COMMUNICATIONS TECHNOLOGY SATELLITE

Dynamics of stepping of the Hermes flexible solar
array
22 p0323 A79-31615

COMMUNITIES

Solid waste utilization in integrated community
energy systems
23 p0490 A79-40415

COMPATIBILITY

Behavior of nonmetallic materials in shale oil
derived jet fuels and in high aromatic and high
sulfur petroleum fuels --- compatibility of
aircraft materials to fuels
[AD-A060322] 21 p0226 A79-15203

COMPENSATION

Optimality criteria in the compensation of the
longitudinal boundary effect in induction MHD
machines
22 p0298 A79-29277

COMPLEX SYSTEMS

Application of computer animation for dynamic
display in complex energy systems --- for human
operator performance improvement
23 p0421 A79-34172

COMPONENT RELIABILITY

Preliminary controller evaluation for the
NERC/CTIU using a mathematical process model ---
of Component Test and Integration Unit in
fluidized bed combustion
21 p0008 A79-10073

Reliability and durability of ceramic regenerators
for gas turbine applications
21 p0050 A79-12823

Reliability analysis of contracts to silicon solar
cells for use in concentrated sunlight
23 p0517 A79-41058

COMPOSITE MATERIALS

Advanced composites - Future space applications
21 p0086 A79-15504

Large filament wound structures for energy and
transportation systems --- turbine blades for
windpowered energy systems
21 p0086 A79-15507

Flywheels for vehicles --- auxiliary power in
electric automobiles
21 p0092 A79-15885

Bibliographic and numeric data bases for fiber
composites and matrix materials
21 p0114 A79-16984

Selective application of materials for products
and energy; Proceedings of the Twenty-third
National Symposium and Exhibition, Anaheim,
Calif., May 2-4, 1978
22 p0239 A79-20801

Suitable optical materials for solar collector
applications
22 p0239 A79-20823

A composite-rim flywheel design
22 p0240 A79-20840

Spectral selectivity of composite materials --- as
solar energy absorbers
23 p0437 A79-36146

Materials for windmill blades
23 p0453 A79-37897

Composite rotor blades for large wind energy
installations
23 p0522 A79-41235

Design, fabrication, and test of a composite
material wind turbine rotor blade
[NASA-CR-135389] 21 p0173 A79-10525

Energy and Technology Review, June 1978 ---
composite materials for flywheels, shale oil
recovery, and seismic safety at nuclear power
plants
[UCRL-52000-78-6] 21 p0215 A79-14168

Satellite Power System (SPS) resource requirements
(critical materials, energy and land)
[NASA-CR-158680] 23 p0548 A79-23492

Outgassing tests of fiber-epoxy composite materials
[SAND-78-7075] 23 p0552 A79-24071

COMPOSITE STRUCTURES

Rotating strength of glass-carbon fiber-reinforced
hybrid composite discs
21 p0165 A79-20273

Composite material flywheel for the
electric-powered passenger vehicle
22 p0240 A79-20842

A status of the 'Alpha-ply' composite flywheel
concept development
22 p0241 A79-20843

Flywheel energy accumulators for road vehicles
22 p0241 A79-20845

Composite material flywheels for energy storage on
electricity supply systems
22 p0241 A79-20852

Current status of composite flywheel development

Solar controls and control modifications - New
century town solar homes, Vernon Hills, IL.
21 p0102 A79-16419

Control strategy for a variable-speed wind energy
conversion system 22 p0303 A79-29800

Control system for solar hot water system
22 p0321 A79-31442

Combined radiant-flux controller for a
high-temperature solar energy system
23 p0433 A79-35382

Measurement and control techniques in geothermal
power plants
[TREE-1312] 22 p0362 N79-20508

CONTROL SIMULATION

Simulation study of the effect of
fuel-conservative approaches on ATC procedures
and terminal area capacity
[SAE PAPER 780523] 21 p0031 A79-10398

A microprocessor based solar controller
21 p0082 A79-14979

Control of wind turbine generators connected to
power systems 21 p0086 A79-15574

Efficient use of wind energy by using static slip
recovery systems - A simulator study
21 p0113 A79-16744

Study of integrated gasification combined cycle
plant interaction and control
[ASME PAPER 79-GT-60] 22 p0306 A79-30530

Study on the application of NASA energy management
techniques for control of a terrestrial solar
water heating system
[AIAA PAPER 79-0977] 23 p0457 A79-38183

CONTROL SURFACES

Fuel conservative subsonic transport --- control
surfaces activated by computers 22 p0337 N79-16874

CONTROL THEORY

Dynamic model of an industrial plant manufacturing
a variety of products 21 p0051 A79-12957

Conference on Decision and Control, and Symposium
on Adaptive Processes, 16th, and Special
Symposium on Fuzzy Set Theory and Applications,
New Orleans, La., December 7-9, 1977,
Proceedings. Volumes 1 & 2 21 p0081 A79-14957

Modeling and simulation. Volume 9 - Proceedings of
the Ninth Annual Pittsburgh Conference,
University of Pittsburgh, Pittsburgh, Pa., April
27, 28, 1978. Part 1 - Energy and power system
modeling - Ecological and biomedical modeling.
Part 2 - Socioeconomic modeling. Part 3 -
Control and identification. Part 4 Methodology
and applications 22 p0263 A79-23776

Optimal control of sun tracking solar concentrators
23 p0526 A79-81831

CONTROLLABILITY

Modelling and control of a fluidized bed gasifier
fusion research device 22 p0332 N79-16345

DESCRIPTION

P.E.R.I.C.L.E.S. - Design of a stationary spherical collector --- solar energy application 21 p0134 A79-17441
 Design fabrication and testing of three meter diameter parabolic dish heliostat system 21 p0135 A79-17447
 Two thermodynamic optima in the design of sensible heat units for energy storage 21 p0150 A79-18091
 Preliminary analysis of advanced ceramic magnetohydrodynamic /MHD/ combustor design concepts 22 p0240 A79-20838
 Analysis and design of a field of heliostats for a solar power plant 22 p0242 A79-21161
 Some flow analyses for Tornado-type wind turbines 22 p0279 A79-26181
 Analysis and design of air heating unglazed flat plate solar collectors 22 p0280 A79-26202
 First-order design variables for concentrating solar collectors 22 p0293 A79-28141
 Fiat Research Center hybrid vehicle prototype [SAE PAPER 790014] 22 p0313 A79-31351
 Electric vehicle battery development [SAE PAPER 790158] 22 p0314 A79-31363
 Design considerations for the energy receiver in a fixed mirror-distributed focus /FMD/ solar energy system 23 p0399 A79-33994
 A novel design of evacuated-concentrating spherical collector 23 p0399 A79-33998
 The solar house --- overview of French designs 23 p0401 A79-34017
 Low cost Darrieus vertical-axis wind turbine design [AIAA PAPER 79-0966] 23 p0456 A79-38174
 Conceptual design of sodium-cooled central receiver solar power plant [AIAA PAPER 79-0994] 23 p0459 A79-38194
 Design problems of the hydraulic network in a linear collector power plant 23 p0464 A79-38591
 Solar central receiver power plants with sodium heat transfer - Design, Exergy flow and economics 23 p0464 A79-38592
 Design analysis of a vertical axis wind turbine 23 p0472 A79-38656
 Materials problems experienced at the Synthane coal-gasification pilot plant 23 p0478 A79-39788
 Post mortem assessment - Coal gasification plant 23 p0480 A79-39909
 Gears for wind power plants 23 p0484 A79-40119
 Solar heating and cooling system design and development [NASA-CR-150803] 21 p0172 N79-10516
 Preliminary design package for Sunair SEC-601 solar collector [NASA-CR-150875] 22 p0341 N79-17332
 A 200-kW wind turbine generator conceptual design study [NASA-TM-79032] 22 p0341 N79-17333
 Evaluation of the ECAS open cycle MHD power plant design [NASA-TM-79012] 22 p0341 N79-17335
 Satellite Power System (SPS) concept definition study (exhibit C) [NASA-CR-161173] 22 p0352 N79-19071
 Solar heating of buildings: Design optimization and economic analysis 22 p0353 N79-19439
 MHD-ETP program. Volume 1: Executive summary [FE-2613-6-VOL-1] 22 p0362 N79-20515
 MHD-ETP program. Volume 2a, parts 1 and 2: Reference design description [FE-2613-6-VOL-2A] 22 p0363 N79-20516
 Engineering test facility conceptual design, part 1 [FE-2614-2-PT-1] 22 p0369 N79-21560
 Engineering test facility conceptual design, part 2 [FE-2614-2-PT-2] 22 p0369 N79-21561
 Description of the possibilities for energy savings during the design and construction of apertures in buildings (cross-section report) [BNFT-FE-T-78-15] 23 p0590 N79-27345

SUBJECT INDEX

DESCRIPTION

Study of the interaction of H₂O and O₂ with the surface of TiO₂ by electron stimulated desorption and Auger and characteristic loss spectroscopies 21 p0037 A79-11793
 Absorption of hydrogen by the intermetallics NdNi₅ and LaNi₄Cu and a correlation of cell volumes and desorption pressures 21 p0038 A79-11804
 Rate of desorption in a solar regenerator 21 p0055 A79-13611
 Kinetics of hydrogen absorption and desorption --- for energy storage 22 p0248 A79-21687
 Laser-induced desorption experiments with technical metal surfaces --- carbon monoxide and hydrogen interaction with Ni 23 p0445 A79-36969
DESULFURIZING
 Coal desulfurization: Chemical and physical methods; Proceedings of the Symposium, New Orleans, La., March 23, 1977 21 p0044 A79-12114
 An overview of coal preparation --- for producing clean fuel through desulfurization 21 p0044 A79-12115
 Desulfurization of coals by high-intensity high-gradient magnetic separation - Conceptual process design and cost estimation 21 p0044 A79-12116
 Applicability of the Meyers process for desulfurization of U.S. coal - A survey of 35 coals --- through chemical leaching 21 p0044 A79-12117
 Coal desulfurization test plant status - July 1977 --- utilizing Meyers leach process 21 p0044 A79-12118
 Coal desulfurization by low-temperature chlorinolysis 21 p0045 A79-12119
 Desulfurization and sulfidation of coal and coal char 21 p0045 A79-12120
 Fluid-bed carbonization/desulfurization of Illinois coal by the Clean Coke Process - PDV studies --- Process Development Unit 21 p0045 A79-12121
 Recent operating experience of the Wellman-Lord FGD process on a coal-fired boiler --- flue gas desulfurization 21 p0065 A79-14120
 The Research-Cottrell/Bahco SO₂ and particulate removal system at Rickenbacker Air Force Base 21 p0065 A79-14122
 Energy requirements of a limestone FGD system --- Flue Gas Desulfurization 21 p0114 A79-16747
 Assessment of current flue gas desulfurization technology 21 p0145 A79-17637
 Operating experience with three 20 MW prototype flue gas desulfurization processes [ASME PAPER 78-JPGC-PWR-12] 21 p0150 A79-18098
 Catalytic hydrodesulfurization and liquefaction of coal - Batch autoclave studies 22 p0282 A79-26465
 Coke formation on hydrodesulfurization catalysts 22 p0283 A79-26470
 The cost of sulfur removal from coal in electric power generation 23 p0419 A79-34157
 Technical and economic factors for evaluating flue gas desulfurization technologies 23 p0424 A79-34458
 Options for treating and disposing of scrubber sludge 23 p0424 A79-34460
 Coal desulfurization --- for reduction of pollution emissions 23 p0533 A79-43200
 Flue gas desulfurization system capabilities for coal-fired steam generators, volume 1. Executive summary [PB-284045/2] 21 p0200 N79-12606
 Coal desulfurization using microwave energy [PB-285880/1] 21 p0216 N79-14243

- Demetallization catalyst tests on heavy residual oils
[PB-285937/9] 21 p0232 N79-15864
- Assessment of coal cleaning technology
[PB-287091/3] 22 p0330 N79-16139
- Catalyst aging tests and the role of catalyst wetting on hydrosulfurization of a coal derived liquid
22 p0352 N79-19169
- Assessment of coal cleaning technology: An evaluation of chemical coal cleaning processes
[PB-289493/9] 22 p0372 N79-21625
- Evaluation of dry sorbents and fabric filtration for PGD (Flue Gas Desulfurization)
[PB-289921/9] 22 p0373 N79-21661
- Rate of desulfurization from liquid iron and iron alloys with hydrogen
[NRC/CNR-TT-1930] 23 p0553 N79-24120
- High-gradient magnetic separation for removal of sulfur from coal
[PB-290945/5] 23 p0569 N79-25469
- Fuel contaminants. Volume 3: Control of coal-related pollutants
[PB-293328/1] 23 p0578 N79-26234
- Evaluation of available MHD seed-regeneration processes on the basis of energy considerations
[ANL/MHD-78-4] 23 p0583 N79-26519
- Disposal of by-products from nonregenerable flue gas desulfurization systems
[PB-293163/2] 23 p0586 N79-26575
- Evaluation of the flash desulfurization process for coal cleaning
[PB-292328/2] 23 p0590 N79-27342
- Coal energy conversion options for Navy bases
[AD-A067463] 23 p0595 N79-27667
- DETECTION**
- Development of sensitized pick coal interface detector system
[NASA-CR-161225] 23 p0556 N79-24417
- DETONATION WAVES**
- Mathematical models of direct initiation of unconfined gas phase detonations --- hazards of LNG/air clouds from spills
[AIAA PAPER 79-0289] 21 p0157 A79-19649
- DEUTERIUM**
- Nuclear characteristics of D-D fusion reactor blankets - Technical data
21 p0162 A79-19826
- High temperature thermodynamics of the solid solutions of hydrogen and deuterium in palladium and in the Pd/0.9/Ag/0.1/ alloy
22 p0249 A79-21689
- DEUTERIUM PLASMA**
- Overview of inertial confinement fusion reactor designs
21 p0018 A79-10149
- Compact experiments for alpha-particle heating --- of confined D-T plasma in tokamak
21 p0078 A79-14786
- Radially resolved measurements of 'q' on the adiabatic toroidal compressor tokamak --- safety factor
21 p0155 A79-18830
- Structure of the current shell in a Z pinch
22 p0245 A79-21434
- Cyclotron-wave spectrum in a plasma with two ion species
22 p0245 A79-21443
- The synergetics of the catalytic D-D-fusion-fission breeder
22 p0252 A79-22236
- Alpha transport and blistering in tokamaks
22 p0253 A79-22243
- Prepulse damage to targets and alignment verification
22 p0258 A79-23027
- Fuel content characterization and pressure retention measurements of DT-filled laser fusion microballoon targets
22 p0258 A79-23034
- Pellet X-ray spectra for laser fusion reactor designs
22 p0291 A79-27878
- Calculation of the Q factor for a two-component tokamak
22 p0324 A79-31763
- Recycling processes in tokamaks
23 p0443 A79-36882
- Measurement of the neutron spectra from beam-heated PLT plasmas
23 p0478 A79-39724
- DEVELOPING NATIONS**
- Prospects for harnessing renewable energy sources in developing countries
21 p0117 A79-17286
- Energy balances as a means for the evaluation of solar energy in developing countries
21 p0118 A79-17290
- Bio-mass energy for rural areas
21 p0126 A79-17373
- Photovoltaic power systems for rural areas of developing countries
22 p0278 A79-26131
- Modern technology for recovering energy and materials from urban wastes - Its applicability in developing countries
22 p0295 A79-28183
- Solar energy in developing countries: An overview and buyers' guide for solar scientists and engineers --- Book
22 p0327 A79-32139
- The role of solar energy in the solution of Turkey's energy predicament
23 p0404 A79-34035
- Fusion energy - The iceberg beneath the tip
23 p0406 A79-34057
- Introducing new technologies for alternative energy sources - The economic, social, and environmental considerations for developing countries
23 p0421 A79-34177
- Renewable energy supplies for developing countries
23 p0422 A79-34178
- Solar electric generator for developing nations
23 p0452 A79-37885
- Commercialisation of solar energy devices in developing countries - Problems and prospects
23 p0477 A79-39105
- Energy needs, uses, and resources in developing countries
[BNL-50784] 21 p0185 N79-11500
- Analytical framework for the assessment of energy resource and technology options for developing countries
[BNL-50800] 21 p0208 N79-13524
- Photovoltaic power systems for rural areas of developing countries
[NASA-TN-79097] 21 p0229 N79-15411
- DIAGRAMS**
- Solar energy diagrams --- combining position and insolation data
22 p0253 A79-22267
- DIELECTRIC PROPERTIES**
- The contribution of plasma dielectric properties to the cyclotron radiation spectrum from a tokamak plasma
22 p0312 A79-31183
- DIESEL ENGINES**
- Dynamic characteristics of a free-piston diesel engine combined with a MHD generator
22 p0258 A79-23137
- Dynamics of a free-piston Diesel- MHD generator
23 p0395 A79-33424
- Heavy duty diesel particulate emission factors
23 p0461 A79-38481
- The emissions and fuel economy of a Detroit diesel 6-71 engine burning a 10-percent water-in-fuel emulsion
[AD-A058550] 21 p0203 N79-13375
- High sulfur fuel effects in a two-cycle high speed army diesel engine
[AD-A059534] 21 p0216 N79-14232
- Air quality assessment of particulate emissions from diesel-powered vehicles
[PB-286172/2] 21 p0223 N79-14641
- Performance characteristics of automotive engines in the United States. Second series, report no. 6: 1976 Nissan diesel 198 CID (3.2 liters), F. I. [PB-286295/1] 21 p0227 N79-15309
- Comparison of fuel-cell and diesel integrated energy systems and a conventional system for a 500-unit apartment
[NASA-TN-79037] 21 p0229 N79-15403
- Proceedings of symposium on water-in-fuel emulsions in combustion --- marine diesels, boilers, and gas turbine engines
[AD-A061503] 22 p0338 N79-17019

- Direct utilization of crude oil as fuel in the US Army four-cycle diesel engine, model LDT-465-1C [AD-A062387] 22 p0357 N79-20279
- Single-cylinder diesel engine tests with unstabilized water-in-fuel emulsions [AD-A062751] 22 p0366 N79-21406
- Cost/benefit analysis of a solar power plant supplemented by diesel generation in comparison with a solely diesel system - optimizing for size and initial investment in an isolated area --- energy technology [P/51/77/21] 23 p0584 N79-26536
- Diesel organic rankine cycle compound engine (Bottoming Cycle) program plan [DOE/CS-0052] 23 p0590 N79-27521
- DIESEL FUELS**
- The development of alternate combustibles for diesel engines 23 p0385 A79-33227
- A literature review-problem definition studies on selected toxic chemicals. Volume 1: Occupational health and safety aspects of diesel fuel and white smoke generated from it [AD-A056018] 21 p0192 N79-11686
- A literature review-problem definition studies on selected toxic chemicals. Volume 8: Environmental aspects of diesel fuel and fog oils SGP number 1 and SGP number 2 and smoke screens generated from them [AD-A056021] 21 p0193 N79-11688
- High sulfur fuel effects in a two-cycle high speed army diesel engine [AD-A059534] 21 p0216 N79-14232
- Fundamental combustion studies of emulsified fuels for diesel applications [PB-287386/7] 22 p0330 N79-16138
- Parametric performance of a turbojet engine combustor using jet A and A diesel fuel [NASA-TM-79089] 22 p0357 N79-20114
- Health effects associated with diesel exhaust emissions, literature review and evaluation [PB-289817/9] 22 p0364 N79-20727
- Dependence of the pour point of diesel fuels on the properties of the initial components [NASA-TM-75424] 22 p0364 N79-21217
- Single-cylinder diesel engine tests with unstabilized water-in-fuel emulsions [AD-A062751] 22 p0366 N79-21406
- Experimental clean combustor program: Diesel no. 2 fuel addendum, phase 3 [NASA-CR-135413] 23 p0576 N79-26221
- DIFFERENTIAL EQUATIONS**
- Heat transfer simulation in underground coal liquefaction 23 p0555 N79-24292
- DIFFUSE RADIATION**
- A theoretical method for the prediction of monthly mean solar radiation parameters 21 p0022 A79-10183
- The relationship between diffuse and total solar radiation in computer simulation of solar energy systems 21 p0119 A79-17304
- Hourly vs daily method of computing insolation on inclined surfaces 22 p0242 A79-21164
- Diffuse solar radiation on a horizontal surface for a clear sky 22 p0242 A79-21167
- Isotropic distribution approximation in solar energy estimations --- diffuse insolation on tilted surface 22 p0262 A79-23753
- Thermodynamics of the conversion of diluted radiation --- solar energy application 22 p0310 A79-30910
- Statistical analysis of solar radiation data in Montreal for solar energy utilization 22 p0322 A79-31452
- The development of a stationary concentrator --- parabolic solar absorber surface effects on energy conversion performance 23 p0464 A79-38586
- DIFFUSERS**
- Experimental demonstration of the Diffuser Augmented Wind Turbine concept 21 p0029 A79-10238
- Fluid dynamics of diffuser-augmented wind turbines 22 p0238 A79-20798
- Diffuser designs for improved wind energy conversion 22 p0279 A79-26182
- Subsonic diffusers for MHD generators 22 p0279 A79-26185
- On supersonic and subsonic diffusers for magnetohydrodynamic generator applications 22 p0279 A79-26186
- Evaluation of the expected diffuser performance for a large MHD generator 23 p0393 A79-33408
- DIFFUSION**
- Response of defects to illumination in silicon solar cells 23 p0521 A79-41084
- DIFFUSION COEFFICIENT**
- Study of diffusion processes in low-temperature thermopiles --- for solar energy conversion 21 p0054 A79-13290
- Effect of grain boundaries in silicon on minority-carrier diffusion length and solar-cell efficiency 22 p0252 A79-21807
- DIFFUSION ELECTRODES**
- Influence of composition on the activity of tungsten carbide gas diffusion hydrogen electrodes 22 p0245 A79-21482
- Influence of the electrolyte content of oxygen carbon gas-diffusion electrodes on their electro-chemical performance in acid solutions 22 p0245 A79-21483
- DIFFUSION FLAMES**
- Influences on exhaust emissions from automotive gas turbines [ASME PAPER 78-GT-85] 22 p0255 A79-22338
- DIFFUSION THEORY**
- Tracer experiments in the field. Example of application for the determination of slide levels for stack discharges at a nuclear research establishment 23 p0551 N79-23539
- DIFFUSIVITY**
- Electrochemical determinations of the chemical potential and diffusivity of sodium in Na/x/TaS₂ at 300 K 21 p0040 A79-11830
- DIGESTING**
- Simple methane digestors 23 p0386 A79-33234
- DIGITAL DATA**
- Application of LANDSAT data and digital image processing --- Ruhr Valley, Germany [E79-10102] 22 p0339 N79-17291
- DIGITAL SIMULATION**
- Dynamic computer simulation of the DOE 10 MW solar thermal pilot plant [AIAA PAPER 78-1752] 21 p0060 A79-13854
- Control of wind turbine generators connected to power systems 21 p0086 A79-15574
- Fast penetration of a magnetic field into a low-density plasma 22 p0244 A79-21432
- Structure of the current shell in a Z pinch 22 p0245 A79-21434
- Non-linear numerical algorithms for studying tearing modes --- in tokamaks 22 p0257 A79-22981
- Digital or analog modelling in the design of hydrostatic vehicular systems 22 p0264 A79-23808
- WATSON - A simulation program for solar-assisted heating systems** 22 p0321 A79-31439
- Solar energy storage - Digital simulation of energy transfer by conduction and radiation in a two-phase medium 23 p0383 A79-32963
- Computer modelling of solar energy collection 23 p0398 A79-33986
- Impurity behaviour in real and simulated tokamak plasmas 23 p0444 A79-36885
- Numerical modeling of impurity effects --- on energy balance in tokamak experiments 23 p0445 A79-36945
- Contribution to solving the energy crisis - Simulating the prospects for low cost energy through silicon solar cells 23 p0475 A79-38877

- A discrete, stochastic simulation model for the analysis and design of solar energy heating systems
23 p0475 A79-38878
- Simulation studies of the basic non-linear effects of wave-energy conversion by an overtopping water-column
23 p0480 A79-39845
- Initial comparison of single cylinder Stirling engine computer model predictions with test results
[NASA-TN-79044]
22 p0337 N79-16721
- DILUTION**
Solar thermal energy storage using heat of dilution - Analysis of heat generation in multistage mixing column
21 p0046 A79-12271
- DIMENSIONAL ANALYSIS**
Dimensioning of energy-production systems - The use of geometric programming --- solar cell array application
23 p0388 A79-33254
- DIODES**
Cooling applications of thermic diode panels [ASME PAPER 78-WA/SOL-10]
21 p0163 A79-19842
Polysilicon MIS solar cells with low work function metals
23 p0510 A79-41010
A modified single diode model for high illumination solar cells for simulation work
23 p0518 A79-41061
Transient shutdown analysis of low-temperature thermal diodes
[NASA-TP-1369]
22 p0346 N79-18287
- DIRECT CURRENT**
Compatibility of direct energy storage devices with ac. processing power system components
21 p0111 A79-16728
- DIRECT POWER GENERATORS**
Electric power from laser fusion - The HYLIFE concept
21 p0030 A79-10249
Design of a direct wind energy converter to heat water by agitation in a closed tank
21 p0067 A79-14290
Solar electricity production
21 p0104 A79-16467
Direct photoelectrochemical conversion and storage of solar energy
21 p0126 A79-17370
Feasibility of MHD-ac induction electric power plant --- using tokamak reactor exhaust plasma
22 p0303 A79-29794
Electro/mechanical aspects of the Mauritius 'passive' type wave energy project
23 p0449 A79-37856
Directly driven generators for wave energy conversion
23 p0449 A79-37858
Mini-BRU/BIPS 1300 watt (sub)e dynamic power conversion system development: Executive summary
[NASA-CR-159440]
21 p0173 N79-10526
Direct firing of coal for power production
23 p0592 N79-27612
- DIRECTIONAL ANTENNAS**
Large active retrodirective arrays for solar power satellites
21 p0107 A79-16604
Solar power satellite rectenna design study: Directional receiving elements and parallel-series combining analysis
[NASA-CR-151866]
22 p0330 N79-16039
- DIRECTIONAL SOLIDIFICATION (CRYSTALS)**
Directional solidification of crack-free silicon ingots by heat exchanger method
23 p0498 A79-40901
- DIRECTIONS**
Directional arrays of windmills
23 p0453 A79-37896
- DISEASES**
Applying NASA remote sensing data to geologically related regional planning problems
[B79-10095]
22 p0339 N79-17289
- DISPLACEMENT**
Variable-displacement spark-ignition engine
[SAND-77-8299]
21 p0172 N79-10435
- DISPLACEMENT MEASUREMENT**
Study of acoustic and microseismic emissions associated with a hydraulic fracture --- geothermal energy utilization
21 p0076 A79-14744
- DISPLAY DEVICES**
Application of computer animation for dynamic display in complex energy systems --- for human operator performance improvement
23 p0421 A79-34172
- DISTILLATION**
Solar distillation in Brasil
23 p0385 A79-33214
Performance study of a solar still in Valencia /Spain/
23 p0471 A79-38653
Enthalpy measurement of coal-derived liquids [FE-2035-12]
23 p0588 N79-27282
- DISTILLATION EQUIPMENT**
The solar still - A new design
23 p0384 A79-33213
Hydrogen isotope distillation for fusion power reactors
23 p0427 A79-34989
Performance study of a solar still in Valencia /Spain/
23 p0471 A79-38653
- DISTRIBUTED PARAMETER SYSTEMS**
A new approach for solar energy systems design by means of the sensitivity theory
23 p0448 A79-37849
- DIURNAL VARIATIONS**
Selection of method for calculating the parameters of wind and solar power station storage facilities
21 p0054 A79-13293
Selective covers for natural cooling devices --- in space
22 p0272 A79-25522
- DIVERTERS**
Magnetic divertors --- in large tokamak plasma confinement experiments
21 p0078 A79-14781

The Pd2Si - /Pd/ - Ni - solder plated
metallization system for silicon solar cells 23 p0506 A79-40979

Evaluation of thick film materials for use as
solar cell contacts 23 p0507 A79-40980

Optimizing solar cell performance by simultaneous
consideration of grid pattern design and
interconnect configuration 23 p0507 A79-40981

Reliability analysis of contracts to silicon solar
cells for use in concentrated sunlight 23 p0517 A79-41058

ELECTRIC CONTROL

Consolidation and local control of power in an MHD
generator 23 p0395 A79-33425

ELECTRIC CORONA

Theory of the striated corona in a theta pinch 22 p0295 A79-28315

ELECTRIC CURRENT

Analysis of electrolyte shunt currents in fuel
cell powerplants 21 p0039 A79-11816

Calculating the photocurrent and maximum
efficiency of film p-CdTe-n-CdS photocells 21 p0166 A79-20354

The economics of electric power generation from
wind energy 22 p0310 A79-30998

Plasma behavior near the neutral line between
parallel currents --- in planar zeta pinch 22 p0324 A79-31754

Scanned light spot evaluation of MTS solar cells
to treat non-uniform peripheral photocurrents 23 p0511 A79-41012

Plasma sheath effects and voltage distributions of
large high-power satellite solar arrays 23 p0552 A79-24024

ELECTRIC DISCHARGES

Response of lead-acid batteries to
chopper-controlled discharge --- for electric
vehicles 21 p0011 A79-10097

'Local' breakdown criterion in highly ionized gas
flow 21 p0049 A79-12683

Environmental interaction implications for large
space systems 23 p0552 A79-24027

ELECTRIC ENERGY STORAGE

Electrochemical engines for power generation and
load-leveling at sites for underground coal
conversion 21 p0005 A79-10051

100MWh zinc-chlorine peak-shaving
battery plants 21 p0011 A79-10096

Calcium/iron sulfide secondary cells 21 p0041 A79-11835

Conductor for LASL 10-MWhr superconducting energy
storage coil 21 p0085 A79-15309

Compatibility of direct energy storage devices
with ac. processing power system components 21 p0111 A79-16728

SUBJECT INDEX

ELECTRICAL PROPERTIES

Advanced wind furnace systems for residential and agricultural heating and electrical supply applications 21 p0028 A79-10237

Thyristor controlled rectifier inverting at unity power factor 21 p0033 A79-10898

Advancements in the design of solar array to battery charge current regulators 21 p0033 A79-10902

Solar electric power supplies - Design and layout 21 p0057 A79-13639

The impact of advanced technology on the future electric energy supply problem 21 p0112 A79-16736

Solar cell modules for terrestrial use 21 p0149 A79-17996

Electrochemical utilization of metal hydrides 22 p0251 A79-21709

Determining the reliability of radioisotope thermoelectric generators /RTGs/ designed for terrestrial and undersea applications 22 p0261 A79-23622

Recent terrestrial and undersea applications of radioisotope thermoelectric generators /RTGs/ 22 p0261 A79-23623

Air Force applications of lightweight superconducting machinery --- in airborne power sources 22 p0290 A79-27666

Off-peak electrical backup experience in the Meadowvale Solar Experiment 22 p0318 A79-31421

Storage of mechanical energy with flywheels - A new design concept for electric trolleybuses 23 p0387 A79-33245

Electromagnetic propulsion alternatives --- in mass drivers [AIAA PAPER 79-1400] 23 p0426 A79-34840

Operating systems for solar electric energy supplies 23 p0466 A79-38606

The regulation of an electricity supply system including wind energy generators 23 p0485 A79-40130

Electrical power distribution subsystem --- electromagnetic environment effects on orbiter and Spacelab payload 23 p0493 A79-40719

Design and fabrication of a photovoltaic power system for the Papago Indian Village of Schuchuli /Gunsight/, Arizona 23 p0521 A79-41089

OAST space power technology program 21 p0169 N79-10123

Comprehensive overview of winter energy data bulletins [PB-282787/1] 21 p0177 N79-10565

Applications of thermal energy storage to process heat and waste heat recovery in the iron and steel industry [NASA-CR-159397] 21 p0183 N79-11473

Energy programs at The Johns Hopkins University Applied Physics Laboratory [PB-283171/7] 21 p0191 N79-11554

Energy programs at The Johns Hopkins University Applied Physics Laboratory [PB-283170/9] 21 p0191 N79-11555

An annotated compilation of the sources of information related to the usage of electricity in non-industrial applications [PB-285260/6] 21 p0212 N79-13552

The 25 kW power module updated baseline system --- for space transportation system payloads [NASA-TM-78212] 21 p0226 N79-15247

Comparison of fuel-cell and diesel integrated energy systems and a conventional system for a 500-unit apartment [NASA-TM-79037] 21 p0229 N79-15403

Power supplies for Arctic radio repeater systems [AD-A061609] 22 p0339 N79-17118

USAF terrestrial energy study. Volume 3, part 1: Summary data display 22 p0342 N79-17341

The 25 kW power module evolution study. Part 3: Conceptual designs for power module evolution. Volume 2: Program plans [NASA-CR-161146] 22 p0345 N79-17890

Electric power from laser fusion: The HYLIFE concept [UCRL-81259-REV-1] 23 p0583 N79-26524

ELECTRIC POWER TRANSMISSION

Market penetration for OTEC 21 p0094 A79-15903

30-MJ superconducting magnetic energy storage /SHES/ unit for stabilizing an electric transmission system 22 p0237 A79-20555

Initial thoughts on the transmission implications of large wave power complexes 23 p0455 A79-37916

Electrical power distribution subsystem --- electromagnetic environment effects on orbiter and Spacelab payload 23 p0493 A79-40719

Optimization of terrestrial photovoltaic power systems 23 p0520 A79-41076

The influence of increasing energy costs on the economic dimensioning of electrical energy distribution equipment 23 p0535 A79-43524

Study of heat engine/flywheel: Hybrid propulsion configuration with electrical transmission system. Phase 2: Design definition [ALO-41/2] 21 p0185 N79-11493

Microwave power transmitting phased array antenna research project [NASA-CR-157843] 21 p0202 N79-13263

Systems definition space based power conversion systems: Executive summary [NASA-CR-150209] 23 p0541 N79-22616

Potential use of small dams to produce power for low-income communities 23 p0575 N79-25535

Assessment of load management on the electric power system --- conferences [CONF-781182-3] 23 p0590 N79-27412

ELECTRIC PROPULSION

Plasma particle trajectories around spacecraft propelled by ion thrusters 23 p0552 N79-24029

ELECTRIC PULSES

Pulse characteristics of sodium sulfur cells for electric vehicle propulsion 21 p0009 A79-10082

Contribution to the theory of the pulsed mode of operation of the thermionic energy converter. II 22 p0246 A79-21542

Theory of the pulsed operation of a thermionic converter. II - Ionization stage 23 p0442 A79-36815

ELECTRICAL ENGINEERING

HIT-DOE program to demonstrate an advanced superconducting generator 22 p0236 A79-20549

ELECTRICAL FAULTS

Mathematical model of interelectrode breakdown in MHD generator 21 p0167 A79-20418

Axial interelectrode breakdown in MHD channels 23 p0392 A79-33401

Preliminary results in the NASA Lewis H2-O2 combustion MHD experiment 23 p0479 A79-39807

Transient response to three-phase faults on a wind turbine generator 21 p0180 N79-11312

ELECTRICAL GROUNDING

Lightning protection for the vertical axis wind turbine [SAND-77-1241] 21 p0221 N79-14567

ELECTRICAL MEASUREMENT

Improvement of direct-current electrical prospecting methods for the geothermal investigation of the Rhine Graben 21 p0075 A79-14734

Detailed characterization of MHD generator operating parameters 23 p0393 A79-33409

ELECTRICAL PROPERTIES

Interface properties and stability of Schottky barriers and MIS solar cells 21 p0123 A79-17342

- Schottky and MIS tunnel diodes based on photovoltaic-quality hydrogenated amorphous silicon prepared by cathodic sputtering - Electrical characterization on the basis of capacitance measurements 23 p0384 A79-32971
- Transient behavior of the fluid and electrical properties in the turbulent boundary layer of an MHD channel 23 p0392 A79-33402

The gasification of ethyl alcohol
23 p0386 A79-33228
Small mills for producing alcohol from sugar cane
23 p0386 A79-33229
Material and energy balances in the production of ethanol from wood
23 p0495 A79-40745
Denaturants for ethanol/gasoline blends
[HCP/M2098-01] 21 p0180 A79-11237
Parameters for legislative consideration of bioconversion technologies
[PB-284742/4] 21 p0194 A79-12250
The production of ethanol from agricultural waste: An economic evaluation
[PB-292552/7] 23 p0577 A79-26233
Material and energy balances in the production of ethanol from wood --- conferences
[CONF-7806139-1] 23 p0589 A79-27338
- ETHYLENE COMPOUNDS**
The anodic oxidation of ethyleneglycol at platinum, gold and Pt/Au-alloys in alkaline solution --- fuel cell electrocatalysis
21 p0037 A79-11795
- EUROPE**
Energy policy of the European Economic Community
22 p0282 A79-26403
Total wind energy over Central Europe and its maximum utilization through optimal degree of development of solar wind conversion plants
23 p0472 A79-38657
In situ coal gasification - New energy source for Europe
23 p0525 A79-41815
Solar energy commercialization for European countries, volume 2
[HCP/CS-4250-VOL-2] 23 p0563 A79-24493
The comparison and coordination of national policies and programs in the energy research and development sector
[EUR-5911] 23 p0594 A79-27653
- EUROPEAN SPACE PROGRAMS**
The utilization of European space techniques for energy production
[IAP PAPER 78-190] 21 p0035 A79-11287
Energy for Europe from space
22 p0273 A79-25605
A review of some critical aspects of satellite power systems
22 p0326 A79-31921
European aspects of Solar Satellite Power systems
22 p0326 A79-31923
Design concept and feasibility study of a flexible deployable, solar panel generator used on a teledetection satellite
[S-1267-CA/81-VOL-1] 23 p0599 A79-27708
- EUTECTICS**
Evaluation of fusion enthalpy of eutectic mixtures of fused salts used for thermal energy storage
23 p0383 A79-32961
Study on room heating utilizing eutectic salt mixture
23 p0470 A79-38638
Eutectic and cellular solar cells
23 p0502 A79-40928
- EVAPORATION**
Drop formation, evaporation modelling and environmental assessment of JP-4 fuel jettisoned from aircraft
[AIAA PAPER 79-0186] 21 p0157 A79-19585
- EVAPORATION RATE**
Vaporization of drops of a melt of potassium carbonate in a medium of combustion products
21 p0167 A79-20411
- EVAPORATIVE COOLING**
The ClearView Solar Collector system and associated one and two stage evaporative cooling - Interim results
[AIAA PAPER 78-1759] 21 p0061 A79-13860
Soil cooling for geothermal electric power plants in the Western United States - The Raft River experiment
22 p0266 A79-24240
- EVAPORATORS**
Heat exchangers for Ocean Thermal Energy Conversion plants
21 p0142 A79-17506
Thermal performance of integrated solar collector evaporator heat pump
[AIAA PAPER 79-0976] 23 p0457 A79-38182
Heat transfer of absorbing evaporator in CDE engine system --- Concentration Difference Energy system working on enriched aqueous inorganic salt solution
23 p0531 A79-42900
- EXCHANGERS**
Energy exchanger technology applied to laser heated engines
21 p0110 A79-16631
- EXCLUSION**
Findings and views concerning the exemption of kerojet fuels from the mandatory petroleum allocation and price regulations
[DOE/ERA-0023] 23 p0600 A79-28058
- EXHAUST GASES**
Development of a compact gas turbine combustor to give extended life and acceptable exhaust emissions
[ASME PAPER 78-GT-146] 21 p0033 A79-10799
Simultaneous nitrogen oxides and sulfur dioxide removal by absorption-reduction scrubbing
21 p0066 A79-14125
Source emissions factors for refuse derived fuels

FAILURE ANALYSIS

SUBJECT INDEX

FAILURE ANALYSIS

- Evaluation of methods for analyzing silver-zinc cells
 - 21 p0010 A79-10085
- Optics in adverse environments; Proceedings of the Seminar, San Diego, Calif., August 25, 26, 1977
 - 21 p0044 A79-12037
- A status of the 'Alpha-ply' composite flywheel concept development
 - 22 p0241 A79-20843
- Failure analysis in coal conversion systems --- pilot plant for liquefaction
 - 22 p0266 A79-24137
- Materials problems experienced at the Synthane coal-gasification pilot plant
 - 23 p0478 A79-39788

FAILURE MODES

- User experience with on-road electric vehicles in the U.S.A. and Canada
 - 21 p0009 A79-10080
- Performance degradation mechanisms and modes in terrestrial photovoltaic arrays and technology for their diagnosis
 - 23 p0512 A79-41019
- Some failure modes and analysis techniques for terrestrial solar cell modules
 - 23 p0512 A79-41020

PAR INFRARED RADIATION

- A study of waveguides for far infrared interferometers measuring electron density of tokamak plasmas
 - 23 p0526 A79-41842

PAR ULTRAVIOLET RADIATION

- Application of electron beams in space for energy storage and optical beam generation
 - 21 p0108 A79-16606

PARADAY EFFECT

- Comparison of results of calculation of flow in an MHD generator with experimental data obtained on the U-25 device
 - 22 p0306 A79-30392

PARCELANDS

- Selling solar energy as a cash crop
 - 21 p0049 A79-12725

FAST NUCLEAR REACTORS

- The fast power cycle for fusion reactors
 - 21 p0018 A79-10152

FATIGUE TESTS

- Fatigue impact on Mod-1 wind turbine design
 - 22 p0240 A79-20827
- Some fatigue characteristics of nickel battery plaque [AD-A060370]
 - 21 p0230 N79-15415

FEASIBILITY ANALYSIS

- Evolution of satellite power system /SPS/ concepts
 - 21 p0002 A79-10023
- High temperature thermal energy storage in moving sand
 - 21 p0012 A79-10103
- Status of free-piston Stirling engine/linear alternator power conversion system development
 - 21 p0025 A79-10212
- Engineering analysis of in situ liquefaction of coal
 - 21 p0032 A79-10521
- Feasibility of rocket propellant production on Mars
 - 21 p0047 A79-12324
- A standard procedure of economic evaluation for energy-producing and pollution-abatement operations
 - 21 p0064 A79-14109
- Solar energy for residential housing
 - 21 p0090 A79-15857
- Solar power satellites revisited
 - 21 p0093 A79-15898
- Impacts of the National Energy Plan on solar economics [CONF-771203-6]
 - 21 p0118 A79-17294
- Investigation on the feasibility of using a two-phase thermosyphon for solar storage, space heating and cooking
 - 21 p0121 A79-17330
- The feasibility of constructing a photoelectric unit utilizing effluent heat
 - 21 p0125 A79-17358
- Technical and economic feasibility of making fertilizer from wind energy, water, and air
 - 21 p0142 A79-17512
- Solar power satellites - An AIAA position paper
 - 21 p0148 A79-17872

Model systems in photoelectrochemical energy conversion

- 21 p0149 A79-18021
- Energy storage using the reversible oxidation of barium oxide
 - 22 p0242 A79-21169
- Space reflector technology and its system implications [AIAA PAPER 79-0545]
 - 22 p0273 A79-25852
- Economic feasibility of solar water and space heating
 - 22 p0292 A79-27899
- Solar absorption cooling feasibility
 - 22 p0295 A79-28358
- Fusion power demonstration study at ORNL
 - 23 p0407 A79-34059
- An evaluation of integrated coal gasification/water-splitting processes
 - 23 p0411 A79-34094
- Medium-power /100 to 1000 kWe/ heat and electricity production from solar sources
 - 23 p0435 A79-35484
- Satellite solar power stations - Current status and prospects
 - 23 p0448 A79-37844
- Wind energy conversion and hydrogen production - A feasibility study for South Africa
 - 23 p0452 A79-37892
- A preliminary feasibility study into the use of solar energy to provide year-round heating for a factory unit
 - 23 p0471 A79-38647
- A 1982 low cost photovoltaic module factory study
 - 23 p0501 A79-40921
- Potential for stand-alone photovoltaic on-site total-energy residential systems
 - 23 p0516 A79-41050
- Feasibility study of transporting offshore OTEC-produced energy to shore by thermal media. Project 8980 [DSE/2426-19]
 - 21 p0174 N79-10535
- Preliminary summary of the ETF conceptual studies [NASA-TN-78999]
 - 21 p0183 N79-11478
- Evaluation of urethane for feasibility of use in wind turbine blade design [NASA-CR-159530]
 - 22 p0360 N79-20497
- Feasibility study of solar dome encapsulation of photovoltaic arrays [NASA-CR-158368]
 - 22 p0367 N79-21545
- Evaluation of the technical feasibility and effective cost of various wafer thicknesses for the manufacture of solar cells [NASA-CR-158588]
 - 23 p0549 N79-23507
- Elements for technological and economic modeling of tower-type solar power plants [P/51/76/17]
 - 23 p0584 N79-26535
- FEATHERING
 - Tilting wing overspeed control for vertical axis wind turbines [AIAA PAPER 79-0967]
 - 23 p0456 A79-38175
- FEDERAL BUDGETS
 - Financial/management scenarios for a satellite power system program [AAS PAPER 78-144]
 - 22 p0243 A79-21259
 - The NASA budget - Fiscal years 1979-80
 - 23 p0535 A79-43448
 - Statement of Doctor Robert A. Prosch, Administrator, National Aeronautics and Space Administration
 - 21 p0224 N79-15111
 - Authorizing appropriations to the National Aeronautics and Space Administration [H-REPT-96-52]
 - 22 p0364 N79-20928
 - Energy: Fiscal year 1980 budget request [GPO-42-886]
 - 23 p0582 N79-26508
- FEED SYSTEMS
 - LSA large area silicon sheet task continuous liquid feed Czochralski growth [NASA-CR-158366]
 - 22 p0357 N79-20281
- FEEDBACK CONTROL
 - On-line control of a large horizontal axis wind energy conversion system and its performance in a turbulent wind environment
 - 21 p0028 A79-10236
 - Dynamics and feedback control of ISX tokamak
 - 21 p0107 A79-16559
 - Optimizing solar energy systems using continuous flow control
 - 21 p0138 A79-17477

- A digital control system for superconducting magnet
22 p0268 A79-24508
- A general design method for closed-loop solar
energy systems
22 p0295 A79-28359
- Control strategy for a variable-speed wind energy
conversion system
22 p0303 A79-29800
- Feedback control of a class of plasma instabilities
23 p0422 A79-34253
- FERMENTATION**
- Petroleum plantations --- hydrocarbon fuels from
artificial photosynthesis and plants
21 p0095 A79-15910
- Small mills for producing alcohol from sugar cane
23 p0386 A79-33229
- Sweet sorghum - A renewable source for alcohol
production
23 p0389 A79-33263
- FERMI SURFACES**
- The change in the interface-state Fermi level of
MIS solar cells when going from dark to
illuminated conditions
23 p0456 A79-38101
- FERTILIZERS**
- Technical and economic feasibility of making
fertilizer from wind energy, water, and air
21 p0142 A79-17512
- Solar energy conversion in marine biological systems
23 p0402 A79-34021
- FIBER COMPOSITES**
- Bibliographic and numeric data bases for fiber
composites and matrix materials
21 p0114 A79-16984
- Rotating strength of glass-carbon fiber-reinforced
hybrid composite discs
21 p0165 A79-20273
- Current status of composite flywheel development
22 p0241 A79-20853
- FIBERS**
- Dual membrane hollow fiber fuel cell and method of
operating same
[NASA-CASE-WPO-13732-1] 21 p0172 A79-10513
- FIELD INTENSITY METERS**
- A time domain survey of the Los Alamos Region, New
Mexico
[LA-7657-MS] 22 p0365 A79-21248
- FIGURE OF MERIT**
- Modified silicon-germanium alloys with improved
performance --- thermoelectric material
21 p0027 A79-10225
- FILAMENT WINDING**
- Large filament wound structures for energy and
transportation systems --- turbine blades for
windpowered energy systems
21 p0086 A79-15507
- Wind-turbine-generator rotor-blade concepts with
low-cost potential
22 p0240 A79-20828
- FILE BOILING**
- Use of fluidized media in thermal power systems
23 p0436 A79-35525
- FILE COOLING**
- Slag transport models for radiant heater of an MHD
system
[ASME PAPER 78-WA/HT-21] 21 p0161 A79-19808
- Water-cooled gas turbine technology development -
Fuels flexibility
[ASME PAPER 79-GT-72] 22 p0307 A79-30536
- FILM THICKNESS**
- Thin-film solar cells produced by physical vapour
deposition
23 p0441 A79-36787
- FINANCE**
- Pennies a day - Financing early deployment of
photovoltaic utility applications through a user
subsidy
[AIAA PAPER 78-1767] 21 p0061 A79-13866
- Elements of financial risk - Identification of
major elements affecting financial risk in the
financing of solid waste resource recovery
projects
23 p0490 A79-40408
- Coal loan guarantee program (PL 94-163)
[DOE/EIS-0004] 21 p0213 A79-13574
- FINANCIAL MANAGEMENT**
- Risk control in the development of energy processes
--- environment, worker and capital
considerations in coal gasification
21 p0085 A79-15372
- Costs and impacts of financial incentives for
solar energy systems
21 p0119 A79-17296
- Financial/management scenarios for a satellite
power system program
[AAS PAPER 78-144] 22 p0243 A79-21259
- Subsidies for a formulation of a plan of action
for alternative energy sources and forms
23 p0388 A79-33258
- The crucial role of financial institutions in
solar heating installations
23 p0403 A79-34031
- Financing alternatives for space industrialization
[AIAA PAPER 791389] 23 p0426 A79-34836
- Capital investment for transition to new energy
supply systems
23 p0480 A79-39993
- The capital stake in the transition to new energy
systems. II
23 p0535 A79-43522
- FINITE DIFFERENCE THEORY**
- Helioostat survivability and structural stability
for wind loading
23 p0400 A79-34001
- FINITE ELEMENT METHOD**
- Three-dimensional effects of electrode
configuration on diagonal MHD generator
performance
22 p0283 A79-26523
- FINNED BODIES**
- Optimal profile of solar energy collectors
21 p0130 A79-17408
- Optimal distribution of heat conducting material
in the finned pipe solar energy collector
22 p0242 A79-21163
- Transient analysis and optimization of an extended
surface thermal storage unit which utilizes a
phase change material
23 p0400 A79-34006
- FINS**
- Radiant exchange for a fin and tube solar collector
22 p0271 A79-25066
- FIRE EXTINGUISHERS**
- Further studies of fuels from alternate sources:
Fire extinguishment experiments with JP-5 jet
turbine fuel derived from shale
[AD-A058586] 21 p0201 A79-13182
- FISHERIES**
- Reservoir ecosystems and western coal development
in the upper Missouri River Basin
[PB-287363/6] 22 p0339 A79-17309
- FISHES**
- Environmental assessment of the Alaskan
Continental Shelf. Volume 2: Biological studies
[PB-289155/4] 22 p0344 A79-17367
- A biologist's manual for the evaluation of impacts
of coal-fired power plants on fish, wildlife and
their habitats
[PB-291330/9] 22 p0373 A79-21679
- FISSION**
- Energy for the long run - Fission or fusion
22 p0256 A79-22760
- FISSIONABLE MATERIALS**
- Integrated safeguards information System (ISIS),
executive summary --- nuclear power plant and
fissionable materials security
[PB-286869/3] 21 p0223 A79-14934
- FLAME PROPAGATION**
- The effect of hydrogen addition on ignition delays
and flame propagation in spark ignition engines
23 p0461 A79-38387
- Use of high-frequency electromagnetic waves for
mapping an in situ coal gasification burn front
23 p0486 A79-40251
- FLAME STABILITY**
- Ignition/stabilization/atomization - Alternative
fuels in gas turbine combustors
21 p0052 A79-12982
- FLAMES**
- Flame emissivities - Alternative fuels
21 p0052 A79-12984
- An investigation of the formation of oxides of
nitrogen in a pulverised coal flame
23 p0474 A79-38865

FLASH LAMPS

Sinner-enhanced flashlamp-pumped dye laser
23 p0384 A79-32981

FLASHING (VAPORIZING)

MHI's recent achievements in the field of
geothermal power generation
23 p0381 A79-32591

An analytical expression in terms of temperature
only for optimising the flash cycle for
geothermal power plants
23 p0487 A79-40369

FLAT PLATES

Jet impingement solar air heater
[AIAA PAPER 78-1760]
21 p0061 A79-13861
Solar energy and the flat plate collector - An
annotated bibliography
21 p0090 A79-15858

A graphical approach to the efficiency of
flat-plate collectors
21 p0102 A79-16422

Solar radiation studies for utilization of
flat-plate collectors in an equatorial region
21 p0119 A79-17311

On the use of grating or mesh selective filters to
increase the efficiency of flat plate solar
collectors
21 p0127 A79-17380

Optimum collection geometries for copper tube -
copper sheet flat plate collectors
21 p0127 A79-17387

Flat plate collector dynamic evaluation
21 p0128 A79-17390

A parametric investigation on flat-plate solar
collectors
21 p0128 A79-17391

A comparison among various flat plate collectors
with honeycomb structures
21 p0128 A79-17392

Comparative outdoor measurements on flat-plate
solar collectors in a metropolitan area in
Western Germany
21 p0128 A79-17394

Performance of flat plate solar collector with
fluid undergoing phase change
21 p0129 A79-17397

Effect of dust on flat plate collectors
21 p0129 A79-17399

Convective effects in 'slat collectors'
21 p0129 A79-17400

Simulation study of natural convection heat
transfer in inclined air layers with application
to solar energy collection
21 p0129 A79-17401

Some aspects towards the performance evaluation
and ensuing design components of solar collector
systems
21 p0130 A79-17404

Comparative performance testing of flat-plate
solar water heaters
21 p0130 A79-17405

Thermal performance testing of flat-plate solar
collectors
21 p0130 A79-17407

A channelled solar flat-plate booster ---
reflector-absorber system for optimum collector
insolation
21 p0131 A79-17413

Design and optimization of a flat plate collector
for cooling application
21 p0132 A79-17419

Anticonvective antiradiative systems --- for solar
collectors
21 p0132 A79-17420

Honeycomb type flat plate collectors - Experiments
leading to drinking straw --- heat retention
material for solar steam generation
21 p0132 A79-17424

Flat plate collector - Experimental studies and
design data for India
21 p0132 A79-17425

Optimum tilt for the flat plate collector
21 p0132 A79-17426

Evacuated solar flat-plate collectors for economic
applications
21 p0133 A79-17435

Theoretical and experimental yields of a solar
heater with flat plate collectors
21 p0134 A79-17437

Comparative performance of tracking type and
non-tracking type solar collectors
21 p0136 A79-17454

Heat transfer analysis of flat plate type domestic
solar water heater
21 p0140 A79-17489

Calculation of flat-plate collector utilizability
21 p0149 A79-18020

A wave power machine using free floating vertical
plates
21 p0151 A79-18104

Some aspects of the transient response of a
flat-plate solar energy collector
21 p0153 A79-18466

Effect of physical properties of a flat plate
solar collector cover on efficiency calculations
- Simplifying hypotheses
21 p0164 A79-19949

Comparison of transient heat transfer models for
flat plate collectors
22 p0242 A79-21168

Experiments with a flat plate solar water heating
system in thermosyphonic flow
22 p0262 A79-23755

Analysis and design of air heating unglazed flat
plate solar collectors
22 p0280 A79-26202

Heat loss characteristics of an evacuated
plate-in-tube collector
22 p0285 A79-26818

Results and analysis of a round robin test program
for liquid-heating flat-plate solar collectors
22 p0295 A79-28356

Ranking and evaluation of flat-plate collectors -
Two new approaches --- for seasonal storage
solar-heating systems
22 p0316 A79-31402

Performance analysis of a flat-plate solar
collector using 'forge-fin' tubes
22 p0316 A79-31404

Dimensional relations for free convective heat
transfer in flat-plate collectors --- solar
collector heat loss
22 p0316 A79-31406

Thermal performance evaluation of a flat-plate
cylindrical parabolic concentrator and a
flat-plate collector
22 p0317 A79-31408

The honeycomb heat trap - Its application in flat
plate solar collectors
22 p0322 A79-31447

System data on flat-plate collectors and its
optimization
23 p0385 A79-33217

Accuracy of empirical relations for flat plate
collector performance prediction
23 p0398 A79-33987

Stability of gas in the gap of inclined flat plate
solar collectors - Effects of convective
boundary condition and radiation
23 p0398 A79-33990

Test results of a moderately focusing flat-plate
solar collector
23 p0399 A79-33995

Environmental testing of flat plate solar cell
modules
23 p0428 A79-35039

An oil company expresses interest in solar energy
23 p0434 A79-35478

The significance of longwave radiation in flat
plate solar collector testing
23 p0448 A79-37847

Transient behaviour of solar flat plate collectors
23 p0467 A79-38612

Investigations of glass collectors with radiation
absorbing heat carrier
23 p0470 A79-38644

A reflecting radiation trap for producing higher
temperatures in flat-plate solar collectors
23 p0530 A79-42895

An efficient optical window for flat-plate solar
energy collectors
23 p0536 A79-43591

Analytical methods for evaluating two-dimensional
effects in flat-plate solar collectors
21 p0181 A79-11462

Methods for reducing heat losses from flat plate
solar collectors, phase 2
[COO-2597-4]
21 p0188 A79-11533

- Provisional flat plate solar collector testing procedures
[PB-283721/9] 21 p0198 N79-12571
- Flat plate solar collector design and performance. Citations from the NTIS data base
[NTIS/PS-78/0840/5] 21 p0212 N79-13551
- Proposal for a representation of the quasisteady-state performance of flat-plate collectors

SUBJECT INDEX

GEOTHERMAL RESOURCES

Mining earth's heat - Hot dry rock geothermal energy
22 p0258 A79-23280

East Mesa geothermal test site
22 p0259 A79-23458

Hot dry rock - A new potential for energy
22 p0265 A79-23832

The geothermal power station at Ahuachapan, El Salvador
22 p0266 A79-24239

Soil cooling for geothermal electric power plants in the Western United States - The Raft River experiment
22 p0266 A79-24240

Thermal conductivity of crystalline rocks associated with energy extraction for hot dry rock geothermal systems
22 p0304 A79-30123

NHI's recent achievements in the field of geothermal power generation
23 p0381 A79-32591

Alternative energy sources; Proceedings of the Miami International Conference, Miami Beach, Fla., December 5-7, 1977. Volume 6 - Geothermal energy and hydropower
23 p0408 A79-34067

Harnessing geothermal energy in Rotorua, New Zealand
23 p0408 A79-34068

Geothermal systems in the Hauraki Rift zone /New Zealand/ - An example for geothermal systems over an inferred upper mantle swell
23 p0408 A79-34069

The Puchuldiza geothermal field --- hot springs in Chilean Andes mountains
23 p0408 A79-34070

Geothermal energy coupled with solar energy is the future energy in Saudi Arabia
23 p0408 A79-34071

Pilot facility for the experimental study of binary-cycle conversion systems - Thermogravimetric loop --- for low temperature geothermal sources
23 p0408 A79-34074

The optimization of alternative energy cycles using program GEOTHM
23 p0409 A79-34075

Thermal fracturing patterns and effects of an imitation hot dry rock by impinging of water jets --- application to geothermal sources
23 p0409 A79-34076

Heat transfer consideration in utilizing solar and geothermal energy
23 p0409 A79-34080

A retrofitted geothermal heating system
23 p0425 A79-34602

The problem of fouling in the utilisation of geothermal energy
23 p0449 A79-37853

Thermodynamic considerations for the energy conversion process in geothermal power plants
23 p0476 A79-38947

Utilizing geothermal resources below 150 C /300 F/
23 p0486 A79-40196

Electrical production from moderate temperature geothermal brines
23 p0486 A79-40197

An analytical expression in terms of temperature only for optimising the flash cycle for geothermal power plants
23 p0487 A79-40369

Exploration and exploitation techniques for geothermal resources
23 p0525 A79-41819

The influence of rough terrain on pollutant dispersion and transport from a geothermal power complex
23 p0534 A79-43372

The Geysers geothermal area emissions and aerometric data base and air quality analysis
23 p0534 A79-43373

Geochemical and geophysical evidence on the geothermal potential of Caledonian granites in Britain
23 p0536 A79-43645

Hot dry rock energy project
[LA-UR-77-2744] 21 p0175 A79-10540

Pollution control guidance for geothermal energy development
[PB-282546/1] 21 p0178 A79-10604

Energy programs at The Johns Hopkins University Applied Physics Laboratory
[PB-283170/9] 21 p0191 A79-11555

Non-electric applications of geothermal energy in six Alaskan towns
[IDO-1622-4] 21 p0208 A79-13523

OTEC thermal resource report for Central Gulf of Mexico
[TID-27951] 21 p0209 A79-13533

Comparative cost analyses: Total flow vs other power conversion systems for the Salton Sea Geothermal Resource
[UCRL-52589] 22 p0342 A79-17337

Impact prediction manual for geothermal development
[PB-288128/2] 22 p0349 A79-18462

Geothermal resources for aquaculture
[PB-290345/8] 22 p0356 A79-19563

Measurement and control techniques in geothermal power plants
[TREE-1312] 22 p0362 A79-20508

Demonstration of a rotary separator for two-phase brine and steam flows
[TID-28519] 22 p0365 A79-21309

Digest of equipment for converting solar, wind, and geothermal energy into electric power for USN application ashore
[AD-A066221] 23 p0561 A79-24475

Geothermal heating with heat pumps
23 p0584 A79-26531

Exploration of volcanic geothermal energy resources based on rheological techniques
[DOE/ET/28453-3] 23 p0596 A79-27676

GEOTHERMAL RESOURCES

Optimum design conditions for a power plant at a vapor dominated geothermal resource, Pacific Gas and Electric's The Geysers Power Plant Unit 16
21 p0014 A79-10121

A thermodynamic study of heating with geothermal energy
[ASKE PAPER 77-WA/ENER-1] 21 p0030 A79-10253

Potential and technical utilization of renewable energy sources
21 p0058 A79-13655

Projecting energy resource utilization - The geothermal case
21 p0068 A79-14321

Seminar on Geothermal Energy, 1st, Brussels, Belgium, December 6-8, 1977, Proceedings. Volumes 1 & 2
21 p0075 A79-14726

Shallow magmatic reservoirs as heat source of geothermal systems - Preliminary interpretation of data available for the Neapolitan active volcanic areas
21 p0075 A79-14727

Magnetotelluric and geoelectric measurements for geothermal exploration in the Phlegraean Fields /preliminary results/
21 p0075 A79-14732

Improvement of direct-current electrical prospecting methods for the geothermal investigation of the Rhine Graben
21 p0075 A79-14734

Study of the applicability of the geochemistry of gases in geothermal prospection
21 p0075 A79-14736

Suggestions for a geochemical prospecting of geothermal systems - A first survey of the Italian thermal springs
21 p0075 A79-14737

Investigation of the optimal use of geothermal waters for the heating of several types of dwelling in various European climates
21 p0075 A79-14739

Hot dry rock - A new geothermal energy source

Hail risk model for solar collectors
21 p0098 A79-16103
- Simulated hail impact testing of photovoltaic solar panels
21 p0098 A79-16116

HALIDES

- A study of positive electrode materials for batteries operating in a halide-aluminate medium 22 p0245 A79-21480

HALL EFFECT

- The ion fly-wheel effect on the electro-thermal instability in non-equilibrium MHD Hall disc generators 21 p0046 A79-12270
- Effect of finite boundary layer on the ionization instability in non-equilibrium MHD generators 21 p0153 A79-18469
- The electric conductivity of a plasma of combustion products of hydrocarbon fuels with alkali impurity 21 p0167 A79-20415
- Investigation of the Hall effect in a discharge with a rotational electric field 22 p0246 A79-21532
- Axial interelectrode breakdown in MHD channels 23 p0392 A79-33401
- Hall effect in an induction discharge 23 p0442 A79-36806

HALL GENERATORS

- Preliminary results in the NASA Lewis H2-O2 combustion MHD experiment 23 p0479 A79-39807

HALLEY'S COMET

- Ultralow-mass solar-array designs for Halley's comet rendezvous mission 21 p0020 A79-10169

HALOGENS

- Thermodynamic and kinetic considerations on zinc-halogen batteries 21 p0040 A79-11822
- Hydrogen halogen energy storage system [BNL-25212] 23 p0563 A79-24492

HANDBOOKS

- Engineering handbook on the atmospheric environmental guidelines for use in wind turbine generator development [NASA-TP-1359] 21 p0223 A79-14679

HARDWARE UTILIZATION LISTS

- Solar energy in developing countries: An overview and buyers' guide for solar scientists and engineers --- Book 22 p0327 A79-32139

HARMONIC GENERATIONS

- Generation of the new coherent radiation by harmonic conversion and nonlinear mixing for certain applications --- optical interactions 21 p0111 A79-16639

HARMONIC OSCILLATION

- Prediction of stresses and natural frequencies for high speed wind turbine blades [AIAA PAPER 79-0970] 23 p0456 A79-38177

HARMONIC RADIATION

- Temporally and spatially resolved harmonic emission from spherical laser fusion targets 23 p0480 A79-39940

HAWAII

- Prospecting for meteorological energy in Hawaii 23 p0536 A79-43615
- Oahu wind power survey [PB-287361/0] 22 p0335 A79-16382

HEALTH PHYSICS

- Status of bioscreening of emissions and effluents from energy technologies 22 p0346 A79-18353

HEAT

- Selection and development of small solar thermal power applications [AIAA PAPER 79-1005] 23 p0459 A79-38198

HELIUM

Energy, helium, and the future --- U.S. He demand
projection and conservation program

23 p0422 A79-34181

Some heat transfer and hydrodynamic problems
associated with superconducting cables (SPTL)
[NASA-TM-79023]

21 p0226 N79-15267

HELIUM-NEON LASERS

Verification of wedge concentration using a helium
neon laser --- solar collector design

21 p0098 A79-16104

HEMISPHERES

A novel design of evacuated-concentrating
spherical collector

23 p0399 A79-33998

HETEROJUNCTION DEVICES

Recent progress in thin film polycrystalline solar
cells based on cadmium sulfide

21 p0042 A79-11966

Photovoltaic effects in II-VI heterojunctions

21 p0042 A79-11967

High efficiency solar cells based on indium
phosphide

21 p0042 A79-11968

The photovoltaic effect in CdS/Cu₂S solar cells

21 p0091 A79-15871

Sprayed CdS thin films for CdS/Cu₂S heterojunction
solar cells

21 p0123 A79-17346

A high-efficiency GaAlAs double-heterostructure
photovoltaic detector --- with antireflection
coating

21 p0154 A79-18489

Photoelectric properties of pCdTe-ncdS film
heterojunctions

21 p0166 A79-20347

Calculating the photocurrent and maximum
efficiency of film p-CdTe-n-CdS photocells

21 p0166 A79-20354

High-efficiency AlGaAs/GaAs concentrator solar cells

22 p0261 A79-23710

Angle-of-incidence effects in
electron-beam-deposited SnO₂/Si solar cells

22 p0272 A79-25069

Series resistance effects in /GaAl/As/GaAs
concentrator solar cells

22 p0273 A79-25745

Ga/1-x/Al/x/As-GaAs photovoltaic cells with
multilayer structure --- heterostructure solar
cell fabrication

22 p0305 A79-30258

Heterojunction phenomena and interfacial defects
in photovoltaic converters

23 p0438 A79-36150

Order-disorder transformations and the nature of
the copper-sulphide layer in Cu/x/S/CdS solar
cells

23 p0442 A79-36789

p-InP/n-CdS heterojunction solar cells

23 p0442 A79-36791

The properties of homoepitaxial InP films prepared
by the MO-CVD process for the fabrication of
heterojunction solar cells

23 p0499 A79-40907

Cuprous oxide photovoltaic cells

23 p0499 A79-40908

The performance of copper-ternary based thin-film
solar cells

23 p0500 A79-40910

Investigation of thin film cadmium sulfide/mixed
copper ternary heterojunction photovoltaic cells

23 p0500 A79-40911

Recent investigations of metal oxide/CdTe
heterojunction solar cells

23 p0502 A79-40926

Achievement of 9.15% efficiency in thin film
CdS/Cu₂S solar cells

23 p0503 A79-40949

Characteristics of Cu/x/S/CdS cell on sprayed thin
CdS films

23 p0505 A79-40963

Barrier heights and interfacial effects in SnO₂/Si
solar cells

23 p0505 A79-40965

Indium-tin oxide/indium phosphide and indium-tin
oxide/gallium arsenide solar cells

23 p0505 A79-40966

The photovoltaic effect in interfacial layer
heterojunctions or
semiconductor-insulator-semiconductor diodes -
Indium-tin-oxide on silicon, gallium arsenide
and indium phosphide

23 p0505 A79-40967

Photovoltaic properties of In₂O₃/semiconductor
heterojunction solar cells

23 p0505 A79-40968

Fabrication and characterization of ITO/CuInSe₂
photovoltaic heterojunctions --- Indium Tin Oxide

23 p0505 A79-40969

Experimental and theoretical study of silicon MOS
solar cells with different barrier metals

23 p0507 A79-40985

Investigation of potentially high efficiency
photovoltaic cells consisting of two
heterojunctions on a common wide band gap
semiconductor base

23 p0513 A79-41031

Zn/x/Cd/1-x/S/Cu₂S heterojunction solar cells. I -
Fabrication and performance

23 p0528 A79-42171

Material growth and characterization directed
toward improving III-V heterojunction solar cells
[NASA-CR-158476]

22 p0367 N79-21543

HEXAGONAL CELLS

Modification of hydriding properties of AB₅ type
hexagonal alloys through manganese substitution

23 p0415 A79-34124

HEXAGONS

Comparison of the solar concentrating properties
of truncated hexagonal, pyramidal and circular
cones

21 p0043 A79-11974

HIGH ALTITUDE

NACA research on hydrogen for high altitude aircraft

22 p0338 N79-16999

New initiatives in high altitude aircraft

22 p0338 N79-17000

Exhaust emissions and fuel economy from
automobiles using alcohol/gasoline blends under
high-altitude conditions
[PB-290612/1]

23 p0555 N79-24191

HIGH ASPECT RATIO

Characterization of electron and ion current flow
in very large aspect-ratio terawatt diodes
employing heated and unheated anodes

21 p0154 A79-18480

HIGH CURRENT

Superconducting magnets --- for MHD applications

21 p0105 A79-16485

HIGH ENERGY ELECTRONS

Application of electron beams in space for energy
storage and optical beam generation

21 p0108 A79-16606

Electrons of high perpendicular energy in the
low-density regime of tokamaks

22 p0270 A79-24852

Radiation energy conversion in space

22 p0284 A79-26595

On the motion of runaway electrons in momentum space
--- analysis for multi-component plasma in
tokamaks

22 p0291 A79-27880

Prospects of generating power with
particle-beam-drive inertial confinement fusion

23 p0407 A79-34063

HIGH ENERGY FUELS

High energy MHD fuels development program
[AD-A060156]

21 p0216 N79-14239

HIGH FIELD MAGNETS

Energy sources and conventional magnets --- for
tokamak experiment Power Reactor toroidal field

21 p0079 A79-14791

Flywheel energy storage system for JT-60 toroidal
field coil

21 p0112 A79-16729

Design of a D-shaped toroidal field coil

21 p0156 A79-19083

Superconducting magnets - Present status and
problems

22 p0311 A79-31009

HIGH FREQUENCIES

Use of high-frequency electromagnetic waves for
mapping an in situ coal gasification burn front

23 p0486 A79-40251

SUBJECT INDEX

HIGH TEMPERATURE TESTS

HIGH POWER LASERS

- Power from space by laser 22 p0284 A79-26596
- Optical characterization of high energy laser components 23 p0447 A79-37668
- High-energy laser mirror thermal distortion testing techniques 23 p0447 A79-37670
- Lasers: Their applications and operational requirements 23 p0590 N79-27494

HIGH PRESSURE

- Advanced industrial gas turbine cooling and high pressure compressor technology 21 p0004 A79-10041
- High temperature, high pressure electrostatic precipitation 23 p0375 A79-32249

HIGH SPEED

- NACA research on hydrogen for high altitude aircraft 22 p0338 N79-16999
- High Speeds and aerotrains 23 p0551 N79-23836

HIGH SPEED CAMERAS

- Temporally and spatially resolved harmonic emission from spherical laser fusion targets 23 p0480 A79-39940

HIGH STRENGTH STEELS

- Wind turbine generator application places unique demands on tower design and materials 22 p0240 A79-20826

HIGH TEMPERATURE

- Hydrogen production from high temperature electrolysis and fusion reactor 21 p0015 A79-10126
- A compound parabolic concentrator for a high temperature solar collector requiring only twelve tilt adjustments per year 21 p0134 A79-17439
- High temperature solar collector of optimal concentration - Non-focusing lens with secondary concentrator 21 p0135 A79-17448
- Energy storage by the use of high temperature electrochemical systems 21 p0148 A79-17992
- The role of the ceramic heat exchanger in energy and resource conservation [ASME PAPER 79-GT-106] 23 p0377 A79-32381
- Thermodynamic method of studying and optimizing thermochemical cycles of water decomposition at high temperature --- for hydrogen production 23 p0382 A79-32875
- Development of high temperature fuel cell battery [BMFT-FB-T-77-17] 22 p0342 N79-17344
- A low cost high temperature sun tracking solar energy collector 22 p0366 N79-21390

HIGH TEMPERATURE AIR

- High-temperature oxidizer preheater --- for fossil fuel MHD energy conversion 21 p0106 A79-16487
- Solar heating performance of the Toshiba Solar House No. 1 21 p0137 A79-17465
- Space heating with solar all-air systems - CSU Solar House II 21 p0137 A79-17467
- Combustion of pulverized coal in high temperature preheated air [AIAA PAPER 79-0298] 21 p0158 A79-19654
- Experimental measurements and correlations of Nusselt number for MHD high temperature air preheaters [ASME PAPER 78-WA/HT-22] 21 p0161 A79-19809
- Optimization of the flow passage geometry for air heating solar collectors 22 p0316 A79-31403
- Progress on high temperature air heater development for MHD systems [AIAA PAPER 79-1003] 23 p0458 A79-38188
- Cost analysis of new and retrofit solar assisted heating systems [NASA-TN-78186] 21 p0173 N79-10519
- MSFC hot air collectors [NASA-TN-78206] 21 p0196 N79-12556

- Thermal performance evaluation of MSFC hot air collectors with various flow channel depth [NASA-CR-150900] 22 p0348 N79-18449
- Effects of air damper leaks on solar energy system performance [SOLAR/0012-78/29] 23 p0563 N79-24497

HIGH TEMPERATURE ENVIRONMENTS

- A high temperature Rankine binary cycle for ground and space solar engine applications 21 p0108 A79-16613
- Differential pressure measurements in high temperature environments 21 p0144 A79-17599

HIGH TEMPERATURE GAS COOLED REACTORS

- The nuclear closed-cycle gas turbine /GT-HTGR/ - A utility power plant for the year 2000 [AIAA PAPER 79-0191] 21 p0157 A79-19590
- Substitute natural gas from coal using high-temperature reactor heat - Project 'Prototype Plant Nuclear Process Heat' 22 p0264 A79-23827
- Gasification of coal with high-temperature reactor heat - Investigations concerning the market and the economics 22 p0264 A79-23828
- High-temperature nuclear heat source for hydrogen production 23 p0437 A79-36049

HIGH TEMPERATURE GASES

- Influence of cyclic wall-to-gas heat transfer in the cylinder of the valved hot-gas engine 21 p0024 A79-10201
- Study of metals erosion in high temperature coal gas streams [ASME PAPER 79-GT-88] 23 p0376 A79-32365
- Mechanical reliability considerations in the modern high temperature industrial gas turbine [ASME PAPER 79-GT-101] 23 p0377 A79-32377
- Analytical consideration of fuel economy and dynamic response of a regenerative high temperature automobile gas turbine. I [ASME PAPER 79-GT-127] 23 p0377 A79-32396
- A high temperature turbine for operation on coal-derived fuel [ASME PAPER 79-GT-173] 23 p0379 A79-32434
- Assessment of hot gas clean-up systems and turbine erosion/corrosion problems in PFBC combined cycle systems --- Pressurized Fluidized Bed Combustion [ASME PAPER 79-GT-195] 23 p0380 A79-32453
- Choice of optimal parameters for a heat exchanger with heat pipes for a gas turbine engine 23 p0529 A79-42552
- Sandia laboratory combustion simulation facility --- for analyzing the flow of high temperature combustion products [SAND-78-2240] 23 p0576 N79-26146

HIGH TEMPERATURE NUCLEAR REACTORS

- Engineering and bench-scale studies of the sulfur-iodine cycle at General Atomic 21 p0015 A79-10127
- Nuclear closed-cycle gas turbine (GT-HTGR): A utility power plant for the year 2000 [GA-A-15184] 23 p0582 N79-26515

HIGH TEMPERATURE PLASMAS

- The TELEC - A plasma type of direct energy converter --- Thermo-Electronic Laser Energy Converter for electric power generation 21 p0110 A79-16629
- 200-kv Blumlein transmission line for ultrafast toroidal theta-pinch 22 p0297 A79-28917
- Interpretation of cyclotron radiation spectra from runaway discharges in TFR 22 p0313 A79-31185
- A ray-tracing analysis of fast-wave heating of tokamaks 22 p0313 A79-31186
- Confinement of ohmically heated plasmas in Heliotron D 23 p0390 A79-33346

HIGH TEMPERATURE RESEARCH

- Materials --- for high temperature MHD technology 21 p0106 A79-16491

HIGH TEMPERATURE TESTS

- Melting multifoil insulation for KIPS emergency cooling --- Kilowatt Isotope Power System 21 p0023 A79-10191

- New instrumentation for high temperature and hemispherical measurements of selective surfaces --- for solar energy conversion 22 p0294 A79-28152
- High temperature, high pressure electrostatic precipitation 23 p0375 A79-32249
- High temperature materials study --- for thermal insulation in solar furnaces 23 p0431 A79-35070
- Furnaces for experiments in zero-gravity conditions 23 p0487 A79-40330
- High-temperature lifetesting of Al/SiO_x/p-Si contacts for MIS solar cells 23 p0536 A79-43569
- HIGH VOLTAGES**
- Large-scale cryopumping for controlled fusion 21 p0085 A79-15330
- Large space system - Charged particle environment interaction technology --- effects on high voltage solar array performance [AIAA 79-0913] 23 p0425 A79-34775
- HIGHWAYS**
- Status of alcohol fuels utilization technology for highway transportation [HCP/M2923-01] 21 p0201 N79-13190
- HISTORIES**
- History of solar energy applications - Solar energy yesterday, today and tomorrow 21 p0089 A79-15852
- Historical and projected power requirements 21 p0169 N79-10125
- HOLLOW**
- Dual membrane hollow fiber fuel cell and method of operating same [NASA-CASE-MPO-13732-1] 21 p0172 N79-10513
- HOLOGRAPHIC INTERFEROMETRY**
- An interferometric study of the local heat transfer by natural convection in inclined airfilled enclosures 23 p0531 A79-42908
- HOMEOSTASIS**
- Designing thermally efficient buildings for the U.S. Midwest 23 p0397 A79-33951
- HOMOPOLAR GENERATORS**
- Homopolar generator energy storage for fusion reactors 22 p0304 A79-29942
- Directly driven generators for wave energy conversion 23 p0449 A79-37858
- HONEYCOMB STRUCTURES**
- An approximate equation for predicting the solar transmittance of transparent honeycombs 21 p0042 A79-11877
- Performance of a honeycomb type flat plate collector with serpentine tube 21 p0054 A79-13579
- Use of monolithic structures for the short term storage of solar energy 21 p0121 A79-17327
- A comparison among various flat plate collectors with honeycomb structures 21 p0128 A79-17392
- An interferometric investigation heat transfer in honeycomb solar collector cells 21 p0129 A79-17398
- Anticonvective antiradiative systems --- for solar collectors 21 p0132 A79-17420
- Honeycomb type flat plate collectors - Experiments leading to drinking straw --- heat retention material for solar steam generation 21 p0132 A79-17424
- The honeycomb heat trap - Its application in flat plate solar collectors 22 p0322 A79-31447
- Use of a honeycomb as solar radiation absorber and heat exchanger in an air-type solar collector 23 p0398 A79-33989
- HOT CATHODES**
- Properties and test results of super-hot wall electrode materials --- for MHD generators 23 p0394 A79-33415
- HOT ELECTRONS**
- Macroscopic stability and beta limit in the ELMO Bumpy Torus 22 p0291 A79-27876
- HUBS**
- A small horizontal axis wind turbine feeding power into the utility grid 21 p0074 A79-14703
- HULLS (STRUCTURES)**
- Limit analysis and design of a semi-submerged concrete hull for an ocean thermal differences power plant 23 p0486 A79-40195
- HUMAN FACTORS ENGINEERING**
- Inexpensive solar energy utilization in human settlements 21 p0104 A79-16470
- HUMAN WASTES**
- The natural and perturbed troposphere 21 p0179 N79-10636
- HUMIDITY**
- Clean energy from humid air --- conversion into electric power 23 p0406 A79-34053
- HYBRID PROPULSION**
- Fiat Research Center hybrid vehicle prototype [SAE PAPER 790014] 22 p0313 A79-31351
- Study of heat engine/flywheel: Hybrid propulsion configuration with electrical transmission system. Phase 2: Design definition [ALO-41/2] 21 p0185 N79-11493
- HYBRID STRUCTURES**
- Combined photovoltaic and thermal hybrid collector systems [COO-4577-3] 23 p0583 N79-26525
- HYDRATION**
- Calcium hydroxide as an energy storage medium for solar power systems 23 p0451 A79-37878
- Solar energy storage using reversible hydration-dehydration of CaO-Ca(OH)₂ [AIAA PAPER 79-0986] 23 p0458 A79-38190
- HYDRAULIC CONTROL**
- The application of hydraulics in the 2,000 kW wind turbine generator 22 p0288 A79-27400
- Flap-cone control of windmill speed 23 p0405 A79-34046
- HYDRAULIC EQUIPMENT**
- The brake system for the DOE/Sandia 17-meter vertical axis wind turbine 21 p0067 A79-14289
- Solar engines - The thermal wheel and beyond 21 p0095 A79-15909
- The design and evaluation of a hydraulic-solar powered tracking device 21 p0136 A79-17458
- Modeling the champagne effect in compressed air energy storage 22 p0280 A79-26190
- Performance of a hydraulic air compressor for use in Compressed Air Energy Storage power systems 22 p0280 A79-26191
- Review of liquid piston pumps and their operation with solar energy [ASME PAPER 79-SOL-4] 22 p0308 A79-30542
- Free-wheeling hydraulic power mills --- wind or water current driven electric plants 23 p0387 A79-33244
- The development of the wave contouring raft 23 p0450 A79-37869
- Design package for programmable controller and hydronic subsystem [NASA-CR-161151] 22 p0371 N79-21619
- HYDRAULIC JETS**
- Thermal fracturing patterns and effects of an imitation hot dry rock by impinging of water jets --- application to geothermal sources 23 p0409 A79-34076
- HYDRAULICS**
- New energy from an old source - Hydrogen from falling water 21 p0015 A79-10129
- HYDRIDES**
- Survey of the different types of hydrides --- for hydrogen energy storage 22 p0247 A79-21678
- Mixing effects of two different types of hydrides --- phase behaviors and energy storage applications 22 p0251 A79-21714

- HYCSOS - A system for evaluation of hydrides as chemical heat pumps 22 p0252 A79-21716
- A survey of the hydrogen storage properties of nickel-copper-mischmetal-calcium alloys 23 p0414 A79-34121
- Modification of hydriding properties of AB5 type hexagonal alloys through manganese substitution 23 p0415 A79-34124
- High energy metal hydride fuel cell power source [AD-A056491] 21 p0184 A79-11485

Important specification of pyranometers for solar energy applications /Survey article/ 23 p0468 A79-38627

Fast spectral radiometer --- for solar radiation spectral composition 23 p0469 A79-38629

Performance of silicon and gallium arsenide concentration cells --- under high sunlight concentration 23 p0511 A79-41017

Variation of solar cell sensitivity and solar radiation on tilted surfaces 23 p0512 A79-41023

INSTALLATION MANUALS

Installation package for a solar heating system [NASA-CR-150876] 22 p0349 A79-18454

INSTALLING

Alternate ways of using bottoming cycle power in pipeline gas compressor stations [ASME PAPER 79-GT-201] 23 p0380 A79-32458

Solar system installation at Louisville, Kentucky [NASA-CR-150814] 21 p0172 A79-10518

Installation package for the Solaron solar subsystem [NASA-CR-161190] 23 p0548 A79-23491

INSTRUMENT ERRORS

Measurement of solar radiation for energy conversion 21 p0119 A79-17305

INSTRUMENT PACKAGES

Transient attitude dynamics of satellites with deploying flexible appendages 21 p0047 A79-12325

Final system instrumentation design package for Decade 80 solar house [NASA-CR-150869] 22 p0354 A79-19455

INSULATION

Development, characterization and evaluation of materials for open cycle MHD [PNL-2004-9] 22 p0361 A79-20504

Insulating wall boundary layer in a Faraday MHD generator [FE-23417] 22 p0365 A79-21310

INSULATORS

Insulator performance and anode recession rate in a direct coal fired cold copper diagonal conducting wall MHD generator 23 p0392 A79-33397

The operation of the semiconductor-insulator-semiconductor solar cell - Experiment 23 p0440 A79-36680

Critical contributions in MHD power generation [FE-2215-11] 22 p0362 A79-20511

Development, characterization and evaluation of materials for open cycle MHD [PNL-2004-8] 22 p0369 A79-21557

Development, testing and evaluation of MHD materials and component designs --- electrode and insulator systems for mhd generators [FE-2248-19] 22 p0369 A79-21558

INTEGRAL CALCULUS

Analytical modelling of oil recovery by steam injection 22 p0358 A79-20434

INTELSAT 5 SATELLITE

Intelsat V solar array design and development summary 21 p0002 A79-10018

INTERFACES

On the role of interface states in MOS solar cells 21 p0122 A79-17337

Interface properties and stability of Schottky barriers and MIS solar cells 21 p0123 A79-17342

INTERFACIAL ENERGY

Solar-cell characteristics and interfacial chemistry of indium-tin-oxide/indium phosphide and indium-tin-oxide/gallium arsenide 23 p0480 A79-39944

INTERLAYERS

- The role of the interfacial layer in Schottky barrier solar cells 23 p0438 A79-36241
- Influence of the interface upon the properties of ITO/silicon SIS solar cells 23 p0510 A79-41011

INTERMETALLICS

- Model predictions for the stability of ternary metallic hydrides 21 p0038 A79-11802
- Hydrogen storage by LaNi₅ - Fundamentals and applications 21 p0038 A79-11803
- Absorption of hydrogen by the intermetallics NdNi₅ and LaNi₄Cu and a correlation of cell volumes and desorption pressures 21 p0038 A79-11804
- Calcium/iron sulfide secondary cells 21 p0041 A79-11835
- Thermodynamics of metal, alloy and intermetallic/hydrogen systems 22 p0248 A79-21680
- Magnetic and electrical properties of rare earth and rare earth intermetallic hydrides 22 p0249 A79-21692
- Hydrogen absorption in rare earth intermetallic compounds 22 p0249 A79-21693
- Synthesis and properties of useful metal hydrides - A review of recent work at Brookhaven National Laboratory 22 p0250 A79-21699
- The use of FeTi-hydride for production and storage of suprapure hydrogen 22 p0250 A79-21700
- Hydrogen sorption properties in binary and pseudobinary intermetallic compounds 22 p0250 A79-21702
- The metallurgy and production of rechargeable hydrides --- for hydrogen storage 22 p0250 A79-21703
- Hydrogen electrochemical storage by substituted LaNi₅ compounds 22 p0251 A79-21711
- Rare earth and actinide intermetallics as hydrogenation catalysts 22 p0251 A79-21713
- Method of producing a p-type or n-type alloy for direct thermoelectric energy conversion 22 p0260 A79-23615

INTERNAL COMBUSTION ENGINES

- Conversion of a standard single cylinder I.C. engine into a 'gamma' configuration air charged Stirling engine 21 p0024 A79-10202
- Alternative fuels for reciprocating internal combustion engines 21 p0051 A79-12980
- Flame emissivities - Alternative fuels 21 p0052 A79-12984
- Road vehicles with combined, at least partly electrical driving systems and energy supplies 22 p0301 A79-29494
- Methanol decomposition bottoming cycle for IC engines [SAE PAPER 790427] 23 p0495 A79-40774
- Performance characteristics of automotive engines in the United States. First series: Report no. 15 1975 Dodge Colt 98 CID (1.6 liters), 2V [PB-286075/7] 21 p0226 N79-15305
- Performance characteristics of automotive engines in the United States. Second series: Report no. 5 1977 Ford 140 CID (2.3 liters), 2V --- fuel consumption and exhaust gases [PB-286076/5] 21 p0227 N79-15306
- Performance characteristics of automotive engines in the United States Third series: Report no. 1 1977 Volvo 130 CID (2.1 liters), P.I. --- fuel consumption and exhaust gases [PB-286077/3] 21 p0227 N79-15307
- Performance characteristics of automotive engines in the United States. Second series, report no. 4: 1976 Chevrolet 85 CID (1.4 liters), 4V [PB-286294/4] 21 p0227 N79-15308
- Performance characteristics of automotive engines in the United States. Second series, report no. 7: 1977 Ford 171 CID (2.8 liters), 2V [PB-286296/9] 21 p0227 N79-15310

- Performance characteristics of automotive engines in the United States. First series, report no. 17: 1975 Buick 455 CID (7.5 liters), 4V [PB-286298/5] 21 p0227 N79-15312
- Performance characteristics of automotive engines in the United States. First series, report no. 18: 1976 Ford CID (6.6 liters), 2V --- fuel consumption and exhaust gases [PB-286299/3] 21 p0227 N79-15313
- Performance characteristics of automotive engines in the United States. First series, report no. 19: 1975 Ford Windsor 351 CID (5.7 liters), 2V [PB-286300/9] 21 p0228 N79-15314
- Performance characteristics of automotive engines in the United States. First series, report no. 20: 1975 Chevrolet 350 CID (5.7 liters) with dresser variable-area venturi system [PB-286301/7] 21 p0228 N79-15315
- An assessment of the potential impact of combustion research on internal combustion engine emissions and fuel consumption [PB-290953/9] 23 p0568 N79-25249
- Exhaust emissions and fuel consumption of a heavy-duty gasoline powered vehicle over various driving cycles: 427 cubic inch 1977 California GMC 6500 [PB-293530/2] 23 p0578 N79-26410
- Performance characteristics of automotive engines in the United States. Third series: Report no. 2, 1978 Pontiac, 301 CID (4.9 liters), 2V [PB-293772/0] 23 p0579 N79-26411
- Exhaust emissions and fuel consumption of a heavy-duty gasoline powered vehicle over various driving cycles: 361 cubic inch 1966 Ford F-600 [PB-293529/4] 23 p0586 N79-26567

INTERNATIONAL COOPERATION

- Summary of international energy research and development activities 1974-1976 --- Book 21 p0068 A79-14400
- Analysis of alternatives for U.S. international cooperation in solar energy 21 p0116 A79-17277
- The solar energy R & D programme of the European Communities 21 p0116 A79-17278
- Energy policy of the European Economic Community 22 p0282 A79-26403
- Status of the U.S./U.S.S.R. cooperative program for the development of open-cycle MHD power generators 22 p0290 A79-27661
- Solar energy via satellites and international cooperation 22 p0310 A79-30952
- Joint Soviet-American studies in the domain of plasma diagnostics 23 p0529 A79-42853

INTERNATIONAL LAW

- Solar power space stations - Some issues of law and policy [AAS 78-199] 23 p0427 A79-34864
- Satellite Power System (SPS) international agreements [NASA-CR-157433] 23 p0548 N79-23497

INTERNATIONAL RELATIONS

- Energy policies in the context of global economics 23 p0433 A79-35228

INTERNATIONAL TRADE

- Energy economics - A research analysis --- considering OPEC Cartel impact 21 p0115 A79-17222

INTERPLANETARY SPACECRAFT

- The application of solar thermoelectric generators in near-sun missions 21 p0023 A79-10187

INVENTORIES

- Energy information: Report to Congress [NTISUB/C/027-001] 21 p0221 N79-14576
- An inventory of environmental impact models related to energy technologies [ORNL/EIS-147] 22 p0372 N79-21640
- Inventory of data bases, graphics packages, and models in Department of Energy laboratories [ORNL-EIS-144] 23 p0587 N79-27018

INVERTED CONVERTERS (DC TO AC)

- Inverter systems --- for MHD power stations 21 p0106 A79-16486
- Solar-cell panel simulator 22 p0265 A79-23867

- Advanced semiconductor technology for alternate energy sources - D-C to A-C inverters --- for gallium arsenide solar photovoltaic arrays
23 p0416 A79-34140
- INVERTERS**
Inverter systems --- for MHD power stations
21 p0106 A79-16486
An inverter/controller subsystem optimized for photovoltaic applications
23 p0516 A79-41047
- INVESTMENTS**
Capital investment for transition to new energy supply systems
23 p0480 A79-39993
Industrialization study --- impact of government incentives and barriers on decision making in the industrial production of photovoltaics [NASA-CR-157953]
21 p0200 N79-12970
- INVISCID FLOW**
A two dimensional vortex sheet model of a Savonius Rotor
22 p0278 A79-26178
Two-dimensional analysis of vertical axis windmills
22 p0353 N79-19446
- IODIDES**
Engineering and bench-scale studies of the sulfur-iodine cycle at General Atomic
21 p0015 A79-10127
Water splitting - The chemistry of the I₂-SO₂-H₂O reaction and the processing of H₂SO₄ and HI products
23 p0413 A79-34109
- IODINE**
The thermochemical decomposition of water using bromine and iodine
22 p0238 A79-20770
- ION ACCELERATORS**
Superconducting magnets - Present status and problems
22 p0311 A79-31009
Pulsed-power research and development in the USSR [AD-A056635]
21 p0193 N79-11859
- ION BEAMS**
Heavy-ion beam inertial-confinement fusion
21 p0054 A79-13448
Generation and applications of high power ion beams to fusion research
21 p0070 A79-14466
Effect of electrode shielding on beamlet-beamlet interaction in multiaperture sources
21 p0154 A79-18481
Microstability of a focused ion beam propagating through a z-pinch plasma
22 p0270 A79-24817
Relaxation of a fast ion beam in a tokamak plasma
22 p0324 A79-31760
Solar cells fabricated by ionised-cluster beam technology
23 p0441 A79-36785
Pulsed-power research and development in the USSR [AD-A056635]
21 p0193 N79-11859
- ION CURRENTS**
Preparation and ionic conductivity of H₃O⁺/β alumina --- for hydrogen-oxygen fuel cells
21 p0040 A79-11821
Characterization of electron and ion current flow in very large aspect-ratio terawatt diodes employing heated and unheated anodes
21 p0154 A79-18480
- ION CYCLOTRON RADIATION**
Present status of two R.F. heating schemes - I.C.R.H. and L.H.R.H. --- Ion Cyclotron Resonant Heating and Lower-Hybrid Resonant Heating of plasma
21 p0071 A79-14467
Cyclotron-wave spectrum in a plasma with two ion species
22 p0245 A79-21443
Magneto-acoustic resonance heating in the ion-cyclotron frequency domain --- of tokamak plasmas
22 p0271 A79-24866
- ION DISTRIBUTION**
Auxiliary heating in breakeven tokamaks
21 p0079 A79-14792
- ION EMISSION**
Thermionic emission properties of some synthetic coal slags
23 p0392 A79-33395
- ION EXCHANGE MEMBRANE ELECTROLYTES**
The use of fuel cell ion exchange membranes in electrolytic cells
[P/539/77/23]
23 p0584 N79-26532
- ION EXCHANGE RESINS**
The use of fuel cell ion exchange membranes in electrolytic cells
[P/539/77/23]
23 p0584 N79-26532
- ION IMPACT**
Suprathermal alpha transport and wall bombardment in tokamaks
23 p0444 A79-36927
- ION IMPLANTATION**
Ion-implanted laser-annealed GaAs solar cells
23 p0447 A79-37685
Analysis of ion-implanted solar cells
23 p0508 A79-40991
Production technology for high efficiency ion implanted solar cells
23 p0509 A79-41000
Low cost ion implantation procedure for the realization of silicon solar cells in a continuous way
23 p0509 A79-41001
Solar cells from laser-annealed ion-implanted silicon
23 p0509 A79-41002
Development of pulsed processes for the manufacture of solar cells [NASA-CR-158706]
23 p0570 N79-25484
- ION INJECTION**
Magnetic multipole line-cusp plasma generator for neutral beam injectors
22 p0238 A79-20746
Efficient high-power high-energy neutral beams for the reference mirror reactor
23 p0397 A79-33919
- ION MOTION**
Parametric decay of lower hybrid waves in a plasma - Effect of ion nonlinearity --- in tokamaks
22 p0269 A79-24814
Suprathermal alpha transport and wall bombardment in tokamaks
23 p0444 A79-36927
- ION PROPULSION**
Changes in the terrestrial atmosphere-ionosphere-magnetosphere system due to ion propulsion for solar power satellite placement [NASA-TN-79719]
22 p0345 N79-17897
Earth orbital assessment of solar electric and solar sail propulsion systems [NASA-CR-158167]
22 p0345 N79-17898
Closed Loop solar array-ion thruster system with power control circuitry [NASA-CASE-LEW-12780-1]
22 p0357 N79-20179
Plasma particle trajectories around spacecraft propelled by ion thrusters
23 p0552 N79-24029
- ION SOURCES**
The advanced thermionic converter with microwave power as an auxiliary ionization source
21 p0153 A79-18470
Effect of electrode shielding on beamlet-beamlet interaction in multiaperture sources
21 p0154 A79-18481
- ION TEMPERATURE**
On the ion energy balance in TFR with and without neutral injection heating
21 p0069 A79-14452
Properties of the plasma ions and the particle lifetime in ohmic heating in the L-2 stellarator
22 p0244 A79-21428
Recombination-induced neutral-particle flux in tokamaks
22 p0291 A79-27877
A source of error in cusp plasma leak measurements
23 p0446 A79-37265
- IONIC REACTIONS**
Space-dependent thermal stability of reacting tokamak plasmas
22 p0253 A79-22242
- IONIC WAVES**
Parametric decay of lower hybrid waves in a plasma - Effect of ion nonlinearity --- in tokamaks
22 p0269 A79-24814
Stimulated scattering of light by ion modes in a homogeneous plasma - Space-time evolution
23 p0478 A79-39566

IONIZATION

- Contribution to the theory of the pulsed mode of operation of the thermionic energy converter. II
22 p0246 A79-21542
- Theory of the pulsed operation of a thermionic converter. II - Ionization stage
23 p0442 A79-36815

IONIZED GASES

- 'Local' breakdown criterion in highly ionized gas flow
21 p0049 A79-12683
- Power generation experiments of a linear MHD generator with fully ionized seed
23 p0394 A79-33421

IONIZERS

- Ionizing seed --- for open cycle MHD power generation
21 p0106 A79-16490

IONOSPHERE

- Changes in the terrestrial atmosphere-ionosphere-magnetosphere system due to ion propulsion for solar power satellite placement [NASA-TM-79719]
22 p0345 N79-17897

IONOSPHERIC DISTURBANCES

- Solar Power Satellite beam disturbance of the upper ionosphere [AIAA PAPER 79-1422]
23 p0426 A79-34848

IONOSPHERIC PROPAGATION

- Solar Power Satellite (SPS) pilot beam and communication link subsystem investigation study, phase 1 --- ionospheric propagation, radio frequency interference, and microwave transmission [NASA-CR-161161]
22 p0345 N79-17896
- Space-based solar power conversion and delivery systems study. Volume 3: Microwave power transmission studies [NASA-CR-150296]
23 p0541 N79-22619

IOWA

- Solar project description: Scattergood School Recreation Center, West Branch, Iowa [SOLAB/2003-78/50]

IRAN

- Computer simulation of the performance of a solar pond in the southern part of Iran
21 p0133 A79-17432
- Solar thermal electrical power plants for Iran
22 p0295 A79-28352
- Solar collector development in Iran
23 p0493 A79-40675
- Analysis of the energy and economic effects of Iranian oil shortfall [PB-292634/3]
23 p0575 N79-25540

IRAQ

- Availability of solar energy at Baghdad, Iraq - Performance and design data for flat plate collectors
21 p0133 A79-17428
- Experimental project on the utilization of solar energy in domestic hot water heating in Iraq
23 p0465 A79-38597

IRON

- Moessbauer spectroscopy of iron in coal and coal hydrogenation products
22 p0282 A79-26464
- Discharge characteristics of a soluble iron-titanium battery system
22 p0286 A79-26996
- Supply of reactants for Redox bulk energy storage systems [NASA-TM-78995]
21 p0183 N79-11479
- Design and cost study of a nickel-iron oxide battery for electric vehicles. Volume 2: Public report [ANL-K-3723-VOL-1]
21 p0222 N79-14579
- Rate of desulfurization from liquid iron and iron alloys with hydrogen [NRC/CNR-TT-1930]
23 p0553 N79-24120

IRON ALLOYS

- New alloy systems for hydrogen storage
21 p0038 A79-11806
- The metallurgy and production of rechargeable hydrides --- for hydrogen storage
22 p0250 A79-21703
- The iron-titanium - hydrogen system: A transmission electron microscope /TEM/ study
22 p0285 A79-26947

IRON CHLORIDES

- Problems around Fe-Cl cycles --- thermochemical decomposition of water hydrogen production
22 p0238 A79-20771

IRON COMPOUNDS

- Calcium/iron sulfide secondary cells
21 p0041 A79-11835
- The use of FeTi-hydride for production and storage of suprapure hydrogen
22 p0250 A79-21700

IRON OXIDES

- Iron oxide semiconductor electrodes in photoassisted electrolysis of water
21 p0037 A79-11781

IRRADIANCE

- Irradiances on inclined surfaces --- from solar and sky radiation and earth albedo
21 p0055 A79-13624
- Total solar irradiance at Table Mtn, California 1926-77
21 p0067 A79-14269
- Proposal for efficient appreciation of solar thermal absorptive materials by high irradiance solar simulator
21 p0130 A79-17406

IRRADIATION

- Results of measurements of solar radiation on surfaces of different orientations
21 p0055 A79-13622
- The use of a sort of slide rule for the quick determination of solar irradiation of surfaces and through double glazing of arbitrary orientation and different inclination
21 p0055 A79-13625
- The effect of protons electrons and photons on the performance of some new types of high efficiency solar cells
23 p0498 A79-40897

IRREVERSIBLE PROCESSES

- On an irreversible thermodynamic analysis of thermoelectric devices
22 p0260 A79-23609

IRRIGATION

- Solar energy installations for pumping irrigation water
21 p0066 A79-14260
- Historical developments of the use of solar energy for pumping irrigation water
21 p0076 A79-14762
- Basic technical and economical aspects of the use of solar energy for pumping irrigation water
21 p0076 A79-14763
- A comparison between sun and wind as energy sources in irrigation plants
21 p0118 A79-17295
- 25 kilowatt photovoltaic powered irrigation and grain drying experiment
21 p0143 A79-17519
- Solar irrigation program status
21 p0143 A79-17520
- The development of a 37 kW solar-powered irrigation system
21 p0144 A79-17525
- Solar powered irrigation systems
23 p0403 A79-34030

KEROGEN

- Organic geochemical studies on kerogen precursors in recently deposited algal mats and oozes 21 p0031 A79-10419
- Combustion rates for oil shale carbonaceous residue 21 p0032 A79-10522

KEROSENE

- Selection of a characteristic quantity defining the self-ignition of a fuel in a stream 21 p0114 A79-16786
- Laser aircraft --- using kerosene 22 p0284 A79-26597
- Toxic component concentration in kerosene-air mixture combustion products 22 p0291 A79-27733
- The influence of fuel composition on smoke emission from gas-turbine-type combustors - Effect of combustor design and operating conditions 22 p0323 A79-31510
- The chemical stability of kerosene fractions 23 p0529 A79-42275

KEVLAR (TRADEMARK)

- Composite material flywheel for the electric-powered passenger vehicle 22 p0240 A79-20842
- A status of the 'Alpha-ply' composite flywheel concept development 22 p0241 A79-20843

- Composite-rim flywheels - Spin tests 23 p0423 A79-34281

- Comparative properties of fiber composites for energy-storage flywheels part A. Evaluation of fibers for flywheel rotors --- Kevlar/epoxy and glass/epoxy composites [UCRL-80116-PT-A] 21 p0215 N79-14165

KINETIC ENERGY

- Mechanical energy storage system for a 10 KWe solar power pack 21 p0121 A79-17329

KINETIC EQUATIONS

- Heat transport near the wall of a tokamak reactor 22 p0324 A79-31764

KINETICS

- Kinetic modeling of pyrolysis and hydrogasification of carbonaceous materials --- converting wood waste char to clean fuels 21 p0179 N79-11150
- Algal growth kinetics in bioconversion of solar energy 23 p0594 N79-27650

KLYSTRONS

- New methods for the conversion of solar energy to R. P. and laser power [AIAA PAPER 791476] 23 p0426 A79-34846

KOREA

- Some experimental investigations on solar space heating in Korea 21 p0138 A79-17470

L**L-1011 AIRCRAFT**

- Fuel conservative subsonic transport --- control surfaces activated by computers 22 p0337 N79-16874

LABOR

- Assessment of economic factors affecting the satellite power system. Volume 1: System cost factors [NASA-CR-161185] 22 p0368 N79-21551

LABORATORY EQUIPMENT

- Sandia Laboratories' Midtemperature Systems Test Facility 23 p0429 A79-35049

LAKE CHAMPLAIN BASIN (NY-VT)

- Energy use and supply in the Lake Champlain Basin [PB-293437/0] 23 p0599 N79-27713

LAKES

- Wave power experiments at Loch Ness 23 p0450 A79-37871
- Reservoir ecosystems and western coal development in the upper Missouri River Basin [PB-287363/6] 22 p0339 N79-17309

LAMINAR FLOW

- Buoyancy effects in a solar regenerator --- for air dehumidifier absorbent solutions 22 p0262 A79-23752
- MHD generator duct flow with cross stream dependent fluid properties 22 p0336 N79-16668

LAMINAR HEAT TRANSFER

- Fully developed laminar heat transfer in passages of triangular cross section for application to solar collector plate design [AIAA PAPER 79-0974] 23 p0458 A79-38189

LAMINATES

- The thermochemical behavior of polyvinyl butyral film and its effect on focal stability of a solar mirror-laminate 22 p0239 A79-20824

LAND USE

- Energy availabilities for state and local development: Projected energy patterns for 1980 and 1985 [ORNL/TN-5890/54] 21 p0186 N79-11511
- Application of LANDSAT data and digital image processing --- Ruhr Valley, Germany [E79-10102] 22 p0339 N79-17291
- Atlas of western surface-mined lands: Coal, uranium, and phosphate [PB-287846/0] 22 p0340 N79-17311
- Satellite Power System (SPS) resource requirements (critical materials, energy and land) [NASA-CR-158680] 23 p0548 N79-23492
- Draft environmental statement of the Island Park geothermal area, Idaho, Montana, Wyoming 23 p0551 N79-23551
- Application of remote sensing to state and regional problems [E79-10196] 23 p0569 N79-25446

LANDSAT SATELLITES

- Landsat - Developing techniques and applications in mineral and petroleum exploration 21 p0111 A79-16725
- NASA takes stock 23 p0461 A79-38375

LANTHANUM COMPOUNDS

- Hydrogen storage by LaNi5 - Fundamentals and applications 21 p0038 A79-11803
- Localization and diffusion of hydrogen in lanthanum-nickel compounds 22 p0248 A79-21682
- Some applications of LaNi5-type hydrides --- using reversible reaction with hydrogen working fluid for heat storage 22 p0249 A79-21694
- Metal hydride electrodes for electrochemical energy storage 22 p0249 A79-21695

LARGE SPACE STRUCTURES

- The design and evaluation of a 5 GW GaAs solar power satellite /SPS/ 21 p0002 A79-10024
- Space platforms for building large space structures 21 p0032 A79-10511
- On-orbit fabrication and assembly of large space structural subsystems [IAF PAPER 78-192] 21 p0035 A79-11288
- New design verification aspects of large flexible solar arrays [IAF PAPER 78-217] 21 p0035 A79-11298
- Advanced composites - Future space applications 21 p0086 A79-15504
- A technology program for large area space systems 21 p0100 A79-16145
- Overview of future programs - USA --- manned orbital space missions 21 p0116 A79-17275
- A development strategy for the solar power satellite [AAS PAPER 78-154] 22 p0243 A79-21266
- Space will be the next big construction site 22 p0268 A79-24450
- Solar power satellite 22 p0287 A79-27375
- Large space system - Charged particle environment interaction technology --- effects on high voltage solar array performance [AIAA 79-0913] 23 p0425 A79-34775
- Lunar resources utilization - An economic assessment --- of manufacturing and construction of large structures in space [AIAA PAPER 79-1412] 23 p0426 A79-34845
- Future large space systems opportunities: A case for space-to-space power? --- spacecraft power supplies microwave and laser transmission 21 p0169 A79-10095
- Environmental interaction implications for large space systems 23 p0552 A79-24027
- LASER APPLICATIONS**
- Optical evaluation techniques for reflecting solar concentrators 21 p0043 A79-11971
- Five MW solar thermal test facility heliostat focus and alignment system 21 p0043 A79-11972
- Facility with sectioned photoreceiver and laser radiator for determining solar radiation concentrator accuracy characteristics 21 p0054 A79-13292
- Radiation energy conversion in space; Conference, 3rd, NASA Ames Research Center, Moffett Field, Calif., January 26-28, 1978, Technical Papers 21 p0107 A79-16601
- Laser aircraft propulsion 21 p0109 A79-16618
- Laser-powered aircraft and rocket systems with laser energy relay units 21 p0109 A79-16619
- The use of lasers for the transmission of power 21 p0109 A79-16621
- New candidate lasers for power beaming and discussion of their applications --- solar powered space lasers 21 p0110 A79-16622
- Systems efficiency and specific mass estimates for direct and indirect solar-pumped closed-cycle high-energy lasers in space 21 p0110 A79-16623
- Quasi-isentropic laser engines 21 p0111 A79-16632
- Status and summary of laser energy conversion --- for space power transmission systems 21 p0111 A79-16635
- Laser ray trace tester for parabolic trough solar collectors 21 p0144 A79-17619
- Laser aircraft --- using kerosene 22 p0284 A79-26597
- Solar power satellites - The laser option 22 p0284 A79-26599
- Laser-particulate control for open-cycle, coal fired gas turbines [ASME PAPER 79-GT-177] 23 p0379 A79-32437
- Ion-implanted laser-annealed GaAs solar cells 23 p0447 A79-37685
- Solar-pumped lasers for space power transmission [AIAA PAPER 79-1015] 23 p0460 A79-38202

- New energy conversion techniques in space, applicable to propulsion --- powering of aircraft with laser energy from SPS [AIAA PAPER 79-1338] 23 p0493 A79-40490
- Solar cells from laser-annealed ion-implanted silicon 23 p0509 A79-41002
- Scanned light spot evaluation of MIS solar cells to treat non-uniform peripheral photocurrents 23 p0511 A79-41012
- Effects of laser irradiation on a diffused layer in silicon 23 p0521 A79-41083
- Future large space systems opportunities: A case for space-to-space power? --- spacecraft power supplies microwave and laser transmission 21 p0169 A79-10095
- Sensitivity of slope measurements on parabolic solar mirrors to positioning and alignment of the laser scanner [SAND-78-0700] 21 p0185 A79-11496
- Potential of laser for SPS power transmission [NASA-CR-157432] 23 p0548 A79-23496
- LASER DAMAGE**
- Techniques for preventing damage to high power laser components --- Shiva laser fusion experiments 21 p0083 A79-15145
- Prepulse damage to targets and alignment verification 22 p0258 A79-23027
- LASER FUSION**
- Overview of inertial confinement fusion reactor designs 21 p0018 A79-10149
- CO2-laser fusion 21 p0018 A79-10150
- Commercial applications of thermionic conversion using a fusion reactor energy source - A preliminary assessment 21 p0026 A79-10219
- Electric power from laser fusion - The HYLIFE concept 21 p0030 A79-10249
- The laser fusion scientific feasibility experiment 21 p0030 A79-10250
- Hybrid reactor based on laser-induced thermonuclear fusion 21 p0032 A79-10658
- Progress in laser-fusion research 21 p0070 A79-14464
- DOE programs in material development for fusion laser systems 21 p0082 A79-15137
- Requirements and new materials for fusion laser systems 21 p0082 A79-15138
- Review of theories for predicting n_2 in glasses and crystals --- refractive index of fusion laser materials 21 p0083 A79-15139
- Performance of the short-pulse oscillators for Argus and Shiva 21 p0083 A79-15171
- A new method for producing cryogenic laser fusion targets 21 p0085 A79-15332
- Development of cryogenic targets for laser fusion 21 p0085 A79-15333
- Cryogenic pellets for laser-fusion research - Theoretical and practical considerations 21 p0085 A79-15334
- Point-contact conduction-cooling technique and apparatus for cryogenic laser fusion pellets 21 p0085 A79-15335
- Self-adjusting laser-target system for laser fusion 21 p0086 A79-15625
- Stimulated Raman scatter in laser fusion target chambers 21 p0155 A79-18794
- An overview of design space for small fusion targets 22 p0253 A79-22241
- Prepulse damage to targets and alignment verification 22 p0258 A79-23027
- Fuel content characterization and pressure retention measurements of DT-filled laser fusion microballoon targets 22 p0258 A79-23034

SUBJECT INDEX

LAW (JURISPRUDENCE)

- Diagnostics of Shiva Nova high-yield thermonuclear events --- in laser fusion 22 p0285 A79-26747
- Pellet X-ray spectra for laser fusion reactor designs 22 p0291 A79-27878
- Self-consistent analysis of alpha-particle heating of a fast-solenoid plasma --- in laser fusion 22 p0291 A79-27879
- Two-dimensional monochromatic X-ray imaging of laser-produced plasmas --- during implosions for laser fusion 22 p0296 A79-28366
- Microradiographs of laser fusion targets - 2-D modeling and analysis 23 p0384 A79-32993
- Production of synthetic fuels - An important civilian application of laser fusion 23 p0408 A79-34066
- Excited-state kinetics for Nd/thd/3 and Tb/thd/3 chelate vapors and prospects as fusion laser media 23 p0422 A79-34192

 - Direct conversion of solar energy into laser radiation 22 p0311 A79-31086
 - New methods for the conversion of solar energy to R. F. and laser power [AIAA PAPER 791416] 23 p0426 A79-34846
- LATTICE PARAMETERS**
 - A new rationale for the hysteresis effects observed in metal-hydrogen systems 22 p0250 A79-21704
- LAW (JURISPRUDENCE)**
 - The need for closed service areas in a supply economy based on line networks --- for German gas and electric utilities 21 p0168 A79-20447
 - National Aeronautics and Space Act of 1958, as amended, and related legislation [GPO-34-175] 21 p0214 N79-13932

LAYOUTS

Satellite Power System (SPS). State and local regulations as applied to satellite power system microwave receiving antenna facilities
[NASA-CR-157430] 23 p0548 N79-23494

LAYOUTS

Layout and design characteristics of MHD power stations 21 p0105 A79-16481

LEACHING

Applicability of the Meyers process for desulfurization of U.S. coal - A survey of 35 coals --- through chemical leaching 21 p0044 A79-12117
Coal desulfurization test plant status - July 1977 --- utilizing Meyers leach process 21 p0044 A79-12118

LEAD (METAL)

Motor vehicle lead emissions in the United States - An analysis of important determinants, geographic patterns and future trends 21 p0113 A79-16745

LEAD ACID BATTERIES

Rapid, efficient charging of lead-acid and nickel-zinc traction cells --- for electric vehicles 21 p0009 A79-10084
Response of lead-acid batteries to chopper-controlled discharge --- for electric vehicles 21 p0011 A79-10097
Effect of electrolyte impurity on the electrochemical performance of the lead/tetrafluoroboric acid/lead dioxide cell 22 p0246 A79-21485
Prospects for improvements in lead-acid batteries --- for electric vehicles 22 p0300 A79-29488
Electric vehicle battery development [SAE PAPER 790158] 22 p0314 A79-31363
A high energy tubular battery for a 1800 kg payload electric delivery van [SAE PAPER 790162] 22 p0315 A79-31367
A state of charge monitor for sealed lead-acid cells [ATR-78 (8114)-2] 21 p0220 N79-14558
Lead-acid battery: An evaluation of commercialization strategies [NTR-7593] 21 p0220 N79-14565
LEAD COMPOUNDS
The influence of lead compounds on automotive exhaust catalysts 21 p0116 A79-17253

LEAKAGE

Measured effects of flow leakage on the performance of the GT-225 automotive gas turbine engine [ASME PAPER 79-GT-3] 22 p0306 A79-30502
Effects of air damper leaks on solar energy system performance [SOLAR/0012-78/29] 23 p0563 N79-24497
Blending of hydrogen in natural gas distribution systems. Volume 3: Gas blends leakage tests of selected distribution system components [CONS/2925-3] 23 p0577 N79-26229

LEAST SQUARES METHOD

Analysis of conduction responses during an underground coal gasification experiment 23 p0531 A79-42898

LEGAL LIABILITY

Legal and economic aspects of engineering design in solar water heating systems 23 p0473 A79-38664
Legal barriers to solar heating and cooling of buildings [HCP/M2528-1] 21 p0209 N79-13534

LENS DESIGN

Solar concentrators --- using cheap refractive lenses 21 p0136 A79-17455
Design, construction and performance of Fresnel lens for solar energy collection 21 p0136 A79-17456
Efficient Fresnel lens for solar concentration 22 p0285 A79-26816

LIBRATIONAL MOTION

Transient attitude dynamics of satellites with deploying flexible appendages 21 p0047 A79-12325

SUBJECT INDEX

LIFE (DURABILITY)

Design features of the TDRSS solar array --- Tracking and Data Relay Satellites 21 p0002 A79-10019
Recent advances in electrocatalysis and their implications for fuel cells 21 p0038 A79-11807
Cast acrylic Fresnel lenses for solar energy concentration 23 p0432 A79-35076
Measurement of minority carrier lifetime in solar cells from photo-induced open-circuit voltage decay 23 p0438 A79-36610

LIFE CYCLE COSTS

User experience with on-road electric vehicles in the U.S.A. and Canada 21 p0009 A79-10080
Nickel-zinc vs. silver-zinc battery - A comparative study of baseline characteristics 21 p0009 A79-10083
Collection of data for estimating the probable life cycle costs of solar energy systems 21 p0087 A79-15828
Economic evaluation and optimization of solar heating systems 21 p0118 A79-17293
Some aspects towards the performance evaluation and ensuing design components of solar collector systems 21 p0130 A79-17404
A unified methodology for cost analysis of energy production 23 p0419 A79-34159
Solar energy systems and life cycle cost 23 p0474 A79-38672
Study of flywheel energy storage Volume 1: Executive summary [PB-282652/7] 21 p0176 N79-10555
Study of flywheel energy storage. Volume 2: Systems analysis [PB-282653/5] 21 p0176 N79-10556
Study of flywheel energy storage. Volume 3: System mechanization [PB-282654/3] 21 p0177 N79-10557
Study of flywheel energy storage. Volume 4: Life-cycle costs [PB-282655/0] 21 p0177 N79-10558
Sodium-antimony trichloride battery development program for load leveling [EPRI-EM-751] 21 p0186 N79-11501
Results of systems analysis --- effectiveness of integrated solar energy systems 21 p0218 N79-14534
Life-cycle costing. A guide for selecting energy conservation projects for public buildings --- computing the cost effectiveness of retrofitting and new buildings [PB-287804/9] 22 p0345 N79-17744
Market assessment of fuel cell total energy systems [ORNL/CON-36] 23 p0598 N79-27704

LIFT

An inverse problem of vertical-axis wind turbines 22 p0239 A79-20800

LIFT AUGMENTATION

Diffuser designs for improved wind energy conversion 22 p0279 A79-26182

LIGHT (VISIBLE RADIATION)

Accelerated testing of the optical radiation resistance of profiled polyethylene sleeves and sheets under natural climatic conditions 23 p0433 A79-35383
Encapsulation of terrestrial solar cell arrays by hydrocarbon foils transparent for both visible and infrared radiation 23 p0466 A79-38603

LIGHT AIRCRAFT

Turbine engines in light aircraft 21 p0047 A79-12380

LIGHT BEAMS

New candidate lasers for power beaming and discussion of their applications --- solar powered space lasers 21 p0110 A79-16622

LIGHT EMISSION

Solar energy conversion: The solar cell --- Book 23 p0423 A79-34449

LIGHT SCATTERING

- Self-adjusting laser-target system for laser fusion
21 p0086 A79-15625
- Stimulated Raman scatter in laser fusion target
chambers
21 p0155 A79-18794
- Effects of nonlinear decay of backscattered light
on the anomalous reflectivity --- in laser plasmas
22 p0310 A79-30742
- Thomson scattering measurements on ohmically
heated plasmas in the JFT-2 tokamak
23 p0390 A79-33345
- Stimulated scattering of light by ion modes in a
homogeneous plasma - Space-time evolution
23 p0478 A79-39566

LIGHT TRANSMISSION

- Laser-powered aircraft and rocket systems with
laser energy relay units
21 p0109 A79-16619
- The use of lasers for the transmission of power
21 p0109 A79-16621

LIGHT WATER BREEDER REACTORS

- Exploring future energy options - An economic
analysis
21 p0068 A79-14324

LIGHTING EQUIPMENT

- Market definition studies for photovoltaic highway
applications
[NASA-CR-159477]
22 p0354 A79-19451

LIGHTNING

- Lightning protection for the vertical axis wind
turbine
[SAND-77-1241]
21 p0221 A79-14567

LIGNIN

- Gasification of raw lignite in the tube-furnace
gasifier
22 p0310 A79-30996
- Texas lignite: Environmental planning opportunities
[PB-286870/1]
21 p0231 A79-15438

LIMESTONE

- Factors limiting limestone utilization efficiency
in fluidized-bed combustors --- in determining
sulfur dioxide emission level
21 p0008 A79-10069
- Potential agricultural uses of fluidized bed
combustion waste
21 p0064 A79-14108
- Limestone SO₂ reactivity and causes for reactivity
loss during multi cycle utilization
21 p0065 A79-14121
- Recent ooids from different environments -
Relationship between petrophysical properties
and microstructure
23 p0529 A79-42424

LIMITER CIRCUITS

- The effect of limiters and current profile on
elliptic free-boundary MHD equilibria
22 p0291 A79-27881

LIMNOLOGY

- Reservoir ecosystems and western coal development
in the upper Missouri River Basin
[PB-287363/6]
22 p0339 A79-17309

LINE SPECTRA

- Observed resonance lines of highly ionized
titanium, chromium, iron, and nickel in tokamak
discharges
23 p0478 A79-39676

LINEAR ARRAYS

- Passive cooling for linearly concentrated solar
cell arrays
23 p0509 A79-40998

LINEAR CIRCUITS

- Limit of formation of counterflows in plane linear
induction MHD machines
22 p0298 A79-29288

LINEAR EQUATIONS

- Equations of a conduction MHD ejector
22 p0298 A79-29289

LINEAR PROGRAMMING

- The Brookhaven buildings energy conservation
optimization model
[BNL-50828]
22 p0370 A79-21564

LININGS

- Compact fusion reactors using controlled imploding
liners
21 p0018 A79-10151
- A calculation of linear magnetic liner fusion
reactor performance
21 p0018 A79-10153

Study of heat transfer through refractory lined
gasifier vessel walls
[PE-2210-29]
23 p0556 A79-24306

LIQUID FLOW

- Second stage concentration with tapers for
fluorescent solar collectors
23 p0423 A79-34372

LIQUEFACTION

- Pyrolysis, thermal gasification, and liquefaction
of solid wastes and residues - Worldwide status
of processes /as of Fall 1977/
23 p0490 A79-40413

LIQUEFIED NATURAL GAS

- Detection of internal defects in a liquid natural
gas tank by use of infrared thermography
21 p0048 A79-12507
- Liquid mixture excess volumes and total vapor
pressures using a magnetic suspension densimeter
with compositions determined by chromatographic
analysis Methane plus ethane
21 p0085 A79-15324
- Mathematical models of direct initiation of
unconfined gas phase detonations --- hazards of
LNG/air clouds from spills
[AIAA PAPER 79-0289]
21 p0157 A79-19649
- The utilization of LH₂ and LNG cold for generation
of electric power by a cryogenic-type Stirling
engine
22 p0311 A79-31020

- Utilization of the cold by LNG vaporization with
closed-cycle gas turbine
[ASME PAPER 79-GT-84]
23 p0376 A79-32361
- Application of gas turbine/compressors in LNG plants
[ASME PAPER 79-GT-85]
23 p0376 A79-32362
- Liquefied natural gas wind tunnel simulation and
instrumentation assessments
[SAW-W1364-01]
21 p0195 A79-12256
- The use of liquid natural gas as heat sink for
power cycles
22 p0332 A79-16262

- Liquefied natural gas safety research overview
[AD-A063714]
22 p0365 A79-21233
- Liquefied energy gases safety. Volume 1:
Executive summary and main text
[EMD-78-28-VOL-1]
23 p0572 A79-25508
- Liquefied energy gases safety. Volume 2:
Appendix
[EMD-78-28-VOL-2]
23 p0573 A79-25509
- Liquefied energy gases safety. Volume 3: Federal
agency comments
[EMD-78-28-VOL-3]
23 p0573 A79-25510

LIQUID AIR

- Remote new energy sources utilization in on-site
non-polluting power plant - Liquid air as energy
carrier concept and final conversion plant design
23 p0416 A79-34141

LIQUID AMMONIA

- Theoretical basis and design for a residential
size solar powered ammonia/water absorption air
conditioning system
21 p0139 A79-17479
- Solar ammonia-water absorption system for cold
storage application
21 p0143 A79-17521
- Catalytic gasification of coals pretreated with
liquid ammonia
23 p0411 A79-34091

LIQUID COOLING

- Drag reduction by cooling in hydrogen fueled
aircraft
21 p0165 A79-20084
- The Alcator liquid nitrogen-cooled tokamaks
22 p0290 A79-27668
- Water-cooled gas turbine technology development -
Fuels flexibility
[ASME PAPER 79-GT-72]
22 p0307 A79-30536
- Solar cooling in the tropics
23 p0397 A79-33950

- Conceptual design of sodium-cooled central
receiver solar power plant
[AIAA PAPER 79-0994]
23 p0459 A79-38194

LIQUID FILLED SHELLS

- Solar energy storage via liquid filled cans - Test
data and analysis
23 p0400 A79-34005

LIQUID FLOW

- Liquid desiccant solar air conditioner and energy
storage system
21 p0021 A79-10176

- A practical electrochemical transport equation for non-dilute solutions --- for energy storage application
21 p0041 A79-11841
- Optimizing solar energy systems using continuous flow control
21 p0138 A79-17477
- Engineering influences on the thermal performance of open-flow liquid solar collectors
23 p0398 A79-33991
- LIQUID HELIUM**
Review of hydrodynamics and heat transfer for large helium cooling systems
23 p0481 A79-40073
- Studies of cryogenic liquid boiling in centrifugal acceleration fields --- heat transfer and critical heat flux densities in superconducting power cooling systems
23 p0530 A79-42893
- LIQUID HYDROGEN**
Alternate aircraft fuels prospects and operational implications
21 p0066 A79-14138
- The potential of liquid hydrogen as a military aircraft fuel
22 p0238 A79-20773
- Cryohydrogen-fuel for tomorrow's commercial aircraft
22 p0289 A79-27656
- The utilization of LH2 and LNG cold for generation of electric power by a cryogenic-type Stirling engine
22 p0311 A79-31020
- Study of hydrogen recovery systems for gas vented while refueling liquid-hydrogen fueled aircraft [NASA-CR-158991]
22 p0346 A79-18057
- Hydrogen storage devices for automobiles [BNL-25263]
23 p0583 A79-26518
- Turbine engine altitude chamber and flight testing with liquid hydrogen [NASA-TN-79196]
23 p0587 A79-27140
- LIQUID LITHIUM**
Lithium and potassium heat pipes for thermionic converters
21 p0013 A79-10113
- LIQUID METALS**
Liquid metal heat pipes for the central solar receiver
21 p0014 A79-10114
- A calculation of linear magnetic liner fusion reactor performance
21 p0018 A79-10153
- Liquid metal heat pipe performance in the presence of a transverse magnetic field --- for fusion reactors [ASME PAPER 78-EWAS-20]
21 p0048 A79-12569
- The role of interfacial heat and mechanical energy transfers in a liquid-metal MHD generator [ASME PAPER 78-WA/HT-33]
21 p0161 A79-19814
- Calculation and design of liquid-metal MHD induction machines --- Russian book
22 p0286 A79-27302
- An overview of liquid metal MHD --- for power generation
22 p0289 A79-27660
- Two-phase LMHD mixer-development experiments --- Liquid-Metal MHD generator flow characteristics
23 p0394 A79-33422
- An experimental investigation of rotating-drum separators for liquid-metal MHD applications
23 p0395 A79-33423
- Studies on two-phase flow mixing pertaining to liquid-metal magnetohydrodynamic power generation
23 p0527 A79-42030
- Rate of desulfurization from liquid iron and iron alloys with hydrogen [NRC/CHN-TT-1930]
23 p0553 A79-24120
- LIQUID NITROGEN**
The Alcatraz liquid nitrogen-cooled tokamaks
22 p0290 A79-27668
- Studies of cryogenic liquid boiling in centrifugal acceleration fields --- heat transfer and critical heat flux densities in superconducting power cooling systems
23 p0530 A79-42893
- LIQUID PHASES**
Liquid-phase reactions of vaporizing hydrocarbon fuels
21 p0052 A79-12987
- Improved anodes for liquid hydrocarbon fuel cell [AD-A058456]
21 p0206 A79-13504
- LIQUID ROCKET PROPELLANTS**
Feasibility of rocket propellant production on Mars
21 p0047 A79-12324
- LIQUID SODIUM**
Conceptual design of sodium-cooled central receiver solar power plant [AIAA PAPER 79-0994]
23 p0459 A79-38194
- LIQUID-GAS MIXTURES**
Mathematical models of direct initiation of unconfined gas phase detonations --- hazards of LNG/air clouds from spills [AIAA PAPER 79-0289]
21 p0157 A79-19649
- Toxic component concentration in kerosene-air mixture combustion products
22 p0291 A79-27733
- An experimental investigation of rotating-drum separators for liquid-metal MHD applications
23 p0395 A79-33423
- Studies on two-phase flow mixing pertaining to liquid-metal magnetohydrodynamic power generation
23 p0527 A79-42030
- LIQUID-SOLID INTERFACES**
Semiconductor liquid junction solar cells - Efficiency, electrochemical stability, and surface preparation
21 p0037 A79-11783
- Direct contact heat exchange for latent heat-of-fusion energy storage systems
23 p0416 A79-34132
- LIQUID-VAPOR EQUILIBRIUM**
Phase equilibria in coal hydrogenation systems [FE-2334-6]
21 p0171 A79-10238
- LIQUID-VAPOR INTERFACES**
The role of interfacial heat and mechanical energy transfers in a liquid-metal MHD generator [ASME PAPER 78-WA/HT-33]
21 p0161 A79-19814
- Experimental study of the characteristics of heat and mass transfer in a two-component low-temperature heat pipe
22 p0246 A79-21585
- LIQUIDS**
A liquid solar energy storage tank model. I - Formulation of a mathematical model
22 p0267 A79-24314
- Chemical and optical studies of heat transfer fluids containing solar energy absorbers [MLM-2549(OP)]
23 p0564 A79-24505
- Enthalpy measurements for coal-derived liquids
23 p0587 A79-26997
- LITHIUM**
Development and evaluation of a 600-kWh lithium-hydrogen peroxide reserve power system
21 p0011 A79-10095
- Electric power from laser fusion - The HTLIFE concept
21 p0030 A79-10249
- The secondary lithium electrode in non-aqueous electrolytes - Some problems, some solutions
21 p0041 A79-11838
- Silver selenate and silver tellurate as positive materials for lithium primary power sources
22 p0245 A79-21484
- On the possibility of using silver salts other than Ag2CrO4 in organic lithium cells
22 p0246 A79-21491
- Primary lithium battery technology and its application to NASA missions [NASA-CR-158229]
22 p0354 A79-19449
- Energy storage with ambient temperature rechargeable lithium batteries [PB-290934/9]
23 p0566 A79-24518
- Electric power from laser fusion: The HTLIFE concept [UCRL-81259-REV-1]
23 p0583 A79-26524
- LITHIUM CHLORIDES**
The lithium-thionyl chloride battery - A review
23 p0487 A79-40370
- LITHIUM COMPOUNDS**
Performance predictions of a LiBr absorption air conditioner utilizing solar energy
21 p0139 A79-17482
- Integration of evacuated tubular solar collectors with lithium bromide absorption cooling systems
21 p0139 A79-17483
- Integration of evacuated tubular solar collectors with lithium bromide absorption cooling systems
23 p0439 A79-36629

LITHIUM SULFUR BATTERIES

- Differential scanning calorimetry studies of possible explosion-causing mixtures in Li/SO₂ cells 22 p0246 A79-21487
- Low voltage behavior of lithium/metal dichalcogenide topochemical cells 22 p0286 A79-26995
- Discharge reaction mechanisms in Li/SOCl₂ cells 22 p0305 A79-30331
- A lithium/dissolved sulfur battery with an organic electrolyte 22 p0305 A79-30332
- Thermal management of the lithium/metal sulfide electric vehicle [SAE PAPER 790161] 22 p0315 A79-31366
- Migrational polarization in high current density molten salt battery and fuel cell analogs 23 p0446 A79-37273

LOADING MOMENTS

- Field testing of 5-kW commercial wind generator with an automatic load-matching device for utilizing its output 21 p0143 A79-17515

LOCOMOTIVES

- Fluid bed combustion coal fired steam locomotive 23 p0453 A79-37903
- Wayside energy storage summary. Volume 1: Summary [DOT-TSC-FRA-79-7-1-VOL-1] 22 p0370 A79-21563

LOGIC DESIGN

- Development of gas turbine performance seeking logic [ASME PAPER 78-GT-13] 21 p0031 A79-10257

LOGISTICS

- Toward a rational energy supply system - Economies and diseconomies of scale in an expensive energy future 23 p0420 A79-34168

LOGISTICS MANAGEMENT

- The need for closed service areas in a supply economy based on line networks --- for German gas and electric utilities 21 p0168 A79-20447

LONG TERM EFFECTS

- Asymptotic behaviour as a guide to the long term performance of solar water heating systems 21 p0041 A79-11872
- Long-term average performance of the Sunpak evacuated-tube collector 21 p0089 A79-15854
- Energy impact on economic activity and long-term trend forecast 23 p0419 A79-34163
- Preliminary long-term stability criteria for compressed air energy storage caverns in salt domes [PNL-2871] 23 p0562 A79-24487
- The significance of longwave radiation in flat plate solar collector testing 23 p0448 A79-37847

LORENTZ FORCE

- Effect of force field nonuniformity on flow in an MHD channel 21 p0101 A79-16365

LOSSES

- Calculation of hysteresis losses in superconducting coils 23 p0432 A79-35174

LOSSLESS MATERIALS

- Double-layer selective coating, high-temperature resistant, for the conversion of solar energy into heat 23 p0478 A79-39695

LOUISIANA

- An assessment of subsurface salt water disposal experience on the Texas and Louisiana Gulf coast for application to disposal of salt water from geopressured geothermal wells [NVO/1531-2] 22 p0366 A79-21523

LOW ASPECT RATIO

- An application of 3-D viscous flow analysis to the design of a low-aspect-ratio turbine [ASME PAPER 79-GT-53] 23 p0375 A79-32348

LOW COST

- Iron-air batteries for electric vehicles 21 p0011 A79-1009
- Low-cost concept for energy supply from the wind 21 p0058 A79-13651

Potential for low cost, high efficiency solar cells using indium tin oxide on semiconductor /OSOS/ solar cells

- 21 p0122 A79-17338
- Solar concentrators --- using cheap refractive lenses 21 p0136 A79-17455
- An evaluation of the strategy of low cost horizontal axis windmills 21 p0143 A79-17517
- General view of low cost solar cell development in Japan 21 p0149 A79-17997
- Recent developments in low cost silicon solar cells for terrestrial applications --- sheet production methods 22 p0239 A79-20821
- Wind-turbine-generator rotor-blade concepts with low-cost potential 22 p0240 A79-20828
- Materials for low-cost solar cells 22 p0252 A79-22099
- Encapsulant materials for \$2/watt terrestrial photovoltaic arrays 22 p0266 A79-24138
- System designs for low cost-low ratio solar concentrators 22 p0293 A79-28142
- Low cost thin-film CdS-based solar cells progress and promise [ASME PAPER 79-SOL-15] 22 p0309 A79-30549
- A simple solar gas turbine plant [ASME PAPER 79-GT-90] 23 p0377 A79-32367
- Low-cost encapsulation materials for terrestrial solar cell modules 23 p0439 A79-36636
- Approaches to low-cost solar cells 23 p0441 A79-36784
- The design construction and proving of a low cost 5kW wind powered turbine for isolated applications 23 p0452 A79-37893
- A low cost wind energy conversion system for heating of domestic premises 23 p0452 A79-37894
- Low cost Darrieus vertical-axis wind turbine design [AIAA PAPER 79-0966] 23 p0456 A79-38174
- Contribution to solving the energy crisis - Simulating the prospects for low cost energy through silicon solar cells 23 p0475 A79-38877
- Spray deposited Cd/1-x/Zn/x/S films for low cost solar cells 23 p0500 A79-40912
- A candidate low-cost processing sequence for terrestrial silicon solar cell panel 23 p0501 A79-40919
- A 1982 low cost photovoltaic module factory study 23 p0501 A79-40921
- Low cost manufacturing of monocrystalline silicon solar cells - A review of technological solutions 23 p0501 A79-40922
- Silicon solar cell arrays - Technical status, terrestrial applications, and future developments for low cost production 23 p0501 A79-40923
- High efficiency, low cost processes for 3 in. diameter silicon solar cells 23 p0501 A79-40924
- Efficient polycrystalline solar cells made from low-cost refined metallurgical silicon 23 p0504 A79-40959
- Evaluations of candidate encapsulation designs and materials for low-cost silicon photovoltaic arrays 23 p0507 A79-40982
- A low cost, durable anti-reflective film for solar collectors 23 p0507 A79-40983
- Epitaxial solar cells on low-cost silicon substrates 23 p0519 A79-41068
- Encapsulation materials for photovoltaic arrays 23 p0534 A79-43294
- Phase 1 of the automated array assembly task of the low cost silicon solar array project [NASA-CR-158120] 22 p0348 A79-18451
- Automated array assembly, phase 2. Low-cost solar array project, task 4 [NASA-CR-158365] 22 p0358 A79-20481

- Phase two of the array automated assembly task for the low cost solar array project
[NASA-CR-158359] 22 p0359 N79-20484
- Solar space heaters for low-income families
[PB-289244/6] 22 p0363 N79-20526
- A low cost high temperature sun tracking solar energy collector
22 p0366 N79-21390
- The array automated assembly task for the low cost solar array project, phase 2
[NASA-CR-158538] 23 p0560 N79-24469
- Low-cost solar array project
23 p0570 N79-25489
- LSA engineering status
23 p0570 N79-25490

LOW TEMPERATURE

- Theoretical and experimental analysis of a latent heat storage system --- solar energy absorbers
21 p0121 A79-17323
- A heat pipe collector for low temperatures
21 p0127 A79-17385
- Experimental study of the characteristics of heat and mass transfer in a two-component low-temperature heat pipe
22 p0246 A79-21585
- Current status and prospects for low-temperature solar energy
22 p0269 A79-24623
- Superconductivity in antenna engineering
22 p0311 A79-31008
- Use of fluidized media in thermal power systems
23 p0436 A79-35525
- Development of low-temperature solar collectors and collectors for thermal and photovoltaic conversion
23 p0463 A79-38583
- Low-temperature application of solar energy in South Africa
22 p0340 N79-17324

LOW TEMPERATURE ENVIRONMENTS

- Experiments in solar space heating and cooling for moderately insolated regions
21 p0137 A79-17464

LOW TEMPERATURE TESTS

- Noble gas MHD generator experiments at low stagnation temperatures
23 p0394 A79-33419
- On the problem of heat transfer in low-temperature heat pipes
23 p0532 A79-42938

LUBRICANTS

- High sulfur fuel effects in a two-cycle high speed army diesel engine
[AD-A059534] 21 p0216 N79-14232

LUBRICATING OILS

- US Army/Environmental Projection Agency re-refined engine oil program
[AD-A056806] 21 p0171 N79-10216

LUMINAIRES

- A novel low-cost photovoltaic concentrator
23 p0508 A79-40996
- The optimum voltage for batteries used in standby lighting systems
[BLL-RTS-11512] 22 p0347 N79-18439

LUMINESCENCE

- Luminescent solar concentrators
23 p0509 A79-40997

LUMINOUS INTENSITY

- Overview of novel photovoltaic conversion techniques at high intensity levels
21 p0108 A79-16610

LUNAR BASES

- Energy conversion at a lunar polar site
21 p0108 A79-16607
- Commercial prospects for extraterrestrial materials
23 p0395 A79-33748
- The polar lunar base - A viable alternative to L-5
[AAS 78-191] 23 p0427 A79-34862

LUNAR CRUST

- Excavation costs for lunar materials
[AIAA PAPER 79-1376] 23 p0425 A79-34828

LUNAR LAUNCH

- Electromagnetic propulsion alternatives --- in mass drivers
[AIAA PAPER 79-1400] 23 p0426 A79-34840

LUNAR SOIL

- Development of space manufacturing systems concepts utilizing lunar resources
[AIAA PAPER 79-1411] 23 p0426 A79-34844

- Lunar resources utilization - An economic assessment --- of manufacturing and construction of large structures in space
[AIAA PAPER 79-1412] 23 p0426 A79-34845

M

MAGMA

- Shallow magmatic reservoirs as heat source of geothermal systems - Preliminary interpretation of data available for the Neapolitan active volcanic areas
21 p0075 A79-14727

MAGNESIUM ALLOYS

- The storage and release of hydrogen from magnesium alloy hydrides for vehicular applications
22 p0249 A79-21688
- Method of producing a p-type or n-type alloy for direct thermoelectric energy conversion
22 p0260 A79-23615

MAGNESIUM SULFATES

- Production of hydrogen by a thermo-electrochemical cycle using solar energy
23 p0383 A79-32966

MAGNET COILS

- A superconducting dipole magnet system for the MHD facility at Univ. of Tennessee Space Institute
21 p0017 A79-10140
- Flywheel energy storage system for JT-60 toroidal field coil
21 p0112 A79-16729
- Design of a D-shaped toroidal field coil
21 p0156 A79-19083
- Design criteria for multilayer superconductive magnets
22 p0236 A79-20536
- Superconducting energy storage magnets
22 p0236 A79-20537
- Heat pulses required to quench a potted superconducting magnet
22 p0236 A79-20538
- The role of the Large Coil Program in the development of superconducting magnets for fusion reactors
22 p0236 A79-20541
- SLPX - Superconducting Long-Pulse Tokamak Experiment
22 p0237 A79-20557
- Design and development of the US-TESPE toroidal coil
22 p0311 A79-31014

MAGNETIC ANOMALIES

- Magnetotelluric and geoelectric measurements for geothermal exploration in the Phlegraean Fields /preliminary results/
21 p0075 A79-14732

MAGNETIC CIRCUITS

- Superconducting magnets --- for MHD applications
21 p0105 A79-16485

MAGNETIC COILS

- Conductor for LASL 10-MW hr superconducting energy storage coil
21 p0085 A79-15309
- Calculation of hysteresis losses in superconducting coils
23 p0432 A79-35174

MAGNETIC CONTROL

- A calculation of linear magnetic liner fusion reactor performance
21 p0018 A79-10153
- Tokamak reactors for breakeven: A critical study of the near-tera fusion reactor program --- Book
21 p0077 A79-14776
- Magnetic divertors --- in large tokamak plasma confinement experiments
21 p0078 A79-14781
- Fusion power by magnetic confinement - Program plan
21 p0080 A79-14794
- Magnetically confined plasma solar collector --- satellite based system in space
21 p0109 A79-16617
- Divertor experiments for controlling plasma-wall interactions
23 p0443 A79-36881
- First wall and divertor plate material selection in fusion reactors
23 p0444 A79-36886

MAGNETIC DIPOLES

- A superconducting dipole magnet system for the MHD facility at Univ. of Tennessee Space Institute
21 p0017 A79-10140

SUBJECT INDEX

MAGNETIC MIRRORS

- Fabrication experiences and operating characteristics of the U.S. SCNS superconducting dipole magnet for MHD research 21 p0084 A79-15304
- A superconducting dipole magnet for the UTSI MHD Facility 22 p0235 A79-20533
- A source of error in cusp plasma leak measurements 23 p0446 A79-37265
- MAGNETIC EFFECTS**
- Desulfurization of coals by high-intensity high-gradient magnetic separation - Conceptual process design and cost estimation 21 p0044 A79-12116
- Liquid metal heat pipe performance in the presence of a transverse magnetic field --- for fusion reactors [ASME PAPER 78-ENAS-20] 21 p0048 A79-12569
- Enhancement of magnetic separability in coal liquefaction residual solids 23 p0461 A79-38434
- Plasma particle trajectories around spacecraft propelled by ion thrusters 23 p0552 A79-24029
- MAGNETIC FIELD CONFIGURATIONS**
- Heating and confinement in the CLEO stellarator 21 p0070 A79-14459
- Magnetic divertors --- in large tokamak plasma confinement experiments 21 p0078 A79-14781
- The 'PINTOR 1' design - A minimum size tokamak experimental reactor 21 p0078 A79-14782
- SLPX - Superconducting Long-Pulse Tokamak Experiment 22 p0237 A79-20557
- Effect of the magnetic configuration of the poloidal diverter on the plasma in the T-12 finger-ring tokamak 22 p0244 A79-21429
- Accounting for the effect of a yoke in an MHD linear induction machine by stipulating boundary conditions of a new kind 22 p0247 A79-21627
- Minimum-average-B wells in linked magnetic mirror fields --- for plasma control in fusion reactors 22 p0252 A79-22237
- Local theory of finite-beta, collisional drift modes --- plasma stability analysis 22 p0253 A79-22244
- Wave reflection from the lower hybrid surface - A toroidal effect --- in tokamaks 22 p0255 A79-22427
- Equilibrium relations in the presence of arbitrary plasma diffusion in axisymmetric configurations 22 p0257 A79-22979
- Collisional transport --- of plasmas in plane and toroidal geometry 22 p0257 A79-22980
- MHD stability for a spherator with a purely poloidal magnetic field 22 p0271 A79-24863
- Macroscopic stability and beta limit in the ELMO Bumpy Torus 22 p0291 A79-27876
- Theory of dissipative drift instabilities in sheared magnetic fields --- in confined toroidal plasmas 22 p0292 A79-27884
- Design and development of the US-TESPE toroidal coil 22 p0311 A79-31014
- MHD stability of Spheromak 22 p0313 A79-31189
- Plasma behavior near the neutral line between parallel currents --- in planar zeta pinch 22 p0324 A79-31754
- Dynamic stabilization of toroidal discharges in weak longitudinal magnetic fields 22 p0324 A79-31766
- Confinement of ohmically heated plasmas in Heliotron D 23 p0390 A79-33346
- The ELMO Bumpy Torus - An alternative fusion reactor concept 23 p0407 A79-34060
- Conceptual design study of a doublet fusion ignition test reactor 23 p0407 A79-34065
- Divertor experiments for controlling plasma-wall interactions 23 p0443 A79-36881
- Plasma-surface interactions in Q-enhanced mirror fusion systems 23 p0444 A79-36887
- A source of error in cusp plasma leak measurements 23 p0446 A79-37265
- Measurements of plasma shape in a tokamak 23 p0527 A79-41944
- MAGNETIC FIELDS**
- Attenuating the transverse edge effect in MHD generators 21 p0063 A79-13985
- Fast penetration of a magnetic field into a low-density plasma 22 p0244 A79-21432
- Cyclotron-wave spectrum in a plasma with two ion species 22 p0245 A79-21443
- Integral invariants and quasi-MHD nonlinear dissipation --- in magnetized toroidal plasmas 22 p0270 A79-24862
- Electromechanical conversion of energy during the deceleration of a piston in a uniform magnetic field 22 p0309 A79-30599
- Magnetic instability of laser-produced plasma and spontaneous generation of magnetic fields 23 p0423 A79-34400
- High-gradient magnetic separation for removal of sulfur from coal [PB-290945/5] 23 p0569 A79-25469
- MAGNETIC INDUCTION**
- Accounting for the effect of a yoke in an MHD linear induction machine by stipulating boundary conditions of a new kind 22 p0247 A79-21627
- Calculation and design of liquid-metal MHD induction machines --- Russian book 22 p0286 A79-27302
- Optimality criteria in the compensation of the longitudinal boundary effect in induction MHD machines 22 p0298 A79-29277
- Two asymptotic solutions for analyzing the transverse edge effect in induction MHD machines 22 p0298 A79-29287
- Limit of formation of counterflows in plane linear induction MHD machines 22 p0298 A79-29288
- Fuel release from solid fossil-fuel deposits by electrical induction heating 23 p0446 A79-37285
- MAGNETIC LENSES**
- Generation and applications of high power ion beams to fusion research 21 p0070 A79-14466
- MAGNETIC MIRRORS**
- The Mirror Fusion Test Facility /MFTF/ 21 p0018 A79-10147
- Mirror fusion reactors 21 p0018 A79-10148
- The mirror machine program in the USA --- controlled fusion experiments and research facilities 21 p0070 A79-14461
- Fusion power by magnetic confinement - Program plan 21 p0080 A79-14794
- Superconductivity for mirror fusion 22 p0236 A79-20542
- Minimum-average-B wells in linked magnetic mirror fields --- for plasma control in fusion reactors 22 p0252 A79-22237
- Particle orbits in field-reversed mirrors --- for plasma confinement in fusion reactor 22 p0253 A79-22239
- Stabilization of drift loss-cone instability /DCI/ by addition of cold ions --- in collisional hydrogen plasma confinement 22 p0291 A79-27882
- Evidence for neutral-beam-injected oxygen impurities in 2XIIB --- mirror confined plasma 22 p0292 A79-27887
- Radial transport in the ELMO Bumpy Torus in collisional regimes 22 p0312 A79-31184

MHD gas turbine energy conversion for mirror fusion reactors 22 p0313 A79-31192

A scheme for direct conversion of plasma thermal energy into electrical energy 22 p0324 A79-31765

Efficient high-power high-energy neutral beams for the reference mirror reactor 23 p0397 A79-33919

Report on a simple fusion reactor model that is already in operation 23 p0407 A79-34058

Plasma-surface interactions in Q-enhanced mirror fusion systems 23 p0444 A79-36887

Complex static mirror solar concentration arrays 23 p0452 A79-37886

Warm plasma effects on drift cyclotron loss cone mode --- in mirror machines 23 p0478 A79-39568

Spectrally split tandem cell converter studies 23 p0513 A79-41028

Overview of the magnetic fusion energy development and technology program [HCP/T3073-01] 21 p0193 N79-11887

MAGNETIC PROBES

Structure of the current shell in a Z pinch 22 p0245 A79-21434

MAGNETIC SHIELDING

Magnetic shielding of large high-power-satellite solar arrays using internal currents 23 p0552 N79-24026

MAGNETIC SURVEYS

Magnetotelluric and geoelectric measurements for geothermal exploration in the Phlegraean Fields /preliminary results/ 21 p0075 A79-14732

Toward assessing the geothermal potential of the Jemez Mountains volcanic complex: A telluric-magnetotelluric survey [LA-7656-MS] 22 p0358 N79-20458

MAGNETIC VARIATIONS

Small-scale magnetic fluctuations inside the Macrotron tokamak 23 p0381 A79-32473

MAGNETICALLY TRAPPED PARTICLES

Characteristics of a predemonstration fusion device 21 p0078 A79-14784

Asymptotic theory of dissipative trapped electron mode overlapping many rational surfaces --- in toroidal plasmas 22 p0270 A79-24855

MAGNETOACOUSTIC WAVES

Magneto-acoustic resonance heating in the ion-cyclotron frequency domain --- of tokamak plasmas 22 p0271 A79-24866

Dynamic stabilization of toroidal discharges in weak longitudinal magnetic fields 22 p0324 A79-31766

MAGNETOHYDRODYNAMIC FLOW

Supersonic flow in an MHD channel with a downwash flow at the inlet 21 p0085 A79-15342

Effect of force field nonuniformity on flow in an MHD channel 21 p0101 A79-16365

On the flow of a conducting fluid between parallel disks with a transverse magnetic field. I - A theoretical investigation on a nonequilibrium plasma flow as a compressible inviscid fluid 21 p0156 A79-19445

Nonstationary two-dimensional magnetohydrodynamic flow in a radial channel 22 p0247 A79-21626

Optimization of a diagonal MHD channel 22 p0247 A79-21628

On the diffusive instability of some simple steady magnetohydrodynamic flows 22 p0278 A79-26163

Two-dimensional MHD channel design --- for energy performance improvement at lower wall temperature 22 p0279 A79-26183

Velocity, temperature, and electrical conductivity profiles in hydrogen-oxygen MHD duct flows 22 p0279 A79-26184

Comparison of results of calculation of flow in an MHD generator with experimental data obtained on the U-25 device 22 p0306 A79-30392

Thermoelectric magnetohydrodynamics 22 p0312 A79-31098

Tokamak plasma diagnosis by surface physics techniques 23 p0443 A79-36883

Diagnostic techniques in combustion MHD flows 23 p0478 A79-39508

MAGNETOHYDRODYNAMIC GENERATORS

Economic optimization of the coal-fired MHD Steam Power Plant 21 p0016 A79-10134

Reducing combustion air temperature variations in magnetohydrodynamic/steam power plants 21 p0016 A79-10135

Considerations for MHD power generation development 21 p0016 A79-10136

A proposed 40 MWe MHD pilot plant 21 p0017 A79-10137

Thermal modeling of coal-fired MHD plant components 21 p0017 A79-10138

Controlling NOx from a coal-fired MHD process 21 p0017 A79-10139

A superconducting dipole magnet system for the MHD facility at Univ. of Tennessee Space Institute 21 p0017 A79-10140

Progress in the testing of materials and design concepts for directly-fired MHD air heater service 21 p0017 A79-10141

Design studies and trade-off analyses for a superconducting magnet/MHD power generator system 21 p0017 A79-10142

The ion fly-wheel effect on the electro-thermal instability in non-equilibrium MHD Hall disc generators 21 p0046 A79-12270

Magnetohydrodynamic/steam power plant modeling and control 21 p0046 A79-12274

'Local' breakdown criterion in highly ionized gas flow 21 p0049 A79-12683

Stability of combustion in the combustion chamber of an MHD generator 21 p0049 A79-12691

U-25B MHD unit for carrying out investigations under the conditions of strong electric and magnetic fields 21 p0049 A79-12692

Channel No. 1 of the MHD generator of a U-25B unit for carrying out investigations in strong electric and magnetic fields 21 p0049 A79-12693

A collisional plasma rotating between two cylinders 21 p0049 A79-12694

Combustion of porous particles --- coal for MHD generators 21 p0049 A79-12708

Attenuating the transverse edge effect in MHD generators 21 p0063 A79-13985

Coal slag effects in MHD generators 21 p0080 A79-14934

Corrosion and deposits in MHD generator systems 21 p0081 A79-14935

Controlled utilization of coal slag in the MHD topping cycle 21 p0081 A79-14936

The MHD interaction and plasma properties in a shock tube driven disk generator with swirl 21 p0083 A79-15260

Commercial realization of MHD - A challenge for superconducting magnets 21 p0084 A79-15302

Cryogenic aspects of the U.S. SCMS superconducting dipole magnet for MHD research 21 p0084 A79-15303

Fabrication experiences and operating characteristics of the U.S. SCMS superconducting dipole magnet for MHD research 21 p0084 A79-15304

Design study of superconducting magnets for a combustion magnetohydrodynamic /MHD/ generator 21 p0084 A79-15305

- Design of superconducting magnets for full-scale MHD generators 21 p0084 A79-15306

MARYLAND

- The energy dilemma: A challenge for Maryland. Proceedings Maryland General Assembly/AISLE Conference [PB-284703/6]
21 p0199 N79-12579

MASS DRIVERS (PAYLOAD DELIVERY)

- Electromagnetic propulsion alternatives --- in mass drivers [AIAA PAPER 79-1400]
23 p0426 A79-34840

MASS FLOW

- The optimization of heat exchanger solidity for coal-fired fluidized bed combustors [ASME PAPER 79-GT-78]
23 p0376 A79-32357

MASS RATIOS

- Parametric study of two planar high power flexible solar array concepts [NASA-CR-157841]
21 p0205 N79-13501

MASS TRANSFER

- Rate of desorption in a solar regenerator
21 p0055 A79-13611
- Mass transfer in a current source during circulation of the mixture driven by gaseous reaction products --- in fuel cell
21 p0164 A79-19851
- Experimental study of the characteristics of heat and mass transfer in a two-component low-temperature heat pipe
22 p0246 A79-21585
- Transient response of a solar regenerator
23 p0526 A79-41935
- International Heat Transfer Conference, 6th, Toronto, Canada, August 7-11, 1978, General Papers. Volume 2 - Heat transfer in energy conversion, natural convection, combined heat and mass transfer, condensation, and forced convection
23 p0530 A79-42886
- Simultaneous heat and mass transfer in soil with application to waste heat utilization
23 p0531 A79-42930

MATERIAL ABSORPTION

- Wilson parameters for the system H₂, N₂, CO, CO₂, CH₄, H₂S, CH₃OH, and H₂O --- for cold methanol absorption in coal gasification
22 p0282 A79-26462
- A gas absorption cycle for electric power generation
23 p0418 A79-34154

MATERIAL BALANCE

- Weak points of our prediction models for raw materials strategy --- waste materials and scrap recycling
22 p0265 A79-24040

MATERIALS

- Materials for fuel cells [PB-285360/4]
21 p0212 N79-13553

MATERIALS HANDLING

- An incremental model for conversion of solar energy in agricultural systems 23 p0479 A79-39840
- Handling and co-firing of shredded municipal refuse and coal in a spreader-stoker boiler 23 p0488 A79-40391
- Methane production from manure 23 p0494 A79-40741
- Measured air flow rates through microorifices and flow prediction capability [PB-286868/5] 21 p0217 N79-14344
- Report on capital requirements for transportation of energy materials [TID-28599] 23 p0545 N79-22965

MATERIALS RECOVERY

- New processes for the recovery of resource materials from coal combustion wastes 21 p0007 A79-10065

 - Fundamentals of mathematical modeling of solar-radiation regime energy structure 21 p0166 A79-20352

Mathematical model of interelectrode breakdown in
MHD generator 21 p0167 A79-20418

Space-dependent thermal stability of reacting
tokamak plasmas 22 p0253 A79-22242

Prediction of the behavior of a solar storage
system by means of recurrent stochastic models
--- of insolation 22 p0258 A79-23295

Modeling and simulation. Volume 9 - Proceedings of
the Ninth Annual Pittsburgh Conference,
University of Pittsburgh, Pittsburgh, Pa., April
27, 28, 1978. Part 1 - Energy and power system
modeling - Ecological and biomedical modeling.
Part 2 - Socioeconomic modeling. Part 3 -
Control and identification. Part 4 Methodology
and applications 22 p0263 A79-23776

A fundamental model for the evolution of a
two-phase geothermal reservoir with application
to environmental impact analysis 22 p0263 A79-23777

A liquid solar energy storage tank model. I -
Formulation of a mathematical model 22 p0267 A79-24314

The interaction of the wind field with a
horizontal axis wind turbine 22 p0278 A79-26177

A two dimensional vortex sheet model of a Savonius
Rotor 22 p0278 A79-26178

Modeling two-phase flow in a swirl combustor
22 p0280 A79-26189

Modeling the champagne effect in compressed air
energy storage 22 p0280 A79-26190

Direct solar transmittance for a clear sky --- for
insolation of solar conversion systems 22 p0296 A79-28361

Study of integrated gasification combined cycle
plant interaction and control 22 p0306 A79-30530
[ASME PAPER 79-GT-60]

Fiat Research Center hybrid vehicle prototype
[SAE PAPER 790014] 22 p0313 A79-31351

Mathematical modelling of passive solar systems
22 p0321 A79-31441

Measured and modeled passive performance in Montana
--- for solar heating and thermal storage 22 p0322 A79-31445

A numerical model investigation of tidal phenomena
in the Bay of Fundy and Gulf of Maine 22 p0323 A79-31554

A hybrid cyclogiro-Darrieus-rotor wind turbine
23 p0387 A79-33243

Mechanistic modeling of pulverized coal combustion
--- in MHD generators 23 p0390 A79-33380

A two-dimensional pulverized coal combustor model
--- for MHD generators 23 p0390 A79-33383

Further modeling of a solar collector based on
linear clipped-V channels 23 p0399 A79-33993

System studies for a tokamak fusion power plant
23 p0407 A79-34061

Technical-economic modeling in energy planning
23 p0419 A79-34164

Solar radiation data modeling and its role in
solar system studies --- for energy conversion
systems performance prediction 23 p0429 A79-35056

The aerodynamic design and testing of a vertical
axis windmill 23 p0452 A79-37895

Analytical and experimental evaluation of
Cycloturbine aerodynamic performance ---
vertical-axis windmill 23 p0456 A79-38176
[AIAA PAPER 79-0968]

Which is the true solar house 23 p0463 A79-38578

Pulverized-coal combustion and gasification:
Theory and applications for continuous flow
processes --- Book 23 p0474 A79-38871

Offshore wind power model estimates 23 p0482 A79-40110

Wake interaction in an array of windmills - Theory
and preliminary results 23 p0483 A79-40112

A numerical study of the effects of complex
terrain on dynamics of airflow and pollutant
dispersion 23 p0535 A79-43383

Orientation studies for single-axis concentrating
collectors 23 p0537 A79-43677

Kinetic modeling of pyrolysis and
hydrogasification of carbonaceous materials ---
converting wood waste char to clean fuels 21 p0179 N79-11150

Computer modeling of automotive engine combustion
[UCRL-80451] 21 p0181 N79-11412

Battery Energy Storage Test (BEST) Facility.
Phenomenological cell modeling: A tool for
planning and analyzing battery testing at the
BEST facility 21 p0184 N79-11490

METAL MATRIX COMPOSITES

Heat pulses required to quench a potted
superconducting magnet 22 p0236 A79-20538

METAL OXIDE SEMICONDUCTORS

Optimum antireflection coating for
Antireflection-coated Metal-Oxide-Semiconductor
/AMOS/ solar cells 21 p0042 A79-11955

On the role of interface states in MOS solar cells
21 p0122 A79-17337

On the role of interface states in MOS solar cells
21 p0156 A79-19092

The operation of the
semiconductor-insulator-semiconductor solar cell
- Experiment 23 p0440 A79-36680

Recent investigations of metal oxide/CdTe
heterojunction solar cells 23 p0502 A79-40926

The photovoltaic effect in interfacial layer
heterojunctions or
semiconductor-insulator-semiconductor diodes -
Indium-tin-oxide on silicon, gallium arsenide
and indium phosphide 23 p0505 A79-40967

Photovoltaic properties of In2O3/semiconductor
heterojunction solar cells 23 p0505 A79-40968

Fabrication and characterization of ITO/CuInSe2
photovoltaic heterojunctions --- Indium Tin Oxide
23 p0505 A79-40969

Experimental and theoretical study of silicon MOS
solar cells with different barrier metals
23 p0507 A79-40985

Large area thin film gallium arsenide solar cells
23 p0515 A79-41042

METAL OXIDES

Growth of refractory oxide layers by
electrochemical vapor deposition /EVD/ at
elevated temperatures --- for fuel cells
21 p0039 A79-11812

Bibliographical study of electrocatalysis
involving mixed oxide compounds in an alkaline
medium
[P/539/77/20] 23 p0588 A79-27284

METAL PARTICLES

Selective absorption of solar energy by ultrafine
metal particles 21 p0127 A79-17382

Selective absorption of solar energy in ultrafine
metal particles - Model calculations 22 p0273 A79-25746

Thin film solar absorber consisting of
Au-particles in SiO2 23 p0465 A79-38599

METAL PLATES

A study for optimum use of metallic plates for
thermal storage in solar processes
21 p0122 A79-17331

A wave power machine using free floating vertical
plates 21 p0151 A79-18104

METAL POWDER

Heat transfer characteristics of porous metallic
matrix metal-hydrides 22 p0251 A79-21706

METAL SHEETS

Optimum collection geometries for copper tube -
copper sheet flat plate collectors 21 p0127 A79-17387

METAL SURFACES

High reliability contacts for miniature
thermoelectric converters 21 p0027 A79-10228

Chloride corrosion and its inhibition in refuse
firing 21 p0080 A79-14930

Investigation of the corrosion performance of
boiler, air heater, and gas turbine alloys in
fluidized combustion systems 21 p0080 A79-14931

Corrosion of superalloys, inconels, and stainless
steels by the products from fluidized-bed coal
combustion 21 p0080 A79-14932

Status report on selective surfaces --- solar
collector absorbers 21 p0126 A79-17374

Investigation and perspectives on iron oxide, zinc
conversion coating, zinc oxide, cobalt oxide and
tungsten oxide as spectral selective solar
absorber surfaces 21 p0126 A79-17375

The structure and properties of Cu based selective
surfaces formed on an Al-Cu alloy by chemical
brightening and etching treatments --- for flat
plate solar collectors 21 p0127 A79-17384

Mechanism of erosion of metal electrodes of the
channel of a MHD generator 22 p0306 A79-30391

Laser-induced desorption experiments with
technical metal surfaces --- carbon monoxide and
hydrogen interaction with Ni 23 p0445 A79-36969

NASCAP modelling of high-voltage power system
interactions with space charged-particle
environments --- particle impact on solar
satellite surfaces 23 p0479 A79-39806

METAL VAPORS

Absorption of solar radiation by alkali vapors ---
for efficient high temperature energy converters
21 p0108 A79-16612

METAL-GAS SYSTEMS

Hydrogen storage by LaNi5 - Fundamentals and
applications 21 p0038 A79-11803

Thermodynamics of pressure plateaus in
metal-hydrogen systems 22 p0238 A79-20772

Hydrogen storage electrode systems 22 p0251 A79-21710

Applications of metal hydrides --- emphasizing use
as energy storage media 22 p0251 A79-21715

The iron-titanium - hydrogen system: A
transmission electron microscope /TEM/ study
22 p0285 A79-26947

Hydrogen storage in the form of metal hydrides
23 p0388 A79-33251

METALLIZING

The Pd2Si - /Pd/ - Ni - solder plated
metallization system for silicon solar cells
23 p0506 A79-40979

Development of economical improved thick film
solar cell contact
[NASA-CR-158358] 22 p0359 A79-20486

Metallization of large silicon wafers
[NASA-CR-158575] 23 p0550 A79-23517

METALLOGRAPHY

The metallurgy and production of rechargeable
hydrides --- for hydrogen storage 22 p0250 A79-21703

METALLURGY

Metallurgical coatings 1978; Proceedings of the
Fifth International Conference, San Francisco,
Calif., April 3-7, 1978. Volumes 1 & 2 22 p0327 A79-31951

Potential applications of solar furnaces in
materials industry 23 p0471 A79-38654

Bureau of Mines research 1977. A summary of
significant results in mining, metallurgy, and
mineral economics [PB-284743/2] 21 p0217 A79-14521

METALS

Solar cells having integral collector grids
[NASA-CASE-LEW-12819-1] 21 p0182 A79-11467

Energy use patterns for metal recycling
[PB-284855/4] 21 p0201 A79-13152

Demetallization catalyst tests on heavy residual
oils [PB-285937/9] 21 p0232 A79-15864

METEOROLOGICAL CHARTS

Effects of weather and pollution on incident solar
energy - Basic measurements leading to computer
models 21 p0065 A79-14117

Solar radiation charts --- monthly average
insolation 22 p0263 A79-23763

On the use of synoptic weather map typing to
define solar radiation regimes 22 p0272 A79-25392

METEOROLOGICAL PARAMETERS

A numerical solar radiation model based on standard meteorological observations --- for energy system application

21 p0041 A79-11871

Power extracted from the wind

21 p0058 A79-13650

Total solar radiation in Mexico using sunshine hours and meteorological data

21 p0150 A79-18026

Stochastic predictions of solar cooling system performance

21 p0164 A79-19848

[ASME PAPER 78-WA/SOL-16]
Storage tank efficiency as simulated in a Markovian model of meteorology

22 p0254 A79-22272

The role of applied meteorology in the Canadian energy programme

22 p0317 A79-31414

Wind energy assessment

23 p0406 A79-34051

Wind energy utilization by means of aerogenerators

23 p0522 A79-41220

Prospecting for meteorological energy in Hawaii

23 p0536 A79-43615

Meteorological measurement data for solar energy utilization

23 p0574 A79-25524

METEOROLOGICAL SATELLITES

Use of satellites in solar applications --- for insolation mapping and space power stations

21 p0104 A79-16468

Synchronous meteorological and geostationary operational environmental satellites battery and power system design

22 p0370 A79-21571

METHANE

Aspects of pulsating combustion --- gaseous methane burning system

21 p0008 A79-10072

Feasibility of rocket propellant production on Mars

21 p0047 A79-12324

Rare earth and actinide intermetallics as hydrogenation catalysts

22 p0251 A79-21713

Simple methane digestors

23 p0386 A79-33234

Methane production from manure

23 p0494 A79-40741

Potential for biomass utilization in Canada

23 p0494 A79-40744

Design criteria and operational guidelines for a pilot-scale anaerobic digester

23 p0523 A79-41371

Methane generation from human, animal, and agricultural wastes

21 p0171 A79-10240

[PB-276469/4]
Comparative automotive engine operation when fueled with ethanol and methanol

21 p0201 A79-13189

[HCP/W1737-01]
Methane production from carbon oxides over borohydride-reduced transition metals

21 p0226 A79-15177

[PB-286385/0]
Methane utilization from coalbeds for power generation

22 p0352 A79-19171

[TID-28408]
Synthetic fuels: Methane. Citations from the Engineering Index data base

22 p0365 A79-21223

[NTIS/PS-79/0030/1]
Methane drainage study in the Sunnyside coalbed, Utah

23 p0540 A79-22606

[PB-289772/6]
Methane production from beef cattle feedlots

23 p0589 A79-27333

[CONF-7806107-2]
METHODOLOGY

A unified methodology for cost analysis of energy production

23 p0419 A79-34159

A methodology for evaluating the potential materials and energy recovery from municipal solid waste

21 p0215 A79-13935

Methodology for modeling geothermal district heating for residential markets

22 p0361 A79-20502

[BNL-50905]
Comparison of three experimental methods used in determining the thermal performance of flat-plate solar collectors

23 p0557 A79-24434

METHYL ALCOHOLS

Novel technology for conversion of methanol and synthesis gas to hydrocarbons

21 p0007 A79-10064

Development of a 1 kW fuel cell aggregate with acid electrolyte

21 p0148 A79-17994

Wilson parameters for the system H₂, N₂, CO, CO₂, CH₄, H₂S, CH₃OH, and H₂O --- for cold methanol absorption in coal gasification

22 p0282 A79-26462

On future carburants. II --- alternative fuels from alcohols and hydrogen

22 p0296 A79-28439

Observations on the production of methanol and anhydrous ammonia from wood

23 p0386 A79-33230

Process aging studies in the conversion of methanol to gasoline in a fixed bed reactor

23 p0492 A79-40454

Potential of biomass to substitute for petroleum in Canada

23 p0494 A79-40743

Potential for biomass utilization in Canada

23 p0494 A79-40744

Methanol decomposition bottoming cycle for IC engines

23 p0495 A79-40774

[SAE PAPER 790427]
Methanol from wood waste: A technical and economic study

21 p0194 A79-12239

[FPL-12]
Fluid bed process studies on selective conversion of methanol to high octane gasoline

23 p0555 A79-24190

[PB-2890-15]
Methanol from coal

23 p0593 A79-27619

MEXICO

Total solar radiation in Mexico using sunshine hours and meteorological data

21 p0150 A79-18026

MICHIGAN

Identification of wood energy resources in central Michigan

22 p0347 A79-18424

[NASA-CR-158130]

MICROCLIMATOLOGY

Radiation regime of inclined surfaces --- Russian book on solar energy engineering and microclimatology

22 p0282 A79-26353

MICROCOMPUTERS

A digital control system for superconducting magnet

22 p0268 A79-24508

The development and implementation of microprocessor based control and instrumentation subsystems for solar energy applications

23 p0402 A79-34020

MICROCRACKS

Microcrack technology for geothermal exploration and assessment.

22 p0367 A79-21530

[PB-290173/4]

MICROMETEOROLOGY

A micrometeorological network for study of transport and diffusion of pollutants in two Apennine Valleys

23 p0586 A79-26638

MICROINITIALIZATION

Optimization method of isotopic thermoelectric microgenerator geometry

22 p0260 A79-23613

Slicing of silicon into sheet material: Silicon sheet growth development for the large area

23 p0586 A79-26979

silicon sheet task of the low cost silicon solar array project

[NASA-CR-158732]

MICROORGANISMS

The microbial production of methane from the putrescible fractions of sorted household waste

23 p0396 A79-33753

MICROPARTICLES

Selective absorption of solar energy by ultrafine metal particles

21 p0127 A79-17382

MICROPLASMAS

Study of the thermal inertia of an electrode microarc

23 p0530 A79-42869

MICROPROCESSORS

A microprocessor based solar controller

21 p0082 A79-14979

- A microprocessor based solar monitoring system
21 p0088 A79-15838
- A microprocessor compatible temperature measuring system --- for solar house energy monitoring
21 p0088 A79-15839

[NASA-CR-158250] 22 p0355 N79-19462
- Tests of NASA ceramic thermal barrier coating for
gas-turbine engines [NASA-TM-79116] 22 p0357 N79-20118
- Authorizing appropriations to the National
Aeronautics and Space Administration [H-REPT-96-52] 22 p0364 N79-20928
- NASA's OAST program: An overview 22 p0370 N79-21574
- Effort of the Jet Propulsion Laboratory 22 p0370 N79-21575
- Lewis Research Center program 22 p0370 N79-21576
- Accelerated test program 22 p0370 N79-21577
- Environmental testing of block 2 solar cell modules
[NASA-CR-158521] 23 p0542 N79-22628
- The role of fuel cells in NASA's space power systems
[NASA-TM-79182] 23 p0546 N79-23133
- NATURAL GAS**
- Aspects of pulsating combustion --- gaseous
methane burning system 21 p0008 A79-10072
- Performance of a Stirling engine powered heat
activated heat pump --- gas heating-cooling system 21 p0011 A79-10098
- Study of the applicability of the geochemistry of
gases in geothermal prospecting 21 p0075 A79-14736
- Shock-tube measurements of induction and
post-induction rates for low-Btu gas mixtures
--- derived from shale oil retorting and coal
gasification 21 p0083 A79-15245
- Production and use of low and medium Btu gas 21 p0095 A79-15912
- Transport fuels from natural gas 22 p0292 A79-27897
- Hydrogen as a mid-term gaseous fuel supplement by
blending with natural gas 23 p0415 A79-34129
- Recent solids from different environments -
Relationship between petrophysical properties
and microstructure 23 p0529 A79-42424
- Environmentally induced cracking of natural gas
and liquid pipelines. Volume 2: Appendices A
and B [PB-282924/0] 21 p0181 N79-11446
- Environmentally induced cracking of natural gas
and liquid pipelines. Volume 1: Technical report
[PB-282923/2] 21 p0181 N79-11447
- Potential producibility and recovery of natural
gas from geopressed aquifers of the Cenozoic
sediments of the Gulf Coast Basin [FE-2025-3] 21 p0192 N79-11607
- Proceedings of Energy Resource 5th Conference
[PB-286246/4] 21 p0230 N79-15423
- GAO work involving title V of the Energy Policy
and Conservation Act of 1975 [PB-286400/7] 21 p0230 N79-15424
- Northern Alaska hydrocarbon resources
[PB-287394/1] 22 p0332 N79-16342
- Tests of Wisconsin S12D engine running on natural
gas with addition of carbon dioxide [AD-A058486] 22 p0339 N79-17230
- Direction of gas supply research in the US 22 p0340 N79-17320
- Late diagenetic indicators of buried oil and gas.
2: Direct detection experiment at Cement and
Garza fields, Oklahoma and Texas, using enhanced
LANDSAT 1 and 2 images [E79-10099] 22 p0347 N79-18373
- Methane utilization from coalbeds for power
generation [TID-28408] 22 p0352 N79-19171
- Economic impacts of a transition to higher oil
prices --- estimation and budget allocations
[BNL-50871] 22 p0364 N79-20927
- Development of combustion data to utilize low-Btu
gases as industrial process fuels [FE-2489-30] 23 p0576 N79-26143
- Blending of hydrogen in natural gas distribution
systems. Volume 3: Gas blends leakage tests of
selected distribution system components [CONS/2925-3] 23 p0577 N79-26229
- Synthetic natural gas in California: When and why
--- from coal 23 p0593 N79-27615
- Underground storage of natural gas by interstate
pipeline companies for 1976 and winter 1976 - 1977
[DOE/EIA-0151] 23 p0597 N79-27684
- Midterm oil and gas supply modeling system
methodology description [DOE/EIA-0103/17] 23 p0600 N79-28059
- NAVIGATION SATELLITES**
- The NTS-2 satellite solar cell experiment 21 p0001 A79-10016
- NAVIGATION TECHNOLOGY SATELLITES**

[AD-A067463] 23 p0595 N79-27667
- NEAR WAKES**
- Flowfield measurements in the vicinity of the
rotor of a 10 kw windmill [AIAA PAPER 79-0969] 23 p0475 A79-38889
- NEBRASKA**
- Photovoltaic-powered irrigation experiments in the
United States --- crop drying and irrigating in
Nebraska [COO-4094-28] 23 p0596 N79-27673
- Neat 25 kilowatt photovoltaic system --- conferences
[COO-4094-19] 23 p0596 N79-27677
- NEGATIVE IONS**
- Efficient high-power high-energy neutral beams for
the reference mirror reactor 23 p0397 A79-33919

NEODYMIUM COMPOUNDS

Excited-state kinetics for Nd/thd/3 and Tb/thd/3
chelate vapors and prospects as fusion laser media
23 p0422 A79-34192

NEODYMIUM LASERS

Frequency doubling of a solar pumped Nd:YAG laser
21 p0044 A79-12062

DOE programs in material development for fusion
laser systems
21 p0082 A79-15137

Requirements and new materials for fusion laser
systems
21 p0082 A79-15138

A survey of laser glasses --- for fusion studies
21 p0083 A79-15140

Performance of the short-pulse oscillators for
Argus and Shiva
21 p0083 A79-15171

Long-pulse laser-plasma interactions at 10 to the
12th and 10 to the 15th W/sq cm
23 p0537 A79-43718

NEON

Measurements of compressed core density of
laser-imploded targets by x-ray continuum-edge
shift
21 p0154 A79-18479

NETHERLANDS

The performance of the heating system in the solar
house of the Eindhoven University of Technology
22 p0276 A79-25938

The Netherlands research program on wind energy
23 p0481 A79-40102

Physical planning aspects of large-scale wind
energy exploitation in the Netherlands
23 p0482 A79-40107

Implications of large scale introduction of power
from large wind energy conversion systems into
the existing electric power supply system in the
Netherlands
23 p0485 A79-40132

NETWORK ANALYSIS

Application of the superposition principle to
solar-cell analysis
22 p0300 A79-29426

NETWORK SYNTHESIS

Depletion of available wind power by a large
network of wind generators
23 p0453 A79-37899

Design of high efficiency monolithic stacked
multijunction solar cells
23 p0513 A79-41029

Performance of AlGaAs/GaAs terrestrial
concentrator solar cells
23 p0514 A79-41038

GaAs solar cells for high solar concentration
applications
23 p0514 A79-41039

High efficiency AlGaAs/GaAs concentrator solar
development
23 p0515 A79-41040

Large area thin film gallium arsenide solar cells
23 p0515 A79-41042

NEUTRAL BEAMS

Development of energetic neutral beams to the
megawatt power level for controlled
thermonuclear research
21 p0054 A79-13439

Magnetic multipole line-cusp plasma generator for
neutral beam injectors
22 p0238 A79-20746

Evidence for neutral-beam-injected oxygen
impurities in 2XIIIB --- mirror confined plasma
22 p0292 A79-27887

Efficient high-power high-energy neutral beams for
the reference mirror reactor
23 p0397 A79-33919

Measurement of the neutron spectra from
beam-heated PLT plasmas
23 p0478 A79-39724

NEUTRAL GASES

Heat transport near the wall of a tokamak reactor
22 p0324 A79-31764

NEUTRAL PARTICLES

A simple neutral density profile calculation for
tokamaks with lambda sub mp much smaller than a
22 p0255 A79-22379

Recombination-induced neutral-particle flux in
tokamaks
22 p0291 A79-27877

NEUTRON DIFFRACTION

Structural studies of hydrides by neutron
diffraction
22 p0248 A79-21681

Hydrogen storage in FeTi - Surface segregation and
its catalytic effect on hydrogenation and
structural studies by means of neutron diffraction
22 p0312 A79-31156

NEUTRON EMISSION

Optimum properties of a noncylindrical pinch ---
neutron energy yield in fusion plasma
22 p0244 A79-21433

NEUTRON IRRADIATION

Materials problems and possible solutions for near
term tokamak fusion reactors
21 p0079 A79-14790

NEUTRON SPECTRA

Measurement of the neutron spectra from
beam-heated PLT plasmas
23 p0478 A79-39724

NEW HAMPSHIRE

Solar project cost report: Kalwall Corporation
Warehouse, Manchester, New Hampshire
[SOLAR/2015-78/60] 23 p0562 A79-24484

Solar project description. Kalwall Corporation
Warehouse, Manchester, New Hampshire
[SOLAR/2015-78/50] 23 p0564 A79-24499

NEW MEXICO

Toward assessing the geothermal potential of the
Jemez Mountains volcanic complex: A
telluric-magnetotelluric survey
[LA-7656-MS] 22 p0358 A79-20458

A time domain survey of the Los Alamos Region, New
Mexico
[LA-7657-MS] 22 p0365 A79-21248

Estimates of New Mexico's future oil production
including reserves of the 50 largest pools
[PB-291780/5] 23 p0540 A79-22597

NEW YORK

Planning for resource recovery in the 'Big Apple'
--- New York City plans for refuse utilization
23 p0491 A79-40424

NEW ZEALAND

Harnessing geothermal energy in Rotorua, New Zealand
23 p0408 A79-34068

Geothermal systems in the Hauraki Rift zone /New
Zealand/ - An example for geothermal systems
over an inferred upper mantle swell
23 p0408 A79-34069

Energy scenarios: Supplementary studies
[NP-23292] 21 p0211 A79-13543

NICKEL

Investigation of extruded sintered-nickel-powder
porous materials used as electrodes in fuel cells
23 p0433 A79-35343

Laser-induced desorption experiments with
technical metal surfaces --- carbon monoxide and
hydrogen interaction with Ni
23 p0445 A79-36969

A thermoanalytical investigation of nickel
catalysts for fuel cells
23 p0481 A79-40008

Catalytic effect of Ni and K2CO2 in the
gasification of carbon and coal
22 p0364 A79-21215

NICKEL ALLOYS

Hot corrosion of Ni-base turbine alloys in
atmospheres in coal-conversion systems
22 p0288 A79-27395

A survey of the hydrogen storage properties of
nickel-copper-mischmetal-calcium alloys
23 p0414 A79-34121

NICKEL CADMIUM BATTERIES

Nickel-cadmium battery reconditioning and long
term performance in geosynchronous orbit
spacecraft
21 p0029 A79-10242

Mathematics of coiling in cylindrical
electrochemical cells - The theory of a spiral
bounded by two circles and its application to
the spiral-wound nickel-cadmium cell
22 p0246 A79-21489

Study of the characteristics of Ni-Cd storage
batteries for space applications
22 p0304 A79-30207

Some fatigue characteristics of nickel battery
plaque
[AD-A060370] 21 p0230 A79-15415

The 100 kW space station --- regenerative fuel cells and nickel hydrogen and nickel cadmium batteries for solar arrays 22 p0371 A79-21603

NICKEL COATINGS

Spectral selective properties of black chrome and nickel electrodeposited coatings for solar absorber 21 p0127 A79-17383

Field performance of certain selective and neutral surfaces in solar collectors 21 p0131 A79-17417

NICKEL COMPOUNDS

Hydrogen storage by LaNi5 - Fundamentals and applications 21 p0038 A79-11803

Absorption of hydrogen by the intermetallics NdNi5 and LaNi4Cu and a correlation of cell volumes and desorption pressures 21 p0038 A79-11804

Localization and diffusion of hydrogen in lanthanum-nickel compounds 22 p0248 A79-21682

Some applications of LaNi5-type hydrides --- using reversible reaction with hydrogen working fluid for heat storage 22 p0249 A79-21694

Metal hydride electrodes for electrochemical energy storage 22 p0249 A79-21695

Hydrides of rare earth-nickel compounds - Structure and formation enthalpies 22 p0250 A79-21697

NICKEL HYDROGEN BATTERIES

The 100 kW space station --- regenerative fuel cells and nickel hydrogen and nickel cadmium batteries for solar arrays 22 p0371 A79-21603

Multistack nickel-hydrogen units 22 p0371 A79-21610

NICKEL OXIDES

Electrochemical-ellipsometric studies of oxide films formed on nickel during oxygen evolution 21 p0038 A79-11799

Design and cost study of a nickel-iron oxide battery for electric vehicles. Volume 2: Public report [ANL-K-3723-VOL-1] 21 p0222 A79-14579

NICKEL PLATE

The fabrication of Schottky-barrier solar cells by electroless nickel plating 23 p0436 A79-35746

NICKEL ZINC BATTERIES

Nickel-zinc vs. silver-zinc battery - A comparative study of baseline characteristics 21 p0009 A79-10083

Rapid, efficient charging of lead-acid and nickel-zinc traction cells --- for electric vehicles 21 p0009 A79-10084

An improved method for analysis of hydroxide and carbonate in alkaline electrolytes containing zinc 21 p0035 A79-11546

The zinc electrode in sealed alkaline cells 21 p0040 A79-11823

Nickel-zinc battery for aircraft and missile applications [AD-A059295] 21 p0220 A79-14561

NIGHT

An analytical investigation of the performance of solar collectors as nighttime heat radiators in airconditioning cycles [NASA-CR-3111] 22 p0363 A79-20519

NITINOL ALLOYS

Nitinol thermodynamic state surfaces --- heat engine material 21 p0045 A79-12264

NITRIC OXIDE

Kinetics of nitric oxide formation in combustion 21 p0053 A79-12989

NITRIDES

/Sn/x-GaAs polymer-semiconductor solar cells 21 p0154 A79-18504

NITROGEN COMPOUNDS

The fate of fuel nitrogen - Implications for combustor design and operation 21 p0080 A79-14927

NITROGEN DIOXIDE

Emissions of nitrogen dioxide from a large gas-turbine power station 21 p0152 A79-18344

NITROGEN OXIDES

Controlling NOx from a coal-fired MHD process 21 p0017 A79-10139

Investigating combustion turbine burner performance with coal derived liquids having high fuel bound nitrogen [ASME PAPER 78-GT-126] 21 p0033 A79-10791

Simultaneous nitrogen oxides and sulfur dioxide removal by absorption-reduction scrubbing 21 p0066 A79-14125

Combustion modifications for the control of air pollutant emissions from coal fired utility boilers [ASME PAPER 78-WA/APC-7] 21 p0158 A79-19738

Investigating the formation of oxides of nitrogen when burning solid fuel --- air pollution by industrial exhaust gases 23 p0474 A79-38864

An investigation of the formation of oxides of nitrogen in a pulverised coal flame 23 p0474 A79-38865

NOx formation with various combustion processes of premixed gas 23 p0528 A79-42220

Low NOx combustion concepts for advanced power generation systems firing low-Btu gas [PB-282983/6] 21 p0178 A79-10610

Nitrogen oxide air pollution. Volume 2, part 1: Control technology. A bibliography with abstracts [NTIS/PS-78/0971/8] 21 p0199 A79-12591

Nitrogen oxide air pollution. Part 3: Atmospheric chemistry. A bibliography with abstracts [NTIS/PS-78/0973/4] 21 p0199 A79-12593

Combustion research on the fate of fuel-nitrogen under conditions of pulverized coal combustion [PB-286208/4] 21 p0232 A79-15474

Combustion modification effects on NOx emissions from gas-, oil-, and coal-fired utility boilers [PB-289878/1] 23 p0545 A79-22661

Status of NO sub x control for coal-fired power plants 23 p0592 A79-27609

Fluidized combustion of coal --- to limit SO2 and NOx emissions 23 p0593 A79-27613

NITROGEN TETROXIDE

Using N2O4 in a solar gas-turbine plant 21 p0167 A79-20357

NOISE POLLUTION

Noise-control needs in the developing energy technologies [COO-4389-1] 21 p0213 A79-13569

Environmental conservation concerns in transportation: Energy, noise, and air quality [PB-286550/9] 21 p0232 A79-15868

NONAQUEOUS ELECTROLYTES

Electrochemical characteristics of ZrO2-Y2O3 solid electrolytes for fuel cells 21 p0039 A79-11813

The secondary lithium electrode in non-aqueous electrolytes - Some problems, some solutions 21 p0041 A79-11838

Low voltage behavior of lithium/metal dichalcogenide topochemical cells 22 p0286 A79-26995

Electrochemical energy storage systems - On the selection of electrolytes for high-energy density storage batteries 23 p0495 A79-40749

NONCONDENSABLE GASES

Effect of noncondensable gases on geothermal power generation 21 p0015 A79-10125

NONDESTRUCTIVE TESTS

Evaluation of methods for analyzing silver-zinc cells 21 p0010 A79-10085

Detection of internal defects in a liquid natural gas tank by use of infrared thermography 21 p0048 A79-12507

Nonequilibrium Ionization

- Effects of position of output electrodes in entrance region of open-cycle diagonal type MHD generator 21 p0153 A79-18468
- Effect of finite boundary layer on the ionization instability in non-equilibrium MHD generators 21 p0153 A79-18469

Nonequilibrium Plasmas

- The ion fly-wheel effect on the electro-thermal instability in non-equilibrium MHD Hall disc generators 21 p0046 A79-12270
- On the flow of a conducting fluid between parallel disks with a transverse magnetic field. I - A theoretical investigation on a nonequilibrium plasma flow as a compressible inviscid fluid 21 p0156 A79-19445
- Effect of diffusion on electron density across the nonequilibrium MHD channel 23 p0479 A79-39839

Nonequilibrium Thermodynamics

- Quasi-equilibrium Air Standard heat balanced cycle analysis 21 p0028 A79-10232

Nonequilibrium Gas

- Stability of gas in the gap of inclined flat plate solar collectors - Effects of convective boundary condition and radiation 23 p0398 A79-33990

Nonlinear Equations

- Non-linear numerical algorithms for studying tearing modes --- in tokamaks 22 p0257 A79-22981
- Parametric decay of lower hybrid waves in a plasma - Effect of ion nonlinearity --- in tokamaks 22 p0269 A79-24814
- Integral invariants and quasi-MHD nonlinear dissipation --- in magnetized toroidal plasmas 22 p0270 A79-24862
- Dynamics of high-beta tokamaks with anisotropic pressure 23 p0526 A79-41939
- Non-linear saturation of the tearing mode in a reversed field pinch 23 p0527 A79-41941

Nonlinear Optics

- Review of theories for predicting n2 in glasses and crystals --- refractive index of fusion laser materials 21 p0083 A79-15139
- Generation of the new coherent radiation by harmonic conversion and nonlinear mixing for certain applications --- optical interactions 21 p0111 A79-16639
- Effects of nonlinear decay of backscattered light on the anomalous reflectivity --- in laser plasmas 22 p0310 A79-30742

Nonuniform Flow

- Electric effects in window-frame MHD generators with non-uniform velocity and conductivity in the transverse plane 23 p0479 A79-39841

Nonuniform Plasmas

- A source of error in cusp plasma leak measurements 23 p0446 A79-37265

North Atlantic Treaty Organization (NATO)

- The AGARD propulsion and energetics panel, 1952-1977 [AGARD-AR-111] 22 p0337 A79-16848

Nose Cones

- Test and development of ceramic combustors, stators, nose cones, and rotor tip shrouds 21 p0049 A79-12821

Nozzle Design

- Flow modeling of an atmospheric pressure, entrained-type coal gasifier 22 p0280 A79-26188

Nozzle Flow

- Evaluation of the expected diffuser performance for a large MHD generator 23 p0393 A79-33408

Nuclear Devices

- Nuclear Science Symposium, 25th, and Symposium on Nuclear Power Systems, 10th, Washington, D.C., October 18-20, 1978, Proceedings 22 p0297 A79-28901

Nuclear Electric Power Generation

- Energy conversion engineering --- Book 22 p0302 A79-29575

Rational utilization of electricity in order to satisfy the general objectives of the national energy policy 23 p0525 A79-41821

Coal and nuclear: A comparison of the cost of generating baseload electricity by region [PB-289585/2] 22 p0355 A79-19469

Systems definition space-based power conversion systems --- for satellite power transmission to earth [NASA-CR-150268] 23 p0546 A79-23483

Nuclear powered satellite studies [COO-4045-3] 23 p0588 A79-27221

Nuclear Electric Propulsion

NASA's thermionic technology program 21 p0026 A79-10217

Power coupling alternatives for the NEP thermionic power system [NASA-CR-158372] 22 p0367 A79-21547

Nuclear Energy

A systems' study of our energy problems 21 p0074 A79-14704

Materials problems in solar, nuclear and storage of energy 21 p0094 A79-15901

Energy for the long run - Fission or fusion 22 p0256 A79-22760

Nuclear Science Symposium, 25th, and Symposium on Nuclear Power Systems, 10th, Washington, D.C., October 18-20, 1978, Proceedings 22 p0297 A79-28901

A nuclear-solar energy strategy 23 p0421 A79-34174

Remarks on economic growth and energy requirements 23 p0535 A79-43523

Nuclear power today and tomorrow 22 p0340 A79-17317

Nuclear Fission

Perspectives on energy: Issues, ideas, and environmental dilemmas /2nd edition/ --- Book 21 p0147 A79-17646

Controlled thermonuclear fusion 22 p0287 A79-27339

Nuclear Fuel Burnup

A dynamic multi-criteria analysis of spent-nuclear-fuel alternatives --- economic analysis 23 p0567 A79-24813

Nuclear Fuel Reprocessing

Proliferation-resistant nuclear fuel cycles [ORNL/TM-6392] 21 p0214 A79-13849

Nuclear Fuels

Fuel technology and the environment --- nuclear reactor caused radiation effects and transmutation 21 p0079 A79-14787

Development of cryogenic targets for laser fusion 21 p0085 A79-15333

Cryogenic pellets for laser-fusion research - Theoretical and practical considerations 21 p0085 A79-15334

Point-contact conduction-cooling technique and apparatus for cryogenic laser fusion pellets 21 p0085 A79-15335

Pellet X-ray spectra for laser fusion reactor designs 22 p0291 A79-27878

Energy, helium, and the future --- U.S. He demand projection and conservation program 23 p0422 A79-34181

Hydrogen isotope distillation for fusion power reactors 23 p0427 A79-34989

Proliferation-resistant nuclear fuel cycles [ORNL/TM-6392] 21 p0214 A79-13849

Current and projected fuel costs --- electric rate schedules and projected costs of fossil, synthetic, and nuclear fuels 21 p0218 A79-14532

Nuclear power today and tomorrow 22 p0340 A79-17317

Nuclear Fusion

A new method for producing cryogenic laser fusion targets 21 p0085 A79-15332

Controlled thermonuclear fusion 22 p0287 A79-27339

Parametric requirements for noncircular Tokamak commercial fusion plants [GA-A-14876] 21 p0214 A79-13871

NUCLEAR HEAT

SUBJECT INDEX

- Parametric requirements for noncircular Tokamak commercial fusion plants
[GA-A-14946] 21 p0214 N79-13872
- Department of Energy policy for fusion energy
[DOE/ER-0018] 23 p0586 N79-26952
- Fusion power program
[ANL/FPP-78-2] 23 p0586 N79-26953
- Lasers: Their applications and operational requirements
23 p0590 N79-27494
- NUCLEAR HEAT**
- Transmission of energy by open-loop chemical energy pipeline
23 p0411 A79-34096
- Hydrogen energy transport systems and nuclear heat - A promising way to conserve fossil energy resources
23 p0415 A79-34127
- Energy conservation by waste heat utilization
23 p0417 A79-34145
- NUCLEAR MAGNETIC RESONANCE**
- Nuclear magnetic resonance studies of metal hydrides
22 p0248 A79-21683
- NMR studies of hydrogen relaxation and diffusion in $TiFeH/x/$ and $TiFe/1-y/Mn/y/H/x/$
22 p0248 A79-21684

OXIDE FILMS

Electrochemical-ellipsometric studies of oxide films formed on nickel during oxygen evolution
21 p0038 A79-11799

Photovoltaic effect in metal-insulator-semiconductor structure
21 p0123 A79-17343

Transparent conducting coatings for solar cells
21 p0124 A79-17350

Thin-film coatings in solar water heating systems
23 p0452 A79-37887

Thin film solar absorber consisting of Au-particles in SiO₂
23 p0465 A79-38599

The photovoltaic properties of thin copper oxide films
23 p0499 A79-40909

Schottky barrier cell and method of fabricating it [NASA-CASE-NPO-13689A]
23 p0568 A79-25311

OXIDIZERS

Evaluation of the use of oxygen as oxidant in fossil fuel fired open cycle MHD-steam energy conversion processes
22 p0353 A79-19444

OXYGEN

Study of the interaction of H₂O and O₂ with the surface of TiO₂ by electron stimulated desorption and Auger and characteristic loss spectroscopies
21 p0037 A79-11793

O₂ reduction kinetics in concentrated acids --- in fuel cells
21 p0038 A79-11809

The effects of wall temperature on light impurities in Alcator --- tokamak device
22 p0313 A79-31188

Hydrogen production at reduced cost through electrolysis and buoyancy
23 p0414 A79-34116

Oxygen adsorption on stainless steel --- in tokamak reactors
23 p0445 A79-36965

Evaluation of the use of oxygen as oxidant in fossil fuel fired open cycle MHD-steam energy conversion processes
22 p0353 A79-19444

MHD performance calculations with oxygen enrichment [NASA-TM-79140]
23 p0571 A79-25499

Development of combustion data to utilize low-Btu gases as industrial process fuels [FE-2489-30]
23 p0576 A79-26143

OXYGEN IONS

Evidence for neutral-beam-injected oxygen impurities in 2XII-B --- mirror confined plasma
22 p0292 A79-27887

OZONE

On the depletion of ambient ozone by a rural coal-fired power plant near Portage, Wisconsin
21 p0082 A79-15052

P

P-I-N JUNCTIONS

Characterization of electron and ion current flow in very large aspect-ratio terawatt diodes employing heated and unheated anodes
21 p0154 A79-18480

Study of photoelectric characteristics of photocells made from high-resistivity silicon
22 p0296 A79-28666

P-N JUNCTIONS

Role of the diode exponential factor in CdS solar cells
21 p0123 A79-17348

Response of p-n junction solar cells to concentrated sunlight and partial illumination
21 p0124 A79-17353

Response of a solar cell to intense and nonuniform illumination when used with solar concentrators
21 p0125 A79-17357

Sensitivity calculations for the design of solar cells. I - Schottky barrier devices
21 p0125 A79-17360

Characteristics of silicon photoconverters with inversion layer
21 p0166 A79-20349

Temperature dependence of photovoltaic solar energy conversion for GaAs homojunction solar cell
22 p0256 A79-22768

A two-junction cascade solar-cell structure
22 p0256 A79-22856

High-efficiency thin-film polycrystalline-silicon solar cells
22 p0273 A79-25744

A better approach to the evaluation of the series resistance of solar cells
22 p0281 A79-26242

An investigation of dark current and photocurrent superposition in photovoltaic devices
22 p0291 A79-27871

Measurement of minority carrier lifetime in solar cells from photo-induced open-circuit voltage decay
23 p0438 A79-36610

Silicon solar cells for operation in concentrated sunlight
23 p0441 A79-36780

Solar cells fabricated by ionised-cluster beam technology
23 p0441 A79-36785

Analysis of an edge-illuminated graded-gap solar cell
23 p0442 A79-36793

Forward-bias capacitance and current measurements for determining lifetimes and band narrowing in p-n junction solar cells
23 p0497 A79-40890

Analysis of ion-implanted solar cells
23 p0508 A79-40991

Defect free very shallow p+/n junction and associated photovoltaic effect
23 p0520 A79-41082

Design considerations for silicon HLE solar cells
23 p0521 A79-41094

Back wall solar cell [NASA-CASE-LEW-12236-2]
21 p0217 A79-14528

P-TYPE SEMICONDUCTORS

Suppression of vaporization in copper-silver-selenide thermoelectric materials
21 p0027 A79-10224

Comprehensive thermoelectric properties of n- and p-type 78a/o Si - 22a/o Ge alloy
22 p0259 A79-23604

Method of producing a p-type or n-type alloy for direct thermoelectric energy conversion
22 p0260 A79-23615

Some effects of leg surface heat losses on the performance of a p-n type thermoelectric generator
22 p0260 A79-23616

Recombination effects in p-type silicon Schottky barrier solar cells
23 p0508 A79-40992

PACIFIC NORTHWEST (US)

Wind power potential in the Pacific Northwest
22 p0244 A79-21334

Region at the crossroads: The Pacific Northwest searches for new sources of electric energy [PB-284691/3]
21 p0222 A79-14583

PACKAGING

Status of wraparound contact solar cells and arrays --- for spacecraft electric propulsion
21 p0001 A79-10014

Double-sided solar cell package [NASA-CASE-NPO-14199-1]
23 p0570 A79-25482

PACKING DENSITY

High efficiency, high density terrestrial solar panels
23 p0499 A79-40905

PALEONTOLOGY

Continental geotherms during the Archaean --- heat production in ancient earth crust
22 p0269 A79-24620

PALLADIUM ALLOYS

Electronic states of concentrated Pd-H alloys from de Haas-van Alphen measurements
22 p0248 A79-21686

High temperature thermodynamics of the solid solutions of hydrogen and deuterium in palladium and in the Pd/0.9/Ag/0.1/ alloy
22 p0249 A79-21689

PANELS

Fibron panels - A technical report --- fiberglass reinforced plastics for solar collectors
21 p0031 A79-10403

Cooling applications of thermic diode panels [ASHE PAPER 78-WA/SOL-10]
21 p0163 A79-19842

- A theoretical analysis of solar collector/storage panels
[ASME PAPER 78-WA/SOL-11] 21 p0163 A79-19843
- Solar collector storage panel
[ASME PAPER 78-WA/SOL-12] 21 p0163 A79-19844
- High efficiency, high density terrestrial solar panels 23 p0499 A79-40905
- A candidate low-cost processing sequence for terrestrial silicon solar cell panel 23 p0501 A79-40919
- An improved solar panel and method for fabricating the same
[NASA-CASE-WFO-14490-1] 22 p0348 A79-18445
- PARA HYDROGEN**
Radiation-catalyzed ortho-to-para transition in solid tritium 23 p0474 A79-38806
- PARABOLAS**
Performance testing of the Hexcel Parabolic Trough Solar Collector
[SAND-76-0381] 21 p0221 A79-14569
- PARABOLIC BODIES**
Evaluation of a plastic parabolic concentrator for terrestrial photovoltaic applications 23 p0508 A79-40995
- PARABOLIC REFLECTORS**
Effects of pointing errors on receiver performance for parabolic dish solar concentrators 21 p0020 A79-10167
- Transient energy removal in cylindrical parabolic collector systems 21 p0020 A79-10168
- Performance of evacuated solar collectors with compound parabolic concentrators 21 p0089 A79-15855
- A compound parabolic concentrator for a high temperature solar collector requiring only twelve tilt adjustments per year 21 p0134 A79-17439
- Compound parabolic concentrators with non-evacuated receivers - Prototype performance and a larger scale demonstration in a school heating system 21 p0134 A79-17440
- An analysis of a cylindrical parabolic focussing collector for distributed collector power system 21 p0134 A79-17442
- Geometrical aspects of a cylindrical parabolic collector 21 p0134 A79-17443
- Design fabrication and testing of three meter diameter parabolic dish heliostat system 21 p0135 A79-17447
- Distribution of beam radiation of the receiver plane of a CPC solar concentrator --- Compound Parabolic Concentrators 21 p0135 A79-17451
- Performance of solar concentrators - A theoretical study 21 p0135 A79-17453
- Manufacture of curved glass mirrors for linear concentrators 21 p0136 A79-17459
- Laser ray trace tester for parabolic trough solar collectors 21 p0144 A79-17619
- A comparison of compound parabolic and simple parabolic concentrating solar collectors 22 p0262 A79-23754
- A parabolic solar reflector for accurate and economic producibility 22 p0293 A79-28145
- Analysis of a Cassegrain solar furnace 22 p0293 A79-28147
- Thermal analysis of black liquid cylindrical parabolic collector 22 p0295 A79-28354
- Thermal performance evaluation of a flat-plate cylindrical parabolic concentrator and a flat-plate collector 22 p0317 A79-31408
- Cylindrical parabolic collector optimization for interfacing with steam turbine generators 22 p0322 A79-31448
- A method for estimating hourly solar radiation for parabolic trough collectors 23 p0399 A79-33997
- Photovoltaic power generation by use of compound parabolic concentrators 23 p0402 A79-34024
- Solar heating and cooling of the Georgia Power Company Office Building in Atlanta
[AIAA PAPER 79-1024] 23 p0460 A79-38206
- Critical study of energy parameters of solar energy /illumination and concentration/- Application to catoptric collectors 23 p0463 A79-38584
- Study of a thermal converter using both the concentration and the greenhouse effects 23 p0464 A79-38585
- Experimental researches concerning the use of solar energy in the generation of electric energy 23 p0465 A79-38593
- The parabolic concentrating collector: A tutorial
[NASA-CR-158246] 22 p0359 A79-20491

- Practical design considerations for CPC solar collectors --- Compound Parabolic Concentrator 23 p0439 A79-36634
- Sensitivity of slope measurements on parabolic solar mirrors to positioning and alignment of the laser scanner
[SAND-78-0700] 21 p0185 A79-11496
- PARAFFINS**
Investigation of physical and chemical properties of phase change materials for space heating/cooling applications 21 p0120 A79-17319
- Theoretical and experimental analysis of a latent heat storage system --- solar energy absorbers 21 p0121 A79-17323
- Latent heat storage --- using paraffin 23 p0388 A79-33249
- PARALLEL PLATES**
An interferometric investigation heat transfer in honeycomb solar collector cells 21 p0129 A79-17398
- Wave-tank experiments on an immersed parallel-plate duct --- for testing performance of sub-sea wave energy converter 22 p0258 A79-23306
- PARAMETERIZATION**
Parametric requirements for noncircular Tokamak commercial fusion plants
[GA-A-14876] 21 p0214 A79-13871
- Parametric requirements for noncircular Tokamak commercial fusion plants
[GA-A-14946] 21 p0214 A79-13872
- Computerized simulation and parameterization of a new high-performance tubular solar collector 23 p0539 A79-22163
- PARKS**
Draft environmental statement of the Island Park geothermal area, Idaho, Montana, Wyoming 23 p0551 A79-23551
- PARTICLE ACCELERATOR TARGETS**
Fusion power with particle beams 21 p0034 A79-11121

PARTICLE ACCELERATORS

SUBJECT INDEX

A new method for producing cryogenic laser fusion targets 21 p0085 A79-15332

Fuel preconditioning studies for e-beam fusion targets 23 p0480 A79-39938

PARTICLE ACCELERATORS

Fusion power with particle beams 21 p0034 A79-11121

PARTICLE BEAMS

Fusion power with particle beams 21 p0034 A79-11121

PARTICLE COLLISIONS

Collisional transport --- particle diffusion and heat transport in tokamak 21 p0078 A79-14780

Calculation of the Q factor for a two-component tokamak 22 p0324 A79-31763

PARTICLE DIFFUSION

Thermophoresis - Enhanced deposition rates in combustion turbine blade passages [ASME PAPER 78-WA/GT-1] 21 p0160 A79-19790

PARTICLE FLUX DENSITY

Recombination-induced neutral-particle flux in tokamaks 22 p0291 A79-27877

PARTICLE INTERACTIONS

Effect of electrode shielding on beamlet-beamlet interaction in multiaperture sources 21 p0154 A79-18481

PARTICLE MOTION

Single-particle behaviour in plasmas 22 p0257 A79-22977

On the motion of runaway electrons in momentum space --- analysis for multi-component plasma in tokamaks 22 p0291 A79-27880

PARTICLE SIZE DISTRIBUTION

Characterization and formation of submicron particles in coal-fired plants 23 p0460 A79-38316

Particle size variation in the solvent refined coal process 23 p0492 A79-40451

Evaluations of novel particulate control devices [PB-283973/6] 21 p0199 A79-12601

PARTICLE TRAJECTORIES

Particle orbits in field-reversed mirrors --- for plasma confinement in fusion reactor 22 p0253 A79-22239

Plasma particle trajectories around spacecraft propelled by ion thrusters 23 p0552 A79-24029

PARTICLES

Surfactant-assisted liquefaction of particulate carbonaceous substances [NASA-CASE-NPO-13904-1] 21 p0179 A79-11152

PARTICULATE SAMPLING

Particulate and sulfur oxide control options for conventional coal combustion 21 p0092 A79-15883

The measurement of the sulfuric acid and sulfate content of particulate matter resulting from the combustion of coal and oil 21 p0156 A79-19219

Heavy duty diesel particulate emission factors 23 p0461 A79-38481

Air quality assessment of particulate emissions from diesel-powered vehicles [PB-286172/2] 21 p0223 A79-14641

Low-sulfur western coal use in existing small and intermediate size boilers --- particulate sampling and combustion efficiency [PB-287937/7] 22 p0346 A79-18061

Balloon-borne particulate sampling for monitoring power plant emissions [PB-290473/8] 23 p0566 A79-24543

Solvent Refined Coal (SRC) process: Environmental program. Volume 3: Pilot plant development work, part 5 [FE-0496-T8] 23 p0588 A79-27329

PASSENGER AIRCRAFT

The improved rigid airship --- design characteristics and cost analysis 21 p0086 A79-15572

Adaptation for the economy or adaptation for energy conservation --- passenger aircraft design [AAAF-RT-77-23] 23 p0551 A79-23537

The airport performance model. Volume 1: Extensions, validations, and applications [AD-A062863] 23 p0568 A79-25040

PAYLOAD MASS RATIO

Systems efficiency and specific mass estimates for direct and indirect solar-pumped closed-cycle high-energy lasers in space 21 p0110 A79-16623

PEBBLE BED REACTORS

Moving bed heat transfer for advanced power reactor applications 23 p0416 A79-34133

PELLETS

Plasma density measurements on refuelling by solid hydrogen pellets in a rotating plasma 22 p0255 A79-22369

Pellet X-ray spectra for laser fusion reactor designs 22 p0291 A79-27878

PENETROMETERS

Coal-shale interface detection [NASA-CASE-MFS-23720-3] 23 p0569 A79-25443

PENNSYLVANIA

Water/energy management and evaluation model for Pennsylvania [PB-287577/1] 22 p0343 A79-17353

PERFORMANCE

Interim performance criteria for solar heating and cooling systems in residential buildings, second edition [PB-289967/2] 22 p0372 A79-21630

PERFORMANCE PREDICTION

Orbiting Solar Observatory /OSO-8/ solar panel design and in-orbit performance 21 p0001 A79-10017

Intelsat V solar array design and development summary 21 p0002 A79-10018

Preliminary controller evaluation for the MERC/CTIU using a mathematical process model --- of Component Test and Integration Unit in fluidized bed combustion 21 p0008 A79-10073

Thermal modeling of coal-fired MHD plant components 21 p0017 A79-10138

Performance and economic risk evaluation of dispersed solar thermal power systems by Monte Carlo simulation 21 p0020 A79-10163

Conversion of a standard single cylinder I.C. engine into a 'gamma' configuration air charged Stirling engine 21 p0024 A79-10202

Analytical predictions of selenide RTG power degradation 21 p0026 A79-10223

Modified silicon-germanium alloys with improved performance --- thermoelectric material 21 p0027 A79-10225

Toroidal Accelerator Rotor Platforms for wind energy conversion 21 p0029 A79-10240

Ultra-thin silicon solar cells for high performance panel applications 21 p0029 A79-10243

Asymptotic behaviour as a guide to the long term performance of solar water heating systems 21 p0041 A79-11872

Predicted performance of heliostats for ERDA's 10 MWe power plant 21 p0044 A79-12045

Performance prediction methods for horizontal axis wind turbines 21 p0045 A79-12244

Predicting the performance of passive solar-heated buildings 21 p0063 A79-13899

Long-term average performance of the Sunpak evacuated-tube collector 21 p0089 A79-15854

Simple procedure for predicting long term average performance of nontracking and of tracking solar collectors 21 p0091 A79-15873

A graphical approach to the efficiency of flat-plate collectors 21 p0102 A79-16422

Performance of vacuum tube solar collector systems 21 p0102 A79-16424

Toroidal high-beta systems 21 p0070 A79-14462

New results in high-beta stellarator and belt-pinch research 21 p0070 A79-14463

Characterization of electron and ion current flow in very large aspect-ratio terawatt diodes employing heated and unheated anodes 21 p0154 A79-18480

Optimum properties of a noncylindrical pinch --- neutron energy yield in fusion plasma 22 p0244 A79-21433

Structure of the current shell in a Z pinch 22 p0245 A79-21434

Investigation of a staged plasma-focus apparatus --- pinch construction and current sheet dynamics investigation 22 p0255 A79-22365

Non-linear saturation of the tearing mode in a reversed field pinch 23 p0527 A79-41941

PLASMA POTENTIALS

Optimization of a Knudsen Cs-Ba thermionic converter 22 p0241 A79-20940

PLASMA PROBES

VKI Short Course on Magnetohydrodynamic Accelerators and Generators [VKI-LECTURE-SERIES-8] 23 p0545 N79-22891

PLASMA RADIATION

An experimental determination of the parallel electron velocity distribution during strong turbulence --- in Texas Turbulent Torus 23 p0446 A79-37264

Temporally and spatially resolved harmonic emission from spherical laser fusion targets 23 p0480 A79-39940

PLASMA RESONANCE

Lower hybrid resonance heating --- of tokamak plasma 22 p0271 A79-24865

Observed resonance lines of highly ionized titanium, chromium, iron, and nickel in tokamak discharges 23 p0478 A79-39676

PLASMA SHEATHS

Surface interactions and conditioning techniques in tokamaks 23 p0443 A79-36880

Plasma sheath effects and voltage distributions of large high-power satellite solar arrays 23 p0552 N79-24024

PLASMA SPECTRA

Measurements of plasma rotation in tokamak LT-3 22 p0252 A79-22238

The contribution of plasma dielectric properties to the cyclotron radiation spectrum from a tokamak plasma 22 p0312 A79-31183

Interpretation of cyclotron radiation spectra from runaway discharges in TFR 22 p0313 A79-31185

PLASMA TEMPERATURE

Transport phenomena in MHD generators - Effect of boundary layers 21 p0156 A79-19098

Warm plasma effects on drift cyclotron loss cone mode --- in mirror machines 23 p0478 A79-39568

PLASMA TURBULENCE

Fast penetration of a magnetic field into a low-density plasma 22 p0244 A79-21432

Turbulence of a combustion product plasma in an MHD channel 22 p0246 A79-21538

Combustion-products turbulence in the channel of an MHD generator 23 p0442 A79-36812

An experimental determination of the parallel electron velocity distribution during strong turbulence --- in Texas Turbulent Torus 23 p0446 A79-37264

PLASMA WAVES

Cyclotron-wave spectrum in a plasma with two ion species 22 p0245 A79-21443

Single-particle behaviour in plasmas 22 p0257 A79-22977

Parametric decay of lower hybrid waves in a plasma - Effect of ion nonlinearity --- in tokamaks 22 p0269 A79-24814

Effects of nonlinear decay of backscattered light on the anomalous reflectivity --- in laser plasmas 22 p0310 A79-30742

Drift wave propagation and convective wave growth in tokamaks 23 p0446 A79-37262

PLASMA-ELECTROMAGNETIC INTERACTION

On the flow of a conducting fluid between parallel disks with a transverse magnetic field. I - A theoretical investigation on a nonequilibrium plasma flow as a compressible inviscid fluid 21 p0156 A79-19445

Fast penetration of a magnetic field into a low-density plasma 22 p0244 A79-21432

Single-particle behaviour in plasmas 22 p0257 A79-22977

The U-25B facility for studies in strong magnetohydrodynamic interaction 23 p0393 A79-33406

Stimulated scattering of light by ion modes in a homogeneous plasma - Space-time evolution 23 p0478 A79-39566

Electrical power loss from high-voltage power circuits through plasma leakage 21 p0169 N79-10113

PLASMA-PARTICLE INTERACTIONS

Generation and applications of high power ion beams to fusion research 21 p0070 A79-14466

Single-particle behaviour in plasmas 22 p0257 A79-22977

Heat transport near the wall of a tokamak reactor
22 p0324 A79-31764
Measurement of the neutron spectra from
beam-heated PLT plasmas
23 p0478 A79-39724

PLASTIC FLOW

Continuous extrusion of coal --- plastic
fluidizing process
22 p0282 A79-26372

PLASTICS

Use of plastics in solar energy applications
21 p0067 A79-14268
Thermal power systems point-focusing distributed
receiver technology project. Volume 1:
Executive summary
[NASA-CR-158421]
22 p0360 A79-20492

PLATING

New processes for black coatings useful in
harnessing solar energy. I - A room temperature
black chromium plating bath
21 p0127 A79-17379
The Pd2Si - /Pd/ - Ni - solder plated
metallization system for silicon solar cells
23 p0506 A79-40979

PLUMES

The impact of a coal fired power plant on ambient
sulfur dioxide levels
21 p0082 A79-15032
Aerosol and ice nuclei measurements in the plume
of the Homer City, Pa., power plant --- for
weather modification studies
23 p0438 A79-36432
The conversion of SO2 to sulfate particles in coal
fired power plant plumes
23 p0535 A79-43391

PLUTONIUM OXIDES

Environmental and radiological safety studies.
Interaction of (Pu-238)O2 heat sources with
terrestrial and aquatic environments --- soil
and water analysis
[LA-7033-PR]
21 p0232 A79-15783

PLUTONIUM 238

Mini-Brayton heat source assembly development
[NASA-CR-159447]
21 p0196 A79-12554
Proliferation-resistant nuclear fuel cycles
[ORNL/TN-6392]
21 p0214 A79-13849
Environmental and radiological safety studies.
Interaction of (Pu-238)O2 heat sources with
terrestrial and aquatic environments --- soil
and water analysis
[LA-7033-PR]
21 p0232 A79-15783

PLYWOOD

Use of waste wood in plywood manufacture - A case
history
23 p0489 A79-40396

PNEUMATIC EQUIPMENT

Experiences with a hydropneumatic wave power device
21 p0151 A79-18105

POINTING CONTROL SYSTEMS

Effects of pointing errors on receiver performance
for parabolic dish solar concentrators
21 p0020 A79-10167
Attitude and pointing control system for the
microwave antenna of the solar power satellite
21 p0113 A79-16739
A simple solar tracking system --- manually
adjusted rotating shaft for solar concentrator
positioning
21 p0136 A79-17457
Computer based sun following system
22 p0242 A79-21165
Optimal control of sun tracking solar concentrators
23 p0526 A79-41831
Accuracy analysis of pointing control system of
solar power station
[NASA-CR-150880]
21 p0215 A79-14143

POLAR REGIONS

Energy conversion at a lunar polar site
21 p0108 A79-16607
The polar lunar base - A viable alternative to L-5
[AAS 78-191]
23 p0427 A79-34862

POLARIZATION (CHARGE SEPARATION)

Migrational polarization in high-current density
molten salt electrochemical devices
21 p0039 A79-11811

POLARIZATION CHARACTERISTICS

Migrational polarization in high current density
molten salt battery and fuel cell analogs
23 p0446 A79-37273

POLICIES

Public policy
21 p0179 A79-11011
United States civilian space programs: An overview
[GPO-35-823]
21 p0232 A79-15815

POLITICS

Economic, political and psychosocial barriers to a
change-over to renewable energy resources
23 p0421 A79-34176

Satellite Power System (SPS) international
agreements
[NASA-CR-157433]
23 p0548 A79-23497

POLLUTION CONTROL

Factors limiting limestone utilization efficiency
in fluidized-bed combustors --- in determining
sulfur dioxide emission level
21 p0008 A79-10069

Circulating-bed boiler concepts for steam and
power generation
21 p0008 A79-10071

Pressurized fluidized-bed combustion/component
test and integration unit preliminary design
report
21 p0008 A79-10076

Low-Btu gas from the IGT ash-agglomeration
gasification process
21 p0009 A79-10077

Controlling NOx from a coal-fired MHD process
21 p0017 A79-10139

Emission control techniques for alternative fuel
combustion
21 p0053 A79-12990

A standard procedure of economic evaluation for
energy-producing and pollution-abatement
operations
21 p0064 A79-14109

State-of-the-art assessment of air pollution
control technologies for various waste-as-fuel
processes
21 p0064 A79-14111

Pollution perspective for geothermal energy
development
21 p0064 A79-14114

Recent operating experience of the Wellman-Lord
FGD process on a coal-fired boiler --- flue gas
desulfurization
21 p0065 A79-14120

The Research-Cottrell/Bahco SO2 and particulate
removal system at Rickenbacker Air Force Base
21 p0065 A79-14122

Particulate control for coal-fired industrial
boilers
21 p0065 A79-14123

The direct reduction of sulfur dioxide
21 p0065 A79-14124

Simultaneous nitrogen oxides and sulfur dioxide
removal by absorption-reduction scrubbing
21 p0066 A79-14125

Correlations of catalytic combustor performance
parameters
21 p0081 A79-14956

Environmental effects of burning solid waste as fuel
21 p0082 A79-15115

Shock tube studies of coal devolatilization
21 p0083 A79-15247

Particulate and sulfur oxide control options for
conventional coal combustion
21 p0092 A79-15883

Coal-based electricity and air pollution control -
A case for solvent refined coal
21 p0096 A79-15922

Commercialization of fluidized-bed combustion
systems by the State of Ohio
21 p0096 A79-15923

Clean Air Act amendments of 1977 and the impact on
control efforts
21 p0097 A79-16091

Protection of the biosphere --- MHD power stations
pollution reduction
21 p0105 A79-16483

The impact of advanced technology on the future
electric energy supply problem
21 p0112 A79-16736

Energy requirements of a limestone FGD system ---
Flue Gas Desulfurization
21 p0114 A79-16747

Reducing inefficiency and emissions of large steam
generators in the United States
21 p0114 A79-17075

SUBJECT INDEX

POLLUTION CONTROL CONTD

- An analysis of air pollution control costs in N.S.W.
--- New South Wales, Australia 21 p0115 A79-17228
- Advanced emissions control and test facility of
the Electric Power Research Institute 21 p0115 A79-17249

SUBJECT INDEX

POWER EFFICIENCY

PORTABLE EQUIPMENT

Development of a compact, lightweight high performance 30 MW MHD generator system
23 p0393 A79-33410

POSITION (LOCATION)

Fixed-focal-axis solar concentrators with a curvature determined by gravity
23 p0523 A79-41254

High accuracy off-shore position finding using the GEOLE satellite based system
22 p0329 N79-15932

Locational response to regulatory policy: A regional analysis of energy facility location --- conferences
[BNL-23597]
23 p0598 N79-27695

POSITION ERRORS

Effects of pointing errors on receiver performance for parabolic dish solar concentrators
21 p0020 A79-10167

Efficiency degradation due to tracking errors for point focusing solar collectors [ASME PAPER 78-WA/SOL-4]
21 p0162 A79-19837

POSITIONING DEVICES (MACHINERY)

Flexed beams in central receiver heliostat drives [AIAA PAPER 78-1755]
21 p0060 A79-13856

A simple solar tracking system --- manually adjusted rotating shaft for solar concentrator positioning
21 p0136 A79-17457

POTABLE WATER

Prototype solar heating and cooling systems including potable hot water [NASA-CR-150850]
21 p0205 N79-13498

POTASSIUM

Lithium and potassium heat pipes for thermionic converters
21 p0013 A79-10113

Catalytic gasification predevelopment research
21 p0029 A79-10246

Absorption of solar radiation by alkali vapors --- for efficient high temperature energy converters
21 p0108 A79-16612

Compositional modeling of MHD channel slag, with preliminary vapor pressure data
23 p0391 A79-33390

POTASSIUM COMPOUNDS

Vaporization of drops of a melt of potassium carbonate in a medium of combustion products
21 p0167 A79-20411

Electrochemical studies of MHD channel electrode materials in molten potassium salt and coal slags
23 p0392 A79-33399

Catalytic effect of Ni and K₂CO₃ in the gasification of carbon and coal
22 p0364 A79-21215

POTASSIUM HYDROXIDES

Bibliographical study of electrocatalysis involving mixed oxide compounds in an alkaline medium [P/539/77/20]
23 p0588 N79-27284

POTENTIAL FIELDS

Effects of position of output electrodes in entrance region of open-cycle diagonal type MHD generator
21 p0153 A79-18468

Three-dimensional effects of electrode configuration on diagonal MHD generator performance
22 p0283 A79-26523

POTENTIAL FLOW

The interaction of the wind field with a horizontal axis wind turbine
22 p0278 A79-26177

POWDER (PARTICLES)

Study of the dynamics of the materials melting process for a solar furnace
21 p0167 A79-20359

Mixing and kinetic processes in pulverized coal combustors [EPRI-PP-806-SY]
23 p0589 N79-27330

POWER CONDITIONING

Power distribution study for a 5-GW space power satellite
21 p0002 A79-10026

Solar furnace type high power density thermoelectric generator
21 p0027 A79-10229

Proposals for power conditioning systems of high power communication satellites
21 p0033 A79-10897

Space power technology - Current status and future development trends --- for powering spacecraft [DGLR PAPER 78-167]
21 p0063 A79-14054

Progress in laser-fusion research
21 p0070 A79-14464

Energy sources and conventional magnets --- for tokamak experiment Power Reactor toroidal field
21 p0079 A79-14791

Control of wind turbine generators connected to power systems
21 p0086 A79-15574

Operation and control of wind-electric systems
21 p0086 A79-15575

Inverter systems --- for MHD power stations
21 p0106 A79-16486

Economic prospects for the application of new electric energy storage devices
22 p0246 A79-21490

Optimizing the conversion mode for solar energy
22 p0258 A79-23125

Contribution to the development of wind energy systems using static power electronic converters
22 p0286 A79-26958

Consolidation and local control of power in an MHD generator
23 p0395 A79-33425

Developments in electrodes and power conditioning systems for open-cycle MHD generators
23 p0395 A79-33426

Load matching effects on wind energy converter performance
23 p0455 A79-37917

Power management battery storage systems [AIAA PAPER 79-0982]
23 p0457 A79-38186

Source tracking and power flow control of terrestrial photovoltaic panels for concentrated sunlight
23 p0509 A79-40999

Peak period of household load in the different stages of electrical power supply
23 p0528 A79-42226

Spacecraft power systems
23 p0533 A79-43199

Alternative power-generation systems
21 p0169 N79-10129

Satellite Power Systems (SPS) concept definition study. Volume 3: SPS concept evolution [NASA-CR-158066]
21 p0225 N79-15138

Satellite Power Systems (SPS) concept definition study. Volume 2: SPS system requirements [NASA-CR-150684]
22 p0330 N79-16037

Comparative cost analyses: Total flow vs other power conversion systems for the Salton Sea Geothermal Resource [UCRL-52589]
22 p0342 N79-17337

Power coupling alternatives for the NEP thermionic power system [NASA-CR-158372]
22 p0367 N79-21547

A method for correlating performance data of a terrestrial solar cell array [NASA-TN-79163]
23 p0581 N79-26503

POWER EFFICIENCY

Coal-fired gas turbine power cycles with steam injection
21 p0004 A79-10042

Mechanical efficiency of the Stirling cycle machine with rhombic drive
21 p0025 A79-10208

The influence of blade camber on the output of vertical-axis wind turbines
21 p0045 A79-12242

Output power variations with solar power satellites
21 p0067 A79-14267

Generalized wind characteristics and their effect on wind turbine output
21 p0068 A79-14294

Generic power performance estimates for wind turbines
21 p0068 A79-14295

MHD power plant characteristics
21 p0105 A79-16480

Technical and economic aspects of open-cycle MHD power plants
21 p0105 A79-16482

Efficiency of conventional silicon solar cells
21 p0125 A79-17362

- A methodology for evaluating the effectiveness of energy conservation programs 21 p0072 A79-14684

- Critical comments on energy models 23 p0481 A79-39994

- System for projecting the utilization of renewable resources. SPURR methodology [ERHQ/2322-77/4] 21 p0174 A79-10538

PREDICTIONS

- Energy and the economy [EPRI-EA-620-VOL-1] 21 p0189 A79-11539

PREMIXED PLANES

- Stability of combustion in the combustion chamber of an MHD generator 21 p0049 A79-12691
- Influences on exhaust emissions from automotive gas turbines [ASME PAPER 78-GT-85] 22 p0255 A79-22338
- NOx formation with various combustion processes of premixed gas 23 p0528 A79-42220

PRESSURE CHAMBERS

- Preliminary comparison of theory and experiment for a conical, pressurized-fluidized-bed coal combustor [NASA-TM-79137] 23 p0542 A79-22623

PRESSURE EFFECTS

- Toroidal high-beta systems 21 p0070 A79-14462
- The plateau pressure of RE Ni5 and RE Co5 hydrides --- in hydride formation 22 p0250 A79-21698
- Dynamics of high-beta tokamaks with anisotropic pressure 23 p0526 A79-41939
- Anomalous diffusion and transport beta limits in dense tokamak plasmas 23 p0527 A79-41943

PRESSURE GRADIENTS

- The use of ocean energy - A hydrostatic motor 22 p0288 A79-27391

PRESSURE HEADS

- Power plant systems based on solar energy --- powered by sea water evaporation-produced osmotic pressure head mechanical energy 21 p0142 A79-17508

PRESSURE MEASUREMENTS

- Differential pressure measurements in high temperature environments 21 p0144 A79-17599
- Fuel content characterization and pressure retention measurements of DT-filled laser fusion microballoon targets 22 p0258 A79-23034
- Pressure measurements on wind tunnel models of the Aylesbury experimental house 22 p0300 A79-29372

PRESSURE OSCILLATIONS

- The oscillating water column wave-energy device 22 p0252 A79-22223

PRESSURE RECOVERY

- On supersonic and subsonic diffusers for magnetohydrodynamic generator applications 22 p0279 A79-26186

PRESSURIZING

- Assessment of the potential of generating power from aqueous saline solutions by means of Osmo-Hydro Power systems 21 p0016 A79-10133

- Pressurized fluidized bed pilot electric plant - A technology status [ASME PAPER 79-GT-193] 23 p0379 A79-32451

PRETREATMENT

- Catalytic gasification of coals pretreated with liquid ammonia 23 p0411 A79-34091

PRIMARY BATTERIES

- Evaluation of methods for analyzing silver-zinc cells 21 p0010 A79-10085
- Discharge reaction mechanisms in Li/SOCl2 cells 22 p0305 A79-30331
- The lithium-thionyl chloride battery - A review 23 p0487 A79-40370

PRINTED CIRCUITS

- Screen printed contacts on silicon solar cells with low series resistance 23 p0506 A79-40977

PRISMS

- Ideal prism solar concentrators 21 p0149 A79-18023

PROBABILITY THEORY

- Hail risk model for solar collectors 21 p0098 A79-16103

PROCESS CONTROL (INDUSTRY)

- Coal desulfurization test plant status - July 1977 --- utilizing Meyers leach process 21 p0044 A79-12118
- Dynamic model of an industrial plant manufacturing a variety of products 21 p0051 A79-12957
- Status and outlook of the Exxon Donor Solvent coal liquefaction process development 21 p0092 A79-15889
- Solar Total Energy Control Data Acquisition System 21 p0144 A79-17618
- Master control and data system for the 5MW Solar Thermal Test Facility 21 p0144 A79-17620

- Burn coal cleanly in a fluidized bed - The key is in the controls 22 p0282 A79-26374

- Catalytic hydrodesulfurization and liquefaction of coal - Batch autoclave studies 22 p0282 A79-26465

- Coal gasification studies. I - Single stage complete gasification of coal using water as the hydrogen source 22 p0283 A79-26466

- Sampling and analysis of synthetic fuel processes --- coal gasification and liquefaction effluent analysis 22 p0284 A79-26538

- Economic prospects for solar energy for industrial process heat 23 p0403 A79-34033

- Evaluation of options for process sequences --- in solar cell manufacturing 23 p0501 A79-40925

- Standards of Practice Manual for the solvent refined coal liquefaction process [PB-283028/9] 21 p0178 A79-10595

- Process feasibility study in support of silicon material task 1 [NASA-CR-158034] 21 p0219 A79-14541

- Systems studies of coal conversion processes using a reference simulator [FE-2275-8] 23 p0554 A79-24187

PROCUREMENT POLICY

- Assessing environmental costs of energy procurement 21 p0071 A79-14682

- The national energy plan: Options under assumptions of national security threat --- economic impact procurement policy, and resources management [H-PRINT-95-48] 21 p0228 A79-15398

PRODUCT DEVELOPMENT

SUBJECT INDEX

Findings and views concerning the exemption of aviation gasoline from the mandatory petroleum allocation and price regulations [DOE/ERA-0024] 23 p0589 N79-27336

PRODUCT DEVELOPMENT

Review of industrial participation in the ANL lithium/iron sulfide battery development program --- for electric vehicles 21 p0010 A79-10086

Recent advances in Na/S cell development - A review 22 p0246 A79-21488

A solar collector thermal performance test for developmental programs 22 p0317 A79-31413

Selection and development of small solar thermal power applications [AIAA PAPER 79-1005] 23 p0459 A79-38198

Wind turbines for electric utilities - Development status and economics [AIAA PAPER 79-0965] 23 p0475 A79-38888

Solar collector development in Iran 23 p0493 A79-40675

Engineering of microwave relays --- microwave radio equipment engineering aspects and impact on energy technology 23 p0526 A79-41931

Industrialization study --- impact of government incentives and barriers on decision making in the industrial production of photovoltaics [NASA-CR-157953] 21 p0200 N79-12970

Industrialization study, phase 2 --- assessment of advanced photovoltaic technologies for commercial development [NASA-CR-158015] 22 p0333 N79-16351

Preliminary design package for residential heating/cooling system: Rankine air conditioner redesign [NASA-CR-150871] 22 p0354 N79-19453

Multistack nickel-hydrogen units 22 p0371 N79-21610

Development of low-cost, high energy-per-unit-area solar cell modules [NASA-CR-158556] 23 p0550 N79-23515

Low-cost Solar Array (LSA) project [NASA-CR-158650] 23 p0559 N79-24457

Low-cost Solar Array (LSA) project [NASA-CR-158651] 23 p0559 N79-24458

Development of pulsed processes for the manufacture of solar cells [NASA-CR-158706] 23 p0570 N79-25484

Status of the DOE photovoltaic concentrator development project 23 p0571 N79-25491

Silicon solar cell process development, fabrication and analysis [NASA-CR-158700] 23 p0572 N79-25505

Silicon solar cell process development, fabrication and analysis [NASA-CR-158736] 23 p0580 N79-26488

Silicon solar cell process development, fabrication and analysis [NASA-CR-158740] 23 p0580 N79-26490

Development of a process for a high capacity arc heater production of silicon for solar arrays [NASA-CR-158745] 23 p0581 N79-26499

PRODUCTION

LSA engineering status 23 p0570 N79-25490

PRODUCTION ENGINEERING

Engineering analysis of in situ liquefaction of coal 21 p0032 A79-10521

Large, lightweight, replicated mirrors 21 p0043 A79-11976

Feasibility of rocket propellant production on Mars 21 p0047 A79-12324

Dynamic model of an industrial plant manufacturing a variety of products 21 p0051 A79-12957

Status and outlook of the Exxon Donor Solvent coal liquefaction process development 21 p0092 A79-15889

Production and use of low and medium Btu gas 21 p0095 A79-15912

Fabrication and assembly considerations for a base load MHD superconducting magnet system 22 p0235 A79-20534

Practical aspects of designing and manufacturing MHD superconducting base-load magnets in 1988 time frame 22 p0235 A79-20535

Mass production of solar collectors and components 23 p0467 A79-38614

A high volume cost efficient production macrostructuring process --- for silicon solar cell surface treatment 23 p0499 A79-40904

A candidate low-cost processing sequence for terrestrial silicon solar cell panel 23 p0501 A79-40919

Silicon solar cell arrays - Technical status, terrestrial applications, and future developments for low cost production 23 p0501 A79-40923

Evaluation of options for process sequences --- in solar cell manufacturing 23 p0501 A79-40925

Multiple silicon ribbon growth by EFG 23 p0502 A79-40939

Production technology for high efficiency ion implanted solar cells 23 p0509 A79-41000

Solar cell collector and method for producing same [NASA-CASE-LEW-12552-2] 21 p0182 N79-11472

Program THEM energy production units of average power and using thermal conversion of solar radiation [NASA-TN-75369] 21 p0183 N79-11474

Energy analysis [NP-23145] 21 p0187 N79-11513

Process feasibility study in support of silicon material task 1 [NASA-CR-158034] 21 p0219 N79-14541

Pilot line report: Development of a high efficiency thin silicon solar cell [NASA-CR-158028] 21 p0219 N79-14548

Automated array assembly, phase 2 [NASA-CR-158360] 22 p0358 N79-20480

Phase two of the array automated assembly task for the low cost solar array project [NASA-CR-158359] 22 p0359 N79-20484

Silicon solar cell process development, fabrication and analysis [NASA-CR-158363] 22 p0359 N79-20485

Development, testing, and certification of the Northrup, Inc., HL series concentrating solar collector model NSC-01-0732 [NASA-TN-78219] 22 p0371 N79-21618

Development, testing, and certification of Owens-Illinois model SEC-601 solar energy collector system [NASA-TN-78223] 22 p0371 N79-21620

A normative price for a manufactured product: The SANICS methodology. Volume 2: Analysis [NASA-CR-158503] 23 p0549 N79-23505

Analysis and evaluation of processes and equipment in tasks 2 and 4 of the low-cost solar array project [NASA-CR-158580] 23 p0550 N79-23519

Development of a model and computer code to describe solar grade silicon production processes [NASA-CR-158679] 23 p0558 N79-24448

Development of high efficiency (14%) solar cell array module [NASA-CR-158672] 23 p0559 N79-24454

Automated solar panel assembly line. LSA task; production processes and equipment [NASA-CR-158671] 23 p0559 N79-24455

Material and energy balances in the production of ethanol from wood --- conferences [CONF-7806139-1] 23 p0589 N79-27338

Midterm oil and gas supply modeling system methodology description [DOE/EA-0103/17] 23 p0600 N79-28059

PRODUCTION MANAGEMENT

Material growth and characterization directed toward improving III-V heterojunction solar cells [NASA-CR-158476] 22 p0367 N79-21543

Production of hot water with the aid of solar energy: Conditions and costs [SIB-R-83-1978] 23 p0598 N79-27700

PROFILE METHOD (FORECASTING)

Outlook for world oil into the 21st century with emphasis on the period to 1990 [EPRI-EA-745] 21 p0181 N79-11454

PROGRAM VERIFICATION (COMPUTERS)

Initial comparison of single cylinder Stirling engine computer model predictions with test results
[NASA-TM-79044] 22 p0337 N79-16721

PROGRAMMED INSTRUCTION

Design package for programmable controller and hydronic subsystem
[NASA-CR-161151] 22 p0371 N79-21619

PROGRAMS

The comparison and coordination of national policies and programs in the energy research and development sector
[EUR-5911] 23 p0594 N79-27653

PROJECT MANAGEMENT

Prospects of MHD power generation in India using coal
23 p0454 A79-37907

The Joint Saudi Arabian-United States Solar Energy Program
[AIAA PAPER 79-1029] 23 p0460 A79-38209

Program overview for the Wind Characteristics Program Element of the United States Federal Wind Energy Program
23 p0534 A79-43376

International project catalog of modular integrated utility systems
[PB-283477/8] 21 p0190 N79-11544

Committee on the challenges of modern society rational use of energy pilot study modular integrated utility system project. Volume 2: Minutes of project meeting
[PB-283429/9] 21 p0191 N79-11558

LSA Low-cost Solar Array project
[NASA-CR-158250] 22 p0355 N79-19462

Evaluation of four energy conservation programs--fiscal year 1977
[PB-288825/3] 22 p0355 N79-19472

Solar project description. Kalwall Corporation Warehouse, Manchester, New Hampshire
[SOLAR/2015-78/50] 23 p0564 N79-24499

Electric and hybrid vehicle program
[DOE/CS-0068] 23 p0567 N79-24900

A summary of systems definition project activities
23 p0570 N79-25488

Low-cost solar array project
23 p0570 N79-25489

DOE photovoltaic tests and applications project
23 p0571 N79-25492

Photovoltaic research and development status
23 p0571 N79-25495

PROJECT PLANNING

Solar thermal power systems point-focusing distributed receiver /PFDR/ technology - A project description
[AIAA PAPER 78-1771] 21 p0062 A79-13869

OAST space power technology program
21 p0169 N79-10123

Satellite power systems program
21 p0169 N79-10128

An economical approach to space power systems
21 p0170 N79-10139

Environmental Development Plan (EDP): Solar thermal power systems, 1977
[DOE/EDP-0004] 21 p0187 N79-11522

OAST Space Theme Workshop. Volume 1: Summary report. 1: Introduction. 2: General observations and some key findings. 3: Follow-on activity. Quick-look comments and working papers
[NASA-TM-80001] 21 p0224 N79-15113

Satellite Power Systems (SPS) concept definition study. Volume 7: SPS program plan and economic analysis
[NASA-CR-158068] 21 p0225 N79-15141

Satellite power systems (SPS) concept definition study. Volume 7: SPS program plan and economic analysis, appendices
[NASA-CR-150702] 21 p0225 N79-15142

Satellite Power System (SPS) program summary
[DOE/ER-0022] 22 p0337 N79-16893

The 25 kW power module evolution study. Part 3: Conceptual designs for power module evolution. Volume 2: Program plans
[NASA-CR-161146] 22 p0345 N79-17890

Energy programs at the Johns Hopkins University Applied Physics Laboratory
[PB-290226/0] 23 p0544 N79-22645

Solar project cost report: Scattergood School Recreation Center, West Branch, Iowa
[SOLAR/2003-78/60] 23 p0562 N79-24482

Solar project description. Radian Corporation Office Building, Austin, Texas
[SOLAR/2002-78/50] 23 p0563 N79-24496

Planning and analysis for development of photovoltaic energy conversion systems
23 p0570 N79-25487

Contextual analysis for industrial energy conservation R and D
[PB-290981/0] 23 p0575 N79-25537

Using coal inside California for electric power
23 p0591 N79-27598

A large scale wind energy program for the state of California
23 p0594 N79-27648

PROPAGATION MODES

Stability criteria for current-driven drift wave eigenmodes --- in tokamaks
22 p0269 A79-24813

PROPELLANTS

Recovery of waste heat from propellant forced-air dry house
[AD-A064108] 23 p0543 N79-22638

PROPULSION

Advanced secondary batteries for electric vehicle propulsion
[CONF-780426-2] 21 p0186 N79-11508

The AGARD propulsion and energetics panel, 1952-1977
[AGARD-AR-111] 22 p0337 N79-16848

Thermal power systems point-focusing distributed receiver technology project. Volume 1: Executive summary
[NASA-CR-158421] 22 p0360 N79-20492

PROPULSION SYSTEM CONFIGURATIONS

Impact of future fuel properties on aircraft engines and fuel systems
21 p0036 A79-11600

NASA research on general aviation power plants
[NASA-TM-79031] 21 p0194 N79-12086

PROPULSION SYSTEM PERFORMANCE

Road vehicles with combined, at least partly electrical driving systems and energy supplies
22 p0301 A79-29494

Developing electric vehicles
22 p0302 A79-29496

An electric propulsion system for a town and city bus
22 p0302 A79-29499

Measured effects of flow leakage on the performance of the GT-225 automotive gas turbine engine
[ASME PAPER 79-GT-3] 22 p0306 A79-30502

Study of flywheel energy storage Volume 1: Executive summary
[PB-282652/7] 21 p0176 N79-10555

Study of flywheel energy storage. Volume 2: Systems analysis
[PB-282653/5] 21 p0176 N79-10556

Study of flywheel energy storage. Volume 3: System mechanization
[PB-282654/3] 21 p0177 N79-10557

Study of flywheel energy storage. Volume 5: Vehicle tests
[PB-282656/8] 21 p0177 N79-10559

- Engine component improvement and performance retention
21 p0202 N79-13198
- Energy efficient engine: Propulsion system-aircraft integration evaluation [NASA-CR-159488]
22 p0337 N79-16850
- Earth orbital assessment of solar electric and solar sail propulsion systems [NASA-CR-158167]
22 p0345 N79-17898
- PROTECTIVE COATINGS**
Controlled utilization of coal slag in the MHD topping cycle
21 p0081 A79-14936
- Metallurgical coatings 1978; Proceedings of the Fifth International Conference, San Francisco, Calif., April 3-7, 1978. Volumes 1 & 2
22 p0327 A79-31951
- PROTON IMPACT**
Spectral characteristics of photoconverters with nonuniform defect distribution in the base
21 p0053 A79-13289
- PROTON IRRADIATION**
Proton and electron irradiations of liquid phase epitaxial GaAlAs solar cells
23 p0506 A79-40972
- Electron and proton degradation in AlGa/As-GaAs solar cells
23 p0506 A79-40973
- Low energy proton radiation damage to (AlGa)As-GaAs solar cells [NASA-CR-159040]
23 p0572 N79-25507
- PROTOTYPES**
Demonstration and commercial prototype tokamak reactors
21 p0018 A79-10146
- An aperture-augmented prototype power satellite
21 p0046 A79-12268
- The Swedish Wind Energy Programme
23 p0482 A79-40103
- Prototype solar heating and cooling systems including potable hot water [NASA-CR-150861]
22 p0334 N79-16372
- Prototype development of an optimized, tapered-thickness, graphite/epoxy composite flywheel [UCRL-52623]
23 p0576 N79-26121
- PROVING**
Verification methodology for the DOE-1 building energy analysis computer program [LA-OR-78-1493]
21 p0208 N79-13520
- SAMICS validation. SAMICS support study, phase 3 [NASA-CR-158746]
23 p0581 N79-26491
- PUBLIC HEALTH**
Risk with energy from conventional and nonconventional sources
22 p0266 A79-24151
- A literature review-problem definition studies on selected toxic chemicals. Volume 1: Occupational health and safety aspects of diesel fuel and white smoke generated from it [AD-A056018]
21 p0192 N79-11686
- Health effects associated with diesel exhaust emissions, literature review and evaluation [PB-289817/9]
22 p0364 N79-20727
- PUBLIC LAW**
Electric and Hybrid Vehicle Act, Public Law 94-413 demonstration program objective and schedule [GPO-98-809]
22 p0351 N79-18810
- Energy Tax Act of 1978 [PUB-LAW-95-618]
23 p0576 N79-25926
- PUBLIC RELATIONS**
Public policy
21 p0179 N79-11011
- Satellite Power System (SPS) public acceptance [NASA-CR-157429]
23 p0548 N79-23493
- PUERTO RICO**
Opportunities for solar thermal energy in Puerto Rico [AIAA PAPER 79-1028]
23 p0460 A79-38208
- PULLING**
Growth and characteristics of polysilicon layers achieved by the ribbon-against-drop /RAD/ pulling process
23 p0498 A79-40900
- PULSE DURATION**
Long-pulse laser-plasma interactions at 10 to the 12th and 10 to the 15th W/sq cm
23 p0537 A79-43718
- PULSE GENERATORS**
Problems in the development of high-service-life capacitative accumulators --- for fusion reactors
22 p0243 A79-21249
- Pulsed-power research and development in the USSR [AD-A056635]
21 p0193 N79-11859
- PULSED LASERS**
Hybrid reactor based on laser-induced thermonuclear fusion
21 p0032 A79-10658
- Prepulse damage to targets and alignment verification
22 p0258 A79-23027
- Diagnostics of Shiva Nova high-yield thermonuclear events --- in laser fusion
22 p0285 A79-26747
- Laser-particulate control for open-cycle, coal fired gas turbines [ASME PAPER 79-GT-177]
23 p0379 A79-32437
- Excited-state kinetics for Nd/thd/3 and Tb/thd/3 chelate vapors and prospects as fusion laser media
23 p0422 A79-34192
- Long-pulse laser-plasma interactions at 10 to the 12th and 10 to the 15th W/sq cm
23 p0537 A79-43718
- Pulsed power supplied for large laser systems [UCRL-80113]
21 p0217 N79-14377
- PUMPING**
Historical developments of the use of solar energy for pumping irrigation water
21 p0076 A79-14762
- Basic technical and economical aspects of the use of solar energy for pumping irrigation water
21 p0076 A79-14763
- Solar pumping --- thermal and electrical water pumping
21 p0104 A79-16469
- Wind tunnel tests on a wind operated suction-pump-turbine system to generate electricity
23 p0387 A79-33241
- Performance matching and optimization of wind powered water pumping systems
23 p0479 A79-39842
- PUMPS**
Analysis of a direct coupling d.c. motor and a photovoltaic converter
21 p0046 A79-12272
- Solar energy installations for pumping irrigation water
21 p0066 A79-14260
- Solar water pumping
21 p0066 A79-14266
- 25 kilowatt photovoltaic powered irrigation and grain drying experiment
21 p0143 A79-17519
- Solar irrigation program status
21 p0143 A79-17520
- The development of a 37 kW solar-powered irrigation system
21 p0144 A79-17525
- The use of wave powered systems for desalination - A new opportunity --- seawater pumping for reverse osmosis
21 p0151 A79-18108
- Production of mechanical energy by thermodynamic conversion of solar energy
22 p0310 A79-30999
- The definition of a national program in energy-efficient pump utilization, volume 1 [HCP/W1260-01/1]
21 p0207 N79-13514
- The definition of a national program in energy-efficient pump utilization. Volume 2: Appendices [HCP/W1260-01/2]
21 p0207 N79-13515
- Solar water pumps. Citations from the Engineering Index data base [NTIS/PS-78/1288/6]
22 p0343 N79-17348
- PURIFICATION**
The use of FeTi-hydride for production and storage of suprapure hydrogen
22 p0250 A79-21700
- PYRAMIDAL BODIES**
Comparison of the solar concentrating properties of truncated hexagonal, pyramidal and circular cones
21 p0043 A79-11974

PYRANOMETERS

- Inclination dependence of pyranometer sensitivity
--- for solar collector testing 22 p0295 A79-28154
- Important specification of pyranometers for solar
energy applications /Survey article/ 23 p0468 A79-38627

PYRITES

- Applicability of the Meyers process for
desulfurization of U.S. coal - A survey of 35
coals --- through chemical leaching 21 p0044 A79-12117

PYROHELIONETERS

- Measurement of radiation intensity by means of a
pyrheliometer 21 p0055 A79-13623

PYROLYSIS

- Coal conversion by flash hydropyrolysis and
hydrogasification 21 p0006 A79-10055
- Theoretical studies of coal pyrolysis in an
entrained bed flow reactor 21 p0007 A79-10063
- A copper oxide-copper sulfate water-splitting cycle
21 p0015 A79-10128
- Recovery of oil from oil shale - An overall
technological perspective 21 p0073 A79-14698
- Thermal calculations for the reactor of a
solar-power unit to produce hydrogen by
thermolysis of water 21 p0167 A79-20360
- A theoretical study of wood gasification processes
22 p0257 A79-22923
- Methane formation during the hydrogasification and
the gas phase pyrolysis of defined aromatics 22 p0265 A79-23829
- Pyrolysis gas from solid waste will provide total
power demand for a major wastewater reclamation
plant 23 p0417 A79-34147
- Development of the Kiener pyrolysis system for
environmental protection, energy recovery and
recycling 23 p0488 A79-40389
- Pyrolysis, thermal gasification, and liquefaction
of solid wastes and residues - Worldwide status
of processes /as of Fall 1977/ 23 p0490 A79-40413
- An overview of San Diego County's resource
recovery plant 23 p0491 A79-40418
- A technical and economic evaluation of the
Baltimore Landgard demonstration --- municipal
solid waste processing plant for energy and
materials recovery 23 p0491 A79-40420
- Pyrolysis of Western Kentucky heavy oil using a
transfer line reactor 23 p0492 A79-40452
- Kinetic modeling of pyrolysis and
hydrogasification of carbonaceous materials ---
converting wood waste char to clean fuels 21 p0179 N79-11150
- Thermal and kinetic analysis of the pyrolysis of
coals 22 p0336 N79-16704
- Hydropyrolysis of coal derived liquids and related
model compounds 23 p0553 N79-24171
- Energy recovery from domestic refuse by means of
incineration and pyrolysis
[CSIR-SR-WAT-54] 23 p0560 N79-24468
- Laboratory study of pyrolysis of explosive
contaminated waste
[AD-A066973] 23 p0576 N79-26222

Q

Q DEVICES

- Feedback control of a class of plasma instabilities
23 p0422 A79-34253

Q FACTORS

- Calculation of the Q factor for a two-component
tokamak 22 p0324 A79-31763

Q SWITCHED LASERS

- Performance of the short-pulse oscillators for
Argus and Shiva 21 p0083 A79-15171

QUADRANTS

- Solar energy conversion system - Four quadrant,
two dimension linear solar concentrators
23 p0399 A79-33999

QUALITY CONTROL

- National motor gasoline surveys: A key source of
fuel trend data
[BETC/RI-78/16] 23 p0568 N79-25248
- Silicon solar cell process development,
fabrication and analysis
[NASA-CR-158700] 23 p0572 N79-25505

QUANTITATIVE ANALYSIS

- Solar Heating and Cooling of Buildings (SHACOB)
commercialization report, part B, analysis of
market development. Volume 1: Executive
summary, September 1977
[HCP/N70066-01/1-VOL-1] 23 p0574 N79-25522
- Quantitative analysis of defects in silicon:
Silicon sheet growth development for the large
area silicon sheet task of the low-cost solar
array project
[NASA-CR-158724] 23 p0586 N79-26980

QUEBEC

- The performance of a site built, air heating,
vertical collector with snow reflector in Quebec
22 p0319 A79-31423

QUENCHING (COOLING)

- Heat pulses required to quench a potted
superconducting magnet 22 p0236 A79-20538

R

RADIAL DISTRIBUTION

- Laser measurements of the radial profiles of the
electron temperature and density in the FT-1
tokamak 22 p0244 A79-21430

RADIAL FLOW

- Nonstationary two-dimensional magnetohydrodynamic
flow in a radial channel 22 p0247 A79-21626
- Radial transport in the ELMO Bumpy Torus in
collisional regimes 22 p0312 A79-31184

RADIANT COOLING

- Optimization and design of radiative
heat-discharge system for energy unit with
Stirling engine --- operating in planetary
environment 21 p0166 A79-20348

RADIANT FLUX DENSITY

- Receiver designs for tower-top solar collector
21 p0135 A79-17450
- Design of solar heating system for winter heating
of buildings /A case study/ 21 p0139 A79-17486
- Controlling the radiant flux of a high-temperature
solar energy conversion system over two parameters
22 p0296 A79-28669
- Radiation regime of inclined surfaces
[WMO-467] 21 p0192 N79-11613

RADIANT HEATING

- Slag transport models for radiant heater of an MHD
system
[ASME PAPER 78-WA/HT-21] 21 p0161 A79-19808
- Radiant exchange for a fin and tube solar collector
22 p0271 A79-25066
- Dynamic testing of a cryogenic heat pipe/radiator
23 p0531 A79-42937

RADIATION ABSORPTION

- Absorption of solar radiation by alkali vapors ---
for efficient high temperature energy converters
21 p0108 A79-16612
- Thermal analysis of black liquid cylindrical
parabolic collector 22 p0295 A79-28354
- Method for making an aluminum or copper substrate
panel for selective absorption of solar energy
[NASA-CASE-MPS-23518-1] 21 p0182 N79-11469
- Solar evacuated tube collector: Absorption
chiller systems simulation
[COO-2577-13] 21 p0209 N79-13530

- Proposal for a representation of the quasisteady-state performance of flat-plate collectors
[ASSA-SB-821/77] 22 p0349 A79-18461
- RADIATION DAMAGE**
The HTS-2 satellite solar cell experiment 21 p0001 A79-10016
Materials problems and possible solutions for near term tokamak fusion reactors 21 p0079 A79-14790
Degradation of polymethylmethacrylate by radiation --- solar collector cover material 23 p0431 A79-35074
Accelerated testing of the optical radiation resistance of profiled polyethylene sleeves and sheets under natural climatic conditions 23 p0433 A79-35383
Solar cell experiments on the HTS-2 satellite 23 p0497 A79-40895
Space environment damage to solar cell coverslide assemblies 23 p0498 A79-40896
The effect of protons electrons and photons on the performance of some new types of high efficiency solar cells 23 p0498 A79-40897
Electron and proton degradation in AlGa/As-GaAs solar cells 23 p0506 A79-40973
Photon-degradation effects in terrestrial silicon solar cells 23 p0529 A79-42545
Low energy proton radiation damage to (AlGa)As-GaAs solar cells [NASA-CR-159040] 23 p0572 A79-25507
- RADIATION DISTRIBUTION**
Fundamentals of mathematical modeling of solar-radiation regime energy structure 21 p0166 A79-20352
Isotropic distribution approximation in solar energy estimations --- diffuse insolation on tilted surface 22 p0262 A79-23753
Flux-redistribution in the focal region of a planar Fresnel ring mirror --- solar furnace design 22 p0263 A79-23764
On the use of synoptic weather map typing to define solar radiation regimes 22 p0272 A79-25392
- RADIATION DOSAGE**
Exposure test results for reflective materials --- used in solar concentrators 23 p0430 A79-35068
Tracer experiments in the field. Example of application for the determination of slide levels for stack discharges at a nuclear research establishment 23 p0551 A79-23539
- RADIATION EFFECTS**
Fuel technology and the environment --- nuclear reactor caused radiation effects and transmutation 21 p0079 A79-14787
Response of a solar cell to intense and nonuniform illumination when used with solar concentrators 21 p0125 A79-17357
Calculation of the external electromagnetic field of closely spaced MHD machines 22 p0298 A79-29285
Effect of microwave radiation on the volt-ampere characteristics of superconducting bridges of variable thickness 23 p0395 A79-33690
Preliminary environmental assessment for the Satellite Power System (SPS). Volume 1: Executive summary [NASA-TN-80354] 23 p0557 A79-24435
Preliminary environmental assessment for the Satellite Power System (SPS). Volume 2: Detailed assessment [NASA-TN-80355] 23 p0557 A79-24436
- RADIATION HAZARDS**
Some perspectives on research into the biological response to non-ionizing electromagnetic radiation --- relation to SETI, SPS, and other government projects 22 p0271 A79-24879
- Health and safety hazards associated with solar concentration systems 23 p0439 A79-36628
- RADIATION MEASUREMENT**
The use of a sort of slide rule for the quick determination of solar irradiation of surfaces and through double glazing of arbitrary orientation and different inclination 21 p0055 A79-13625
Calibration standards and field instruments for the precision measurement of insolation 21 p0076 A79-14765
Measurement of solar radiation for energy conversion 21 p0119 A79-17305
Design of radiometer for measurement of total and net exchange solar radiation 21 p0119 A79-17307
Measurement and modelling of shortwave radiation on inclined surfaces 22 p0242 A79-21062
Thermal converters with transverse thermoelectromotive forces 22 p0256 A79-22847
Solar radiation data modeling and its role in solar system studies --- for energy conversion systems performance prediction 23 p0429 A79-35056
- RADIATION MEASURING INSTRUMENTS**
Facility with sectioned photoreceiver and laser radiator for determining solar radiation concentrator accuracy characteristics 21 p0054 A79-13292
Results of measurements of solar radiation on surfaces of different orientations 21 p0055 A79-13622
Measurement of radiation intensity by means of a pyrheliometer 21 p0055 A79-13623
New instrumentation for high temperature and hemispherical measurements of selective surfaces --- for solar energy conversion 22 p0294 A79-28152
Specularity measurements for solar materials 22 p0294 A79-28153
- RADIATION SHIELDING**
Optimization of radioisotope thermoelectric generators with gamma-radiation protection 23 p0433 A79-35176
- RADIATIVE HEAT TRANSFER**
Flame emissivities - Alternative fuels 21 p0052 A79-12984
On the optimisation of Trombe wall solar collectors [ASME PAPER 78-WA/SOL-13] 21 p0163 A79-19845
Estimating heat loads on multistage thermoelectric heat pumps 22 p0260 A79-23614
Heat exchanges and columnar growth in electron-beam evaporation of silicon films for solar cell applications 22 p0272 A79-25084
Cavity-type surfaces for solar collectors 22 p0283 A79-26497
Theoretical and practical aspects of heat transfer in the window-absorber cavity of a flat plate collector 23 p0383 A79-32957
Combined radiant-flux controller for a high-temperature solar energy system 23 p0433 A79-35382
Effects of nonuniform distribution of the absorber temperature on radiation losses of a flat-plate solar collector 23 p0530 A79-42894
Heat transfer in a high-power MHD channel 23 p0533 A79-43171
- RADIATIVE TRANSFER**
Solar energy storage - Digital simulation of energy transfer by conduction and radiation in a two-phase medium 23 p0383 A79-32963
- RADIATORS**
Dynamic testing of a cryogenic heat pipe/radiator 23 p0531 A79-42937
- RADIO EQUIPMENT**
Engineering of microwave relays --- microwave radio equipment engineering aspects and impact on energy technology 23 p0526 A79-41931

RADIO FREQUENCIES

New methods for the conversion of solar energy to
R. F. and laser power
[AIAA PAPER 791416] 23 p0426 A79-34846

RADIO FREQUENCY HEATING

Present status of two R.F. heating schemes -
I.C.R.H. and L.H.R.H. --- Ion Cyclotron Resonant
Heating and Lower-Hybrid Resonant Heating of
plasma

The advanced thermionic converter with microwave
power as an auxiliary ionization source
21 p0071 A79-14467

RF-heating in stationary systems --- of toroidal
plasma in tokamaks
21 p0153 A79-18470

Lower hybrid resonance heating --- of tokamak plasma
22 p0271 A79-24864
22 p0271 A79-24865

RADIO FREQUENCY INTERFERENCE

Solar Power Satellite (SPS) pilot beam and
communication link subsystem investigation
study, phase 1 --- ionospheric propagation,
radio frequency interference, and microwave
transmission
[NASA-CR-161161] 22 p0345 A79-17896

RADIO TRANSMITTERS

Power supplies for Arctic radio repeater systems
[AD-A061609] 22 p0339 A79-17118

RADIOACTIVE ISOTOPES

Selenide isotope generator for the Galileo mission
21 p0022 A79-10185

Cooling radioisotope thermoelectric generators in
the Shuttle
21 p0023 A79-10186

Selenide technology evaluation program at JPL
21 p0026 A79-10222

Analytical predictions of selenide RTG power
degradation
21 p0026 A79-10223

Recent terrestrial and undersea applications of
radioisotope thermoelectric generators /RTGs/
21 p0027 A79-10226

Radioisotope-powered free-piston Stirling engine
for space applications
[IAF PAPER 78-42] 21 p0034 A79-11217

Analysis of radioactive contaminants in
by-products from coal-fired power plant operations
[PB-286365/2] 21 p0232 A79-15473

Assessing the impact of nuclear-power plants on
the environment
[PB-290858/0] 23 p0545 A79-22662

RADIOACTIVE WASTES

A waste management strategy for nuclear fusion
power systems from a regulatory perspective
23 p0407 A79-34064

Radioisotope-powered photovoltaic generator
23 p0423 A79-34285

RADIOGRAPHY

Microradiographs of laser fusion targets - 2-D
modeling and analysis
23 p0384 A79-32993

RADIOISOTOPE BATTERIES

Copper/water axially-grooved heat pipes for RTG
applications
21 p0023 A79-10188

Brayton Isotope Power System - The versatile
dynamic power converter --- for spacecraft
21 p0023 A79-10190

Melting multifoil insulation for KIPS emergency
cooling --- Kilowatt Isotope Power System
21 p0023 A79-10191

Development of a 1 kW/e/ isotope fueled Stirling
cycle power system
21 p0025 A79-10210

Determining the reliability of radioisotope
thermoelectric generators /RTGs/ designed for
terrestrial and undersea applications
22 p0261 A79-23622

Recent terrestrial and undersea applications of
radioisotope thermoelectric generators /RTGs/
22 p0261 A79-23623

Radioisotope-powered photovoltaic generator
23 p0423 A79-34285

Optimization of radioisotope thermoelectric
generators with gamma-radiation protection
23 p0433 A79-35176

RADIOMETERS

Design of radiometer for measurement of total and
net exchange solar radiation
21 p0119 A79-17307

RAFTS

The development of the wave contouring raft
23 p0450 A79-37869

RAIL TRANSPORTATION

Energy efficiency in the transport sector
21 p0054 A79-13574

Breakdown of rapid rail energy costs - A study of
three systems
21 p0068 A79-14323

Total energy and labor requirements for an
electric commuter railroad
21 p0068 A79-14325

Optimal control of on-board and station flywheel
storage for rail transit systems
21 p0148 A79-17822

Energy requirements of the rail mode
[ASME PAPER 78-RT-1] 21 p0150 A79-18085

Optimal control of on-board and station flywheel
storage for rail transit systems
[ASME PAPER 78-WA/DSC-32] 21 p0159 A79-19771

The influence of systems and operations on rapid
rail energy utilization
22 p0299 A79-29338

The impact of aeronautical sciences on other modes
of transport
22 p0325 A79-31915

The self-propelled hydrogen-powered refrigerator car
23 p0415 A79-34126

Electromagnetic propulsion alternatives --- in
mass drivers
[AIAA PAPER 79-1400] 23 p0426 A79-34840

High Speeds and aerotrain
23 p0551 A79-23836

RAMAN SPECTRA

Stimulated Raman scatter in laser fusion target
chambers
21 p0155 A79-18794

RANDOM SAMPLING

Phase one/base data for the development of energy
performance standards for new buildings: Sample
design
[PB-286903/0] 22 p0331 A79-16150

RANKINE CYCLE

Analysis and design of an 18-ton solar-powered
heating and cooling system
21 p0019 A79-10156

Combined cycle gas turbine for an automobile
application
21 p0019 A79-10157

Simulation of solar powered Rankine cycle systems
21 p0022 A79-10179

Melting multifoil insulation for KIPS emergency
cooling --- Kilowatt Isotope Power System
21 p0023 A79-10191

A Stirling engine heat pump system
21 p0024 A79-10206

A high temperature Rankine binary cycle for ground
and space solar engine applications
21 p0108 A79-16613

Cycle optimization for a solar turbopack ---
turbine water pump utilizing Rankine cycle
21 p0141 A79-17500

Design and performance of 1/4 H.P. solar power unit
21 p0141 A79-17503

Application of turbopack in solar energy systems
21 p0141 A79-17504

Conceptual design of large heat exchangers for
ocean thermal energy conversion
[ASME PAPER 78-WA/HT-32] 21 p0161 A79-19813

Efficiency improvement by means of multicomponent
processes - Improvement of the efficiency of
heat-power transformation by means of an
employment of Clausius-Rankine sorption processes
21 p0164 A79-19975

Use of organic fluids in solar turbines
22 p0269 A79-24621

Optimum power plant capacity of ocean-based ocean
thermal energy conversion systems
22 p0297 A79-28922

The combined reheat gas turbine/steam turbine
cycle. I - A critical analysis of the combined
reheat gas turbine/steam turbine cycle
[ASME PAPER 79-GT-7] 22 p0306 A79-30505

Solar Rankine engines - Examples and projected costs
[ASME PAPER 79-SOL-3] 22 p0307 A79-30541

- Application of a power recovery system to gas turbine exhaust gases
[ASME PAPER 79-GT-167] 23 p0379 A79-32429
- Alternate ways of using bottoming cycle power in pipeline gas compressor stations
[ASME PAPER 79-GT-201] 23 p0380 A79-32458
- Major factors in OTEC power cycle design
23 p0404 A79-34041
- Externally pumped Rankine cycle thermal transport devices
[AIAA PAPER 79-1091] 23 p0456 A79-38060
- Rankine cycle machines for solar cooling
[NASA-TM-78196] 21 p0173 N79-10524
- Preliminary design package for residential heating/cooling system: Rankine air conditioner redesign
[NASA-CR-150871] 22 p0354 N79-19453
- The thermodynamic performance of two combined cycle power plants integrated with two coal gasification systems
23 p0545 N79-22950
- Rankine-cycle component characteristics
23 p0579 N79-26478
- Candidate power-conversion system cycles, appendix A
23 p0580 N79-26484
- Diesel organic rankine cycle compound engine (Bottoming Cycle) program plan
[DOE/CS-0052] 23 p0590 N79-27521
- RANKINE-HUGONIOT RELATION**
- Mathematical models of direct initiation of unconfined gas phase detonations --- hazards of LNG/air clouds from spills
[AIAA PAPER 79-0289] 21 p0157 A79-19649
- RAPID TRANSIT SYSTEMS**
- Breakdown of rapid rail energy costs - A study of three systems
21 p0068 A79-14323
- Optimal control of on-board and station flywheel storage for rail transit systems
[ASME PAPER 78-WA/DSC-32] 21 p0159 A79-19771
- Application of kinetic energy storage to transportation systems --- flywheels
22 p0299 A79-29337
- The influence of systems and operations on rapid rail energy utilization
22 p0299 A79-29338
- The application of optimal control theory hybrid electric transit systems
[AD-A059365] 21 p0220 N79-14559
- High Speeds and aerotrain
23 p0551 N79-23836
- RARE EARTH ALLOYS**
- Modification of hydriding properties of AB5 type hexagonal alloys through manganese substitution
23 p0415 A79-34124
- RARE EARTH COMPOUNDS**
- Magnetic and electrical properties of rare earth and rare earth intermetallic hydrides
22 p0249 A79-21692
- Hydrogen absorption in rare earth intermetallic compounds
22 p0249 A79-21693
- Hydrides of rare earth-nickel compounds - Structure and formation enthalpies
22 p0250 A79-21697
- The plateau pressure of RE Ni5 and RE Co5 hydrides --- in hydride formation
22 p0250 A79-21698
- Rare earth and actinide intermetallics as hydrogenation catalysts
22 p0251 A79-21713
- RARE GASES**
- Noble gas MHD generator experiments at low stagnation temperatures
23 p0394 A79-33419
- Experimental investigation on the discharge structure in a noble gas MHD generator
[TH-78-E-79] 22 p0350 N79-18758
- RAREFIED PLASMAS**
- Fast penetration of a magnetic field into a low-density plasma
22 p0244 A79-21432
- Electrons of high perpendicular energy in the low-density regime of tokamaks
22 p0270 A79-24852
- RATIONS**
- Proposed standby gasoline rationing plan. Economic and regulatory analysis draft
[DOE/ERA-0009] 21 p0214 N79-13934
- RAY TRACING**
- Laser ray trace tester for parabolic trough solar collectors
21 p0144 A79-17619
- Wave reflection from the lower hybrid surface - A toroidal effect --- in tokamaks
22 p0255 A79-22427
- A ray-tracing analysis of fast-wave heating of tokamaks
22 p0313 A79-31186
- Drift wave propagation and convective wave growth in tokamaks
23 p0446 A79-37262
- RAYLEIGH DISTRIBUTION**
- A comparison of the Weibull and Rayleigh distributions for estimating wind power potential
21 p0045 A79-12243
- An analytical expression for the specific output of wind turbine generators
22 p0273 A79-25720
- REACTION KINETICS**
- Catalytic gasification predevelopment research
21 p0029 A79-10246
- Catalytic coal gasification exploratory research program
21 p0030 A79-10247
- Electrochemical-ellipsometric studies of oxide films formed on nickel during oxygen evolution
21 p0038 A79-11799
- O2 reduction kinetics in concentrated acids --- in fuel cells
21 p0038 A79-11809
- Combustion chemistry of chain hydrocarbons
21 p0052 A79-12986
- Kinetics of nitric oxide formation in combustion
21 p0053 A79-12989
- Shock-tube measurements of induction and post-induction rates for low-Btu gas mixtures --- derived from shale oil retorting and coal gasification
21 p0083 A79-15245
- Solar fuels --- photochemical reaction kinetics and energy storage
21 p0149 A79-18009
- Energy storage using the reversible oxidation of barium oxide
22 p0242 A79-21169
- Kinetics of hydrogen absorption and desorption --- for energy storage
22 p0248 A79-21687
- Feasible operating regions for moving bed coal gasification reactors
22 p0297 A79-28983
- Electrochemical corrosion of MHD electrodes in slags
23 p0392 A79-33398
- Comparison of two hydrogen production methods for nuclear-hydrogen conversion
23 p0413 A79-34108
- Water splitting - The chemistry of the I2-SO2-H2O reaction and the processing of H2SO4 and HI products
23 p0413 A79-34109
- Modification of hydriding properties of AB5 type hexagonal alloys through manganese substitution
23 p0415 A79-34124
- Excited-state kinetics for Nd/thd/3 and Th/thd/3 chelate vapors and prospects as fusion laser media
23 p0422 A79-34192
- Pulverized-coal combustion and gasification: Theory and applications for continuous flow processes --- Book
23 p0474 A79-38871
- Pyrolysis of Western Kentucky heavy oil using a transfer line reactor
23 p0492 A79-40452
- Noncatalytic coal liquefaction in a donor solvent - Rate of formation of oil, asphaltenes, and preasphaltenes
23 p0492 A79-40453
- A stoichiometric analysis of coal gasification
23 p0492 A79-40456
- Combustion kinetics of selected aromatic hydrocarbons
[AD-A059381] 21 p0215 N79-14184
- Thermal and kinetic analysis of the pyrolysis of coals
22 p0336 N79-16704

SUBJECT INDEX

REACTOR MATERIALS

- Alternative hydrocarbon fuels: Combustion and chemical kinetics --- synthetic aircraft fuels [AD-A061050] 22 p0338 N79-17011
- Analysis of coke combustion during in-situ oil recovery 23 p0553 N79-24095
- Rate of desulfurization from liquid iron and iron alloys with hydrogen [NRC/CNR-TT-1930] 23 p0553 N79-24120
- Kinetics of coal liquefaction to preasphaltenes, asphaltenes and oils 23 p0588 N79-27320
- Mixing and kinetic processes in pulverized coal combustors [EPRI-FP-806-SY] 23 p0589 N79-27330
- Kinetics of silica deposition from simulated geothermal brines [CONF-790108-1] 23 p0597 N79-27691
- REACTION WHEELS**
- Design and applications of flywheels. Citations from the NTIS data base [NTIS/PS-78/0997/3] 21 p0190 N79-11550
- Design and applications of flywheels. Citations from the engineering index data base [NTIS/PS-78/0998/1] 21 p0190 N79-11551
- REACTIVITY**
- Limestone SO₂ reactivity and causes for reactivity loss during multi cycle utilization 21 p0065 A79-14121

- Energy for the long run - Fission or fusion 22 p0256 A79-22760
- The potential of fusion reactors as process heat source 22 p0284 A79-26624
- Pellet X-ray spectra for laser fusion reactor designs 22 p0291 A79-27878
- Characteristics of electron-cyclotron-resonance-heated tokamak power reactors 22 p0292 A79-27885
- Design and development of the US-TESPE toroidal coil 22 p0311 A79-31014
- Thermoelectric magnetohydrodynamics 22 p0312 A79-31098
- Large tokamak experiments - Report on the Third IAEA Technical Committee Meeting, Paris, 1-6 September 1978 22 p0313 A79-31193
- Report on a simple fusion reactor model that is already in operation 23 p0407 A79-34058
- Fusion power demonstration study at ORNL 23 p0407 A79-34059
- The ELMO Bumpy Torus - An alternative fusion reactor concept 23 p0407 A79-34060
- Conceptual design study of a doublet fusion ignition test reactor 23 p0407 A79-34065
- Progress in tokamak and stellarator experiments 23 p0443 A79-36878
- Solar chemical reactors 23 p0462 A79-38572
- Overview of the magnetic fusion energy development and technology program [HCP/T3073-01] 21 p0193 N79-11887
- Civilian applications of laser fusion [UCRL-52349] 21 p0195 N79-12439
- REACTOR MATERIALS**
- Liquid metal heat pipe performance in the presence of a transverse magnetic field --- for fusion reactors [ASME PAPER 78-ENAS-20] 21 p0048 A79-12569

REACTOR PHYSICS

SUBJECT INDEX

Plasma surface interactions in controlled fusion devices; Proceedings of the Third International Conference, Abingdon, Oxon, England, April 3-7, 1978
23 p0442 A79-36876

First wall and divertor plate material selection in fusion reactors
23 p0444 A79-36886

Corrosion of stainless steel, volume 2. A bibliography with abstracts [NTIS/PS-79/0208/3]
23 p0553 N79-24143

Fusion power program [ANL/PPP-78-2]
23 p0586 N79-26953

REACTOR PHYSICS
The synergetics of the catalytic D-D-fusion-fission breeder
22 p0252 A79-22236

Large tokamak experiments - Report on the Third IAEA Technical Committee Meeting, Paris, 1-6 September 1978
22 p0313 A79-31193

Gaseous fuel reactors for power systems [LA-UR-78-1437]
21 p0214 N79-13844

REACTOR SAFETY
Energy and Technology Review, June 1978 --- composite materials for flywheels, shale oil recovery, and seismic safety at nuclear power plants [UCRL-52000-78-6]
21 p0215 N79-14168

Environmental and radiological safety studies. Interaction of (Pu-238)O₂ heat sources with terrestrial and aquatic environments --- soil and water analysis [LA-7033-PR]
21 p0232 N79-15783

REACTOR TECHNOLOGY
Heavy-ion beam inertial-confinement fusion
21 p0054 A79-13448

Large tokamak experiments - Report on the Third IAEA Technical Committee Meeting, Paris, 1-6 September 1978
22 p0313 A79-31193

Moving bed heat transfer for advanced power reactor applications
23 p0416 A79-34133

Fusion research - The temperature rises
23 p0445 A79-37000

Stored energy calculation: The state of the art [PNL-2581]
21 p0210 N79-13541

Proposal to the United States Energy Research and Development Administration for continuation of fusion reactor technology studies [COO-4636-1]
23 p0582 N79-26511

REAL TIME OPERATION
Real time computer control of 5 megawatts of solar thermal energy
21 p0144 A79-17621

The real time aperture flux system as part of the Solar Thermal Test Facility
23 p0429 A79-35050

Suntrack-systems for solar concentrators
23 p0464 A79-38587

Alternative, semi-automated method for performing multiobjective analyses [BNL-50892]
23 p0599 N79-27921

RECEIVERS
Receiver designs for tower-top solar collector
21 p0135 A79-17450

Assessment of economic factors affecting the satellite power system. Volume 2: The systems implications of rectenna siting issues [NASA-CR-161186]
22 p0368 N79-21552

Central receiver thermal power system [AED-COFP-78-212-008]
23 p0582 N79-26513

RECIRCULATIVE FLUID FLOW
Mass transfer in a current source during circulation of the mixture driven by gaseous reaction products --- in fuel cell
21 p0164 A79-19851

RECLAMATION
The effectiveness of multi-date, multi-scale aerial remote sensing imagery for monitoring coal mining operations and reclamation efforts in Alberta
23 p0438 A79-36505

Solid waste and biomass. Their potential as energy sources in Illinois, 1977 [PB-281649/4]
21 p0177 N79-10562

Remote monitoring of coal strip mine rehabilitation [PB-286647/3]
21 p0228 N79-15379

RECOMBINATION COEFFICIENT
Spectral characteristics of photoconverters with nonuniform defect distribution in the base
21 p0053 A79-13289

RECORDING INSTRUMENTS
Data acquisition using a modular data logger --- for solar heated building monitoring
21 p0088 A79-15832

RECTENNAS
Solar power satellites - Microwaves deliver the power
23 p0460 A79-38374

RECTIFIERS
Thyristor controlled rectifier inverting at unity power factor
21 p0033 A79-10898

RECYCLING
The need for materials recycling
21 p0047 A79-12340

Energy conservation by means of recycling
21 p0112 A79-16735

Development of specifications for recycled products
22 p0295 A79-28182

The use of anaerobic digestion for the treatment and recycling of organic wastes
23 p0396 A79-33754

Recycling processes in tokamaks
23 p0443 A79-36882

Summary results from the NASA Tech House one year live-in [AIAA PAPER 79-0987]
23 p0475 A79-38892

Development of the Kiener pyrolysis system for environmental protection, energy recovery and recycling
23 p0488 A79-40389

Considerations in the design of a shredded municipal refuse burning and heat recovery system
23 p0488 A79-40390

Recycle energy system - City of Akron, Ohio
23 p0488 A79-40392

US Army/Environmental Projection Agency re-refined engine oil program [AD-A056806]
21 p0171 N79-10216

Energy use patterns for metal recycling [PB-284855/4]
21 p0201 N79-13152

A dynamic multi-criteria analysis of spent-nuclear-fuel alternatives --- economic analysis
23 p0567 N79-24813

REDUCTION (CHEMISTRY)
O₂ reduction kinetics in concentrated acids --- in fuel cells
21 p0038 A79-11809

The direct reduction of sulfur dioxide
21 p0065 A79-14124

Coal gasification studies. III - Reduction in the presence of some metal iodides and iron halides
22 p0299 A79-29314

Redox flow cell energy storage systems [NASA-TN-79143]
23 p0558 N79-24442

Redox flow cell development and demonstration project, calendar year 1977 [NASA-TN-79067]
23 p0558 N79-24445

REFERENCE SYSTEMS
Impacts of new energy technologies as measured against reference energy systems --- conferences [BNL-25475]
23 p0597 N79-27694

REFINING
Operation of the Ft. Lewis, Washington Solvent Refined Coal /SRC/ Pilot Plant in the SRC I and SRC II processing modes
21 p0006 A79-10054

Potential applications of solar furnaces in materials industry
23 p0471 A79-38654

Particle size variation in the solvent refined coal process
23 p0492 A79-40451

Coal liquefaction and deashing studies. I - Consol Synthetic Fuel process. II - Solvent Refined Coal process
23 p0492 A79-40455

Chemicals from coal. Report based on HRI H-coal product [FE-1534-50]
21 p0180 N79-11166

Solvent Refined Coal (SRC) process: Operation of solvent refined coal pilot plant [FE-2270-34]
23 p0554 N79-24181

- US refining capacity: How much is enough
[PB-291437/2] 23 p0555 N79-24192
Status report the SRC-1 and SRC-2 processes
23 p0593 N79-27616
- REFLECTANCE**
Specular mirrors for solar energy application
21 p0034 A79-11147
Ideal prism solar concentrators
21 p0149 A79-18023
Colored stainless steel - A new type of selective
absorber --- for solar thermal conversion
22 p0294 A79-28150
Heliostat reflectivity variations due to dust
buildup under desert conditions
23 p0430 A79-35067
Exposure test results for reflective materials ---
used in solar concentrators
23 p0430 A79-35068
Temperature dependence of the optical properties
of silicon
23 p0437 A79-35820
Spatial uniformity of quantum efficiency of a
silicon photovoltaic detector
23 p0478 A79-39593
Augmented solar energy collection using various
planar reflective surfaces: Theoretical
calculations and experimental results
[LA-7041] 21 p0185 N79-11494
- REFLECTOMETERS**
Coal-shale interface detection
[NASA-CASE-MFS-23720-3] 23 p0569 N79-25443
- REFLECTORS**
Large, lightweight, replicated mirrors
21 p0043 A79-11976
Analysis, development and testing of a fixed tilt
solar collector employing reversible Vee-Trough
reflectors and vacuum tube receivers
23 p0477 A79-39101
- REFRACTION**
Linear echelon refractor/reflector solar
concentrators
22 p0293 A79-28143
- REFRACTIVITY**
Review of theories for predicting n2 in glasses
and crystals --- refractive index of fusion
laser materials
21 p0083 A79-15139
Second stage concentration with tapers for
fluorescent solar collectors
23 p0423 A79-34372
- REFRACTORY MATERIALS**
Materials --- for high temperature MHD technology
21 p0106 A79-16491
Ceramic materials for vehicular gas turbine
applications
21 p0165 A79-20085
The role of the ceramic heat exchanger in energy
and resource conservation
[ASME PAPER 79-GT-106] 23 p0377 A79-32381
Thermal properties of MHD electrode materials
23 p0392 A79-33400
High temperature materials study --- for thermal
insulation in solar furnaces
23 p0431 A79-35070
MHD power generation: Research, development and
engineering
[FE-3087-2] 22 p0363 N79-20518
Study of heat transfer through refractory lined
gasifier vessel walls
[FE-2210-29] 23 p0556 N79-24306
- REFRACTORY METAL ALLOYS**
High-temperature contacts for silicon solar cells
23 p0502 A79-40934
- REFRACTORY METALS**
Growth of refractory oxide layers by
electrochemical vapor deposition /EVD/ at
elevated temperatures --- for fuel cells
21 p0039 A79-11812
- REFRIGERANTS**
Solar absorption cooling
21 p0090 A79-15861
Candidate chemical systems for air cooled, solar
powered, absorption air conditioner design.
Part 2: Solid absorbents, high latent heat
refrigerants
[SAN/1587-2] 21 p0211 N79-13544
- REFRIGERATING**
Solar ammonia-water absorption system for cold
storage application
21 p0143 A79-17521
Cryogenic technology and superconductivity in
controlled fusion
22 p0311 A79-31003
Refrigeration requirements for future
superconductive energy related applications
22 p0311 A79-31019
Conserving electric power by geothermal
refrigeration - Cooling and freezing
23 p0409 A79-34079
Continuous solar-heated absorption cooling unit
for industrial applications
23 p0471 A79-38648
- REFRIGERATING MACHINERY**
Optimising the pitching of tubes in a flat solar
collector for increasing the efficiency for use
in vapour absorption refrigeration
21 p0132 A79-17422
The self-propelled hydrogen-powered refrigerator car
23 p0415 A79-34126
Cryogenic refrigeration, volume 2. A bibliography
with abstracts
[NTIS/PS-78/1261/3] 22 p0331 N79-16144
Cryogenic refrigeration, volume 3. A bibliography
with abstracts
[NTIS/PS-78/1262/1] 22 p0331 N79-16145
- REFRIGERATORS**
Performance testing of a three ton solar
absorption chiller
[AIAA PAPER 78-1757] 21 p0060 A79-13858
Design of a solar energy operated lithium-bromide
water absorption refrigeration system for
refrigeration storage
21 p0143 A79-17523
Gas-cycle solar refrigeration system performance
21 p0153 A79-18471
Design and optimisation of an absorption
refrigeration system operated by solar energy
22 p0285 A79-26819
Performance of an intermittent ammonia-water solar
refrigerator operating with a flat plate collector
23 p0466 A79-38607
Solar air conditioning and refrigeration in arid
regions
23 p0466 A79-38608
- REFUELLING**
Plasma density measurements on refuelling by solid
hydrogen pellets in a rotating plasma
22 p0255 A79-22369
Mechanically rechargeable, metal-air batteries for
automotive propulsion
[UCRL-81178] 21 p0189 N79-11538
- REGENERATION (ENGINEERING)**
Simulations of the performance of open cycle
desiccant systems using solar energy
21 p0066 A79-14262
A regenerative process for fluidized-bed
combustion of coal with lime additives
22 p0297 A79-28984
An electrochemically regenerative
hydrogen-chlorine energy storage system
23 p0397 A79-33836
Methane generation from human, animal, and
agricultural wastes
[PB-276469/4] 21 p0171 N79-10240
Engineering and economic analysis of waste to
energy systems
[PB-285797/7] 21 p0224 N79-14946
Evaluation of available MHD seed-regeneration
processes on the basis of energy considerations
[ANL/MHD-78-4] 23 p0583 N79-26519
- REGENERATIVE FUEL CELLS**
The 100 kW space station --- regenerative fuel
cells and nickel hydrogen and nickel cadmium
batteries for solar arrays
22 p0371 N79-21603
- REGENERATORS**
Reliability and durability of ceramic regenerators
for gas turbine applications
21 p0050 A79-12823
Rate of desorption in a solar regenerator
21 p0055 A79-13611
Study of a heat exchanger with heat pipes within
the system of a small-scale gas-turbine engine
21 p0114 A79-16800

- Buoyancy effects in a solar regenerator --- for air dehumidifier absorbent solutions
22 p0262 A79-23752
- Analytical consideration of fuel economy and dynamic response of a regenerative high temperature automobile gas turbine. I
[ASME PAPER 79-GT-127] 23 p0377 A79-32396

SUBJECT INDEX

RESEARCH AND DEVELOPMENT

Reliability of wind power from dispersed sites: A preliminary assessment [LBL-6889] 21 p0176 N79-10547

Verification test report on a solar heating and hot water system [NASA-CR-161165] 22 p0360 N79-20493

Evaluation of ceramics for stator application: Gas turbine engine report [NASA-CR-159533] 22 p0364 N79-21075

RELIABILITY ENGINEERING

Design criteria for multilayer superconductive magnets 22 p0236 A79-20536

Unique aspects of terrestrial photovoltaic system design [ASME PAPER 79-SOL-14] 22 p0308 A79-30548

Repowering of a small utility - A unique solution to a unique problem [ASME PAPER 79-GT-15] 23 p0375 A79-32332

Mechanical reliability considerations in the modern high temperature industrial gas turbine [ASME PAPER 79-GT-101] 23 p0377 A79-32377

Design of pressurized fluid-bed combustor/particulate control system for reliable turbine operation [ASME PAPER 79-GT-190] 23 p0379 A79-32449

System reliability studies for wave energy generation 23 p0450 A79-37872

Operating systems for solar electric energy supplies 23 p0466 A79-38606

REMOTE HANDLING

The impact of servicing requirements on tokamak fusion reactor design 21 p0079 A79-14793

Manned remote work station development article [NASA-CR-151871] 22 p0330 N79-16057

REMOTE REGIONS

NASA Lewis Research Center photovoltaic application experiments [AIAA PAPER 78-1768] 21 p0061 A79-13867

An overview of photovoltaic power systems [ASME PAPER 79-SOL-12] 22 p0308 A79-30547

REMOTE SENSORS

Instrumentation development for in situ coal gasification 21 p0006 A79-10053

Joint Conference on Sensing of Environmental Pollutants, 4th, New Orleans, La., November 6-11, 1977, Proceedings 21 p0082 A79-15023

Future programs and prospects for resource exploration from space by the year 2000 [AAS PAPER 78-182] 22 p0243 A79-21275

Energy and remote sensing applications 22 p0255 A79-22516

Remote sensing use in hydraulic planification in Mexico 22 p0255 A79-22522

Infrared remote sensing on geothermal areas by helicopter 22 p0256 A79-22620

Remote sensing and mine subsidence in Pennsylvania 22 p0303 A79-29936

Instrumentation for in situ coal gasification. IV - Seismic and acoustic techniques for remote monitoring 22 p0304 A79-29974

The effectiveness of multi-date, multi-scale aerial remote sensing imagery for monitoring coal mining operations and reclamation efforts in Alberta 23 p0438 A79-36505

Application of multispectral scanner data to the study of an abandoned surface coal mine [NASA-TM-78912] 21 p0204 N79-13472

Remote monitoring of coal strip mine rehabilitation [PB-286647/3] 21 p0228 N79-15379

REMOTELY PILOTED VEHICLES

Nickel-zinc battery for aircraft and missile applications [AD-A059295] 21 p0220 N79-14561

REPLENISHMENT

Need for and deployment of inexhaustible energy resource technologies: Report of Technology Study Panel inexhaustible energy resources study [TID-28202] 21 p0186 N79-11510

REPORTS

LSA Low-cost Solar Array project [NASA-CR-158250] 22 p0355 N79-19462

MHD power generation: Research, development and engineering [FE-2524-8] 22 p0363 N79-20517

REQUIREMENTS

Satellite Power Systems (SPS) concept definition study, exhibit C. Volume 7: System/subsystem requirements data book [NASA-CR-161223] 23 p0547 N79-23489

RESEARCH

Strategies for applied research management [PB-284741/6] 21 p0214 N79-13913

Hydrogen technology from thermonuclear research 22 p0338 N79-16997

NACA research on hydrogen for high altitude aircraft 22 p0338 N79-16999

MHD power generation: Research, development and engineering [FE-3087-2] 22 p0363 N79-20518

Basic research on ceramic materials for energy storage and conversion system [COO-2564-4] 23 p0564 N79-24506

RESEARCH AND DEVELOPMENT

Intersociety Energy Conversion Engineering Conference, 13th, San Diego, Calif., August 20-25, 1978, Proceedings. Volumes 1, 2 & 3 21 p0001 A79-10001

Oil recovery from a Utah tar sand deposit by in situ combustion 21 p0004 A79-10043

Exxon Donor Solvent coal liquefaction process development 21 p0007 A79-10060

Exploratory research in coal conversion 21 p0007 A79-10061

JPL - Small Power Systems Applications Project --- for solar thermal power plant development and commercialization 21 p0019 A79-10161

Evaluation program for new industrial gas turbine materials [ASME PAPER 78-GT-145] 21 p0031 A79-10269

ERDA fuel cell programs 21 p0039 A79-11814

Summary of international energy research and development activities 1974-1976 --- Book 21 p0068 A79-14400

Predemonstration fusion devices - Research and development needs 21 p0078 A79-14785

Biomimetic approach to solar energy conversion - Artificial photosynthesis 21 p0094 A79-15899

Westinghouse fluidized bed coal gasification system - Experience and plans 21 p0096 A79-15924

The solar energy R & D programme of the European Communities 21 p0116 A79-17278

Solar energy in Latin America - An overview 21 p0116 A79-17279

Report on the development of solar energy in France 21 p0117 A79-17280

The accomplishments of the United States Federal Solar Energy Program 21 p0117 A79-17281

Solar energy research, development and demonstration program in Kuwait 21 p0117 A79-17282

Solar energy activities in Austria 21 p0117 A79-17283

Solar energy R&D in Iran - The approach and the philosophy 21 p0117 A79-17284

Plans and prospects for solar energy utilisation in Malawi 21 p0117 A79-17285

Solar energy in Southern Africa 21 p0117 A79-17287

Fracture research in Canada 21 p0144 A79-17530

Coal technology '78; International Coal Utilization Convention, Houston, Tex., October 17-19, 1978, Conference Papers. Volumes 1 & 2 21 p0145 A79-17631

A summary of R&D programs --- for coal utilization 21 p0146 A79-17639

RESEARCH FACILITIES

resource and technology options for developing
countries
[BNL-50800]
21 p0208 N79-13524
- The national energy plan: Options under
assumptions of national security threat ---
economic impact procurement policy, and
resources management
[H-PRINT-95-48]
21 p0228 N79-15398
- The effects of resource impact factors on energy
conservation standards for buildings
[PB-286909/7]
22 p0335 N79-16384
- Technology assessment of western energy resource
development
22 p0347 N79-18368
- Baltimore applications project
[NASA-TM-79667]
22 p0351 N79-18815
- RETRIEVAL**
RDP storage and retrieval problems: Cause - effect
- options --- Refuse Derived Fuel
23 p0489 A79-40402
- RETROFITTING**
A solar energy system for space heating and space
cooling --- retrofitting aged buildings
21 p0072 A79-14686
- Solar retrofitting of existing residence with
almost zero delta TE system
21 p0139 A79-17485
- The performance of a site built, air heating,
vertical collector with snow reflector in Quebec
22 p0319 A79-31423
- Solar energy retrofit system for an older-type
building - The Williamstown Museum project
22 p0320 A79-31434
- Determination of the potential for solar
retrofitting in Edmonton --- pilot systems for
single family dwellings
22 p0323 A79-31456
- Retrofitting strategies for a housing cooperative
--- solar water heating installation
23 p0473 A79-38671
- RETROREFLECTION**
Large active retrodirective arrays for solar power
satellites
21 p0107 A79-16604
- RHEOLOGY**
Exploration of volcanic geothermal energy
resources based on rheological techniques
[DOE/ET/28453-3]
23 p0596 N79-27676
- RHODESIA**
Description of hydro-electric development and
proposal for future development on the Zambezi
22 p0340 N79-17323
- RIBBONS**
Multiple silicon ribbon growth by EFG
23 p0502 A79-40939
- Structure and electrical activity of planar
defects in EFG ribbons
[NASA-CR-158572]
23 p0551 N79-23806
- Silicon solar cell process development,
fabrication and analysis
[NASA-CR-158735]
23 p0581 N79-26495
- Quantitative analysis of defects in silicon:
Silicon sheet growth development for the large
area silicon sheet task of the low-cost solar
array project
[NASA-CR-158724]
23 p0586 N79-26980
- RIGID ROTORS**
The Netherlands experimental vertical axis wind
turbine
21 p0114 A79-17120
- A vertical-axis bicycle rotor turbine. I - Rotor
design. II - Aerodynamic aspects --- windmill
23 p0386 A79-33237
- The Savonius rotor - Theory and optimization
23 p0387 A79-33242
- Mechanical and vibrational problems of a vertical
axis wind turbine
23 p0389 A79-33265
- RIGID STRUCTURES**
The improved rigid airship --- design
characteristics and cost analysis
21 p0086 A79-15572
- RIMS**
Composite-rim flywheels - Spin tests
23 p0423 A79-34281
- RING LASERS**
Boltzmann simulation of a storage ring laser
23 p0487 A79-40381
- RING STRUCTURES**
On vibration of a thick flexible ring rotating at
high speed --- for flywheel energy storage
22 p0235 A79-20511
- Flux-redistribution in the focal region of a
planar Fresnel ring mirror --- solar furnace
design
22 p0263 A79-23764
- RISK**
Risk control in the development of energy processes
--- environment, worker and capital
considerations in coal gasification
21 p0085 A79-15372
- Risk with energy from conventional and
nonconventional sources
22 p0266 A79-24151
- Elements of financial risk - Identification of
major elements affecting financial risk in the
financing of solid waste resource recovery
projects
23 p0490 A79-40408
- RIVER BASINS**
A commentary on a methodology for assessment of
the environmental impact of the electrical power
system within the Connecticut River Basin
21 p0093 A79-15893
- RIVERS**
Tidal and river current energy systems
23 p0449 A79-37862
- Description of hydro-electric development and
proposal for future development on the Zambezi
22 p0340 N79-17323
- ROCKS**
Hot dry rock - A new geothermal energy source
21 p0087 A79-15673
- Hot dry rock, an abundant clean energy resource
21 p0098 A79-16106
- Long-term storage of solar energy in native rock
21 p0120 A79-17314
- A passive rock bed - Design, construction, and
performance
21 p0121 A79-17328
- Hot dry rock - A new potential for energy
22 p0265 A79-23832
- Thermal conductivity of crystalline rocks
associated with energy extraction for hot dry
rock geothermal systems
22 p0304 A79-30123
- Studies on the effect of bed aspect ratios and
pressure drop on flow distribution in rock bed
storage systems for solar energy applications
22 p0317 A79-31409
- Sensible heat storage for solar energy applications
22 p0322 A79-31449
- Alternate energy installations on the Jordan
College Campus
22 p0323 A79-31454
- Hot dry rock energy project
23 p0408 A79-34073
- Thermal fracturing patterns and effects of an
imitation hot dry rock by impinging of water jets
--- application to geothermal sources
23 p0409 A79-34076
- Hot dry rock energy project
[LA-UR-77-2744]
21 p0175 N79-10540
- Late diagenetic indicators of buried oil and gas.
2: Direct detection experiment at Cement and
Garza fields, Oklahoma and Texas, using enhanced
LANDSAT 1 and 2 images
[E79-10099]
22 p0347 N79-18373
- Research on the physical properties of geothermal
reservoir rock
[COO-2908-4]
22 p0358 N79-20459
- ROOFS**
Development of a shingle-type solar cell module
23 p0499 A79-40906

ROOM TEMPERATURE

- New alloy systems for hydrogen storage
21 p0038 A79-11806

ROTARY STABILITY

- Rotating strength of glass-carbon fiber-reinforced
hybrid composite discs
21 p0165 A79-20273

ROTARY WINGS

- Lag damping in autorotation by a perturbation method
--- for rigid rotor blades
[AHS 78-25] 21 p0152 A79-18151
Aeroelastic response and stability of a coupled
rotor/support system with application to large
horizontal axis with turbines
22 p0332 A79-16346

ROTATING BODIES

- On vibration of a thick flexible ring rotating at
high speed --- for flywheel energy storage
22 p0235 A79-20511

- Rotatable mass for a flywheel
[NASA-CASE-MFS-23051-1] 21 p0172 A79-10422
Demonstration of a rotary separator for two-phase
brine and steam flows
[TID-28519] 22 p0365 A79-21309

ROTATING CYLINDERS

- The Madaras Rotor Power Plant - An alternate
method for extracting large amounts of power
from the wind
[AIAA PAPER 79-0115] 21 p0157 A79-19541

ROTATING DISKS

- Rotating strength of glass-carbon fiber-reinforced
hybrid composite discs
21 p0165 A79-20273
Design of a mechanical energy storage unit ---
flywheel
23 p0387 A79-33246
The minimization of drag torque for rotating disks
23 p0387 A79-33247

ROTATING FLUIDS

- On the diffusive instability of some simple steady
magnetohydrodynamic flows
22 p0278 A79-26163

ROTATING PLASMAS

- A collisional plasma rotating between two cylinders
21 p0049 A79-12694
Investigation of the Hall effect in a discharge
with a rotational electric field
22 p0246 A79-21532
Measurements of plasma rotation in tokamak LT-3
22 p0252 A79-22238
Plasma density measurements on refuelling by solid
hydrogen pellets in a rotating plasma
22 p0255 A79-22369
Theory of the striated corona in a theta pinch
22 p0295 A79-28315
Hall effect in an induction discharge
23 p0442 A79-36806

ROTATING SHAFTS

- A simple solar tracking system --- manually
adjusted rotating shaft for solar concentrator
positioning
21 p0136 A79-17457
Mechanical reliability considerations in the
modern high temperature industrial gas turbine
[ASME PAPER 79-GT-101] 23 p0377 A79-32377
Commercial synchronous alternating-current
generators
23 p0580 A79-26482

ROTOR AERODYNAMICS

- Airfoil data for use of wind turbine designers
21 p0073 A79-14702
A two dimensional vortex sheet model of a Savonius
Rotor
22 p0278 A79-26178
A vertical-axis bicycle rotor turbine. I - Rotor
design. II - Aerodynamic aspects --- windmill
23 p0386 A79-33237
A method for calculating the induced velocity for
windmills with application to the optimization
of the aerodynamic design
23 p0387 A79-33239
The IAE 30-KW wind turbine - A review of the
aerodynamic design
23 p0387 A79-33240
The Savonius rotor - Theory and optimization
23 p0387 A79-33242
Windpower generation on a large scale
23 p0452 A79-37891

- Further development of the high-speed converter
with flapping hinge /Goslich system/ - Plans for
application in developing countries --- windmill
23 p0471 A79-38655

- Wind tunnel corrections for Savonius rotors
23 p0485 A79-40127

Cretan windmills

- 23 p0536 A79-43576

- Performance of windmills in a closely spaced array
23 p0537 A79-43681

- Design, instrumentation, and calibration of a
vertical axis wind turbine rotor
[TID-27754] 21 p0174 A79-10533

ROTOR BLADES

- A small horizontal axis wind turbine feeding power
into the utility grid
21 p0074 A79-14703

- High efficiency wave engine --- featuring rotor
blade exit nozzle design for high efficiency
22 p0279 A79-26187

- A hybrid cyclogiro-Darrieus-rotor wind turbine
23 p0387 A79-33243

- Materials for windmill blades
23 p0453 A79-37897

- A new concept - The flexible blade windmill /FBW/
23 p0485 A79-40126

- Composite rotor blades for large wind energy
installations
23 p0522 A79-41235

ROTOR BLADES (TURBOMACHINERY)

- Airfoil data for use of wind turbine designers
21 p0073 A79-14702

- Wind-turbine-generator rotor-blade concepts with
low-cost potential
22 p0240 A79-20828

- An operating 200 kW horizontal axis wind turbine
22 p0240 A79-20829

- A method for calculating the induced velocity for
windmills with application to the optimization
of the aerodynamic design
23 p0387 A79-33239

- Measurements of performance and structural
response of the Danish 200kW Gedser windmill
23 p0484 A79-40121

- Concentration augmentation of power in a
Savonius-type wind rotor
23 p0527 A79-41947

- Design, fabrication, and test of a composite
material wind turbine rotor blade
[NASA-CR-135389] 21 p0173 A79-10525

- Evaluation of urethane for feasibility of use in
wind turbine blade design
[NASA-CR-159530] 22 p0360 A79-20497

ROTOR SPEED

- A small horizontal axis wind turbine feeding power
into the utility grid
21 p0074 A79-14703

- Air bearing development for a GM automotive gas
turbine
[SAE PAPER 790107] 22 p0314 A79-31355

- Refuse shredding - Performance, testing and
evaluation data
23 p0491 A79-40419

- Optimal value of the rated speed of a wind generator
23 p0527 A79-41948

ROTORS

- Toroidal Accelerator Rotor Platforms for wind
energy conversion
21 p0029 A79-10240

- Test and development of ceramic combustors,
stators, nose cones, and rotor tip shrouds
21 p0049 A79-12821

- Preliminary design of a subscale ceramic
helical-rotor expander
21 p0050 A79-12849

- Development of vertical-axis wind-energy
converters - Darrieus design
23 p0447 A79-37744

- Giromill wind tunnel test and analysis, volume 2.
Technical discussion
[COO-2617-4/2] 21 p0204 A79-13378

RURAL AREAS

- On the depletion of ambient ozone by a rural
coal-fired power plant near Portage, Wisconsin
21 p0082 A79-15052

- Solar electrification and rural electrification -
A techno-economic review
21 p0118 A79-17289

- Bio-mass energy for rural areas
Development of small solar power plants for rural areas in India
A methodology for evaluating the worth of a new energy resource with particular reference to wind energy utilisation in rural areas
Photovoltaic power systems for rural areas of developing countries
An overview of photovoltaic power systems [ASME PAPER 79-SOL-12]
Wind energy conversion systems /WECS/ for central station and dispersed power applications
Integrated solar energy installations for isolated operation
Photovoltaic power systems for rural areas of developing countries [NASA-TM-79097]
Energy conservation and the rural home: Economic considerations for the nation and the individual [PB-286222/5]
Impact of solar energy on rural housing [GPO-31-641]
Characteristics of a typical village in the solar belt of the developing countries of Asia, Africa, and Latin America

S

SAFETY FACTORS

- Problems, status, and prospects of a solar hydrogen economy
Radially resolved measurements of 'q' on the adiabatic toroidal compressor tokamak --- safety factor
Some environmental and safety aspects of using hydrogen as a fuel

SAFETY MANAGEMENT

- Solar heating and safety techniques
Safety requirements for solar heating systems - Practical considerations
Risk control in the development of energy processes --- environment, worker and capital considerations in coal gasification
Air classify first, then shred --- solid waste processing to reduce danger of explosions
Liquefied natural gas safety research overview [AD-A063714]
Liquefied energy gases safety. Volume 1: Executive summary and main text [EMD-78-28-VOL-1]
Liquefied energy gases safety. Volume 2: Appendixes [EMD-78-28-VOL-2]
Liquefied energy gases safety. Volume 3: Federal agency comments [EMD-78-28-VOL-3]

SAILS

- The design and testing of a vertical-axis wind turbine using sails
Sail power for the world's cargo ships
Wind energy ships - Potential for modern wind-driven sea transport systems

SALINITY

- Geothermal power from salt domes
Assessment of the potential of generating power from aqueous saline solutions by means of Osno-Hydro Power systems
Solar pond stability experiments

- Salinity power station at the Swedish west-coast - Possibilities and energy-price for a 200 MW-plant
Preliminary results of tests of proprietary chemical additives, seeding, and other approaches for the reduction of scale in hypersaline geothermal systems [UCID-18051]
SALTS
Heat transfer of absorbing evaporator in CDE engine system --- Concentration Difference
Energy system working on enriched aqueous inorganic salt solution
SARARIUM COMPOUNDS
Development of a satellite flywheel family operating on one active axis magnetic bearings

SAMPLES

- Measurement of high-temperature, high-pressure processes
Balloon-borne particulate sampling for monitoring power plant emissions

SAMPLING

- Sampling and analysis of synthetic fuel processes --- coal gasification and liquefaction effluent analysis
Motor gasolines, summer 1978
Sampling and analysis methods for geothermal fluids and gases [PNL-MA-572-APP]

SANDS

- High temperature thermal energy storage in moving sand

SATELLITE ANTENNAS

- Advanced composites - Future space applications
Large active retrodirective arrays for solar power satellites
Space will be the next big construction site
Solar power satellites - Microwaves deliver the power

SATELLITE ATTITUDE CONTROL

- Transient attitude dynamics of satellites with deploying flexible appendages
Attitude and pointing control system for the microwave antenna of the solar power satellite

SATELLITE DESIGN

- Intelsat V solar array design and development summary
Structures for solar power satellites
Solar power satellites revisited
Design considerations for solar power satellites
An evolutionary solar power satellite program [AAS PAPER 78-153]
Latest developments in solar array technology at AEG-Telefunken
The ESA lightweight hybrid solar array
Satellite Power Systems (SPS) concept definition study (exhibit C) [NASA-CR-150827]
Solar power satellite rectenna design study: Directional receiving elements and parallel-series combining analysis [NASA-CR-151866]

SATELLITE OBSERVATION

- Current and potential uses of aerospace technology by the U.S. Department of the Interior [AIAA PAPER 78-1716]
Use of satellites in solar applications --- for insolation mapping and space power stations

SUBJECT INDEX

SATELLITE POWER TRANSMISSION (TO EARTH)

- Landsat - Developing techniques and applications in mineral and petroleum exploration 21 p0111 A79-16725
- Future programs and prospects for resource exploration from space by the year 2000 [AAS PAPER 78-182] 22 p0243 A79-21275
- SATELLITE ORIENTATION**
 - A problem of optimizing the setting angle of sun-battery panels of concave shape --- onboard satellite 21 p0045 A79-12186
- SATELLITE POWER TRANSMISSION (TO EARTH)**
 - Satellite power systems /SPS/ overview 21 p0002 A79-10022
 - A microwave power transmission system for space satellite power 21 p0002 A79-10025
 - Power distribution study for a 5-GW space power satellite 21 p0002 A79-10026
 - From sunlight in space to 60 Hz on earth - The losses along the way --- satellite solar power transmission efficiency 21 p0003 A79-10027
 - Environmental considerations for the microwave beam from a solar power satellite 21 p0003 A79-10030
 - A 5-GWe nuclear satellite power system conceptual design 21 p0003 A79-10033
 - Solar power satellite developments [AAS PAPER 78-022] 21 p0035 A79-11558
 - An aperture-augmented prototype power satellite 21 p0046 A79-12268
 - Radiation energy conversion in space: Conference, 3rd, NASA Ames Research Center, Moffett Field, Calif., January 26-28, 1978, Technical Papers 21 p0107 A79-16601
 - SPS microwave subsystem potential impacts and benefits --- environmental and societal effects of Solar Power System construction and operation 21 p0107 A79-16603
 - Large active retrodirective arrays for solar power satellites 21 p0107 A79-16604
 - Application of electron beams in space for energy storage and optical beam generation 21 p0108 A79-16606
 - Laser aircraft propulsion 21 p0109 A79-16618
 - Laser-powered aircraft and rocket systems with laser energy relay units 21 p0109 A79-16619
 - The use of lasers for the transmission of power 21 p0109 A79-16621
 - New candidate lasers for power beaming and discussion of their applications --- solar powered space lasers 21 p0110 A79-16622
 - Status and summary of laser energy conversion --- for space power transmission systems 21 p0111 A79-16635
 - Design considerations for solar power satellites 21 p0113 A79-16738
 - Financial/management scenarios for a satellite power system program [AAS PAPER 78-144] 22 p0243 A79-21259
 - A development strategy for the solar power satellite [AAS PAPER 78-154] 22 p0243 A79-21266
 - Power from space by laser 22 p0284 A79-26596
 - Solar power satellite 22 p0287 A79-27375
 - Status of the SPS concept development and evaluation program --- Solar Power Satellite 22 p0326 A79-31919
 - Solar Power Satellite systems definition 22 p0326 A79-31920
 - A review of some critical aspects of satellite power systems 22 p0326 A79-31921
 - Preliminary assessment of the environmental impacts of the Satellite Power System /SPS/ 22 p0326 A79-31922
 - New methods for the conversion of solar energy to R. F. and laser power [AIAA PAPER 791416] 23 p0426 A79-34846
 - Solar Power Satellite beam disturbance of the upper ionosphere [AIAA PAPER 79-1422] 23 p0426 A79-34848

22 p0317 A79-31411

SUBJECT INDEX

SEISMIC WAVES

- Photovoltaic properties of metal-free
phthalocyanines - Al/H2Pc Schottky barrier solar
cells 22 p0317 A79-31412
- Schottky and MIS tunnel diodes based on
photovoltaic-quality hydrogenated amorphous
silicon prepared by cathodic sputtering -
Electrical characterization on the basis of
capacitance measurements 23 p0384 A79-32971
- Photovoltaic conversion in Cu2O 23 p0384 A79-32973
- The fabrication of Schottky-barrier solar cells by
electroless nickel plating 23 p0436 A79-35746
- The role of the interfacial layer in Schottky
barrier solar cells 23 p0438 A79-36241
- Meteorological effects on Schottky-barrier solar
cells 23 p0441 A79-36781
- Schottky-barrier versus homojunction silicon solar
cells - A status report 23 p0441 A79-36783
- Solar cells fabricated by ionised-cluster beam
technology 23 p0441 A79-36785
- Experimental critique of the simple Schottky
theory of metal-silicon solar cells using a
range of metals and illumination levels 23 p0507 A79-40986
- Formation and stability of MS or MIS Schottky
solar cells 23 p0507 A79-40987
- Transport and ultra-thin insulator studies for MIS
solar cell structures on silicon and gallium
arsenide 23 p0507 A79-40988
- The short-wavelength response of single- and
poly-crystalline MIS solar cells 23 p0507 A79-40989
- Analysis of ion-implanted solar cells 23 p0508 A79-40991
- Recombination effects in p-type silicon Schottky
barrier solar cells 23 p0508 A79-40992
- Schottky effect and photovoltaic devices on the
texturized surfaces 23 p0522 A79-41100
- Solar cells having integral collector grids
[NASA-CASE-LEW-12819-1] 21 p0182 N79-11467
- Silicon Schottky photovoltaic diodes for solar
energy conversion [PB-283998/3] 21 p0198 N79-12572
- Back wall solar cell [NASA-CASE-LEW-12236-2] 21 p0217 N79-14528
- Silicon Schottky photovoltaic diodes for solar
energy conversion [PB-287417/0] 22 p0343 N79-17349
- Cuprous oxide photovoltaic cells --- fabricating
schottky barrier devices 23 p0565 N79-24514
- Schottky barrier cell and method of fabricating it
[NASA-CASE-NPO-13689A] 23 p0568 N79-25311
- Preparation and properties of Au-(n) A sub X Ga
sub 1 minus X as-(n)GaAs Schottky-Barrier solar
cells 23 p0579 N79-26473
- SCINTILLATION**
Radioisotope-powered photovoltaic generator
23 p0423 A79-34285
- SCOTLAND**
Wave power experiments at Loch Ness 23 p0450 A79-37871
- SCRAP**
Weak points of our prediction models for raw
materials strategy --- waste materials and scrap
recycling 22 p0265 A79-24040
- Energy use patterns for metal recycling
[PB-284855/4] 21 p0201 N79-13152
- SCREENS**
Study of the temperature distribution across the
width of the screen of low-temperature water
heaters with tubular heat receivers 22 p0297 A79-28671
- SCRUBBERS**
Stabilization of power plant scrubbing slurries
and fine coal refuse with the additive Calcilox
21 p0063 A79-14107
- Simultaneous nitrogen oxides and sulfur dioxide
removal by absorption-reduction scrubbing
21 p0066 A79-14125
- Options for treating and disposing of scrubber
sludge 23 p0424 A79-34460
- Particulate control mobile test units: Third
year's operation 21 p0178 N79-10603
- Evaluations of novel particulate control devices
[PB-283973/6] 21 p0199 N79-12601
- Flue gas desulfurization system capabilities for
coal-fired steam generators, volume 1.
Executive summary [PB-284045/2] 21 p0200 N79-12606
- Disposal of by-products from nonregenerable flue
gas desulfurization systems [PB-293163/2] 23 p0586 N79-26575
- SEA WATER**
Sea water desalination by means of solar energy
21 p0057 A79-13645
- Power plant systems based on solar energy ---
powered by sea water evaporation-produced
osmotic pressure head mechanical energy 21 p0142 A79-17508
- A self-consistent process of producing hydrogen
from sea water 23 p0414 A79-34118
- Electro/mechanical aspects of the Mauritius
'passive' type wave energy project 23 p0449 A79-37856
- The absorption of energy from ocean waves
23 p0449 A79-37859
- SEALING**
Energy conservation through sealing technology
22 p0237 A79-20700
- SECONDARY EMISSION**
A method to increase the efficiency of solar
photovoltaic devices by secondary emission
[AIAA PAPER 79-0981] 23 p0457 A79-38185
- SECONDARY FLOW**
Limit of formation of counterflows in plane linear
induction MHD machines 22 p0298 A79-29288
- SECURITY**
Integrated safeguards information System (ISIS),
executive summary --- nuclear power plant and
fissionable materials security [PB-286869/3] 21 p0223 N79-14934
- The national energy plan: Options under
assumptions of national security threat ---
economic impact procurement policy, and
resources management [H-PRINT-95-48] 21 p0228 N79-15398
- The national energy plan: Options under
assumptions of national security threat or
energy policy as if it really mattered
[H-PRINT-95-42] 21 p0228 N79-15399
- SEDIMENTS**
The effect of maturation on the configuration of
pristane in sediments and petroleum 22 p0272 A79-25375
- SEEBECK EFFECT**
Comprehensive thermoelectric properties of n- and
p-type 78a/o Si - 22a/o Ge alloy 22 p0259 A79-23604
- SEEPAGE**
Late diagenetic indicators of buried oil and gas.
2: Direct detection experiment at Cement and
Garza fields, Oklahoma and Texas, using enhanced
LANDSAT 1 and 2 images [E79-10099] 22 p0347 N79-18373
- SEISMIC ENERGY**
Energy and Technology Review, June 1978 ---
composite materials for flywheels, shale oil
recovery, and seismic safety at nuclear power
plants [UCRL-52000-78-6] 21 p0215 N79-14168
- SEISMIC WAVES**
Underwater seismic source --- for petroleum
exploration [NASA-CASE-NPO-14255-1] 23 p0551 N79-23555

SEISMOGRAPHS

Instrumentation for in situ coal gasification. IV
- Seismic and acoustic techniques for remote
monitoring

22 p0304 A79-29974

SEISMOLOGY

Seismological investigations in geothermal regions

22 p0356 A79-19506

SELECTIVITY

Selective solar absorbers --- coatings for solar
collector applications

21 p0057 A79-13646

Colored stainless steel - A new type of selective
absorber --- for solar thermal conversion

22 p0294 A79-28150

Microstructural characterization of a black chrome
solar selective absorber

22 p0294 A79-28151

New instrumentation for high temperature and
hemispherical measurements of selective surfaces
--- for solar energy conversion

22 p0294 A79-28152

Optical properties of materials under simulated
operating environments --- selective coatings
for solar thermal conversion

23 p0431 A79-35071

Spectrally selective surfaces and their impact on
photothermal solar energy conversion

23 p0437 A79-36145

Spectral selectivity of composite materials --- as
solar energy absorbers

23 p0437 A79-36146

Double-layer selective coating, high-temperature
resistant, for the conversion of solar energy
into heat

23 p0478 A79-39695

SELENIDES

Selenide isotope generator for the Galileo mission

21 p0022 A79-10185

Selenide thermoelectric converter technology

21 p0026 A79-10221

Selenide technology evaluation program at JPL

21 p0026 A79-10222

Analytical predictions of selenide RTG power
degradation

21 p0026 A79-10223

Low voltage behavior of lithium/metal
dichalcogenide topochemical cells

22 p0286 A79-26995

Photovoltaic effect in InSe - Application to solar
energy conversion

23 p0384 A79-32976

SELENIUM COMPOUNDS

Silver selenate and silver tellurate as positive
materials for lithium primary power sources

22 p0245 A79-21484

SELF CONSISTENT FIELDS

The 'PINTOR 1' design - A minimum size tokamak
experimental reactor

21 p0078 A79-14782

Self-consistent analysis of alpha-particle heating
of a fast-solenoid plasma --- in laser fusion

22 p0291 A79-27879

SELF EXCITATION

Magnetic instability of laser-produced plasma and
spontaneous generation of magnetic fields

23 p0423 A79-34400

SELF FOCUSING

Self-adjusting laser-target system for laser fusion

21 p0086 A79-15625

Solar receiver performance of point focusing
collector system

21 p0163 A79-19838

[ASME PAPER 78-WA/SOL-5]

SEMICONDUCTING FILMS

Large area silicon sheet by EPG --- Edge-defined
Film-fed Growth

21 p0123 A79-17340

Transparent conducting coatings for solar cells

21 p0124 A79-17350

A pilot line for the production of large area
Cu/x/S-CdS solar cells

21 p0124 A79-17351

A diagnostic study on the polycrystalline nature
and its relationship with the yield of CdS solar
cell

21 p0125 A79-17361

Preparation and properties of pure and tin doped
indium oxide selective coatings

21 p0127 A79-17381

Grain-boundary edge passivation of GaAs films by
selective anodization --- shorting effect in
solar cells

21 p0154 A79-18487

Merocyanine organic solar cells

21 p0165 A79-20216

Calculating the photocurrent and maximum
efficiency of film p-CdTe-n-CdS photocells

21 p0166 A79-20354

Heat exchanges and columnar growth in
electron-beam evaporation of silicon films for
solar cell applications

22 p0272 A79-25084

High-efficiency thin-film polycrystalline-silicon
solar cells

22 p0273 A79-25744

The design and fabrication of CdS/Cu₂S cells of
8.5-percent conversion efficiency

22 p0300 A79-29428

Black germanium solar selective absorber surfaces

22 p0327 A79-31970

Cadmium-sulphide/copper-sulphide thin-film solar
cells - Review of methods of producing the CdS
and Cu₂S layers

23 p0441 A79-36786

Formation of thin Cu₂S/chalcocite/ films using
reactive sputtering techniques

23 p0445 A79-37156

Technique to determine the growth rate and
resistivity of evaporated CdS thin films

23 p0445 A79-37157

The properties of homoepitaxial InP films prepared
by the MO-CVD process for the fabrication of
heterojunction solar cells

23 p0499 A79-40907

Investigation of thin film cadmium sulfide/mixed
copper ternary heterojunction photovoltaic cells

23 p0500 A79-40911

Spray deposited Cd_{1-x}/Zn_x/S films for low cost
solar cells

23 p0500 A79-40912

Multiple silicon ribbon growth by EPG

23 p0502 A79-40939

Achievement of 9.15% efficiency in thin film
CdS/Cu₂S solar cells

23 p0503 A79-40949

Silicon foil cells

23 p0503 A79-40954

Characteristics of Cu/x/S/CdS cell on sprayed thin
CdS films

23 p0505 A79-40963

The effects of MISFIT dislocations on the
photovoltaic properties of CdS based solar cells

23 p0505 A79-40964

The dependence of solar cell characteristics on
the electronic properties of discharge produced,
hydrogenated amorphous silicon

23 p0510 A79-41007

Surface state and performance evaluation of
Schottky barrier solar cells on amorphous silicon

23 p0510 A79-41009

Progress towards high efficiency polycrystalline
thin-film GaAs AMOS solar cells

23 p0515 A79-41044

Thin film polycrystalline silicon solar cells

23 p0518 A79-41067

SEMICONDUCTOR DEVICES

High reliability contacts for miniature
thermoelectric converters

21 p0027 A79-10228

Semiconductor electrodes for conversion and
storage of solar energy

21 p0036 A79-11777

Role of semiconductor properties in
photoelectrolysis

21 p0037 A79-11780

Progress and trends in the development of
terrestrial photoelectric conversion

21 p0056 A79-13635

A new amorphous silicon-based alloy for electronic
applications

21 p0100 A79-16226

Potential for low cost, high efficiency solar
cells using indium tin oxide on semiconductor
/OSOS/ solar cells

21 p0122 A79-17338

Analysis of the characteristics of silicon
photoconverters in the 100-400 K temperature range

21 p0167 A79-20361

SUBJECT INDEX

SHIPS

- Progress towards 100-knot nonconventional ocean ships. II 21 p0155 A79-18519
- Conceptual design of an 80,000-shp fossil-fired closed-cycle helium turbine propulsion system for naval ship applications [ASME PAPER 79-GT-94] 23 p0377 A79-32370
- DD-963 Class waste heat recovery system experience [ASME PAPER 79-GT-159] 23 p0378 A79-32421
- Technology requirements and readiness for very large vehicles [NASA-TM-80127] 23 p0587 A79-27086

SHIVA LASER SYSTEM

- Techniques for preventing damage to high power laser components --- Shiva laser fusion experiments 21 p0083 A79-15145
- Performance of the short-pulse oscillators for Argus and Shiva 21 p0083 A79-15171
- Diagnostics of Shiva Nova high-yield thermonuclear events --- in laser fusion 22 p0285 A79-26747

SHOCK HEATING

- New results in high-beta stellarator and belt-pinch research 21 p0070 A79-14463
- Shock-tube measurements of induction and post-induction rates for low-Btu gas mixtures --- derived from shale oil retorting and coal gasification 21 p0083 A79-15245

SHOCK TUBES

- Shock tube studies of coal devolatilization 21 p0083 A79-15247
- The MHD interaction and plasma properties in a shock tube driven disk generator with swirl 21 p0083 A79-15260

SHOCK TUNNELS

- Design of the Eindhoven 5 MW thermal MHD blow down experiment 23 p0394 A79-33420

SHOCK WAVE INTERACTION

- Energy conversion by means of MHD shock-wave generators combined with closed-cycle gas turbines [ASME PAPER 79-GT-54] 23 p0376 A79-32349

SHOCK WAVE PROPAGATION

- Analysis of a cylindrical imploding shock wave 21 p0155 A79-18846
- Nonstationary two-dimensional magnetohydrodynamic flow in a radial channel 22 p0247 A79-21626

SHORT CIRCUITS

- Determination of the minority carrier diffusion length in silicon solar cells 23 p0528 A79-42248

SHORT WAVE RADIATION

- Measurement and modelling of shortwave radiation on inclined surfaces 22 p0242 A79-21062

SHREDDING

- Air classify first, then shred --- solid waste processing to reduce danger of explosions 23 p0489 A79-40404
- Refuse shredding - Performance, testing and evaluation data 23 p0491 A79-40419

SHROUDED TURBINES

- Design and construction of a pilot plant for a shrouded wind turbine 23 p0485 A79-40128

SIGNAL DISTORTION

- High-energy laser mirror thermal distortion testing techniques 23 p0447 A79-37670

SIGNAL GENERATORS

- Underwater seismic source --- for petroleum exploration [NASA-CASE-WPO-14255-1] 23 p0551 A79-23555

SIGNAL MEASUREMENT

- Instrumentation for in situ coal gasification. IV - Seismic and acoustic techniques for remote monitoring 22 p0304 A79-29974

SIGNAL MIXING

- Generation of the new coherent radiation by harmonic conversion and nonlinear mixing for certain applications --- optical interactions 21 p0111 A79-16639

SIGNAL PROCESSING

- Data acquisition and signal processing for a vertical axis wind energy conversion system 23 p0432 A79-35078
- Data acquisition and signal processing for a vertical axis wind energy conversion system [SAND-78-1000C] 21 p0187 A79-11517

SIGNAL RECEPTION

- Satellite Power System (SPS). State and local regulations as applied to satellite power system microwave receiving antenna facilities [NASA-CR-157430] 23 p0548 A79-23494

SIGNAL REFLECTION

- Use of high-frequency electromagnetic waves for mapping an in situ coal gasification burn front 23 p0486 A79-40251

SIGNAL STABILIZATION

- Observation of voltage fluctuations in a Superconducting Magnet during MHD power generation 22 p0235 A79-20531

SILICA GEL

- Solid desiccant air conditioning with silica gel using solar energy 21 p0181 A79-11464

SILICIDES

- DC reactively sputtered metal carbide and metal silicide selective absorbing surfaces --- for photothermal solar energy conversion 21 p0126 A79-17377

SILICON

- Possibility of production of low cost solar grade silicon by trichlorosilane process 21 p0125 A79-17363
- Heat exchanges and columnar growth in electron-beam evaporation of silicon films for solar cell applications 22 p0272 A79-25084
- Chemical vapor deposited amorphous silicon for use in photothermal conversion 22 p0294 A79-28149
- Study of photoelectric characteristics of photocells made from high-resistivity silicon 22 p0296 A79-28666
- Cast semicrystalline silicon for solar cells [ASME PAPER 79-SOL-16] 22 p0309 A79-30550
- New techniques for fabricating silicon solar cells 23 p0384 A79-32969
- Schottky and MIS tunnel diodes based on photovoltaic-quality hydrogenated amorphous silicon prepared by cathodic sputtering - Electrical characterization on the basis of capacitance measurements 23 p0384 A79-32971

High-efficiency GaAs shallow-homojunction solar cells 23 p0515 A79-41041

Poly- vs single-crystal silicon solar cells 23 p0518 A79-41064

SINTERING

Effects of sintering on porous fuel cell electrodes 21 p0039 A79-11818

SITE DATA PROCESSORS

Wind power site evaluation. I - Wind energy potential. II - Data acquisition and processing 22 p0257 A79-22924

SITES

Wind energy conversion --- review discussing sites and machinery 21 p0091 A79-15870

A technique for longitudinal correlation of wind data - Theory and its application to siting of wind power plants 21 p0143 A79-17518

Tidal power plants - Sites, history and geographical distribution 21 p0150 A79-18102

Selection of optimum sites for tidal power development in the Bay of Fundy 21 p0152 A79-18110

Review of optimization and economic evaluation of potential tidal power developments in the Bay of Fundy 21 p0152 A79-18111

Solar energy - Four sites demonstrate potential 22 p0328 A79-32194

Wind site selection for optimum wind power systems 23 p0406 A79-34049

The use of a complex-terrain wind model for the siting and design of wind generators
[AIAA PAPER 79-0971] 23 p0456 A79-38178

Program overview for the wind characteristics program element of the United States Federal Wind Energy Program 23 p0482 A79-40108

Wind energy prospecting in Prince Edward Island - A program overview and status report 23 p0482 A79-40109

Reliability of wind power from dispersed sites: A preliminary assessment
[LBL-6889] 21 p0176 N79-10547

Siting handbook for small wind energy conversion systems
[PNL-2521] 21 p0209 N79-13527

Atlas of western surface-mined lands: Coal, uranium, and phosphate
[PB-287846/0] 22 p0340 N79-17311

Assessment of economic factors affecting the satellite power system. Volume 2: The systems implications of rectenna siting issues
[NASA-CR-161186] 22 p0368 N79-21552

LLL wind energy studies (OAHU)
[UCRL-82171] 23 p0582 N79-26514

Air monitoring network design for power plant siting 23 p0591 N79-27590

Geologic assessment of compressed air storage sites in Kansas
[EPRI-EM-877] 23 p0597 N79-27689

SIZE DETERMINATION

Optimal sizing of solar collectors by the method of relative areas 21 p0066 A79-14263

Universal generator storer curves --- Economic and relative size optimization of solar photovoltaic energy 22 p0238 A79-20799

SKY RADIATION

Computation of IR sky temperature and comparison with surface temperature --- for solar collector energy budgets 21 p0042 A79-11875

Irradiances on inclined surfaces --- from solar and sky radiation and earth albedo 21 p0055 A79-13624

Diffuse solar radiation on a horizontal surface for a clear sky 22 p0242 A79-21167

Isotropic distribution approximation in solar energy estimations --- diffuse insolation on tilted surface 22 p0262 A79-23753

SLABS

Periodic heating/cooling by solar radiation --- through concrete slab buildings 21 p0140 A79-17491

SLAGS

Coal slag effects in MHD generators 21 p0080 A79-14934

Controlled utilization of coal slag in the MHD topping cycle 21 p0081 A79-14936

Slag deposition and its effect on the performance of MHD channels --- in electric generators
[AIAA PAPER 79-0189] 21 p0157 A79-19588

Slag transport models for radiant heater of an MHD system
[ASME PAPER 78-WA/HT-21] 21 p0161 A79-19808

Compositional modeling of MHD channel slag, with preliminary vapor pressure data 23 p0391 A79-33390

Fluid mechanics and thermal behavior of MHD channel slag layers 23 p0391 A79-33391

Discharge characteristics of slagging metal electrodes --- magnetohydrodynamic generators 23 p0391 A79-33392

MHD slag electrical conductivity studies 23 p0391 A79-33394

Thermionic emission properties of some synthetic coal slags 23 p0392 A79-33395

Electrochemical corrosion of MHD electrodes in slags 23 p0392 A79-33398

Chemical solutions to problems encountered in the gasification of coal 23 p0410 A79-34088

SLICING

Effect of multiblade slurry saw induced damage on silicon solar cells 23 p0498 A79-40902

Analysis of ID saw slicing of silicon for low cost solar cells 23 p0499 A79-40903

Slicing of silicon into sheet material: Silicon sheet growth development for the large area silicon sheet task of the Low Cost Silicon Solar Array project
[NASA-CR-158082] 22 p0333 N79-16365

Analysis and evaluation of processes and equipment in tasks 2 and 4 of the low-cost solar array project
[NASA-CR-158744] 23 p0580 N79-26485

Slicing of silicon into sheet material: Silicon sheet growth development for the large area silicon sheet task of the low cost silicon solar array project
[NASA-CR-158732] 23 p0586 N79-26979

SLIDING FRICTION

Effect of friction on motion of a piston driven by combustion products 23 p0436 A79-35656

SLOPES

Optimum collector slope for residential heating in adverse climates 22 p0263 A79-23761

Sensitivity of slope measurements on parabolic solar mirrors to positioning and alignment of the laser scanner
[SAND-78-0700] 21 p0185 N79-11496

Radiation regime of inclined surfaces
[WHO-467] 21 p0192 N79-11613

SLUDGE

Co-disposal of sewage sludge using refuse-derived fuel
21 p0097 A79-16098

Options for treating and disposing of scrubber sludge
23 p0424 A79-34460

Use of solar energy to heat anaerobic digesters.
Part 1: Technical and economic feasibility study. Part 2: Economic feasibility throughout the United States
[PB-286940/2] 21 p0231 A79-15440

SLURRIES

Stabilization of power plant scrubbing slurries and fine coal refuse with the additive Calcilor
21 p0063 A79-14107

Prospects for coal slurry pipelines in California
23 p0592 A79-27608

SMOKE

A literature review-problem definition studies on selected toxic chemicals. Volume 8: Environmental aspects of diesel fuel and fog oils SGP number 1 and SGP number 2 and smoke screens generated from them
[AD-A056021] 21 p0193 A79-11688

SMOKE ABATEMENT

Advanced emissions control and test facility of the Electric Power Research Institute
21 p0115 A79-17249

SNOW

Applying NASA remote sensing data to geologically related regional planning problems in Tennessee
[E79-10095] 22 p0339 A79-17289

SOCIAL FACTORS

A multivariate-utility approach for selection of energy sources
21 p0098 A79-16120

SPS microwave subsystem potential impacts and benefits --- environmental and societal effects of Solar Power System construction and operation
21 p0107 A79-16603

Energy use and society in the 21st century --- development cost effects on growing GNP economy
23 p0420 A79-34165

Economic, political and psychosocial barriers to a change-over to renewable energy resources
23 p0421 A79-34176

Introducing new technologies for alternative energy sources - The economic, social, and environmental considerations for developing countries
23 p0421 A79-34177

Selected results from the technology assessment of solar energy program
[AIAA PAPER 79-0984] 23 p0458 A79-38187

Windpower programmes in Tanzania
23 p0482 A79-40106

Statement of Doctor Krafft A. Ehrlicke, President, Space Global, La Jolla, California
21 p0224 A79-15108

Alaska OCS socioeconomic studies program. Beaufort sea petroleum development scenarios: Impacts on Anchorage, Alaska
[PB-291916/5] 23 p0546 A79-22970

Identification of social and economic difficulties associated with the introduction of solar energy devices
[BNFT-PB-T-78-47] 23 p0599 A79-27712

SODIUM

Performance of molten salt sodium/beta-alumina/SbCl₃ cells
22 p0245 A79-21479

Sodium-antimony trichloride battery development program for load leveling
[EPRI-EM-751] 21 p0186 A79-11501

SODIUM COMPOUNDS

Electrochemical determinations of the chemical potential and diffusivity of sodium in Na₂x/TaS₂ at 300 K
21 p0040 A79-11830

SODIUM HYDROXIDES

NaOH-based high temperature heat-of-fusion thermal energy storage device
21 p0012 A79-10106

Phase change thermal storage for a solar total energy system
21 p0120 A79-17321

Development of a phase-change thermal storage system using modified anhydrous sodium hydroxide for solar electric power generation
[NASA-CR-159465] 22 p0354 A79-19454

SODIUM NITRATES

Phase change thermal storage for a solar total energy system
21 p0120 A79-17321

SODIUM SULFUR BATTERIES

A critical review and evaluation of published electric-vehicle performance data
21 p0009 A79-10081

Pulse characteristics of sodium sulfur cells for electric vehicle propulsion
21 p0009 A79-10082

Advanced batteries --- sodium sulfur batteries for electric motor vehicles
21 p0067 A79-14270

The sodium/sulfur battery - A storage battery for peak load adjustment and electric traction
21 p0165 A79-20244

Casing materials for sodium/sulfur cells
22 p0245 A79-21481

Recent advances in Na/S cell development - A review
22 p0246 A79-21488

Superbatteries - A progress report --- for utility energy storage and electric vehicles
22 p0286 A79-27207

High temperature batteries --- energy stores using Na and sulfur electrodes
23 p0451 A79-37881

Behavior of a sodium-sulfur cell with a dynamic sulfur electrode
23 p0487 A79-40372

Development of sodium-sulfur batteries for utility application
[EPRI-EM-683] 21 p0186 A79-11502

SODIUM VAPOR

Research on the sodium heat engine
21 p0028 A79-10231

SOIL MAPPING

Surtrace - An airborne geochemical system --- for earth surface micro-layer exploration
22 p0255 A79-22557

Satellite Power System (SPS) mapping of exclusion areas for rectenna sites
[NASA-CR-157435] 23 p0548 A79-23499

SOIL MOISTURE

An incremental model for conversion of solar energy in agricultural systems
23 p0479 A79-39840

SOILS

Soil cooling for geothermal electric power plants in the Western United States - The Raft River experiment
22 p0266 A79-24240

Simultaneous heat and mass transfer in soil with application to waste heat utilization
23 p0531 A79-42930

Environmental and radiological safety studies. Interaction of (Pu-238)O₂ heat sources with terrestrial and aquatic environments --- soil and water analysis
[LA-7033-PR] 21 p0232 A79-15783

Applying NASA remote sensing data to geologically related regional planning problems in Tennessee
[E79-10095] 22 p0339 A79-17289

SOLAR ARRAYS

Status of wraparound contact solar cells and arrays --- for spacecraft electric propulsion
21 p0001 A79-10014

Orbiting Solar Observatory /OSO-8/ solar panel design and in-orbit performance
21 p0001 A79-10017

Intelsat V solar array design and summary
21 p0002 A79-10018

Ultralow-mass solar-array designs for Halley's comet rendezvous mission
21 p0020 A79-10169

Cost minimization of photovoltaic power supplies
21 p0021 A79-10171

Photovoltaic concentrating array
21 p0021 A79-10172

Development and testing of the ULP solar array
21 p0029 A79-10245

Advancements in the design of solar array to battery charge current regulators
21 p0033 A79-10902

- Roll-out solar arrays - Candidate power sources for future space missions
[IAF PAPER 78-39] 21 p0034 A79-11216
- New design verification aspects of large flexible solar arrays
[IAF PAPER 78-217] 21 p0035 A79-11298
- Design optimization for solar array of multiple collector types 21 p0071 A79-14677
- Determining optimal angles of nonconvex solar battery panel mounting 21 p0080 A79-14837
- Practical considerations for 'capturing the sun' 21 p0089 A79-15853
- Status of photovoltaic systems and applications 21 p0095 A79-15907

A Markov model of solar energy systems 21 p0138 A79-17476

Theoretical basis and design for a residential size solar powered ammonia/water absorption air conditioning system 21 p0139 A79-17479

A solar heating and cooling system for an industrial plant located in southern Europe 21 p0139 A79-17480

Solar retrofitting of existing residence with almost zero delta TE system 21 p0139 A79-17485

Heat transfer analysis of flat plate type domestic solar water heater 21 p0140 A79-17489

Exploitation of solar energy via modular power plants and multiple utilization of waste heat 21 p0141 A79-17497

Cycle optimization for a solar turbopack --- turbine water pump utilizing Rankine cycle 21 p0141 A79-17500

Development of small solar power plants for rural areas in India 21 p0141 A79-17502

Application of turbopack in solar energy systems 21 p0141 A79-17504

Power plant systems based on solar energy --- powered by sea water evaporation-produced osmotic pressure head mechanical energy 21 p0142 A79-17508

A reflector concentrator modified sterling engine unit and an aqua-ammonia absorber gas turbine unit for farm power needs 21 p0142 A79-17509

25 kilowatt photovoltaic powered irrigation and grain drying experiment 21 p0143 A79-17519

Solar irrigation program status 21 p0143 A79-17520

Use of solar energy for industrial process heat 21 p0143 A79-17524

The development of a 37 kW solar-powered irrigation system 21 p0144 A79-17525

Solar Total Energy Control Data Acquisition System 21 p0144 A79-17618

Master control and data system for the 5MW Solar Thermal Test Facility 21 p0144 A79-17620

Real time computer control of 5 megawatts of solar thermal energy 21 p0144 A79-17621

Solar energy --- conversion technologies 21 p0147 A79-17648

Solar fuels --- photochemical reaction kinetics and energy storage 21 p0149 A79-18009

Model systems in photoelectrochemical energy conversion 21 p0149 A79-18021

Structural design of a superheater for a central solar receiver [ASME PAPER 78-WA/PVP-1] 21 p0162 A79-19832

SUBJECT INDEX

SOLAR PONDS (HEAT STORAGE)

Determination of the potential for solar retrofitting in Edmonton --- pilot systems for single family dwellings 22 p0323 A79-31456

Solar heating of domestic hot water at the Confederation Heights Cafeteria 22 p0323 A79-31457

Domestic solar heating and cooling system for Kuwait and Saudi Arabia 23 p0401 A79-34009

Design curves for a solar heated and cooled Kuwaiti home 23 p0401 A79-34010

Design, performance, and economics of solar heating and cooling systems for single and multi-family residences 23 p0401 A79-34011

Refined model of solar space cooling system 23 p0401 A79-34012

Sunbird I - Utah's first commercial solar home 23 p0401 A79-34015

Perspectives on solar electric power for small homes 23 p0401 A79-34016

The solar house --- overview of French designs 23 p0401 A79-34017

Theoretical considerations in the use of small passive-solar test-boxes to model the thermal performance of passively solar-heated building designs 23 p0439 A79-36630

Initial experimental tests on the use of small passive-solar test-boxes to model the thermal performance of passively solar-heated building designs 23 p0439 A79-36631

Domestic hot water heating using hot air solar collectors [AIAA PAPER 79-0973] 23 p0457 A79-38180

Solar heated and cooled house in Winter Springs, Florida - A Florida Gas Company Project [AIAA PAPER 79-1019] 23 p0460 A79-38204

A 'real life' solar air conditioned house project 23 p0463 A79-38577

Which is the true solar house 23 p0463 A79-38578

Design of the Eichenau solar house --- emphasizing heat insulation and solar collection and conversion 23 p0463 A79-38579

Traditional architecture in West Africa and passive methods of cooling in the Tropics 23 p0463 A79-38580

Solar energy pattern on building vertical walls of different orientations 23 p0463 A79-38581

System analysis of solar space heating 23 p0465 A79-38595

Active heat insulation through solar low-temperature system that can be integrated into the house wall 23 p0465 A79-38596

System selection and optimization of a solar thermal installation for cooling, heating, and warm water heating 23 p0466 A79-38609

Direct-contact heat exchange-storage tank in solar houses 23 p0468 A79-38626

Solar-assisted heat pump heating with tube collectors 23 p0469 A79-38635

A low energy house in Sweden heated by a solar energy system with heat pump 23 p0471 A79-38650

The design of four solar houses in Zoetermeer, The Netherlands 23 p0471 A79-38651

The LN solar/heat pump house at Skive, Denmark 23 p0471 A79-38652

Description of solar energy activities and results at Arshan H.T.T. College 23 p0472 A79-38660

Potential for use of solar energy in private households to the year 2000 23 p0473 A79-38667

Energy analysis of low-temperature solar energy systems 23 p0473 A79-38670

Design of a public exhibition building to demonstrate air, water, and passive solar heating systems 23 p0474 A79-38673

Energy conservation and solar energy - Partners in progress --- TVA program overview [AIAA PAPER 79-0979] 23 p0475 A79-38890

Comparison of 100 per cent solar heated residences using active solar collection systems 23 p0477 A79-39106

Potential for stand-alone photovoltaic on-site total-energy residential systems 23 p0516 A79-41050

Regional analysis of residential photovoltaic system concepts 23 p0520 A79-41077

Analysis of photovoltaic total energy system concepts for single-family residential applications 23 p0520 A79-41078

Evaluation of high performance evacuated tubular collectors in a residential heating and cooling system: Colorado State University Solar House 1 [COO-2577-14] 21 p0206 N79-13507

Environmental and safety considerations for solar heating and cooling applications [PB-287772/8] 22 p0343 N79-17350

Buildings energy use data book, edition 1 [ORNL-5363] 22 p0348 N79-18447

System integration of marketable subsystems --- for residential solar heating and cooling [NASA-CR-161104] 22 p0348 N79-18448

Preliminary design package for residential heating/cooling system: Rankine air conditioner redesign [NASA-CR-150871] 22 p0354 N79-19453

Final system instrumentation design package for Decade 80 solar house [NASA-CR-150869] 22 p0354 N79-19455

EPRI Methodology for Preferred Solar Systems (EMPSS) computer program documentation. User's guide [EPRI-ER-771] 23 p0543 N79-22635

System design package for a solar heating and cooling system installed at Akron, Ohio [NASA-CR-161192] 23 p0547 N79-23490

Impact of solar energy on rural housing [GPO-31-641] 23 p0560 N79-24467

Solar project cost report: Terrell E. Moseley Office Building, Lynchburg, Virginia [SOLAR/2011-78/60] 23 p0562 N79-24483

Solar project description. Terrell E. Moseley Office Building, Lynchburg, Virginia [SOLAR/2011-78/50] 23 p0563 N79-24498

Solar project description. Kalwall Corporation Warehouse, Manchester, New Hampshire [SOLAR/2015-78/50] 23 p0564 N79-24499

SOLAR INSTRUMENTS

Calibration standards and field instruments for the precision measurement of insolation 21 p0076 A79-14765

Sensor selection and placement in the National Solar Data Program 21 p0089 A79-15844

Testing of solar collectors according to ASHRAE Standard 93-77 21 p0101 A79-16417

Design of radiometer for measurement of total and net exchange solar radiation 21 p0119 A79-17307

SOLAR PONDS (HEAT STORAGE)

Solar pond stability experiments 21 p0042 A79-11878

Some studies on an experimental solar pond 21 p0131 A79-17416

Yield of ground storage of heat in solar ponds 21 p0133 A79-17429

Viscosity stabilized solar ponds 21 p0133 A79-17430

Conditions for absolute stability of salt gradient solar ponds 21 p0133 A79-17431

Computer simulation of the performance of a solar pond in the southern part of Iran 21 p0133 A79-17432

Design construction and short term performance of a solar pond 23 p0385 A79-33220

SOLAR POSITION

SUBJECT INDEX

- Heat extraction from a salt gradient solar pond
23 p0410 A79-34085
- Solar ponds. Citations from the NTIS data base
[NTIS/PS-78/0836/3] 21 p0176 N79-10553
- Solar ponds. Citations from the engineering index
data base
[NTIS/PS-78/0837/1] 21 p0176 N79-10554
- Design guide for shallow solar ponds
[UCRL-52385] 21 p0185 N79-11497
- Final system instrumentation design package for
Decade 80 solar house
[NASA-CR-150869] 22 p0354 N79-19455
- SOLAR POSITION**
- Sun-position diagrams using examples from
Plensburg to Mittenwald 21 p0055 A79-13626
- Long-term average performance of the Sunpak
evacuated-tube collector 21 p0089 A79-15854
- Solar energy diagrams --- combining position and
insolation data 22 p0253 A79-22267
- SOLAR POWER SATELLITES**
- New energy conversion techniques in space,
applicable to propulsion --- powering of
aircraft with laser energy from SPS
[AIAA PAPER 79-1338] 23 p0493 A79-40490
- SOLAR PROPULSION**
- A high temperature Rankine binary cycle for ground
and space solar engine applications 21 p0108 A79-16613
- Design investigation of solar powered lasers for
space applications
[NASA-CR-159554] 23 p0578 N79-26384
- SOLAR RADIATION**
- A theoretical method for the prediction of monthly
mean solar radiation parameters 21 p0022 A79-10183
- Results of measurements of solar radiation on
surfaces of different orientations 21 p0055 A79-13622
- Measurement of radiation intensity by means of a
pyrheliometer 21 p0055 A79-13623
- Irradiances on inclined surfaces --- from solar
and sky radiation and earth albedo 21 p0055 A79-13624
- The use of a sort of slide rule for the quick
determination of solar irradiation of surfaces
and through double glazing of arbitrary
orientation and different inclination 21 p0055 A79-13625
- Estimating hourly solar radiation for one-axis
tracking focusing collectors 21 p0071 A79-14678
- A probabilistic model of insolation for the Mojave
desert-area 21 p0076 A79-14766
- Measurement of solar radiation for energy conversion
21 p0119 A79-17305
- Design of radiometer for measurement of total and
net exchange solar radiation 21 p0119 A79-17307
- Fundamentals of mathematical modeling of
solar-radiation regime energy structure 21 p0166 A79-20352
- Differential insolation and turbidity measurements
--- solar radiation attenuation by aerosols 22 p0241 A79-21056
- Diffuse solar radiation on a horizontal surface
for a clear sky 22 p0242 A79-21167
- Solar radiation charts --- monthly average
insolation 22 p0263 A79-23763
- Selected ordinates for total solar radiant
property evaluation from spectral data 22 p0271 A79-25060
- On the use of synoptic weather map typing to
define solar radiation regimes 22 p0272 A79-25392

- SUCTION**
- Wind tunnel tests on a wind operated suction-pump-turbine system to generate electricity 23 p0387 A79-33241
- SUGAR CANE**
- Efficiency of sugar cane and cowpea as solar energy converters 21 p0125 A79-17368

- Small mills for producing alcohol from sugar cane
23 p0386 A79-33229
- Properties and operating experience with bagasse
as a boiler fuel --- raw sugarcane processing
waste
23 p0489 A79-40395

SUGARS

- Sweet sorghum - A renewable source for alcohol
production
23 p0389 A79-33263

SULFATES

- The oxidation of sulfur dioxide to sulfate
aerosols in the plume of a coal-fired power plant
21 p0076 A79-14757
- The measurement of the sulfuric acid and sulfate
content of particulate matter resulting from the
combustion of coal and oil
21 p0156 A79-19219
- Liquid fuels from carbonates by a microbial system
23 p0494 A79-40742
- The conversion of SO₂ to sulfate particles in coal
fired power plant plumes
23 p0535 A79-43391

SULFIDES

- Electrochemistry of lithium/metal sulfide and
calcium/metal sulfide cells using molten salt
electrolytes
21 p0040 A79-11832

SULFUR

- High sulfur fuel effects in a two-cycle high speed
army diesel engine
[AD-A059534] 21 p0216 A79-14232
- Behavior of nonmetallic materials in shale oil
derived jet fuels and in high aromatic and high
sulfur petroleum fuels --- compatibility of
aircraft materials to fuels
[AD-A060322] 21 p0226 A79-15203
- Low-sulfur western coal use in existing small and
intermediate size boilers --- particulate
sampling and combustion efficiency
[PB-287937/7] 22 p0346 A79-18061

SULFUR COMPOUNDS

- Engineering and bench-scale studies of the
sulfur-iodine cycle at General Atomic
21 p0015 A79-10127
- /SH/x-GaAs polymer-semiconductor solar cells
21 p0154 A79-18504
- The preparation of some novel electrolytes:
Synthesis of partially fluorinated alkane
sulfonic acids as potential fuel cell electrolytes
[AD-A056278] 21 p0184 A79-11483

SULFUR DIOXIDES

- Factors limiting limestone utilization efficiency
in fluidized-bed combustors --- in determining
sulfur dioxide emission level
21 p0008 A79-10069
- Recent operating experience of the Wellman-Lord
FGD process on a coal-fired boiler --- flue gas
desulfurization
21 p0065 A79-14120
- Limestone SO₂ reactivity and causes for reactivity
loss during multi cycle utilization
21 p0065 A79-14121
- The Research-Cottrell/Bahco SO₂ and particulate
removal system at Rickenbacker Air Force Base

- The direct reduction of sulfur dioxide
21 p0065 A79-14124
- Simultaneous nitrogen oxides and sulfur dioxide
removal by absorption-reduction scrubbing
21 p0066 A79-14125
- The oxidation of sulfur dioxide to sulfate
aerosols in the plume of a coal-fired power plant
21 p0076 A79-14757
- The impact of a coal fired power plant on ambient
sulfur dioxide levels
21 p0082 A79-15032
- Particulate and sulfur oxide control options for
conventional coal combustion
21 p0092 A79-15883
- Commercialization of fluidized-bed combustion
systems by the State of Ohio
21 p0096 A79-15923
- Emission control for SO₂ - An update
[ASME PAPER 78-JPGC-PWR-11] 21 p0150 A79-18097
- Oxidation of SO₂ on the surface of fly ash
particles under low relative humidity conditions
22 p0277 A79-26038

- Impact of coal fired power plant emissions on the
air quality in Huntington Canyon, Utah
23 p0534 A79-43371
- The conversion of SO₂ to sulfate particles in coal
fired power plant plumes
23 p0535 A79-43391

- Application of long-range transport modeling to
assess coal development --- for impact on air
quality
23 p0535 A79-43429

- Demonstration of Wellman-Lord/Allied Chemical FGD
technology: Acceptance test results
[PB-290514/9] 23 p0566 A79-24534
- Control of sulfur dioxide and particulate emission
in MHD power systems using high sulfur coal
[CONF-781109-18] 23 p0585 A79-26546
- A method of computing maximum ground-level
concentrations of SO₂ under prolonged stagnation
conditions
23 p0590 A79-27546

- Fluidized combustion of coal --- to limit SO₂ and
NO_x emissions
23 p0593 A79-27613

SULFUR OXIDES

- Particulate and sulfur dioxide emission control
costs for large coal-fired boilers
[PB-281271/7] 21 p0178 A79-10591
- Evaluation of the flash desulfurization process
for coal cleaning
[PB-292328/2] 23 p0590 A79-27342

SULFURIC ACID

- The measurement of the sulfuric acid and sulfate
content of particulate matter resulting from the
combustion of coal and oil
21 p0156 A79-19219
- Real-time, continuous measurement of automotive
sulfuric acid emissions
21 p0156 A79-19359
- Sulfuric acid-water - Chemical heat pump/energy
storage system demonstration
22 p0281 A79-26209
- Water splitting - The chemistry of the I₂-SO₂-H₂O
reaction and the processing of H₂SO₄ and HI
products
23 p0413 A79-34109
- Material and energy balances in the production of
ethanol from wood
23 p0495 A79-40745

SUMMARIES

- A normative price for a manufactured product: The
SAMICS methodology. Volume 1: Executive summary
[NASA-CR-158502] 23 p0549 A79-23504

SUNLIGHT

- A new concept for solar pumped lasers
21 p0110 A79-16624
- Response of p-n junction solar cells to
concentrated sunlight and partial illumination
21 p0124 A79-17353
- Hawaii solar radiation summary
23 p0398 A79-33985

SUPPLYING

Energy and input-output analysis --- for predicting impact on U.S. economy
21 p0115 A79-17223

Toward a rational energy supply system - Economies and diseconomies of scale in an expensive energy future
23 p0420 A79-34168

Energy availabilities for state and local development: 1973 data volume
[ORNL/TM-5890-S2]
21 p0175 N79-10541

Energy availabilities for state and local development: 1974 data volume
[ORNL/TM-5890-S3]
21 p0175 N79-10542

Future aviation fuels fuel suppliers views
21 p0202 N79-13194

US energy demand and supply, 1976-1985: Limited options, unlimited constraints
[H-PRINT-95-43]
21 p0228 N79-15400

Symposium on Energy Today and Tomorrow
[CSIR-S-145]
22 p0340 N79-17316

The planning and economic aspects of energy supply and demand in South Africa
22 p0341 N79-17325

The 1980 motor gasoline supply and demand. Analysis memorandum AM/ES/79-12
[DOE/EIA-0102/32]
23 p0589 N79-27337

Energy supply and demand in California
23 p0591 N79-27603

Coal supply for California
23 p0592 N79-27607

SUPPORT SYSTEMS

Support services for electric vehicles
22 p0301 A79-29492

Satellite Power Systems (SPS) concept definition study, exhibit C. Volume 7: System/subsystem requirements data book
[NASA-CR-161223]
23 p0547 N79-23489

SUPPORTS

Fixed angle and seasonably adjustable structural support concepts for solar converters
23 p0518 A79-41063

Absence of bending effects on solar-receiver-tube fatigue
23 p0537 A79-43682

SURFACE COOLING

Drag reduction by cooling in hydrogen fueled aircraft
21 p0165 A79-20084

SURFACE DIFFUSION

Defect free very shallow p+/n junction and associated photovoltaic effect
23 p0520 A79-41082

Effects of laser irradiation on a diffused layer in silicon
23 p0521 A79-41083

A study of the effective resistance of the diffused layer and its effect on solar cell performance
22 p0367 N79-21541

SURFACE DISTORTION

Optical evaluation techniques for reflecting solar concentrators
21 p0043 A79-11971

SURFACE EFFECT SHIPS

Progress towards 100-knot nonconventional ocean ships. II
21 p0155 A79-18519

SURFACE FINISHING

Semiconductor liquid junction solar cells - Efficiency, electrochemical stability, and surface preparation
21 p0037 A79-11783

Effect of multiblade slurry saw induced damage on silicon solar cells
23 p0498 A79-40902

A high volume cost efficient production microstructuring process --- for silicon solar cell surface treatment
23 p0499 A79-40904

Schottky effect and photovoltaic devices on the texturized surfaces
23 p0522 A79-41100

Automated array assembly, phase 2
[NASA-CR-158599]
23 p0550 N79-23512

SURFACE GEOMETRY

Effect of surface curvature on measurement of the absorptance properties of solar coatings
21 p0042 A79-11879

Optimum collection geometries for copper tube - copper sheet flat plate collectors
21 p0127 A79-17387

Performance of optimal geometry three step compound wedge stationary concentrator --- solar collector using flat side mirrors
21 p0134 A79-17438

Geometrical aspects of a cylindrical parabolic collector
21 p0134 A79-17443

Cavity-type surfaces for solar collectors
22 p0283 A79-26497

The development of a stationary concentrator --- parabolic solar absorber surface effects on energy conversion performance
23 p0464 A79-38586

An experimental study of walls with latent heat for residences
23 p0470 A79-38640

SURFACE LAYERS

Status report on selective surfaces --- solar collector absorbers
21 p0126 A79-17374

Fluid mechanics and thermal behavior of MHD channel slag layers
23 p0391 A79-33391

MHD slag electrical conductivity studies
23 p0391 A79-33394

A study of the effective resistance of the diffused layer and its effect on solar cell performance
22 p0367 N79-21541

SURFACE PROPERTIES

The structure and properties of Cu based selective surfaces formed on an Al-Cu alloy by chemical brightening and etching treatments --- for flat plate solar collectors
21 p0127 A79-17384

Radiation regime of inclined surfaces --- Russian book on solar energy engineering and microclimatology
22 p0282 A79-26353

Effect of form errors on the characteristics of ellipsoidal radiant energy concentrators
22 p0296 A79-28667

Selective materials for photothermal conversion of solar energy
23 p0383 A79-32956

Electrode development for coal fired MHD generators
23 p0392 A79-33396

Spectral selectivity of composite materials --- as solar energy absorbers
23 p0437 A79-36146

Relationship of optical degradation to surface morphology changes in solar absorbers
23 p0446 A79-37158

Measuring dirt on photovoltaic modules
23 p0533 A79-43283

Development of surfaces optically suitable for flat solar panels
[NASA-CR-150831]
21 p0173 N79-10522

A study of the physical and chemical properties of oil shale relevant to physical concentration processes
23 p0569 N79-25445

SURFACE REACTIONS

Study of the interaction of H₂O and O₂ with the surface of TiO₂ by electron stimulated desorption and Auger and characteristic loss spectroscopies
21 p0037 A79-11793

Charge transfer by surface states in the photoelectrolysis of water using a semiconductor electrode
22 p0254 A79-22320

Plasma surface interactions in controlled fusion devices; Proceedings of the Third International Conference, Abingdon, Oxon, England, April 3-7, 1978
23 p0442 A79-36876

Surface processes in plasma wall interactions --- in tokamak experiments
23 p0442 A79-36877

- Surface interactions and conditioning techniques in tokamaks 23 p0443 A79-36880
- Tokamak plasma diagnosis by surface physics techniques 23 p0443 A79-36883

- Material and energy balances in the production of ethanol from wood --- conferences [CONF-7806139-1] 23 p0589 A79-27338

SUBJECT INDEX

SYSTEMS ANALYSIS

- Methanol from coal 23 p0593 N79-27619
- SYSTEM EFFECTIVENESS**
- A critical review and evaluation of published electric-vehicle performance data 21 p0009 A79-10081
- Life cycle costing of energy systems 21 p0072 A79-14683
- A methodology for evaluating the effectiveness of energy conservation programs 21 p0072 A79-14684
- Considerations in choosing solar energy monitoring systems 21 p0087 A79-15831
- Experience gained and lessons learned from monitoring the solar building, Albuquerque 21 p0088 A79-15833
- The use of computer-controlled data acquisition systems in determining solar heating and cooling system performance 21 p0088 A79-15834
- System performance measurements for a packaged solar space heating system equipped with air-heating collectors 21 p0088 A79-15835
- Temperature calibration for solar heating and cooling system evaluation 21 p0089 A79-15846
- Incentives and requirements for gasification based power systems 21 p0094 A79-15904
- Thermal storage of solar energy 21 p0103 A79-16459
- Non-adaptive optics for solar thermal electric power 21 p0112 A79-16733
- A study for optimum use of metallic plates for thermal storage in solar processes 21 p0122 A79-17331
- Economic evaluation of the ATC/Wellman incandescent two-stage low Btu coal gas producer 21 p0146 A79-17640
- Calculation of flat-plate collector utilizability 21 p0149 A79-18020
- Gas-cycle solar refrigeration system performance 21 p0153 A79-18471
- Energy storage efficiency for the ammonia/hydrogen-nitrogen thermochemical energy transfer system 22 p0261 A79-23718
- Solar heating, cooling and hot water production - A critical look at CCMS installations 22 p0275 A79-25931
- Solar air heating and nocturnal cooling system /CSU Solar House II/ 22 p0275 A79-25932
- The Philips experimental house - A system's performance study --- of solar energy utilization and energy conservation 22 p0277 A79-25941
- Evaluation of the effectiveness of electric power systems for transport purposes 22 p0284 A79-26723
- Studies on solar collector performance at NRC 22 p0322 A79-31451
- First year performance data and lessons learned in the NRC 14 house solar demonstration program 22 p0323 A79-31453
- A hybrid wind turbine suitable for developing regions 22 p0323 A79-31455
- Performance and cost of domestic solar water heating in Australia 23 p0452 A79-37889
- The performance of solar water heating systems with flat plate collectors 23 p0468 A79-38620
- A case study of a solar assisted heat pump system - 1977 23 p0469 A79-38634
- Thermodynamic considerations for the energy conversion process in geothermal power plants 23 p0476 A79-38947
- Solar assisted heat pump study for heating of military facilities [AD-A058626] 21 p0206 N79-13506
- Results of systems analysis --- effectiveness of integrated solar energy systems 21 p0218 N79-14534
- Parameter estimation and validation of a solar assisted heat pump model 22 p0332 N79-16349
- Effects of air damper leaks on solar energy system performance [SOLAR/0012-78/29] 23 p0563 N79-24497
- Relative effective solar space heating over the United States obtained from southward-tilted solar collectors [PB-292963/6] 23 p0565 N79-24513
- SYSTEM FAILURES**
- Is there repair after failure --- reliability of repairable vs. nonrepairable engines 21 p0086 A79-15378
- Failure analysis in coal conversion systems --- pilot plant for liquefaction 22 p0266 A79-24137
- SYSTEMS**
- Satellite Power Systems (SPS) concept definition study. Volume 7: SPS program plan and economic analysis [NASA-CR-158068] 21 p0225 N79-15141
- SYSTEMS ANALYSIS**
- A thermodynamic study of heating with geothermal energy [ASME PAPER 77-WA/ENER-1] 21 p0030 A79-10253
- A commentary on a methodology for assessment of the environmental impact of the electrical power system within the Connecticut River Basin 21 p0093 A79-15893
- Potential research problems in energy systems analysis 21 p0115 A79-17221
- A solar energy system with a dual-source heat pump and long-term storage 21 p0119 A79-17312
- The analysis by stochastic modelling of solar systems for space and water heating 21 p0137 A79-17466
- Parametric analysis of power conversion systems for central receiver solar power generation [ASME PAPER 78-WA/SOL-2] 21 p0162 A79-19835
- NRC solar monitoring program 22 p0318 A79-31419
- Energy policy optimization by environmental systems analysis 23 p0422 A79-34180
- A retrofitted geothermal heating system 23 p0425 A79-34602
- System analysis of solar space heating 23 p0465 A79-38595
- A solar assisted economy --- system for peak electrical generation and off-peak storage or fuel production 23 p0469 A79-38632

- Study of flywheel energy storage. Volume 2: Systems analysis [PB-282653/5] 21 p0176 N79-10556
- Public policy 21 p0179 N79-11011
- Fuel cell on-site integrated energy system parametric analysis of a residential complex [NASA-TM-78996] 21 p0193 N79-11955
- Initial assessment: Electromagnetic compatibility aspects of proposed SPS Microwave Power Transmission System (MPTS) operations [PNL-2482] 21 p0202 N79-13252
- Parametric requirements for noncircular Tokamak commercial fusion plants [GA-A-14876] 21 p0214 N79-13871
- Parametric requirements for noncircular Tokamak commercial fusion plants [GA-A-14946] 21 p0214 N79-13872
- Application of solar technology to today's energy needs, volume 2 --- systems analysis and analytical methods [OTA-E-77-VOL-2] 21 p0218 N79-14530
- Analytical methods 21 p0218 N79-14531
- Calculation of backup requirements 21 p0218 N79-14533
- Results of systems analysis --- effectiveness of integrated solar energy systems 21 p0218 N79-14534
- Satellite Power Systems (SPS) concept definition study. Volume 3: SPS concept evolution [NASA-CR-158066] 21 p0225 N79-15138

SYSTEMS COMPATIBILITY

SUBJECT INDEX

- The 25 kW power module updated baseline system ---
for space transportation system payloads
[NASA-TM-78212] 21 p0226 N79-15247
- Satellite Power Systems (SPS) concept definition
study. Volume 2: SPS system requirements
[NASA-CR-150681] 22 p0330 N79-16037
- Qualification test and analysis report: Solar
collectors
[NASA-CR-150860] 22 p0333 N79-16360
- Preliminary design package for Sunair SEC-601
solar collector
[NASA-CR-150875] 22 p0341 N79-17332
- System integration of marketable subsystems ---
for residential solar heating and cooling
[NASA-CR-161104] 22 p0348 N79-18448
- Satellite Power System (SPS) concept definition
study (exhibit C)
[NASA-CR-161173] 22 p0352 N79-19071
- Technical support for open-cycle MHD program
[ANL-MHD-78-8] 22 p0361 N79-20507
- Measurement and control techniques in geothermal
power plants
[FREC-1312] 22 p0362 N79-20508
- Satellite Power Systems (SPS) concept definition
study, exhibit C. Volume 2, part 1: System
engineering
[NASA-CR-161219] 23 p0547 N79-23485
- Satellite Power Systems (SPS) concept definition
study, exhibit C. Volume 4: Transportation
analysis
[NASA-CR-161222] 23 p0547 N79-23488
- Satellite Power Systems (SPS) concept definition
study, exhibit C. Volume 7: System/subsystem
requirements data book
[NASA-CR-161223] 23 p0547 N79-23489
- Process feasibility study in support of silicon
material, task 1
[NASA-CR-158587] 23 p0549 N79-23508
- Solar project description. Radian Corporation
Office Building, Austin, Texas
[SOLAR/2002-78/50] 23 p0563 N79-24496
- Photovoltaic mission analysis
23 p0570 N79-25486
- A summary of systems definition project activities
23 p0570 N79-25488
- A systems examination of the opportunities of coal
for California
23 p0591 N79-27600
- SYSTEMS COMPATIBILITY**
Compatibility of direct energy storage devices
with ac. processing power system components
21 p0111 A79-16728
- SYSTEMS ENGINEERING**
A microwave power transmission system for space
satellite power
21 p0002 A79-10025
- A 5-GWe nuclear satellite power system conceptual
design
21 p0003 A79-10033
- Conceptual design and cost estimate 600 MWe coal
fired fluidized-bed combined cycle power plant
21 p0008 A79-10068

- The circumsolar measurement program - Assessment of the effects of atmospheric scattering on solar energy conversion 21 p0082 A79-15077

SUBJECT INDEX

TEMPERATURE GRADIENTS

TELLURIC CURRENTS

- Magnetotelluric and geoelectric measurements for geothermal exploration in the Phlegraean Fields /preliminary results/ 21 p0075 A79-14732
- Toward assessing the geothermal potential of the Jemez Mountains volcanic complex: A telluric-magnetotelluric survey [LA-7656-MS] 22 p0358 N79-20458

TELLURIDES

- Study of diffusion processes in low-temperature thermopiles --- for solar energy conversion 21 p0054 A79-13290

TELLURIUM COMPOUNDS

- Silver selenate and silver tellurate as positive materials for lithium primary power sources 22 p0245 A79-21484

TEMPERATE REGIONS

- Complementary nature of wind and solar energy at a continental mid-latitude station 23 p0396 A79-33763

TEMPERATURE CONTROL

- Solar Power Satellite thermal analysis 21 p0003 A79-10028
- Reducing combustion air temperature variations in magnetohydrodynamic/steam power plants 21 p0016 A79-10135
- Cooling radioisotope thermoelectric generators in the Shuttle 21 p0023 A79-10186
- Simple high-accuracy diode temperature-difference control circuit 21 p0056 A79-13631
- Evaluation of control options for solar climate control systems [AIAA PAPER 78-1758] 21 p0060 A79-13859
- A microprocessor based solar controller 21 p0082 A79-14979
- High-current power leads for tokamak fusion reactor superconducting magnets 21 p0085 A79-15318
- Controls for residential solar heating 21 p0101 A79-16418
- Controls for heat reclaim with thermal storage coupled with solar heating 21 p0102 A79-16420
- Using controls to reduce component size and energy needs for solar HVAC --- Heating Ventilation, Air Conditioning 21 p0102 A79-16421
- Theoretical and experimental analysis of a latent heat storage system --- solar energy absorbers 21 p0121 A79-17323
- A heat operated mechanical device to control the temperature and flow of water entering a hot water storage tank in a solar water heating system 21 p0140 A79-17487
- An optimal standard for solar heating systems [ASME PAPER 78-WA/DSC-19] 21 p0159 A79-19765
- A Thermic Controller for a thermic diode solar panel [ASME PAPER 78-WA/SOL-9] 21 p0163 A79-19841
- Study of the dynamics of the materials melting process for a solar furnace 21 p0167 A79-20359
- Stability of work and sensitivity of semiconductor thermoelectric systems under automatic control 22 p0261 A79-23624
- Thermal management of the lithium/metal sulfide electric vehicle [SAE PAPER 790161] 22 p0315 A79-31366
- Passive solar heating - Results from two Saskatchewan residences 22 p0322 A79-31444
- Externally pumped Rankine cycle thermal transport devices [AIAA PAPER 79-1091] 23 p0456 A79-38060
- Evaluation of a sodium heat pipe/thermal energy storage unit utilizing LiF-MgF2-KF phase change material [AIAA PAPER 79-1095] 23 p0462 A79-38565
- Transient shutdown analysis of low-temperature thermal diodes [NASA-TP-1369] 22 p0346 N79-18287

TEMPERATURE DISTRIBUTION

- A parametric investigation on flat-plate solar collectors 21 p0128 A79-17391

Velocity, temperature, and electrical conductivity profiles in hydrogen-oxygen MHD duct flows 22 p0279 A79-26184

Heat transfer in a solar radiation absorbing fluid layer flowing over a substrate 22 p0281 A79-26204

Effects of nonuniform distribution of the absorber temperature on radiation losses of a flat-plate solar collector 23 p0530 A79-42894

Natural convection in porous media and geothermal systems 23 p0533 A79-43014

TEMPERATURE EFFECTS

- Effect of inlet temperature on the performance of a catalytic reactor 21 p0035 A79-11542
- Thermionics and its application to the SPS --- solar power satellite for energy conversion 21 p0109 A79-16616
- Temperature dependent parameter analysis of thermoelectric devices 21 p0113 A79-16740
- The thermomechanical behavior of polyvinyl butyral film and its effect on focal stability of a solar mirror-laminate 22 p0239 A79-20824
- Mixing effects of two different types of hydrides --- phase behaviors and energy storage applications 22 p0251 A79-21714
- Temperature dependence of photovoltaic solar energy conversion for GaAs homojunction solar cell 22 p0256 A79-22768
- Collisional transport --- of plasmas in plane and toroidal geometry 22 p0257 A79-22980
- Mechanism of erosion of metal electrodes of the channel of a MHD generator 22 p0306 A79-30391
- The effects of wall temperature on light impurities in Alcator --- tokamak device 22 p0313 A79-31188
- Fuel effects in recent combustion turbine burner tests of six coal liquids [ASME PAPER 79-GT-137] 23 p0378 A79-32406
- A new concept of thermaionic converter 23 p0381 A79-32636
- Fluid mechanics and thermal behavior of MHD channel slag layers 23 p0391 A79-33391
- Designing thermally efficient buildings for the U.S. Midwest 23 p0397 A79-33951
- State of development in the area of water electrolysis /near term/ --- hydrogen production technology 23 p0414 A79-34114
- Temperature characteristics of high-voltage germanium photoconverters 23 p0433 A79-35378
- Temperature dependence of the optical properties of silicon 23 p0437 A79-35820
- The problem of carbon dioxide --- fossil fuel consumption effect on air pollution 23 p0438 A79-36201
- Temperature dependence of selective properties for black chromium solar absorbers 23 p0465 A79-38600
- Warm plasma effects on drift cyclotron loss cone mode --- in mirror machines 23 p0478 A79-39568
- Long-term weathering effects on the thermal performance of the Libbey-Owens-Ford (liquid) solar collector [NASA-CR-161093] 22 p0348 N79-18450

TEMPERATURE GRADIENTS

- Solar engines - The thermal wheel and beyond 21 p0095 A79-15909
- Power generation using thermal vapor pumping and hydro-pumped storage - Thermal gradient utilization cycle /TGUC/ 21 p0095 A79-15914
- Thermal gradient-hydro generation cycle /TGUC/ 21 p0098 A79-16102
- Continental geotherms during the Archaean --- heat production in ancient earth crust 22 p0269 A79-24620

- Absence of bending effects on solar-receiver-tube fatigue 23 p0537 A79-43682
- TEMPERATURE MEASUREMENT**
- Instrumentation development for in situ coal gasification 21 p0006 A79-10053
- Instrumentation for in situ coal gasification. II - Thermal and gas sampling diagnostic techniques 21 p0032 A79-10520
- Detection of internal defects in a liquid natural gas tank by use of infrared thermography 21 p0048 A79-12507

Thermal energy storage for industrial waste heat recovery 21 p0012 A79-10101
High efficiency thermal energy storage system for utility applications 21 p0012 A79-10102
High temperature thermal energy storage in moving sand 21 p0012 A79-10103
NaOH-based high temperature heat-of-fusion thermal energy storage device 21 p0012 A79-10106
Form-stable, crystalline polymer pellets for thermal energy storage 21 p0013 A79-10107
Storage systems for solar thermal power 21 p0013 A79-10108
Central solar heat stations and the Studsvik Demonstration Plant 21 p0021 A79-10175
Basic physical and chemical processes for storage of heat 21 p0038 A79-11805
Solar pond stability experiments 21 p0042 A79-11878
Options for solar thermal conversion 21 p0043 A79-11969
A vacuum solar thermal collector with optimal concentration 21 p0043 A79-11970
Solar thermal electric power systems - Manufacturing cost estimation and systems optimization 21 p0046 A79-12273
Low-grade thermal energy-conversion Joule effect heat engines [ASME PAPER 78-ENAS-7] 21 p0048 A79-12556
Thermal energy storage heat exchanger design [ASME PAPER 78-ENAS-30] 21 p0049 A79-12579
Development of solar thermal power plants 21 p0057 A79-13641
Solar thermal power stations 21 p0057 A79-13644
On the thermal and thermo-electrolytical generation of hydrogen by solar energy 21 p0059 A79-13660
Dispersed power systems and total energy --- solar energy conversion for combined mechanical/electrical and thermal loads [AIAA PAPER 78-1770] 21 p0062 A79-13868
Solar thermal power systems point-focusing distributed receiver /PFDR/ technology - A project description [AIAA PAPER 78-1771] 21 p0062 A79-13869
Heat recovery devices for building HVAC systems --- Heating Ventilating and Air Conditioning 21 p0073 A79-14697
Solar total energy systems 21 p0090 A79-15863
Hot dry rock, an abundant clean energy resource 21 p0098 A79-16106
A status report on the Solar Thermal Test Facility 21 p0112 A79-16731
The economics of solar heating and cooling - A cautious view 21 p0119 A79-17297
Long-term storage of solar energy in native rock 21 p0120 A79-17314
A simulation study of phase change energy store 21 p0120 A79-17318
Role of high performance solar cells in practical photovoltaic systems 21 p0122 A79-17336
Amorphous semiconductors in photovoltaic and solar thermal conversion [BNL-24216] 21 p0122 A79-17339

- The feasibility of constructing a photoelectric unit utilizing effluent heat 21 p0125 A79-17358
Theoretical and experimental yields of a solar heater with flat plate collectors 21 p0134 A79-17437
Development of solar collectors for low temperature level and of concentrators for thermal and photoelectric conversion 21 p0135 A79-17445
The USA 5MW solar thermal test facility 21 p0135 A79-17449
Optimum insulation with internal and solar heat gains 21 p0140 A79-17490
Medium capacity heliothermal power stations 21 p0142 A79-17507
Use of solar energy for industrial process heat 21 p0143 A79-17524
Master control and data system for the 5MW Solar Thermal Test Facility 21 p0144 A79-17620
Real time computer control of 5 megawatts of solar thermal energy 21 p0144 A79-17621
Cooling applications of thermic diode panels [ASME PAPER 78-WA/SOL-10] 21 p0163 A79-19842
Solar-to-thermal energy converter based on coaxial evacuated tubular elements with multilayer and selective coatings 21 p0167 A79-20356
Study of the dynamics of the materials melting process for a solar furnace 21 p0167 A79-20359
Heat pulses required to quench a potted superconducting magnet 22 p0236 A79-20538
Thermoclines: A solar thermal energy resource for enhanced hydroelectric power production 22 p0237 A79-20730
Thermal storage for industrial process and reject heat 22 p0243 A79-21300
Effects of test fluid, flow rate, and flow regime on solar collector thermal performance measurements 22 p0268 A79-24317
A comparison of solar thermal energy collection using fixed and tracking collectors 22 p0293 A79-28146
Chemical vapor deposited molybdenum films for use in photothermal conversion 22 p0294 A79-28148
Chemical vapor deposited amorphous silicon for use in photothermal conversion 22 p0294 A79-28149
A scheme for direct conversion of plasma thermal energy into electrical energy 22 p0324 A79-31765
GUD - An unfired combined cycle approach to energy utilization --- in turbine power plant gas and steam waste heat recovery system [ASME PAPER 79-GT-131] 23 p0377 A79-32400
Thermal energy storage by means of the latent heat of fusion of a mineral salt - Study of a direct contact dynamic exchanger with salt crystallization during flow 23 p0383 A79-32962
Analysis of dynamic effects in solar thermal energy conversion systems 23 p0400 A79-34008
Solar energy in California industry - Applications, characteristics and potential 23 p0402 A79-34019
Economic prospects for solar energy for industrial process heat 23 p0403 A79-34033
Hot dry rock energy project 23 p0408 A79-34073
Transmission of energy by open-loop chemical energy pipeline 23 p0411 A79-34096
Experimental study of thermal energy storage by use of reversible chemical reactions 23 p0416 A79-34137
A central receiver solar thermal power system 23 p0424 A79-34455
Industrial applications of solar heat 23 p0434 A79-35477

SUBJECT INDEX

THERMAL SIMULATION

- Medium-power /100 to 1000 kW/ heat and electricity production from solar sources 23 p0435 A79-35484
- The THER program for solar energy plants with 'distributed' converters 23 p0462 A79-38574
- Analysis of the economic potential of solar thermal energy to provide industrial process heat in the United States 23 p0470 A79-38646
- Rough cost estimates of solar thermal/coal or biomass derived fuels [AIAA PAPER 79-0988] 23 p0476 A79-38893
- Thermal energy conversion with fluorescent collector-concentrators 23 p0477 A79-39103
- Considerations in the design of a shredded municipal refuse burning and heat recovery system 23 p0488 A79-40390
- Practice of heat utilization from refuse 23 p0488 A79-40393
- Thermal energy storage subsystems [NASA-CR-150812] 21 p0172 N79-10517
- Hot dry rock energy project [LA-UR-77-2744] 21 p0175 N79-10540
- Mini-Brayton heat source assembly development [NASA-CR-159447] 21 p0196 N79-12554
- A feasibility study of inorganic oxide-fluoride compositions for thermal energy storage applications [AD-A059001] 21 p0196 N79-12559
- Evaluation and targeting of geothermal energy resources in the southeastern United States [VPI-SU-5648-1] 21 p0204 N79-13478
- Conceptual design of thermal energy storage systems for near term electric utility applications. Volume 1: Screening of concepts [NASA-CR-159411-VOL-1] 21 p0205 N79-13496
- An assessment of thermal energy storage and waste heat dissipation with total energy systems for MIT [AD-A059061] 21 p0205 N79-13502
- Solar thermal test facility experiment manual [SAND-77-1173] 21 p0221 N79-14568
- Use of waste heat from thermal electric power plants and nuclear power plants to heat greenhouses [ORNL-TN-4483] 21 p0221 N79-14574
- Thermal energy transformer [NASA-CASE-NPO-14058-1] 22 p0348 N79-18443
- Thermal storage technologies for solar industrial process heat applications [NASA-TN-79130] 22 p0360 N79-20498
- Advanced subsystems development [NASA-CR-158335] 23 p0542 N79-22627
- Thermoelectrochemical cycles for power and hydrogen production [BNL-24387] 23 p0563 N79-24491
- Solar thermal components: A bibliography with abstracts [NASA-CR-158699] 23 p0570 N79-25479
- Handbook of data on selected engine components for solar thermal applications [NASA-TN-79027] 23 p0579 N79-26476
- Solar thermal power-conversion system 23 p0579 N79-26477
- Power-conversion system component summation 23 p0580 N79-26483
- Combined photovoltaic and thermal hybrid collector systems [COO-4577-3] 23 p0583 N79-26525
- System study on the feasibility of a coal-fired total-energy plant (with solar options) for Sandia Laboratories [SAND-78-0979] 23 p0584 N79-26530
- The effects of regional insolation differences upon advanced solar thermal electric power plant performance and energy costs [NASA-CR-158768] 23 p0595 N79-27660
- Modeling passive solar buildings with hand calculations --- conferences [LBL-8583] 23 p0596 N79-27683
- THERMAL ENVIRONMENTS**
- Fusion energy - The iceberg beneath the tip 23 p0406 A79-34057
- THERMAL INSULATION**
- Belted multifoil insulation for KIPS emergency cooling --- Kilowatt Isotope Power System 21 p0023 A79-10191
- Characteristics of combustion-heated thermionic diodes 21 p0026 A79-10215
- Optimum insulation with internal and solar heat gains 21 p0140 A79-17490
- Solar energy and heat insulation --- materials for residential buildings 22 p0268 A79-24321
- High temperature materials study --- for thermal insulation in solar furnaces 23 p0431 A79-35070
- Ceramic receivers for solar power conversion [AIAA PAPER 79-1008] 23 p0459 A79-38200
- Design of the Eichenau solar house --- emphasizing heat insulation and solar collection and conversion 23 p0463 A79-38579
- Active heat insulation through solar low-temperature system that can be integrated into the house wall 23 p0465 A79-38596
- Study of heat transfer through refractory lined gasifier vessel walls [PE-2210-29] 23 p0556 N79-24306
- THERMAL MAPPING**
- A time domain survey of the Los Alamos Region, New Mexico [LA-7657-MS] 22 p0365 N79-21248
- THERMAL PLASMAS**
- Auxiliary heating in breakeven tokamaks 21 p0079 A79-14792
- Plasma particle trajectories around spacecraft propelled by ion thrusters 23 p0552 N79-24029
- THERMAL POLLUTION**
- Controlling NOx from a coal-fired MHD process 21 p0017 A79-10139
- Environmental impacts of industrial energy systems in the coastal zone 21 p0075 A79-14722
- Coupled heat and organic wastes stream pollution 21 p0086 A79-15602
- Regional air pollution study: Heat emission inventory [PB-284081/7] 21 p0200 N79-12602
- THERMAL PROTECTION**
- Review of plasma wall interactions in tokamaks 23 p0443 A79-36879
- Tests of NASA ceramic thermal barrier coating for gas-turbine engines [NASA-TN-79116] 22 p0357 N79-20118
- THERMAL RADIATION**
- A proposed thermophotovoltaic solar energy conversion system 22 p0287 A79-27317
- Design package for concentrating solar collector panels [NASA-CR-150788] 21 p0173 N79-10523
- THERMAL REACTORS**
- Thermal calculations for the reactor of a solar-power unit to produce hydrogen by thermolysis of water 21 p0167 A79-20360
- THERMAL RESISTANCE**
- Selective coatings for aluminum and steel solar absorbers 21 p0058 A79-13647
- Materials problems in solar, nuclear and storage of energy 21 p0094 A79-15901
- Determination of thermal contact resistances --- for solar thermoelectric generators 21 p0166 A79-20351
- Hot corrosion of Ni-base turbine alloys in atmospheres in coal-conversion systems 22 p0288 A79-27395
- Gas turbine operating and maintenance experience in Saudi Arabia 22 p0298 A79-28989
- A study of the effective resistance of the diffused layer and its effect on solar cell performance 22 p0367 N79-21541
- THERMAL SIMULATION**
- Thermal modeling of coal-fired MHD plant components 21 p0017 A79-10138

- Simulation study of natural convection heat transfer in inclined air layers with application to solar energy collection 21 p0129 A79-17401
- Gas stream composition and temperature determination in a coal-fired MHD simulation facility [ASME PAPER 78-WA/HT-23] 21 p0161 A79-19810

THERMOREGULATION

A Thermic Controller for a thermic diode solar panel
[ASME PAPER 78-WA/SOL-9] 21 p0163 A79-19841

THERMOSYPHONS

Thermosyphon solar water heating system under
Brazilian conditions 21 p0021 A79-10177

Passive solar design --- for domestic heating and
cooling systems 21 p0074 A79-14720

A passive rock bed - Design, construction, and
performance 21 p0121 A79-17328

Investigation on the feasibility of using a
two-phase thermosyphon for solar storage, space
heating and cooking 21 p0121 A79-17330

A heat operated mechanical device to control the
temperature and flow of water entering a hot
water storage tank in a solar water heating system
21 p0140 A79-17487

Thermosyphon models for downhole heat exchanger
applications in shallow geothermal systems
21 p0150 A79-18092

A theoretical analysis of solar collector/storage
panels
[ASME PAPER 78-WA/SOL-11] 21 p0163 A79-19843

Experiments with a flat plate solar water heating
system in thermosyphonic flow 22 p0262 A79-23755

Effects of low solar input and amount of storage
on thermosyphon hot water system performance
22 p0267 A79-24312

A test bed for thermosyphon solar air collectors
[AIAA PAPER 79-0541] 22 p0274 A79-25860

On the stability of the natural circulation solar
heater 23 p0531 A79-42896

THERMOSTATS

Controls for residential solar heating
21 p0101 A79-16418

THETA PINCH

Past penetration of a magnetic field into a
low-density plasma 22 p0244 A79-21432

Theory of the striated corona in a theta pinch
22 p0295 A79-28315

200-kv Blumlein transmission line for ultrafast
toroidal theta-pinch 22 p0297 A79-28917

Report on a simple fusion reactor model that is
already in operation 23 p0407 A79-34058

THICK FILMS

Evaluation of thick film materials for use as
solar cell contacts 23 p0507 A79-40980

Development of economical improved thick film
solar cell contact
[NASA-CR-158358] 22 p0359 A79-20486

THICK WALLS

On the optimisation of Trombe wall solar collectors
[ASME PAPER 78-WA/SOL-13] 21 p0163 A79-19845

THICKNESS

Prototype development of an optimized,
tapered-thickness, graphite/epoxy composite
flywheel
[UCRL-52623] 23 p0576 A79-26121

THIN FILMS

Sprayed CdS thin films for CdS/Cu₂S heterojunction
solar cells 21 p0123 A79-17346

Stoichiometric Cu₂S thin films for solar cells
21 p0123 A79-17349

A pilot line for the production of large area
Cu_x/S-CdS solar cells 21 p0124 A79-17351

Photoelectric properties of pCdTe-nCdS film
heterojunctions 21 p0166 A79-20347

Heat exchanges and columnar growth in
electron-beam evaporation of silicon films for
solar cell applications 22 p0272 A79-25084

High-efficiency thin-film polycrystalline-silicon
solar cells 22 p0273 A79-25744

Chemical vapor deposited molybdenum films for use
in photothermal conversion 22 p0294 A79-28148

The design and fabrication of CdS/Cu₂S cells of
8.5-percent conversion efficiency 22 p0300 A79-29428

Low cost thin-film CdS-based solar cells progress
and promise
[ASME PAPER 79-SOL-15] 22 p0309 A79-30549

Thin-film solar cells - A chance to convert
economically solar energy into electric energy
23 p0425 A79-34610

Analysis of the series resistance of thin-film
pCdTe-nCdS photoconverters 23 p0433 A79-35379

Investigation of the optical properties of
transparent materials for solar energy
applications 23 p0434 A79-35384

Thin-film GaAs solar cells with grain-boundary
edge passivation 23 p0436 A79-35749

Cadmium-sulphide/copper-sulphide thin-film solar
cells - Review of methods of producing the CdS
and Cu₂S layers 23 p0441 A79-36786

Thin-film solar cells produced by physical vapour
deposition 23 p0441 A79-36787

Chemical vapor deposition of spectrally selective
surfaces for high-temperature photothermal
conversion 23 p0445 A79-37155

Formation of thin Cu₂S /chalcocite/ films using
reactive sputtering techniques 23 p0445 A79-37156

Technique to determine the growth rate and
resistivity of evaporated CdS thin films
23 p0445 A79-37157

Sputtered thin film solar cells 23 p0448 A79-37843

Thin-film coatings in solar water
heating systems 23 p0452 A79-37887

Cu₂S-CdS thin-film solar cells 23 p0466 A79-38601

The photovoltaic properties of thin copper oxide
films 23 p0499 A79-40909

The performance of copper-ternary based thin-film
solar cells 23 p0500 A79-40910

Investigation of thin film cadmium sulfide/nixed
copper ternary heterojunction photovoltaic cells
23 p0500 A79-40911

Achievement of 9.15% efficiency in thin film
CdS/Cu₂S solar cells 23 p0503 A79-40949

Testing of ultra-thin solar cells 23 p0503 A79-40952

Silicon foil cells 23 p0503 A79-40954

Characteristics of Cu_x/S/CdS cell on sprayed thin
CdS films 23 p0505 A79-40963

Transport and ultra-thin insulator studies for MIS
solar cell structures on silicon and gallium
arsenide 23 p0507 A79-40988

Luminescent solar concentrators 23 p0509 A79-40997

Concepts for rheotaxially-grown thin-film tandem
III-V solar cells 23 p0513 A79-41030

Progress towards high efficiency polycrystalline
thin-film GaAs AMOS solar cells 23 p0515 A79-41044

Thin film polycrystalline silicon solar cells
23 p0518 A79-41067

Evaluation of the technical feasibility and
effective cost of various wafer thicknesses for
the manufacture of solar cells
[NASA-CR-158095] 22 p0334 A79-16368

Thin film battery/fuel cell power generating system
[CONS/1197-9] 22 p0369 A79-21556

High-efficiency thin-film GaAs solar cells
[NASA-CR-158641] 23 p0560 A79-24463

THIN PLATES

- Solar power towers 23 p0435 A79-35483
- Large scale solar thermal power generation 23 p0452 A79-37890
- TOXIC HAZARDS**
A literature review-problem definition studies on
selected toxic chemicals. Volume 1:
Occupational health and safety aspects of diesel
fuel and white smoke generated from it
[AD-A056018] 21 p0192 A79-11686
- Measured air flow rates through microorifices and
flow prediction capability
[PB-286868/5] 21 p0217 A79-14344
- TOXICITY**
Toxic component concentration in kerosene-air
mixture combustion products 22 p0291 A79-27733
- TOXICITY AND SAFETY HAZARD**
A literature review-problem definition studies on
selected toxic chemicals. Volume 8:
Environmental aspects of diesel fuel and fog
oils SGF number 1 and SGF number 2 and smoke
screens generated from them
[AD-A056021] 21 p0193 A79-11688

TOXICOLOGY

Health effects associated with diesel exhaust emissions, literature review and evaluation
[PB-289817/9] 22 p0364 N79-20727

TRACE CONTAMINANTS

A mass and energy balance of a Wellman-Galusha gasifier --- bituminous coal conversion
22 p0283 A79-26467

TRACE ELEMENTS

The fate of trace elements in coal after combustion
21 p0116 A79-17250
Trace element emissions from coal-fired power plants
[ASME PAPER 78-WA/PU-9] 21 p0160 A79-19789
Chemical studies of stack fly ash from a coal-fired power plant
22 p0309 A79-30595

Trace element characterization and removal/recovery from coal and coal wastes
[LA-7048-PR] 21 p0222 N79-14602

TRACKING (POSITION)

Annual available radiation for fixed and tracking collectors
21 p0042 A79-11880

Design of a second generation concentrating tracking solar collector
[AIAA PAPER 78-1775] 21 p0062 A79-13872

Tracking high temperature collectors
21 p0090 A79-15856

Simple procedure for predicting long term average performance of nontracking and of tracking solar collectors
21 p0091 A79-15873

The design and evaluation of a hydraulic-solar powered tracking device
21 p0136 A79-17458

Efficiency degradation due to tracking errors for point focusing solar collectors
[ASME PAPER 78-WA/SOL-4] 21 p0162 A79-19837

Suntrack-systems for solar concentrators
23 p0464 A79-38587

Source tracking and power flow control of terrestrial photovoltaic panels for concentrated sunlight
23 p0509 A79-40999

Optimization of the geometrical parameters for arrays of tracking solar collectors to give minimum energy cost
23 p0511 A79-41016

Optimal control of sun tracking solar concentrators
23 p0526 A79-41831

Solar tracking control system Sun Chaser
[NASA-TM-78199] 21 p0172 N79-10514

TRADEOFFS

Thermal power systems small power systems applications project. Decision analysis for evaluating and ranking small solar thermal power system technologies. Volume 1: A brief introduction to multiattribute decision analysis --- explanation of multiattribute decision analysis methods used in evaluating alternatives for small powered systems
[NASA-CR-158425] 22 p0368 N79-21548

TRAFFIC CONTROL

Bus priority system studies
22 p0299 A79-29339

TRAINING DEVICES

Application of computer animation for dynamic display in complex energy systems --- for human operator performance improvement
23 p0421 A79-34172

TRANSFORMERS

Symmetrical and asymmetrical ideal cylindrical radiation transformers and concentrators
22 p0303 A79-29647

TRANSIENT HEATING

Transient behaviour of solar flat plate collectors
23 p0467 A79-38612

TRANSIENT RESPONSE

Transient energy removal in cylindrical parabolic collector systems
21 p0020 A79-10168

Some aspects of the transient response of a flat-plate solar energy collector
21 p0153 A79-18466

Comparison of transient heat transfer models for flat plate collectors
22 p0242 A79-21168

Stability of work and sensitivity of semiconductor thermoelectric systems under automatic control
22 p0261 A79-23624

Transient behavior of the fluid and electrical properties in the turbulent boundary layer of an MHD channel
23 p0392 A79-33402

Transient analysis of the rectified superconducting alternator
23 p0462 A79-38529

Transient response of a solar regenerator
23 p0526 A79-41935

Transient response to three-phase faults on a wind turbine generator
21 p0180 N79-11312

TRANSIT TIME

The airport performance model. Volume 1: Extensions, validations, and applications
[AD-A062863] 23 p0568 N79-25040

TRANSITION FLOW

Effect of force field nonuniformity on flow in an MHD channel
21 p0101 A79-16365

TRANSITION METALS

Model predictions for the stability of ternary metallic hydrides
21 p0038 A79-11802

Methane production from carbon oxides over borohydride-reduced transition metals
[PB-286385/0] 21 p0226 N79-15177

TRANSITION TEMPERATURE

Screening reversible reactions for thermochemical energy transfer
22 p0285 A79-26823

TRANSMISSION EFFICIENCY

Design, construction and performance of Fresnel lens for solar energy collection
21 p0136 A79-17456

Effect of physical properties of a flat plate solar collector cover on efficiency calculations - Simplifying hypotheses
21 p0164 A79-19949

Optical characterization of high energy laser components
23 p0447 A79-37668

Space Laser Power System --- for satellite solar power station transmission to earth
[AIAA PAPER 79-1013] 23 p0459 A79-38201

Solar power satellites - Microwaves deliver the power
23 p0460 A79-38374

TRANSMISSION LINES

30-MJ superconducting magnetic energy storage /SMES/ unit for stabilizing an electric transmission system
22 p0237 A79-20555

200-kv Blumlein transmission line for ultrafast toroidal theta-pinch
22 p0297 A79-28917

Initial thoughts on the transmission implications of large wave power complexes
23 p0455 A79-37916

TRANSMISSION LOSS

From sunlight in space to 60 Hz on earth - The losses along the way --- satellite solar power transmission efficiency
21 p0003 A79-10027

Electrical power loss from high-voltage power circuits through plasma leakage
21 p0169 N79-10113

TRANSMITTANCE

An approximate equation for predicting the solar transmittance of transparent honeycombs
21 p0042 A79-11877

Direct solar transmittance for a clear sky --- for insolation of solar conversion systems
22 p0296 A79-28361

Performance characteristics of a 1.8 by 3.7 meter Fresnel lens solar concentrator
[NASA-TM-78222] 22 p0360 N79-20495

TRANSMUTATION

Fuel technology and the environment --- nuclear reactor caused radiation effects and transmutation
21 p0079 A79-14787

TRANSPIRATION

A high temperature turbine for operation on coal-derived fuel
[ASME PAPER 79-GT-173] 23 p0379 A79-32434

TRANSPORT AIRCRAFT

- Analysis of wind turbine generator rotor response to one-dimensional turbulence
21 p0077 A79-14768

TURBULENT BOUNDARY LAYER

Transient behavior of the fluid and electrical properties in the turbulent boundary layer of an MHD channel

23 p0392 A79-33402

Insulating wall boundary layer in a Faraday MHD generator

[FE-23417] 22 p0365 N79-21310

TURBULENT FLOW

A two-dimensional pulverized coal combustor model --- for MHD generators

23 p0390 A79-33383

A numerical simulation model for entrained flow coal gasification. I - The hydrodynamical model

23 p0410 A79-34087

Preliminary results of a field experiment to characterize wind flow through a vertical plane

[PNL-2518] 21 p0203 N79-13322

TURBULENT MIXING

Mixing and kinetic processes in pulverized coal combustors

[EPRI-PP-806-SY] 23 p0589 N79-27330

TURBULENT WAKES

Energy effectiveness of arbitrary arrays of wind turbines

[AIAA PAPER 79-0114] 21 p0156 A79-19540

The interaction of windmill wakes

23 p0482 A79-40111

Wake interaction in an array of windmills - Theory and preliminary results

23 p0483 A79-40112

Performance of windmills in a closely spaced array

23 p0537 A79-43681

TURKEY

Investigations of solar heat production for household heating in Turkey

22 p0253 A79-22265

Calculation of solar energy incident on non-horizontal surfaces over Turkey

22 p0253 A79-22266

The role of solar energy in the solution of Turkey's energy predicament

23 p0404 A79-34035

TWO DIMENSIONAL FLOW

Solids mixing and fluidization characteristics in a tube filled bed --- of fluidized bed coal combustion

21 p0008 A79-10070

A two dimensional vortex sheet model of a Savonius Rotor

22 p0278 A79-26178

Vortex sheet analysis of the Giromill --- vertical axis wind turbine with straight blades

22 p0278 A79-26179

Two-dimensional MHD channel design --- for energy performance improvement at lower wall temperature

22 p0279 A79-26183

Two-dimensional analyses related to wave-energy extraction by submerged resonant ducts

22 p0312 A79-31099

A two-dimensional pulverized coal combustor model --- for MHD generators

23 p0390 A79-33383

Two-dimensional analysis of vertical axis windmills

22 p0353 N79-19446

TWO FLUID MODELS

A collisional plasma rotating between two cylinders

21 p0049 A79-12694

TWO PHASE FLOW

The role of interfacial heat and mechanical energy transfers in a liquid-metal MHD generator

[ASME PAPER 78-WA/HT-33] 21 p0161 A79-19814

Experimental study of the characteristics of heat and mass transfer in a two-component

low-temperature heat pipe 22 p0246 A79-21585

Modeling two-phase flow in a swirl combustor

22 p0280 A79-26189

Modeling the champagne effect in compressed air energy storage

22 p0280 A79-26190

Two-phase LHMHD mixer-development experiments --- Liquid-Metal MHD generator flow characteristics

23 p0394 A79-33422

An experimental investigation of rotating-drum separators for liquid-metal MHD applications

23 p0395 A79-33423

A numerical simulation model for entrained flow coal gasification. I - The hydrodynamical model
23 p0410 A79-34087
Studies on two-phase flow mixing pertaining to liquid-metal magnetohydrodynamic power generation
23 p0527 A79-42030
Numerical simulation of the compaction-subsideance phenomena in a reservoir for two-phase nonisothermal flow
23 p0540 N79-22401

U

U.S.S.R.

Pulsed-power research and development in the USSR
[AD-A056635] 21 p0193 N79-11859

ULTRASHORT PULSED LASERS

Performance of the short-pulse oscillators for Argus and Shiva
21 p0083 A79-15171

ULTRAVIOLET RADIATION

The short-wavelength response of MIS solar cells
22 p0273 A79-25748
Space environment damage to solar cell coverslide assemblies
23 p0498 A79-40896
Ultraviolet irradiation at elevated temperatures and thermal cycling in vacuum of PEP-A covered silicon solar cells
23 p0498 A79-40898
The short-wavelength response of single- and poly-crystalline MIS solar cells
23 p0507 A79-40989

UNDERGROUND STORAGE

Large-scale thermal energy storage for cogeneration and solar systems --- in aquifers
21 p0092 A79-15886
Underground aquifer storage of hot water from solar energy collectors
21 p0120 A79-17317
Earth-conducted heat losses from thermal storage systems
22 p0281 A79-26208
Studies on the effect of bed aspect ratios and pressure drop on flow distribution in rock bed storage systems for solar energy applications
22 p0317 A79-31409
Manmade geothermal energy --- underground storage systems
23 p0408 A79-34072
Eighty atmospheres in reserve --- compressed air storage in caverns for peaking power source
23 p0436 A79-35800
Conductive heat transfer from hemispherical, buried tanks with application to solar heating
23 p0532 A79-42976
Hydrogen energy storage program: Five-year plan
[DOE/ET-0046] 21 p0175 N79-10544
Inventory of underground energy storage sites in California
[PB-290835/8] 23 p0566 N79-24519
Crude and product storage: State-of-the-art review and assessment
[AD-A066605] 23 p0568 N79-25243
Underground storage of natural gas by interstate pipeline companies for 1976 and winter 1976 - 1977
[DOE/EIA-0151] 23 p0597 N79-27684

UNDERWATER COMMUNICATION

Recent terrestrial and undersea applications of radioisotope thermoelectric generators /RTGs/
21 p0027 A79-10226

UNDERWATER ENGINEERING

Underwater seismic source --- for petroleum exploration
[NASA-CASE-WPO-14255-1] 23 p0551 N79-23555
Performance of photovoltaic cells in an undersea environment
[AD-A066385] 23 p0573 N79-25517

UNITED KINGDOM

Some practical aspects of the design and installation of domestic solar energy systems in the UK
23 p0452 A79-37884
Offshore wind energy systems for the U.K.
23 p0453 A79-37901
Wind power for domestic use in the United Kingdom
23 p0453 A79-37902

WATER TREATMENT

There is a lot of energy in digester gas . . . use
it --- in municipal waste water plants
21 p0035 A79-11448

A new thermochemical process for hydrogen production
22 p0312 A79-31153

Direct thermomagnetic splitting of water
22 p0312 A79-31154

The problem of fouling in the utilisation of
geothermal energy
23 p0449 A79-37853

Solar system - Solar
generator-inverter-asynchronous motor-pump ---
for waste water treatment
23 p0466 A79-38605

Total energy consumption for municipal wastewater
treatment
[PB-286688/7] 21 p0231 A79-15439

Resource analysis: Water and energy as linked
resources
[PB-288046/6] 22 p0349 A79-18463

WATER WAVES

Two-dimensional analyses related to wave-energy
extraction by submerged resonant ducts
22 p0312 A79-31099

The absorption of energy from ocean waves
23 p0449 A79-37859

Simulation studies of the basic non-linear effects
of wave-energy conversion by an overtopping
water-column
23 p0480 A79-39845

WATERWAVE ENERGY CONVERSION

Wave energy conversion in a random sea
21 p0030 A79-10252

Wave driven power generating system
21 p0059 A79-13657

Wind, waves, and tides --- as future energy sources
21 p0074 A79-14719

Useful power from ocean waves
21 p0077 A79-14773

Ocean energy unlimited --- water wave conversion
21 p0095 A79-15908

International Symposium on Wave and Tidal Energy,
University of Kent, Canterbury, England,
September 27-29, 1978, Proceedings. Volume 1
21 p0150 A79-18101

A theory for wave-power absorption by two
independently oscillating bodies
21 p0151 A79-18103

The theoretical analysis of an air turbine
generation system --- for waterwave energy
conversion
21 p0151 A79-18106

Wave power electric generation study in Japan ---
large scale buoy facility
21 p0151 A79-18107

The use of wave powered systems for desalination -
A new opportunity --- seawater pumping for
reverse osmosis
21 p0151 A79-18108

Principles of design and construction for marine
structures for wave/tidal/ocean thermal energy
21 p0152 A79-18114

Integrating wave power into the electricity supply
system
21 p0152 A79-18117

The oscillating water column wave-energy device
22 p0252 A79-22223

Wave-tank experiments on an immersed
parallel-plate duct --- for testing performance
of sub-sea wave energy converter
22 p0258 A79-23306

A theory for wave-power absorption by two
independently oscillating bodies
22 p0259 A79-23307

On the dynamics of wave-power devices
22 p0269 A79-24539

A wave activated electric generator --- waterwave
energy conversion
22 p0288 A79-27389

Energy from sea waves - System optimization by
diffraction theory
22 p0288 A79-27390

Design and experimental testing of a
fully-submerged model wave-power converter
23 p0396 A79-33767

Energy from sea and air by large-span tensioned
foils
23 p0410 A79-34084

Electro/mechanical aspects of the Mauritius
'passive' type wave energy project
23 p0449 A79-37856

Directly driven generators for wave energy
conversion
23 p0449 A79-37858

The absorption of energy from ocean waves
23 p0449 A79-37859

Wave power - Some practical considerations
23 p0449 A79-37861

System economic optimisation for wave energy
23 p0450 A79-37864

The development of the wave contouring raft
23 p0450 A79-37869

System reliability studies for wave energy
generation
23 p0450 A79-37872

Options and constraints in the use of wave power
23 p0454 A79-37914

Electrical generation from a randomly varying input
--- waterwave energy conversion
23 p0455 A79-37915

Initial thoughts on the transmission implications
of large wave power complexes
23 p0455 A79-37916

Energy analysis of wave and tidal power
23 p0455 A79-37918

Power extraction from ocean surface waves
23 p0486 A79-40198

Optimization of power absorption from sea waves
23 p0486 A79-40199

WATERWAVE POWERED MACHINES

A wave power machine using free floating vertical
plates
21 p0151 A79-18104

Experiences with a hydropneumatic wave power device
21 p0151 A79-18105

Electro/mechanical aspects of the Mauritius
'passive' type wave energy project
23 p0449 A79-37856

Directly driven generators for wave energy
conversion
23 p0449 A79-37858

Wave power - Some practical considerations
23 p0449 A79-37861

The development of the wave contouring raft
23 p0450 A79-37869

Wave power experiments at Loch Ness
23 p0450 A79-37871

Electrical generation from a randomly varying input
--- waterwave energy conversion
23 p0455 A79-37915

Power extraction from ocean surface waves
23 p0486 A79-40198

WAVE DIFFRACTION

Energy from sea waves - System optimization by
diffraction theory
22 p0288 A79-27390

WAVE DISPERSION

Cyclotron-wave spectrum in a plasma with two ion
species
22 p0245 A79-21443

The contribution of plasma dielectric properties
to the cyclotron radiation spectrum from a
tokamak plasma
22 p0312 A79-31183

A ray-tracing analysis of fast-wave heating of
tokamaks
22 p0313 A79-31186

WAVE INTERACTION

Wave-tank experiments on an immersed
parallel-plate duct --- for testing performance
of sub-sea wave energy converter
22 p0258 A79-23306

WAVE REFLECTION

Wave reflection from the lower hybrid surface - A
toroidal effect --- in tokamaks
22 p0255 A79-22427

Effects of nonlinear decay of backscattered light
on the anomalous reflectivity --- in laser plasmas
22 p0310 A79-30742

WAVEGUIDES

A study of waveguides for far infrared interferometers measuring electron density of tokamak plasmas

23 p0526 A79-41842

WAXES

The development of a method of producing etch resistant wax patterns on solar cells
[NASA-CR-158563]

23 p0550 N79-23527

WEAPONS DEVELOPMENT

Satellite Power System (SPS) military implications
[NASA-CR-157436]

23 p0549 N79-23500

WEATHER MODIFICATION

Aerosol and ice nuclei measurements in the plume of the Homer City, Pa., power plant --- for weather modification studies

23 p0438 A79-36432

WEATHERING

Long-term weathering effects on the thermal performance of the Lennox/Honeywell (liquid) solar collector
[NASA-CR-150818]

21 p0204 N79-13493

Environmental and radiological safety studies.

Interaction of (Pu-238)O₂ heat sources with terrestrial and aquatic environments --- soil and water analysis

21 p0232 N79-15783

Long term weathering effects on the thermal performance of the sunworks (liquid) solar collector
[NASA-CR-150899]

22 p0341 N79-17328

Long-term weathering effects on the thermal performance of the Libbey-Owens-Ford (liquid) solar collector
[NASA-CR-161093]

22 p0348 N79-18450

Long term weathering effects on the thermal performance of the solaron (air) solar collector
[NASA-CR-161166]

22 p0371 N79-21621

Thermal performance evaluation of the Semco (liquid) solar collector
[NASA-CR-161230]

23 p0594 N79-27656

WEATHERPROOFING

Energy conservation and the rural home: Economic considerations for the nation and the individual
[PB-286222/5]

21 p0230 N79-15425

WEDGES

Verification of wedge concentration using a helium neon laser --- solar collector design

21 p0098 A79-16104

WEIBULL DENSITY FUNCTIONS

A comparison of the Weibull and Rayleigh distributions for estimating wind power potential

21 p0045 A79-12243

Frequency distribution of wind speed near the surface

21 p0165 A79-20139

Optimal value of the rated speed of a wind generator

23 p0527 A79-41948

WEIGHT (MASS)

Development of advanced fuel cell system
[NASA-CR-159443]

21 p0196 N79-12553

WEIGHT ANALYSIS

Vehicle Design Evaluation Program (VDEP). A computer program for weight sizing, economic, performance and mission analysis of fuel-conservative aircraft, multibodied aircraft and large cargo aircraft using both JP and alternative fuels

21 p0200 N79-13026

WEIGHT REDUCTION

Silver-hydrogen, a long life light weight energy storage system --- design for spacecraft

21 p0001 A79-10012

Design features of the TDRSS solar array --- Tracking and Data Relay Satellites

21 p0002 A79-10019

Large, lightweight, replicated mirrors

21 p0043 A79-11976

Ultralightweight structures for space power --- solar energy collection for transmission to earth

21 p0108 A79-16609

Optimal distribution of heat conducting material in the finned pipe solar energy collector

22 p0242 A79-21163

Structural optimization of SMC line focusing collectors

23 p0534 A79-43295

WEIGHTLESSNESS

Furnaces for experiments in zero-gravity conditions

23 p0487 A79-40330

WELLS

Study of acoustic and microseismic emissions associated with a hydraulic fracture --- geothermal energy utilization

21 p0076 A79-14744

WICKS

Investigation of the maximal heat-transmitting power of heat pipes with metal-fiber wicks

23 p0447 A79-37661

On the problem of heat transfer in low-temperature heat pipes

23 p0532 A79-42938

WILDLIFE

A biologist's manual for the evaluation of impacts of coal-fired power plants on fish, wildlife and their habitats

22 p0373 N79-21679

Application of remote sensing to state and regional problems

23 p0569 N79-25446

WIND (METEOROLOGY)

Stormy development of wind energy --- German technology utilization

22 p0268 A79-24323

Preliminary results of a field experiment to characterize wind flow through a vertical plane

21 p0203 N79-13322

Applied research on energy storage and conversion for photovoltaic and wind energy systems.

Volume 2: Photovoltaic systems with energy storage

21 p0207 N79-13510

Applied research on energy storage and conversion for photovoltaic and wind energy systems.

Volume 1: Study summary and concept screening

21 p0207 N79-13511

Engineering handbook on the atmospheric environmental guidelines for use in wind turbine generator development

21 p0223 N79-14679

An operating 200-kW horizontal axis wind turbine

22 p0333 N79-16357

Wind engineering research digest, volume 3, 1978 --- a bibliography of ongoing research projects

23 p0567 N79-24621

LLL wind energy studies (OAHU)

23 p0582 N79-26514

Proceedings of the Workshop on Mechanical Storage of Wind Energy

23 p0584 N79-26528

WIND DIRECTION

Directional arrays of windmills

23 p0453 A79-37896

Depletion of available wind power by a large network of wind generators

23 p0453 A79-37899

Wind direction change criteria for wind turbine design

22 p0361 N79-20506

WIND EFFECTS

Dynamic response of a wind turbine system and its effect on performance

21 p0067 A79-14293

Generalized wind characteristics and their effect on wind turbine output

21 p0068 A79-14294

Effect of dust on flat plate collectors

21 p0129 A79-17399

The interaction of the wind field with a horizontal axis wind turbine

22 p0278 A79-26177

Heliostat survivability and structural stability for wind loading

23 p0400 A79-34001

Offshore wind power model estimates

23 p0482 A79-40110

WIND MEASUREMENT

Measurement of wind speed around a wind power plant in Sweden

23 p0483 A79-40113

Wind direction change criteria for wind turbine design

22 p0361 N79-20506

WIND PRESSURE

Pressure measurements on wind tunnel models of the Aylesbury experimental house 22 p0300 A79-29372

WIND PROFILES

Wind power potential in the Pacific Northwest 22 p0244 A79-21334

Wind energy assessment 23 p0406 A79-34051

Measurement of wind speed around a wind power plant in Sweden 23 p0483 A79-40113

Atmospheric turbulence structure in relation to wind generator design 23 p0483 A79-40114

The use of wind data with an operational wind turbine in a research and development environment [NASA-TM-73832] 23 p0581 N79-26502

WIND TUNNEL CALIBRATION

Wind tunnel corrections for Savonius rotors 23 p0485 A79-40127

WIND TUNNEL MODELS

Pressure measurements on wind tunnel models of the Aylesbury experimental house 22 p0300 A79-29372

WIND TUNNEL TESTS

The design and testing of a vertical-axis wind turbine using sails 21 p0153 A79-18467

Fluid dynamics of diffuser-augmented wind turbines 22 p0238 A79-20798

Wind tunnel tests on a wind operated suction-pump-turbine system to generate electricity 23 p0387 A79-33241

An axial-flow wind-turbine with delta-wing blades 23 p0405 A79-34044

The aerodynamic design and testing of a vertical axis windmill 23 p0452 A79-37895

The interaction of windmill wakes 23 p0482 A79-40111

Wind tunnel corrections for Savonius rotors 23 p0485 A79-40127

Liquefied natural gas wind tunnel simulation and instrumentation assessments [SAN-W1364-01] 21 p0195 N79-12256

Giromill wind tunnel test and analysis, volume 2. Technical discussion [CDO-2617-4/2] 21 p0204 N79-13378

WIND VANES

Windmills with increased power output due to tipvanes 23 p0405 A79-34045

Tipvane research at the Delft University of Technology --- auxiliary wings for turbine blades of windmills 23 p0485 A79-40129

WIND VARIATIONS

Total wind energy over Central Europe and its maximum utilization through optimal degree of development of solar wind conversion plants 23 p0472 A79-38657

Estimation of wind characteristics at potential wind energy conversion sites 23 p0534 A79-43377

WIND VELOCITY

A comparison of the Weibull and Rayleigh distributions for estimating wind power potential 21 p0045 A79-12243

Frequency distribution of wind speed near the surface 21 p0165 A79-20139

Energy statistics for large wind turbine arrays 22 p0299 A79-29371

Depletion of available wind power by a large network of wind generators 23 p0453 A79-37899

Measurement of wind speed around a wind power plant in Sweden 23 p0483 A79-40113

Performance evaluation of wind power units 23 p0483 A79-40115

Optimal value of the rated speed of a wind generator 23 p0527 A79-41948

Oahu wind power survey [PB-287361/0] 22 p0335 N79-16382

WIND VELOCITY MEASUREMENT

Wind power site evaluation. I - Wind energy potential. II - Data acquisition and processing 22 p0257 A79-22924

An analytical expression for the specific output of wind turbine generators 22 p0273 A79-25720

Run duration analysis of surface wind speeds for wind energy application 22 p0287 A79-27345

WINDMILLS (WINDPOWERED MACHINES)

Design and operating experience on the U.S. Department of Energy Experimental Mod-O 100 kW Wind Turbine 21 p0028 A79-10234

DOE/NASA Mod-OA wind turbine performance 21 p0028 A79-10235

On-line control of a large horizontal axis wind energy conversion system and its performance in a turbulent wind environment 21 p0028 A79-10236

Vortex sheet analysis of the Giromill 21 p0031 A79-10278

Calculation of wake effects in wind turbine parks 21 p0045 A79-12241

Performance prediction methods for horizontal axis wind turbines 21 p0045 A79-12244

Low-cost concept for energy supply from the wind 21 p0058 A79-13651

A small horizontal axis wind turbine feeding power into the utility grid 21 p0074 A79-14703

Wind energy conversion --- review discussing sites and machinery 21 p0091 A79-15870

The Campbell Chinese Type Windmill 21 p0142 A79-17510

Development of 1 kW vertical axis wind generator 21 p0142 A79-17511

An evaluation of the strategy of low cost horizontal axis windmills 21 p0143 A79-17517

The design and testing of a vertical-axis wind turbine using sails 21 p0153 A79-18467

An analytical expression for the specific output of wind turbine generators 22 p0273 A79-25720

Fluids engineering in advanced energy systems; Proceedings of the Winter Annual Meeting, San Francisco, Calif., December 10-15, 1978 22 p0278 A79-26176

The interaction of the wind field with a horizontal axis wind turbine 22 p0278 A79-26177

A two dimensional vortex sheet model of a Savonius Rotor 22 p0278 A79-26178

Vortex sheet analysis of the Giromill --- vertical axis wind turbine with straight blades 22 p0278 A79-26179

Wind power distribution, control, and conversion in vortex augmentors --- influence on turbomachinery design and development 22 p0278 A79-26180

Some flow analyses for Tornado-type wind turbines 22 p0279 A79-26181

Diffuser designs for improved wind energy conversion 22 p0279 A79-26182

Induction-generator/synchronous-condenser system for wind-turbine power 22 p0286 A79-27219

Wind energy --- Book 22 p0287 A79-27327

The application of hydraulics in the 2,000 kW wind turbine generator 22 p0288 A79-27400

Evaluation of MOSTAS computer code for predicting dynamic loads in two-bladed wind turbines [AIAA 79-0733] 22 p0298 A79-29007

A hybrid wind turbine suitable for developing regions 22 p0323 A79-31455

A vertical-axis bicycle rotor turbine. I - Rotor design. II - Aerodynamic aspects --- windmill 23 p0386 A79-33237

A practical technique for basic windmill design 23 p0387 A79-33238

WINDPOWERED GENERATORS

Design and operating experience on the U.S. Department of Energy Experimental Mod-0 100 kW Wind Turbine
21 p0028 A79-10234

DOE/NASA Mod-0A wind turbine performance
21 p0028 A79-10235

On-line control of a large horizontal axis wind energy conversion system and its performance in a turbulent wind environment
21 p0028 A79-10236

Experimental demonstration of the Diffuser Augmented Wind Turbine concept
21 p0029 A79-10238

Aeroelastic wind energy converter
21 p0047 A79-12275

Power extracted from the wind
21 p0058 A79-13650

Low-cost concept for energy supply from the wind
21 p0058 A79-13651

Optimum selection of a wind turbine generator system [AIAA PAPER 78-1774]
21 p0062 A79-13871

The brake system for the DOE/Sandia 17-meter vertical axis wind turbine
21 p0067 A79-14289

Design of a direct wind energy converter to heat water by agitation in a closed tank
21 p0067 A79-14290

A low cost blade design for a Darrieus-type vertical-axis wind turbine
21 p0067 A79-14291

Dynamic response of a wind turbine system and its effect on performance
21 p0067 A79-14293

Generalized wind characteristics and their effect on wind turbine output
21 p0068 A79-14294

Generic power performance estimates for wind turbines
21 p0068 A79-14295

Analysis of wind turbine generator rotor response to one-dimensional turbulence
21 p0077 A79-14768

Toroidal accelerator rotor platforms for wind energy conversion
21 p0077 A79-14770

Large filament wound structures for energy and transportation systems --- turbine blades for windpowered energy systems
21 p0086 A79-15507

Control of wind turbine generators connected to power systems
21 p0086 A79-15574

Operation and control of wind-electric systems
21 p0086 A79-15575

Large wind turbine generators --- NASA program status and potential costs
21 p0092 A79-15881

Utility applications of wind power plants
21 p0092 A79-15882

A proposed conceptual plan for integration of wind turbine generators with a hydroelectric system
21 p0098 A79-16107

On the use of eddy-current couplings in wind-driven synchronous machines
21 p0113 A79-16742

Controlling a wind generator for increased efficiency
21 p0113 A79-16743

Efficient use of wind energy by using static slip recovery systems - A simulator study
21 p0113 A79-16744

The Netherlands experimental vertical axis wind turbine
21 p0114 A79-17120

The Campbell Chinese Type Windmill
21 p0142 A79-17510

Development of 1 kW vertical axis wind generator
21 p0142 A79-17511

Wind generation of electricity for a novel dwelling independent of servicing networks
21 p0142 A79-17513

Field testing of 5-kW commercial wind generator with an automatic load-matching device for utilizing its output
21 p0143 A79-17515

Vertical axis wind turbine status
21 p0143 A79-17516
